Circus Circus-Reno turned in moderate growth in operating income, while the company's two Laughlin properties, on a combined basis, were down moderately in operating income. The Edgewater, for its part, is undergoing a major construction project - a 988-room tower slated to open next February.

For the six months, Circus reported earnings per share of $1.29 compared with $1.40 per share. Net income was $35,552,000 against $40,821,000. (Excluding the preopening expenses for Excalibur, net income in the six months would have been $42,929,000, and earnings per share $1.56). Average shares outstanding were 27.5 million versus 29.2 million. Revenues were $309,651,000 versus $267,185,000.

Circus Circus Enterprises Inc. operates seven properties in Nevada: Excalibur; the Circus Circus resorts in Las Vegas and Reno; the Colorado Belle and Edgewater in Laughlin; and Slots-A-Fun and Silver City in Las Vegas.

SEATTLE (AUG. 30) PR NEWSWIRE - Immunex Corp. (NASDAQ: IMNX) today announced that it has created and filled the position of vice president of communications to meet the increasing communications demands arising from the company's transition to a fully integrated pharmaceutical company. The new vice president, Jason Rubin, is former vice president and director of the biotechnology group at Hill and Knowlton Inc. in Washington, D.C.

"Jason brings with him a broad range of experience in managing media relations for leading biotechnology and pharmaceutical companies," said Alan Frazier, Immunex's executive vice president and chief financial officer. "His knowledge and abilities are just what we need to prepare for the media-related activities of the product launch of GM-CSF and other products currently under development."

Before his work at Hill and Knowlton, Rubin was a senior associate with Adams and Rinehart Inc., in New York, where he directed public and investor relations programs for several major biotechnology and computer companies. Rubin holds a master's degree in management from the Sloan School of Management at the Massachusetts Institute of Technology.

Valoree Dowell, Immunex's director of communications, will continue in her current position and will devote her time primarily to the increasing demands of investor relations.

Immunex is a leading biotechnology firm focused on the research, development, marketing and manufacture of immunological therapeutic products.

CONTACT: Valoree Dowell of Immunex Corp., 206-587-0430; or Joseph Jennings or Gregory Spector of Joseph Jennings Communications Inc., 415-349-8400, for Immunex.

SALT LAKE CITY (AUG. 30) PR NEWSWIRE - The board of directors of Sterling Medical Systems, Inc. (SMS)(NASDAQ: SSYS) has announced the first release of stock under an equity funding agreement with Sierra-Pacific Medical Technologies Corp.

Pursuant to the agreement negotiated between the two companies last March, Sierra-Pacific has committed to invest a minimum of $4 million dollars for the purchase of Sterling's common stock.

The infusion of equity funds will be utilized by Sterling at their

discretion to implement the first stage of its financial plan. The program calls for (1) inventory build-up of Sterling's enteral feeding product group; and (2) inventory purchase of a new non-invasive, muscle diagnostic product group.

The exclusive marketing rights to the new product group were acquired in February of this year, and subsequently assigned to Sterling under a separate agreement.

Based upon its own market research, Sierra-Pacific projects that over the next 18 months, the marketing rights to California alone will yield a profit to Sterling in excess of $10 million dollars.

More importantly, the sales of this diagnostic product group will provide immediate cash flow to Sterling while its enteral group inventory build-up is being completed. Details of this diagnostic product group will be released in future announcements.

In summary, the infusion of equity capital into Sterling Medical Systems, Inc. through the purchase of common stock by Sierra-Pacific Medical Technologies Corp. will enable SMS to commence the first stage of its financial plan.

CONTACT: Michael S. Eldredge, president of Sierra-Pacific Medical Technologies Corp. or Kip Eardley of Sterling Medical Systems, (801) 975-9700.

ATLANTA (AUG. 30) PR NEWSWIRE - U.S. Wheelchair Olympic hopeful Bert Burns, victim of a 1982 drunk driving crash, will represent the promise of thousands of Atlanta residents to "DRIVE FOR LIFE" this holiday weekend at a news conference hosted by Mothers Against Drunk Driving (MADD) and Volkswagen United States (VW/US) at Atlanta's Shepherd Spinal Center, Thursday, Aug. 30, at 10 a.m.

Burns, a therapeutic recreation specialist at the Spinal Center, together with Micky Sadoff, national president MADD, Atlanta Deputy Police Chief W.J. Taylor, and Rich Weidman, manager of the Southeast Zone for Volkswagen, will kick off DRIVE FOR LIFE 1990 by pledging to drive safe and sober Saturday, Sept. 1.

For the fourth year, Volkswagen and MADD have teamed up to sponsor DRIVE FOR LIFE, a national public-awareness campaign to reduce alcohol-related traffic crashes. They are asking Atlanta residents to pledge to drive safe and sober Labor Day weekend and to uphold that pledge throughout the year. Motorists also are asked to turn on their headlights while driving

on Sept. 1 in remembrance of the nearly 23,000 people needlessly killed and injured in drunk driving crashes each year.

At the news conference, officials from the city of Atlanta, MADD and VW/US will hear Deputy Chief Taylor read a proclamation from Atlanta Mayor Maynard Jackson declaring Sept. 1 DRIVE FOR LIFE day in the city. After reading the proclamation, dignitaries, Burns and guests will sign a large DRIVE FOR LIFE petition.

Burns, a graduate of the University of Florida, became a quadriplegic following a 1982 automobile crash in which a drunk driver ran a red light and hit Burns' car. In September 1982, after several months of rehabilitation, Burns began to compete in road races and track.

This summer, Burns competed and won his division in the wheelchair division of Atlanta's annual Peachtree Road Race, co-sponsored by Volkswagen's Southeast Zone and Shepherd Spinal Center. Volkswagen also sponsored Burns' participation in the Wheelchair Athletes World Championships in the Netherlands in July. Burns currently is training to compete in the 1990 Pan American games in Venezuela as a member of the United States Disabled Sports Team (USDST).

In the last four years, DRIVE FOR LIFE has achieved steadily increasing success. In 1989, alcohol-related traffic fatalities on DRIVE FOR LIFE Day were down 25.7 percent from the same day a year before.

Shepherd Spinal Center is located at 2020 Peachtree Rd., N.W., Atlanta.

NEW YORK (AUG. 30) PR NEWSWIRE - Sir Gordon White, chairman of Hanson Industries, the U.S. arm of Hanson PLC (NYSE: HAN), announced today that Newmont Mining Corporation (NYSE: NEM), which is 49 percent owned by Hanson, has filed a registration statement for the proposed public offering of 12 million shares of Newmont common stock and 6 million warrants to purchase an additional share of Newmont common stock.

Newmont proposes to offer 3.6 million shares, or 30 percent of the common stock included in the offering. A wholly owned subsidiary of Consolidated Gold Fields proposes to offer 8.4 million shares, or 70 percent, of the common stock included in the offering. All of the warrants to be offered will be issued by Newmont. The proposed transaction has been structured to enable Newmont to purchase from Consolidated, at the exercise price,

all of the common stock necessary for Newmont to satisfy its obligations upon exercise of the warrants.

Hanson acquired its stake in Newmont as part of its August 1989 acquisition of Consolidated Gold Fields. The proposed offering would reduce Hanson's stake from 49 percent to approximately 26 percent, assuming exercise of the warrants in full.

Sir Gordon stated "Hanson is pleased to be working with Newmont's management team in connection with this transaction. The offering will permit Newmont to raise additional capital and, at the same time, affords Consolidated Gold Fields the opportunity to monetize a portion of its investment while continuing to maintain a significant stake in Newmont."

The offering of the shares of Newmont common stock and the warrants will only be made by means of a prospectus under the Securities Act of 1933.

Hanson PLC is a British-American industrial management corporation. In the U.S., Hanson Industries' operations include SCM Chemicals, Peabody Holding Company, Jacuzzi Whirlpool Bath and Spa Products, Grove Crane, Ames Tools, Universal Gym, Endicott Johnson and Frye Footwear, Hanson Lighting Group, Kaiser Cement, Weber Aircraft, Farberware Cookware, and Gold Fields Mining among others.

In the United Kingdom, Hanson's holdings include Imperial Tobacco, Ever Ready Batteries, ARC Aggregates, London Brick, Butterly Brick, and Smith Meters.

CONTACT: Karen Levy of Hanson Industries, 011-4471-245-1245 or after Monday, Sept. 3: 212-826-0098.

#90242p0036 08/30/1990 ~PR Newswire

HIGHLAND PARK, MICH. (AUG. 30) PR NEWSWIRE - Chrysler Corporation (NYSE: C) today reported that its vehicle sales outside of North America for the first seven months of 1990 have topped 35,000 units, an increase of 20 percent over the 29,000 units sold in the same period in 1989.

In Taiwan, Chrysler sold more vehicles in the January-July period than in the entire 1989 calendar year. The total sales of 5,237 for the first seven months exceeded the 1,725 vehicles sold in the comparable 1989 by 204 percent and surpassed the 4,109 units sold during all of 1989.

In Europe, sales continue to top year-ago numbers, with sales in the first seven months of 1990 up 13.5 percent -- 26,811 vs. 23,710 in 1989. Chrysler sells vehicles through a network of more than 800 dealers in 12 western and southern European countries.

"We have recently begun selling our products in Spain, which will have a positive impact on our performance in Europe," said Patrick R. Smorra, General Manager - International Sales and Marketing. "We see our 1990 European sales surpassing the 39,000 we sold in 1989 based on the acceptance of Chrysler products."

The Jeep Cherokee and Voyager minivan are Chrysler's best sellers outside of North America with international sales of nearly 12,100 and 7,800 respectively. The Jeep Wrangler, with more than 3,200 sales in the first seven months of 1990, is No. 3, followed by the Chrysler LeBaron coupe and convertible models with 1990 sales of more than 2,500.

Cherokee and Voyager also are Chrysler's top-selling European models. Through July of this year, 10,816 Cherokees and 7,672 Voyagers have been sold, accounting for nearly 70 percent of Chrysler's total sales in Europe.

"We continue to work on sales in Japan and our 1990 sales, though still modest, have increased 83 percent over 1989's seven-month sales," Smorra said. "With this fall's addition of the Honda Primo dealers to our dealer network in Japan, we are looking to boost sales of our popular Jeep lineup and build on our commitment to the Japanese market."

SAN ANTONIO, TX (AUG. 30) PR NEWSWIRE - The Exploration Company (NASDAQ: TXCO) today announced that it has successfully negotiated a major investment in the company by its largest shareholder, Spectrum Resources, Inc. (SRI). TXCO will acquire over 30,000 acres of oil and gas leases in the prolific Austin Chalk trend in Zavala and Maverick counties of Texas

and $500,000 cash in exchange for 20,205,051 shares of TXCO common stock.

With the transfer of SRI's basis in the acreage and the private placement, TXCO's assets will increase by approximately $2,250,000.

TXCO is currently drilling the La Paloma No. 2-51 under a joint venture agreement with a New York Stock Exchange oil and gas company on its 50,000 acre La Paloma lease in Maverick county, Texas. The La Paloma No. 1-112 has been drilled horizontally approximately 1,500 feet in the Pearsall formation and is currently being completed.

With the additional acreage and cash, TXCO feels it is in an excellent position to take advantage of the horizontal drilling technology now occurring in the oil and gas industry.

TXCO will continue to acquire other prospects to utilize management's experience with horizontal drilling and to enhance its position during a time of growing concern for increased domestic oil and gas exploration and production.

#90242p0044 08/30/1990 ~PR Newswire

ST. PAUL, MN (AUG. 30) PR NEWSWIRE - The Misti Gold Bio-Oncotic(TM) Gel-Filled Breast Prosthesis, developed by Bioplasty, Inc. (NASDAQ: BIOP) of St. Paul, Minn., ushers in a new generation of biomaterials technology.

Utilizing the proven Misti surface-patterned mammary prosthesis shell, and a revolutionary new filler material - Bio-Oncotic Gel - the Misti Gold Implant is created to eliminate most problems associated with traditional silicone mammary implants.

Silicone gel and saline-filled breast implants have been found to block x-rays. Thus, early tissue changes indicating the presence of cancers may be missed on mammograms.

To resolve this problem, Bioplasty, Inc. has developed Bio-Oncotic Gel. This new gold-colored implant filler has been found to be more transparent to x-rays than either silicone gel or saline solution, and it is comparable to natural breast tissue when seen on x-rays.

The consistency of a Bio-Oncotic Gel-Filled Implant is similar to natural breast tissue when placed in the body. The gel has superior lubricating qualities. For this reason, shell rupture associated with saline-filled implants is expected to be rare.

In the event an implant containing Bio-Oncotic Gel should rupture, this biocompatible filler material is quickly eliminated from the body through the kidneys within a few days.

Each year, over 150,000 women choose to surgically augment their breast size. A multicenter study reported in the September issue of "Contempary Surgery," states that use of Misti surface-patterned implants effects a significant reduction in capsular contracture (hard breasts).

Using old style smooth-surfaced implants, contractures occurred in approximately 25 percent of cases during the first postoperative year. With Misti surface-patterned prostheses, contractures appeared in fewer than two percent of patients for the same period.

Studies show that the unique Misti surface encourages development of a thinner scar capsule, resulting in a softer, more natural-looking augmentation.

The Misti Gold Mammary Implant, containing Bio-Oncotic Gel, is commercially available in Western Europe, but has not yet been cleared for market in the United States.

#90242p0047 08/30/1990 ~PR Newswire

NEW YORK (AUG. 30) PR NEWSWIRE - John Wiley & Sons, Inc. (NASDAQ-NMS: WILL), publishers, announced today that net income for the fiscal 1991 first quarter ended July 31, 1990, increased 17 percent to $2.1 million, or 48 cents per share, compared with $1.8 million, or 41 cents per share, for the prior year's first quarter.

Revenues for the first quarter of fiscal 1991 increased 3 percent to $75.4 million compared with $73.4 million for the first quarter of the prior year.

Revenue and earnings increases were largely attributable to the company's scientific, technical and medical publishing sector, paced by increased journal subscription revenues including an additional month of operations in fiscal 1991's first quarter related to the Wiley-Liss division, which was acquired in June 1989. The professional and trade publishing sector continued to experience strong revenue and operating income gains resulting from expanded trade and subscription-based programs.

These gains were offset by the loss of operating contribution associated

with the occupational and nursing publishing lines sold during the second quarter of fiscal 1990, as well as a decreased contribution from the company's educational publishing sector. The training sector's operating loss was reduced compared with the prior year's first quarter.

Also contributing to the improvement in earnings was an increase in interest income due to higher cash balances related to the proceeds received on the businesses sold in fiscal 1990, offset somewhat by higher interest expense due to the additional month of Liss acquisition financing costs in fiscal 1991.

Founded in New York in 1807, John Wiley & Sons is an independent, global publishing company that specializes in scientific and technical books and journals, professional and trade books and subscription services, and educational textbooks and other materials for colleges and universities. Its Wilson Learning training group provides information, services and multi-media instruction to business, commerce and industry worldwide.

JAMESTOWN, N.Y. (AUG. 30) PR NEWSWIRE - Frank T. Costanzo, chief executive officer of Electronic Technology Group, Inc. (NASDAQ: ETEK; BSE: ETE) today announced the consummation of ETEK's previously announced acquisition of Advanced Printed Circuit Technology II, Inc. (ACT II) of Tempe, Ariz. for $4.5 million.

Curt B. Westrom, ETEK's chief financial officer stated that ACT II's sales through July 31, 1990 were expected to approximate $11 million. Westrom further stated that after giving effect to its acquisition of ACT II, ETEK's consolidated operating revenues for its fiscal year ending July 31, 1991 would approximate $21 million. This would be a three-fold increase over the approximate $7 million for its fiscal year ended July 31, 1990.

Westrom indicated that, in the absence of any significant recessionary impact upon the electronics industry and assuming no further acquisitions by ETEK during its current fiscal year, ETEK anticipated earnings of approximately $.70 per share for its current fiscal year, including approximately $.38 per share to be derived as a consequence of its acquisition of ACT II.

FAIRFAX, VA (AUG. 30) PR NEWSWIRE - Mobil Exploration Somalia Inc., an affiliate of Mobil Corporation (NYSE: MOB), announced today it has signed a joint venture agreement with Pecten Somalia Company, a subsidiary of Shell U.S.A., to explore a 14.9-million-acre block offshore Somalia. The concession area, originally awarded to Pecten in 1988, extends for 1,200 kilometers along the Somali Indian Ocean coast.

Pecten, as operator, has already conducted extensive seismic evaluation of the block. The partners will equally share the exploration risk and any resulting production for the duration of the concession. They expect to spud the first wildcat well in early 1991.

"If we are successful, the discovery of commercial petroleum would strengthen Somalia's economy and thus reduce or eliminate its dependency on imported energy," said J. Robert Gaca, president of Mobil New Exploration Ventures. "While there are no guarantees that exploration will discover large reserves, we consider this block holds promise as a highly prospective oil and gas area."

VALLEY FORGE, PA. (AUG. 30) PR NEWSWIRE - UGI Corp. (NYSE: UGI) announced today that it will join in the national gas industry's 10-year commitment to improve the quality of education in the United States and support the education goals of the Bush administration and the National Governors Association.

James A. Sutton, chairman and chief executive officer, also announced that UGI and its AmeriGas subsidiary are structuring their future contributions programs to focus a major portion of these resources on education.

Sutton noted that the company's programs "will emphasize commitments in communities where our utility and propane units operate and where our support can have an impact on the quality of education."

UGI's gas and electric utilities operate in 15 central, eastern and

southeastern Pennsylvania counties. AmeriGas, the nation's third largest propane distributor, operates in 36 states.

"UGI is pleased to support the American Gas Association's (A.G.A.) 'Education 2000' initiative which was announced today in Washington," Sutton said. A.G.A's program will build on existing industry activities and promote new local and state efforts to further educational improvement. A.G.A. will also represent the industry nationally in partnership arrangements with government, business, educational and other organizations, he said.

A.G.A., headquartered in Arlington, Va., is a national trade association composed of 250 natural gas distribution and transmission companies.

HARRISON, NJ (AUG. 30) PR NEWSWIRE - Lechters, Inc. (NASDAQ-NMS: LECH) announced today that net income for the twenty-six week period ended July 28, 1990 was $687,000 as compared with net income of $356,000 for the prior year's comparable period, a 93 percent increase.

Net income per share for this period was $0.09 as compared with $0.06 for such period during the prior year. Sales for said twenty-six week period were $69,783,000, as compared with sales of $57,807,000 for the prior year's comparable period, an increase of 21 percent.

For the thirteen week period ended July 28, 1990, the company's net income was $394,000, as compared with net income of $204,000 in the prior year's comparable period, a 93 percent increase. Net income per share for this period was $0.05 as compared with $0.03 for such period during the prior year.

Sales for said thirteen week period were $36,616,000, as compared with sales of $30,736,000 for the prior year's comparable period, an increase of 19 percent. On July 28, 1990 the company operated 326 stores, 49 more than a year earlier.

LECHTERS, INC. REPORTS (UNAUDITED)

26 Weeks ended	7/28/90	7/29/89
Sales	$69,783,000	$57,807,000
Gross profit (net of occupancy & indirect costs)	21,634,000	17,946,000
Selling, general & administration expenses	19,737,000	15,890,000
Interest expense	753,000	1,457,000

Income before income tax provision	1,144,000	599,000
Income tax provision	457,000	243,000
Net income	687,000	356,000
Per share earnings	$0.09	$0.06
Weighted average shares outstanding	7,252,886	6,164,267

13 Weeks ended	7/28/90	7/29/89
Sales	$36,616,000	$30,736,000
Gross profit (net of occupancy & indirect costs)	11,342,000	9,539,000
Selling, general & administration expenses	10,217,000	8,416,000
Interest expense	469,000	779,000
Income before income tax provision	656,000	344,000
Income tax provision	262,000	140,000
Net income	394,000	204,000
Per share earnings	$0.05	$0.03
Weighted average shares outstanding	7,269,374	6,226,861

In addition, the company reported sales of $14.5 million for the four-week period ended Aug. 25, 1990, which rr?esents and increase of 18 percent over sales of $12.3 million for the comparable period in 1989. The company's comparable stores sales decreased 1.2 percent during this period as compared with such period during the prior year.

Sales of $84.3 million for the thirty weeks ended Aug. 25, 1990 represent an increase of 20 percent over sales of $70.1 million for the comparable period in 1989. Year-to-date through Aug. 25, 1990, the company's comparable store sales were up 0.7 percent.

Lechters, Inc., based in Harrison, N.J., operates 339 specialty houseware stores in thirty-two states as compared with 280 stores on Aug. 26, 1989, an increase of 21 percent.

During the balance of this year the company plans to open 29 stores and close one store, and expects to have 367 stores in operation by the end of its fiscal year in January 1991, as compared with 297 stores in operation at the end of its fiscal year in January 1990. This represents a net increase of 70 stores (75 stores opened and five stores closed).

The company continues implementation of Point-of-Sale registers and anticipates that all stores will be converted to P.O.S. by Nov. 15, 1990. This represents a six month acceleration in converting to P.O.S. over the company's original plan.

BURLINGTON, N.C. (AUG. 30) PR NEWSWIRE - Environmental Diagnostics, Inc. (NASDAQ: EDIT) announced today that it has been awarded a research and development contract from the United States Department of Defense to develop specialized diagnostic tests for the U.S. Military.

Pursuant to the Phase I fixed-price contract totalling $46,000, the Company will develop specialized diagnostic tests to detect certain substances using its patented QUIK-CARD technology incorporated in the EZ-SCREEN Test System.

James D. Skinner, EDI President and Chief Executive, said, "The need for rapid diagnostic tests in military applications provides a vast opportunity for the EDI QUIK-CARD technology. Because the Company's testing system is completely portable and may be adapted to a wide range of testing requirements, it is ideal for military field applications. If the Phase I research and development program is successfully completed, we anticipate that this project may lead to production of commercial quantities of the new tests for the military."

Mr. Skinner added: "Our Company's strategy is to expand its products to solve the testing needs of various markets using its very well patented and proprietary technology. This Phase I contract will provide EDI with the opportunity to address a totally new market that has exciting potential."

Environmental Diagnostics, Inc. develops and manufactures human clinical and agricultural diagnostics specifically designed for on-site testing by non-technical personnel. The Company's EZ-SCREEN products provide the accuracy of laboratory results in minutes.

BETHESDA, MD (AUG. 30) PR NEWSWIRE - Martin Marietta Corporation (NYSE: ML) has been awarded $11 million in advance funding by General Electric Company (NYSE: GE) to begin work as the dual manufacturing source for sophisticated electronic diagnostic equipment for the U.S. Navy.

Martin Marietta and GE both will produce the Consolidated Automated Support Systems, or CASS, a self-contained diagnostic unit designed to test operational Navy electronic and avionic systems for optimum efficiency and reliability.

GE Automated Systems is CASS prime contractor and recently received Navy funding totaling $35.9 million, which it shared with Martin Marietta under the program's procurement guidelines.

Martin Marietta Technical Services, Inc., a wholly owned subsidiary of Martin Marietta Corporation, was selected by GE in 1988 as the CASS second-source supplier and will manufacture the system at a new Americus, Ga., facility.

As a result of the GE funding, construction of the Americus facility will begin shortly and is scheduled for completion in seven months. CASS production at Americus will begin in 1991.

GE's full-scale engineering contract with the Navy includes three annual production options for a total of 327 CASS test sets. Martin Marietta expects to receive contracts valued at $175 million to produce 40 percent of the test sets.

Martin Marietta and GE will compete for CASS production beginning with the fourth option in 1993 and the Navy has indicated it plans to buy more than 775 test sets.

OAK BROOK, IL (AUG. 30) PR NEWSWIRE - The L.E. Myers Co. Group (NYSE: MYR) announced today that a judgment was entered on Aug. 28, 1990 in the Owensboro Municipal Utilities Commission (OMU) vs. LEMCO Engineers (LEMCO) and Lehigh Structural Steel Co. (Lehigh) lawsuit in Daviess Circuit Court, Kentucky.

The case arose out of a collapse in 1984 of transmission towers designed by LEMCO, a former subsidiary of Myers. The judgment awarded damages in favor of OMU of approximately $1,646,000 of which approximately $202,000 were assessed against Lehigh individually, $80,000 were assessed against LEMCO individually, and $1,364,000 were assessed jointly and severally against LEMCO and Lehigh.

Myers retained all of the rights and liabilities associated with this lawsuit, as well as a related lawsuit in U.S. District Court in New York regarding insurance coverage of LEMCO for its liability associated with the collapse of the towers, when it sold LEMCO in 1988. The federal court case has been stayed pending the outcome of the Kentucky case.

Myers is currently reviewing its options, including appealing the court's

decision, with its counsel. Myers and its counsel continue to be of the opinion that the outcome of these two related matters will not have a material effect on the company.

Myers specializes in overhead and underground outdoor electrical construction. This includes construction and maintenance of transmission lines, distribution systems, substations, outdoor lighting and signal control systems for public investor owned electric utilities, heavy industry, and government facilities.

LAWRENCEVILLE, N.J. (AUG. 30) PR NEWSWIRE - In an action aimed at assuring the timely completion of its drive for full business integration and maximum operating efficiency, First Fidelity Bancorporation (NYSE: FFB) has entered into an agreement with EDS (NYSE: GME) under which EDS will integrate and manage First Fidelity's data center operations, it was announced today.

Under the terms of the 10-year contract, EDS will also, within the next 18 months, convert the multibank holding company's numerous application systems into a unified companywide platform that will support common products across bank unit lines.

Additional elements of the agreement are: -- EDS will consolidate First Fidelity's data center operations at a single site and will manage that facility.

-- First Fidelity will continue to directly manage and control its application systems maintenance and development resources.

-- EDS will offer employment to all First Fidelity data center operations and technical staff.

Tony Terracciano, First Fidelity chairman and chief executive officer, said: "We have set an ambitious timetable in which to achieve total integration and consolidation of all of the company's product and service lines. Obviously that requires converting to common systems. EDS' extensive experience in managing data processing conversions and the availability of its very large pool of talented and seasoned computer and systems professionals to supplement our own excellent staff resources provide us a critical edge in achieving that objective in far less time than would have been possible by ourselves. EDS' experience in conversions of this type also will minimize the inherent risks of such a consolidation and conversion process."

First Fidelity said the computer application conversion and site consolidation project was part of a larger program in which, over the same 18-month period, the banking company will rationalize and consolidate all support and processing operations along service or product lines, eliminating historic bank unit geographic redundancies.

EDS, which is based in Dallas and has operations in 27 countries, is the leader in providing information technology services to customers around the world. EDS reported revenues of $5.5 billion in 1989.

First Fidelity Bancorporation, with $29.8 billion in assets and 500 offices in New Jersey and eastern Pennsylvania, is among the 25 largest banking companies in the nation.

RESTON, VA. (AUG. 30) PR NEWSWIRE - In support of American servicemen and servicewomen called to duty during the current Mideast crisis, Freddie Mac (NYSE: FRE) will assist its customers -- America's mortgage lenders -- in complying with The Soldiers' and Sailors' Civil Relief Act of 1940.

"The Act is designed primarily to help GIs when their ability to meet debt obligations, such as mortgage payments, is impaired due to military service, by lowering their home mortgage rate to 6 percent during the period of active duty. Freddie Mac will absorb the difference between the Act's 6 percent and the borrower's current mortgage interest rate," said Henry Cassidy, senior vice president of credit policy.

Freddie Mac purchases mortgages from financial institutions and remits principal and interest to investors of securities backed by those mortgages.

Cassidy assured investors that Freddie Mac will fulfill all commitments on its securities outstanding, maintaining the inclusion of those affected mortgages in their respective security pools and continuing to pay them in full at the security rate. "We have agreed to make good on the difference between the 6 percent interest rate payments from affected military personnel and the amount investors will be paid. We have a unique opportunity to show our commitment to investors by honoring all guarantees of passthrough of principal and interest while supporting servicemen and women who are called to serve their country," he said.

The Act is expected to mainly impact reservists who have been called up for active duty and who have mortgages originated prior to active duty.

The difference between the mortgage interest rate and the 6 percent allowed by the Act is totally forgiven, not deferred, during the eligible period. The borrower must still pay all escrow fees, including taxes and insurance. Freddie Mac will also consider providing GIs additional relief on a case-by-case basis, such as specially tailored repayment plans that go beyond the interest reduction provisions.

"We intend to fully support servicemen and servicewomen by providing mortgage relief as soon as possible and if necessary, accommodating special circumstances of affected GIs," said Cassidy.

Further administrative details will be forthcoming to the corporation's Sellers and Services within the next week.

Freddie Mac is a stockholder-owned corporation chartered by Congress in 1970 to create a continuous flow of funds to mortgage lenders in support of home ownership and rental housing. By linking the capital markets with the mortgage markets, Freddie Mac brings the efficiencies and lower costs of the secondary mortgage market to the lender, the investor and the homebuyer. Over the years, Freddie Mac has helped finance one in eight American homes, including more than 700,000 apartment units.

#90242p0064 08/30/1990 ~PR Newswire

WASHINGTON (AUG. 30) PR NEWSWIRE - The Federal National Mortgage Association (Fannie Mae) (NYSE: FNM) today announced that under the provisions of the Soldiers' and Sailors' Civil Relief Act, the company will absorb forgiven interest income on mortgages it holds or guarantees for reservists called to duty in the Persian Gulf crisis.

Under that act, active reservists can have their mortgage interest rates reduced to 6 percent during their tour of duty. The difference between the reduced interest rate and the actual mortgage interest rate is forgiven and cannot be collected.

Fannie Mae's mortgage servicers and holders of mortgage-backed securities will not incur losses related to the interest rate reduction mandated by the Relief Act.

The company is distributing to its customers guidelines and additional information regarding streamlined procedures to make it easier to get forbearance relief under the act, as well as under Fannie Mae's normal servicing standards. The guidelines also state that Fannie Mae's normal forbearance plans are available to others affected by the Persian Gulf crisis.

Timothy Howard, Fannie Mae's executive vice president and chief financial officer, said the company could not estimate the effect on earnings of the relief provisions until the number of reservists to whom the act applies was determined, as well as the duration of their active service. He noted however, that any such effects were not expected to be material.

Fannie Mae, the USA's Housing Partner, is a congressionally chartered, shareholder-owned company and the nation's largest investor in home mortgages.

NEW YORK (AUG. 30) PR NEWSWIRE - Kinney Shoe Corporation took a giant step toward becoming a dominant force in the fast-growing insole market this week with the introduction of its Pro Care Insoles line.

The new insoles are made of Impac Plus, a revolutionary open-cell material with extraordinary cushioning power. The material is being supplied to Kinney's by Impac Plus Corporation of Durham, NC under a long-term agreement.

Kinney's new insole products are made for women's high heels, as well as dress, casual and work shoes. Kinney will also market a special line of Pro Care heel pads.

Pro Care Insoles will be available in 600 Kinney stores on September 1, with full penetration of the all 1,462 Kinney stores by October 15, Sills said.

The women's high heel insole market is a natural fit for Kinney's marketing muscle and Impac Plus's material, said Kinney marketing director Geoffrey Sills.

"With this new insole, you get the feel and comfort of an athletic shoe with the fashion style of heels," he said. "It's an ideal marriage of form and function."

Worldwide sales of insole products topped $100 million in 1989, a 25 percent increase over 1988, industry analysts report. 1990 sales are expected to grow to over $150 million.

ST. LOUIS (AUG. 30) PR NEWSWIRE - The newly elected board of directors of Comprehensive Care Corporation (NYSE: CMP) met on Monday, Aug. 27, and elected James Carmany as president and chief executive officer of the company, it was announced today.

Carmany, who was an executive vice president of the company until April 1989, was also elected a director. W. James Nicol, the former president, will continue to serve the company as a director. The board also elected Donald G. Simpson, also a former officer of the company, executive vice president and chief operating officer.

The new board was elected Aug. 20 after a prolonged contest between the former management and a dissident group of stockholders and all of the directors, except Nicol, are new to the board. Norman L. Perry, the new chairman, praised Livingston Securities, Inc., financial advisor to the dissident group, for its counsel and assistance in the contest to oust the

former directors and elect the new board. Perry also expressed his appreciation for stockholder support of the new group and stated that Carmany is approaching the coming opportunities and challenges with a high level of enthusiasm in keeping with the new group's plans to rejuvenate the company.

Comprehensive Care Corporation, based in St. Louis, is a national provider of chemical dependency treatments, as well as physical rehabilitation programs through its wholly owned subsidiary, RehabCare Corporation.

WORCESTER, MASS. (AUG. 30) PR NEWSWIRE - Researchers at Alpha-Beta Technology, in collaboration with scientists at the University of Lowell, Mass., today presented striking initial preclinical results on the use of Fibercel(tm), a yeast-derived beta-glucan fiber, to lower cholesterol levels. Alpha-Beta is developing two products based on Fibercel: a cholesterol-lowering drug to reduce the risk of cardiovascular disease, and a food ingredient that could be used as a fat substitute. The study results were presented at the American Chemical Society National Meeting in Washington, D.C.

In one study, hamsters fed 5 percent Fibercel with a high fat diet had a significant 42 percent reduction in total cholesterol and a 69 percent reduction in low density lipoprotein (LDL) cholesterol, the form linked directly to risk of heart disease. At the same time, the amount of beneficial high density lipoprotein (HDL) cholesterol in those animals increased by 16 percent.

In contrast, animals fed 5 percent oat bran in addition to a high fat diet had 19 and 29 percent reductions in total cholesterol and LDL cholesterol, respectively. The addition of wheat bran to the diet had essentially no effect on cholesterol.

In the treatment period, none of the fibers replaced dietary saturated fat so that cholesterol-lowering effects could not be attributable to a reduction in fat intake. One group of hamsters that received no added fiber served as a control.

"These studies highlight the superior cholesterol-lowering properties of Fibercel(tm)," said Spiros Jamas, Sc.D., president and chairman of Alpha-Beta. "We believe this novel product shows great promise as a cholesterol-lowering drug that combines the safety of a dietary fiber with the effectiveness of potent systemic drugs now available.

In addition, Fibercel is more palatable and easier to formulate than existing fibers and cholesterol-lowering resins such as oat bran, psyllium and cholestyramine."

Alpha-Beta Technology, Inc. is developing patentable carbohydrate- based products for the health care industry through the application of carbohydrate engineering. The company's major products in development include Fibercel, a cholesterol-lowering agent and fat substitute, Betafectin(tm) for the treatment of hospital infections, and Adjuvax(tm), a novel vaccine adjuvant and delivery vehicle. Alpha- Beta's headquarters, laboratory and pilot production facilities are located in Worcester, Mass.

NEWARK, NJ (AUG. 30) PR NEWSWIRE - Mutual Benefit Life, the nation's 18th largest life insurance company, announced today that it would waive premiums needed to keep existing life insurance in force for individual policyowner who are United States military reservists called to active duty.

The waiver of up to two policy years or until deactivation would affect all policyowner reservists whose policies were in force prior to Aug. 1, 1990. The company also said its individual life insurance policies issued since the Vietnam era do not contain a war exclusion clause which voids coverage if a loss of life is war-related.

Responding to the call-up following Iraq's invasion of Kuwait and the establishment of a U.S. force in Saudi Arabia, Henry E. Kates, president and chief executive officer, said "While we are not certain of the number of policyowners who qualify for this waiver, we know that being able to meet financial obligations while on active duty may be a concern for some reservists. It's certainly in keeping with Mutual Benefit's traditions to extend this waiver to any affected policyowner who has that concern."

Mutual Benefit Life, founded in 1845, is represented by the symbol of the pelican. The pelican logo, modeled after the family crest of the company's first president, represents self-sacrifice and caring for others.

The company said that, with some exceptions, it will be paying employees called to active duty the difference between military pay and their regular salaries for up to one year or until deactivation, whichever comes first.

Mutual Benefit Life is based in Newark, N.J., with offices in Kansas City, Mo. and Providence, R.I. The company is rated A+ by A.M. Best Company and holds a AA+ rating from Standard & Poor's.

With over $12 billion in assets, the Mutual Benefit Companies offer a full line of financial products and services to individuals, affiliated groups and businesses, ranging from individual life insurance and tax-advantaged investment opportunities to corporate pension plans, group life and health coverage, and asset management services.

TAMPA, FLA. (AUG. 30) PR NEWSWIRE - At a forum on business-education cooperation today at NCNB National Bank in Tampa, Fla., school districts were invited to compete in two unique programs designed to improve education.

Dr. Alton Crews of the Southern Regional Education Board and R. Eugene Taylor, president of NCNB Florida, announced the application process for two new NCNB/SREB programs -- the Leadership Academy and the $75,000 A-Plus Excellence in Education Awards.

The Leadership Academy, directed by Dr. Crews, will provide an intensive training program for school management teams from across the South. All school districts in the SREB's 15-state region have been invited to submit proposals for participation in the Leadership Academy.

Selected school districts will receive an A-Plus Excellence in Education Award from NCNB to help them meet the goals included in their proposal.

The forum discussions focused on the challenges facing public schools today and how business and education can cooperate to produce a well-prepared work force for the 1990s and the next century.

"For every local school district, state agency, professional group and business represented here, there is a different dream for education in Florida and across the South," Taylor told the audience.

"The strategies to achieve those dreams may differ. But one thing is certain. Given the magnitude of our challenge, success will require all of our collective efforts and abilities."

Leading the discussion, which was open to audience participation, was a panel made up of:

Florida Education Commissioner Betty Castor; State Sen. Bob Johnson; State Rep. Michael Friedman; Dorothy Ridings, publisher and president of the Bradenton Herald; Bob Alligood, vice chairman of the Council of 100; Dr. Crews and Taylor.

#90242p0086 08/30/1990 ~PR Newswire

BERKELEY HEIGHTS, NJ (AUG. 30) PR NEWSWIRE - Customedix Corporation (AMEX: CUS), a dental and medical products company, has announced fourth quarter and year end results for its 1990 fiscal year, Revenues for the fourth quarter were $12,705,200, down from last year's record fourth quarter of $13,465,100. This decrease was primarily attributable to a reduction in export sales.

The company reported a loss from continuing operations, before unusual items and taxes of $681,700 for the fourth quarter of 1990 versus a profit of $571,700 in the prior year's fourth quarter. The 1990 quarter included $420,000 in nonrecurring charges. These charges included a goodwill writedown, a settlement on a liability of a former subsidiary, a pension plan termination and relocation expenses. In addition to these nonrecurring charges, there was a $170,000 increase in the 1990 quarter in amortization due to management's revaluation of the estimated expected life of a subsidiary's royalty income stream,

A net loss of $2,726,800, or 8 cents per share, was recorded for the quarter versus net income of $430,800 or 1 cent per share for last year's fourth quarter. In addition to the nonrecurring items included in continuing operations mentioned above, the net loss for the quarter is due primarily to the following nonrecurring unusual items: (1) a provision for losses on notes receivable of $1,542,400; and (2) the loss on the sale of the net assets of the company's former subsidiary, Sales and Marketing Services, Inc. of $540,100. These items had no negative effect on the company's cash flow.

For the fiscal year, total revenues increased to a record $52,099,400 from last year's $51,913,800. The company recorded a net loss for the fiscal year ended June 30, 1990 of $1,917,200, or 6 cents per share, which is entirely attributable to the aforementioned fourth quarter writedowns and adjustments. Continuing operations were profitable in 1990. "Because no new significant unusual writedowns or adjustments are currently anticipated, the company should return to profitability in fiscal 1991 if

no major adverse changes in the economy occur," said Dr. Gordon Cohen, chairman and chief executive officer.

For fiscal year 1990, the company's long term debt was reduced to $12,170,000 from 1989's $14,078,200. Current maturities of long term debt also were reduced to $948,000 in 1990 from $1,119,200 in 1989. Over the course of the year, bank debt was reduced by approximately $682,000 and prepayment of $551,650 was made on the company's senior subordinated debentures due 1990 and $100,000 of its 15 percent convertible subordinated debentures due 1997. Additionally, $167,000 of notes issued in connection with the acquisition of Jeneric Industries, Inc. (now Jeneric/Pentron, Inc.) were repaid and the company made all its regular payments on obligations associated with equipment and leases.

The company's focus on improving cash flow and strengthening the balance sheet is reflected by an increase in the company's current ratio from 2.46 to 3.33 at June 30, 1989 and 1990, respectively.

For fiscal year 1991, Customedix anticipates the introduction of several major products by its largest subsidiary, Jeneric/Pentron, Inc. The successful introduction of these new products together with efforts to increase sales of existing products and efficiency in both the medical and dental subsidiaries will be a primary focus of management. Through these efforts, management plans to continue its policy of increasing profitability and cash flow while reducing debt.

CONTACT: Gordon S. Cohen, chairman and chief executive officer, or Barry Kosowski, assistant treasurer, 203-265-7397, or Andrew A. Miller, chief financial officer, 201-464-2214, all of Customedix

BOULDER, CO (AUG. 30) PR NEWSWIRE - NBI Inc. (NYSE: NBI) announced today that it is now shipping Legacy, its comprehensive word processing, page layout and graphics package designed exclusively for Microsoft(R) Windows 3.0.

Legacy is designed for users who need to create professional quality documents containing text, graphics and data. Compared with other advanced word processors, Legacy makes it easier and faster to produce these documents because of its depth of desktop publishing functionality, ease of use and reliable underlying architecture.

"Legacy has undergone extensive beta testing and has been well received by the corporations who have participated in this program," stated Stephen Jerritts, president and CEO of NBI. "We are confident that the product offers a powerful word processing solution and significant value to the

word processing user."

Besides fulfilling every standard WYSIWYG word processing requirement, Legacy provides some of the strongest page layout and typographical capabilities in the word processing market. Users benefit with the ability to create high-impact documents quickly and easily. In addition, Legacy's interactive on-line tutorials and intuitive user interface help the user learn the product quickly.

In conjunction with this release, NBI is also announcing two new products to provide upgrade paths to its wide base of system customers. LEO(TM) is a PC software package that allows users to easily convert NBI OASys word processing files to Legacy and use the OASys server to store the converted files. A second product, the OASys Archive Assistant, provides document management in the form of offline archiving and retrieval.

Legacy is available through authorized NBI dealers or direct from NBI at a suggested retail price of $495. It requires Microsoft Windows 3.0 and MS-DOS 3.2 or higher; an IBM AT or compatible (80286 or 80386 CPU) or IBM PS/2; 640K RAM (2 MB recommended); EGA, VGA or other Windows-compatible display; and a Windows-compatible mouse. For more information, users can call 800-NBI-1111.

Based in Boulder, NBI designs and markets advanced word processing software packages. A leader in the word processing industry for more than a decade, NBI also provides customer service and support to a wide base of system users in domestic and international locations.

ST. LOUIS (AUG. 30) PR NEWSWIRE - The directors of Jones Medical Industries, Inc. (NASDAQ: JMED) today announced a 25-percent increase in the company's regular quarterly dividend to $.025 per share beginning with the next dividend, payable Oct. 5, 1990, to shareholders of record Sept. 26, 1990.

Jones Medical has paid seven consecutive dividends of $.02 per share since beginning its dividend program in the fourth quarter of 1988.

Chairman and Chief Executive Officer Dennis M. Jones stated, "In view of the company's 84-percent increase in net income for the trailing 12 months ended June 30, 1990, the board members felt it was an appropriate time to increase the dividend. Net income during the period rose to $2.13 million from $1.16 million as our sales force increased its penetration

into the hospital market."

DETROIT (AUG. 30) PR NEWSWIRE - Visiting Nurse Services Corporation, a subsidiary of Visiting Nurse Association of Southeast Michigan, has opened a new proprietary business called Case Management Specialists.

Based in Southfield, Mich., Case Management Specialists expects to help insurance companies improve quality while reducing costs associated with clients who have complex health-care needs.

"A person with cancer, for example, may be under the care of several different physicians," said Patricia Kupiec, director of Case Management Specialists. "Case management facilitates the communication process between everyone involved -- the patient, doctors, insurance company and other health-care providers.

"If the patient needs a blood test, case management assures that the results are sent to all the physicians involved without duplication of the test or billing," she said.

Case managers, who are registered nurses, meet face to face to assess the clients' condition and coordinate treatment plans.

People who will benefit from this new service include patients suffering from severe burns, spinal cord injuries, transplants, and other high-risk disorders.

Case Management Specialists serves Southeast Michigan from its office at 29540 Southfield Road, Suite 202. The telephone number is 313-552-0070 or 800-722-5169.

Visiting Nurse Association of Southeast Michigan is the state's largest non-profit home health organization. Its subsidiaries include Visiting Nurse Home Health Services, Visiting Nurse Home Support Services and Visiting Nurse Services Corporation.

Besides services provided by Case Management Specialists, Visiting Nurse Services Corporation also offers medical equipment and supplies through VNA Medical Equipment Company.

#90242p0096 08/30/1990 ~PR Newswire

WASHINGTON (AUG. 30) PR NEWSWIRE - Harman International Industries, Incorporated (NYSE: HAR) today announced its results for the fourth quarter and the year ended June 30, 1990.

In the fourth quarter, sales were $151 million, an increase of $15.3 million or 11 percent over sales in the comparable quarter last year. Net income was $2.4 million, 36 percent below that of the prior year. Earnings per share decreased 17 cents, from 44 cents to 27 cents.

For the full fiscal year ended June 30, 1990, sales were $556.7 million, up 6 percent from prior year sales of $524.2 million. Net income was $14.1 million, down $1.3 million, or 9 percent. Earnings per share were $1.61, down 10 percent from prior year earnings per share of $1.78.

Commenting on the results, Dr. Sidney Harman, chairman and chief executive officer, said: "Fiscal 1989 had been an excellent year -- a record year -- but 1990 was adversely affected by the sharp fall in automobile sales and the soft consumer durables market in the United States.

"Despite the difficult market environment, we achieved earnings which approached 1989 levels. In fact, many good and promising things occurred in fiscal 1990. We addressed each operating problem vigorously and productively. Talented senior management has been appointed at Audax, JBL and for the newly formed Consumer Electronics Group. Numbers of our companies including JBL, Harman Motive, Pyle and Harman Manufacturing had truly splendid years."

Harman also announced the appointment of two new members of the board of directors. Edward H. Meyer, chairman of the board and president of Grey Advertising, Inc., was appointed to fill the vacancy created on the board of directors by the resignation of G. William Miller. Meyer's term as a director expires at the 1991 annual meeting of stockholders. Jane Harman an attorney with the firm of Jones, Day, Reavis and Pogue and the wife of Sidney Harman, was also appointed to serve as a member of the board of directors to fill a vacancy on the board that had existed since 1987. Mrs. Harman's term as a director expires at the 1992 annual meeting of stockholders.

Harman International Industries, Incorporated is a leading manufacturer and worldwide marketer of high-quality, high-fidelity audio and video products for consumer home and automotive, professional and original equipment manufacturer (OEM) markets.

BRENTWOOD, NY (AUG. 30) PR NEWSWIRE - Allou Health & Beauty Care, Inc. (AMEX: ALU), a premier distributor of health and beauty aids on the Atlantic Seaboard, "is expanding rapidly into the distribution of selective food products to its current customers, and expects sharp increases in sales and earnings in the current fiscal year," the company told shareholders at the annual meeting today. "Health and beauty aid retailers are now adding non-perishable, rapidly moving food and beverage items to their store shelves, creating an opportunity for Allou to be an even more significant supplier and opening a large new and profitable marketplace for us utilizing our existing base of 3,500 customers," the company said.

For the first quarter ended June 30, 1990 sales rose 11 percent to a record $19,988,855 from $17,947,256. Earnings were a record $268,738, or $.10 per share, up 14 percent from $235,437, or $.09 per share the year before.

For the fiscal year ended Mar. 31, 1990 sales rose more than 20 percent to a record $71 million from $59 million. Earnings were a record $861,000, or $.40 per share, versus $809,000, or $.37 per share, restated to reflect shares issued in the company's initial public offering in 1989.

Shareholders attending the annual meeting, or voting by proxy, elected four new directors and re-elected three others. Newly elected to the board of directors are: Mark Felman, Allou's director of Purchasing; Donald Kirsch, chairman of The Wall Street Group, Inc., an international financial services firm; David Shamilzadeh, Allou's Controller; and Melvin Ungar, president of Litigation Corporation of America. Re-elected were:

Victor Jacobs, chairman of the board and chief executive officer; Herman Jacobs, president; and Ramon Montes, vice president/operations and sales. Frank Cohen, an attorney with Cohen & Cohen; and Monte Wolfson, president of Monte Wolfson Associates, Inc. resigned from the board for personal reasons. The board is now made up of seven directors compared to five last year.

The company also approved an amendment to authorize a class of preferred stock.

COLUMBUS, OH (AUG. 30) PR NEWSWIRE - The board of directors of Lancaster Colony Corporation (NASDAQ: LANC) today declared a quarterly cash dividend of 19 cents per share payable Sept. 29, 1990, to shareholders of record on Sept. 10, 1990.

John B. Gerlach, president of Lancaster Colony, pointed out that the board action continuing the dividend at 19 cents brings the indicated annual payout to 76 cents per share for the current fiscal year, up from 75 cents per share in the previous fiscal year ended June 30, 1990.

He said the directors also authorized the repurchase of up to 200,000 shares of Lancaster Colony common stock in the open market or in private transactions.

Lancaster Colony has paid consecutive quarterly cash dividends since September, 1963, and has increased the cash dividend every year for more than 25 years.

BASKING RIDGE (N.J.) PR NEWSWIRE - Eighteen AT&T Bell Laboratories researchers will move from corporation to campus this fall to participate in AT&T's Visiting Professors program, part of the company's overall commitment to meeting the special needs of minority students.

As Visiting Professors, AT&T Bell Labs members of technical staff are assigned to temporary faculty positions at the nation's Historically Black Colleges and Universities (HBCUs). In the 1990-91 academic year,

thirteen colleges will participate in the program.

Since the program's start in 1972, 125 AT&T researchers have shared their expertise with hundreds of mostly black and Hispanic students. The HBCUs produce about 35 percent of the black engineers in the U.S., and 13 percent of AT&T Bell Labs' new technical hires each year are graduates of these schools.

AT&T's Visiting Professors must meet specific educational and work experience criteria, as well as demonstrate keen interest in teaching and an ability to motivate others. Sensitivity to the needs of minority students is equally important.

In addition to teaching lecture and lab courses in subjects ranging from computer science to electrical engineering, AT&T Visiting Professors also participate in curriculum development and career counseling.

"The Visiting Professors program highlights AT&T's commitment to historically black schools and minority students in a very direct way," said Mario Jarvis, university relations and special program manager, AT&T Bell Laboratories. "It's a win-win situation for everyone. The students and schools gain access to some of the world's top talent in information technology. Our Visiting Professors are personally enriched through a rewarding teaching experience. And AT&T wins by helping increase the pool of minority engineers and computer scientists. Right now, science and engineering are extremely under-represented career choices for minorities. AT&T has an important stake in changing that."

In addition to underwriting salary and living expenses of the Visiting Professors, AT&T also provides technical grants and equipment donations to the Historically Black Colleges and Universities. In 1989, the AT&T Foundation approved three-year grants totaling $1.5 million to support engineering or computer science programs at ten of the schools.

KANATA, ONTARIO (AUG. 30) PR NEWSWIRE - Newbridge Networks announced today that a contract has been signed with Northwest Electric Power Administration of China for the provision of an integrated voice and data digital backbone network.

Of the six power authorities in China, Northwest Electric Power Administration is the largest in geographic area covering five provinces: Shaanxi, Quinghai, Gansu, Ningxia and Xinjiang. Upon completion the

network will consist of more than 70 nodes based on the 3630 MainStreet Drop/Insert Primary Rate Multiplexer.

"We are extremely pleased to have been selected by Northwest Electric Power," commented Mike Pascoe, general manager of the Asian Business Region at Newbridge. "This marks a major expansion into the People's Republic of China."

Newbridge Networks is an international company which specializes in the design, manufacture and marketing of voice and data communications equipment for global networks. Offices and manufacturing facilities are located in Canada, the United States and Europe.

Newbridge Networks Corporation is a public company whose common shares are listed for trading on the Toronto Stock Exchange (NNC) in Canada and quoted for trading on the NASDAQ National Market System (NNCXF) in the United States.

PRINCETON, N.J. (AUG. 30) PR NEWSWIRE - Cytogen Corp. (NASDAQ: CYTO) has announced the issuance of a U.S. patent on the preparation and use of diagnostic and therapeutic conjugates containing antibody fragments.

U.S. Patents No. 4,937,183, titled "Method for the Preparation of Antibody -- Fragment Conjugates" covers a new method for preparing antibody fragment conjugates which have superior characteristics for the targeted delivery of compounds in the diagnosis and treatment of disease when administered in vivo.

In addition to process claims, the resultant antibody fragment conjugates are also protected by the patent. These novel antibody fragment conjugates differ from other antibody fragment preparations in that the diagnostic or therapeutic component is attached to the carbohydrate region of the antibody fragment which is distant from the targeting region of the molecule. This attachment does not impair the ability of the antibody conjugate to target disease sites and thereby optimizes their use as delivery vehicles.

"The issuance of this patent provides Cytogen with additional protection for its proprietary lower molecular weight conjugates," said Cytogen Corp.'s Executive Vice President, Thomas J. McKearn, M.D., Ph.D. He continued, "Such conjugates may prove to be useful for cancer and cardiovascular disease in selected therapeutic and diagnostic imaging settings."

Cytogen Corp. is a biopharmaceutical company which has developed proprietary systems for linking drugs and diagnostic agents to monoclonal antibodies in order to optimize the function of the antibody as a delivery vehicle. With major emphasis on human cancer, current product development efforts at Cytogen are focused on improved cancer diagnostic imaging agents and the targeted delivery of cancer therapeutic agents directly to tumor sites.

#90242p0109 08/30/1990 ~PR Newswire
WALL, NJ (AUG. 30) PR NEWSWIRE - New Jersey Natural Gas Company today joined scores of utilities and pipeline companies in the first industry-wide, formal policy commitment to improve education.

The industry-wide effort, called "Education 2000," was announced today in Washington by the American Gas Association (A.G.A.), the national trade association representing more than 200 natural gas utilities, pipeline, and related companies. The Education 2000 initiative commits A.G.A. "to a decade of active support of the new national effort to reform America's educational system."

New Jersey Natural Gas has long been involved in education initiatives and business/education partnerships. The company's most ambitious effort, called Project Venture, provides professionals from several corporate disciplines ranging from accounting to engineering, to work with 5th-grade students in the Asbury Park school system.

Project Venture employee volunteers conduct weekly classroom presentations, one-on-one tutoring or mentoring sessions with students. Project Venture builds relationships between students and working professionals, and demonstrates the relevance of basic skills to the modern work place.

Project Venture is coordinated with the Asbury Park school district administrators and teachers, and is about to begin its second full year of activities.

Although Project Venture has been the utility's most ambitious partnership to date, it is only the latest in a series of business/education efforts in recent years.

The utility conducts career days in many high schools, actively participates in several state education councils, provides energy-related materials to schools at no cost, and frequently provides tours of utility facilities to interested school groups.

In addition, New Jersey Natural sponsors scholarship programs to encourage students from the company's service area to attend area colleges. These scholarship programs are coordinated with Brookdale Community College, Ocean County College, the County College of Morris, Monmouth College and Georgian Court College.

Beyond the scholarship stipend, scholarship winners are offered summer

employment at New Jersey Natural Gas. A new scholarship awarded for the first time this year will support a nursing student's expenses at Brookdale and through a four-year nursing degree in conjunction with Riverview Medical Center, Red Bank.

BALTIMORE (AUG. 30) PR NEWSWIRE - Schlegel Maryland Inc. has earned the General Motors Mark of Excellence award, the highest honor that General Motors (NYSE: GM) bestows on its suppliers.

Wally Gordon, Schlegel Maryland Inc.'s plant manager, will accept the award at a ceremony today in the Chestertown Industrial Park, where the company manufactures the automotive weather seals used by General Motors on its Corsica and Beretta cars.

Maryland Department of Economic and Employment Development (DEED) official James Peiffer presented Gordon with a citation from Gov. William Donald Schaefer in recognition of the Maryland company's achievement.

"Schlegel Maryland Inc. is to be congratulated on its consistently high standards and dedication to quality," said Peiffer. "They are a model for all small Maryland manufacturers in their use of technology to control the quality of the product," he said, a reference to the company's computerized statistical process control system designed to ensure that the product consistently meets or exceeds specifications. Peiffer noted that Gordon is a member of the recently formed Eastern Shore Regional High Technology Council's planning committee.

"Very few General Motors suppliers have earned the Mark of Excellence, and we are proud that a Maryland company is one of them," said Gordon. Gordon said that of the approximately 2,500 suppliers evaluated by General Motors, only 4 to 5 percent qualified for the award. Companies were required to earn top scores in five categories in order to earn the award. The assessment covered supplier performance, systems and processes for continuous improvement in quality, delivery, cost, technology and management. Schlegel Maryland Inc. received "outstanding" marks in each category.

Schlegel Maryland's manufacturing plant employs approximately 70 people, working a two-shift operation. The plant supplies finished extruded rubber weatherstripping components to General Motors' Wilmington and Linden assembly plants.

In addition to the Schlegel Maryland "Mark of Excellence" award, Schlegel's West Unity, Ohio, and Maryville, Tenn., locations have also qualified for the "Mark of Excellence."

Representing General Motors at the ceremony were Pat McCormick, director of material management for the company's Cadillac Division; Dennis Hughey Sr., the division's assessment/development engineer; and Cynthia Tonne, buyer for General Motors' Lansing Automotive Division. Steve Barton, director of operations for Schlegel Tennessee and Roberto Quartra, group chief executive of the BTR Sealing Systems Group, were speakers. BTR purchased Schlegel Corp. in 1989.

HOUSTON (AUG. 30) PR NEWSWIRE - G. Thomas Wilkinson has been named president of Ashland Exploration, Inc. and vice president of Ashland Oil, Inc. (NYSE: ASH), Ashland Exploration's parent company, according to John R. Hall, chairman and chief executive officer of Ashland Oil, Inc.

The appointment is effective Oct. 1, and Wilkinson will be responsible for the operation of Ashland Exploration, a subsidiary of Ashland Oil. He reports to James R. Boyd, senior vice president and group operating officer of Ashland Oil, Inc.

An employee since 1988, Wilkinson previously was executive vice president. Before his employment with Ashland Exploration, he held various positions with AMOCO, ARCO and was president of Seagull Energy E&P Inc.

A native of St. Louis, Wilkinson holds a bachelor's degree in geophysical engineering from St. Louis University.

"Ashland Exploration is a growing part of Ashland Oil's energy business," Boyd said. "Tom will continue to lead us in the development of our three key segments, Appalachian gas development, Gulf Coast exploration and Nigerian oil production, which are areas of continued, aggressive growth and expansion for Ashland Exploration."

With its headquarters in Houston, Ashland Exploration is engaged in oil and gas exploration and production both onshore and offshore in the United States and in Nigeria.

MALVERN, PA (AUG. 30) PR NEWSWIRE - Acme Markets Inc. today announced a major educational program that offers the opportunity for all schools in Acme's marketing area to receive free IBM PS/2 computers, printers, software, and Funk and Wagnall's 1990 Encyclopedias.

Edwin Spragg, vice president of sales, stated, "Acme recognizes the need for a partnership between the private business sector and our schools to help provide today's much needed quality education. The Acme 'Free IBM Computers for Your School' program gives us the opportunity to make a significant contribution to the communities that have supported us. I can think of no better investment than the education of our young people."

Joining with Acme in the program are the following companies: Scott Paper, Campbell's, and TastyKake. Beginning Sept. 2, 1990, through Feb. 5, 1991, schools can earn free products by saving any combination of

- Acme gold colored register receipts (dated Sept. 2, 1990 through Feb. 5, 1991).
- Scott Paper products - save the "Learning Tools for Schools" seals (purchased at Acme).
- Campbell's products - labels from any Campbell's products (purchased at Acme).
- TastyKake Family Pack - save the UPC barcode from each family pack (purchased at Acme).

Before becoming eligible to participate in the program schools must first register with Acme. Schools can obtain registration material by contacting any local Acme supermarket or Program Coordinator Barbara Tuttle at (215) 889-4000. All schools which register before Sept. 15 will receive 20,000 free points toward the purchase of their first free computer or encyclopedia set.

It is estimated that Acme will award more than $6 million worth of free IBM computer equipment, and software to the schools in its marketing area. Acme Markets Inc. operates 276 stores in five states and has more than 25,000 employees.

LINCOLNWOOD, IL (AUG. 30) PR NEWSWIRE - Allercare, Inc. (NASDAQ: ALLR) announced today that its wholly owned subsidiary, Allercare/NSL, Inc. entered into an asset purchase agreement to sell its condom business to Schmid Laboratories, Inc. of Little Falls, N.J., for $4 million cash.

Included in the sale was inventory and manufacturing equipment valued at approximately $1 million together with applicable trademarks, tradenames and customer lists. The transaction is expected to close Sept. 17, 1990.

As a result of the sale Allercare expects to significantly reduce levels of employment, consolidate facilities and reduce overhead. The transaction will provide additional liquidity for continuing operations and for future acquisitions.

Allercare's other products unaffected by the sale include "LaSalle-10" nail care treatment products, "Allerderm" hypoallergenic baby products and "Country Cream," a country decorator product line.

BIRMINGHAM, AL (AUG. 30) PR NEWSWIRE - Sonat Inc. (NYSE: SNT) and its subsidiary, Southern Natural Gas Company, today announced their active participation in "Education 2000: The Natural Gas Industry's Campaign for Educational Excellence."

William E. Matthews IV, chairman of Southern Natural Gas, will serve on the American Gas Association (A.G.A.) task force charged with identifying productive new applications to further educational improvement. A.G.A. made the announcement today at a Washington, D.C., press conference.

The effort is a 10-year commitment to help the nation's schools attain educational excellence and to support the education goals of the Bush administration and the National Governors Association. The A.G.A. program will build on the natural gas industry's traditional educational activities by calling for renewed efforts in local and state programs that further educational improvement.

"Sonat and Southern Natural Gas are uniquely positioned to participate in the initiative," said Matthews. "Our natural gas pipelines and facilities extend across eight Southeastern states, and other Sonat facilities are located in the West and New England. At each of these facilities are Sonat people who are committed to enhancing the quality of life in their communities.

"Students who today are in elementary schools, high schools, colleges and universities are our potential work force. And they are also our customers of the future. Sonat is sincerely committed to assisting these students in achieving and even surpassing their life's goals. It is our

hope that participation in this A.G.A. initiative will help us continue our pursuit of this mission," Matthews said.

"Here in Birmingham, our headquarters city, and in Alabama, our employees are involved in programs particularly devoted to enhancing the quality of education and to serving youth at risk. Sonat employees take time off from work to help students in elementary grades grasp the fundamentals of education. Our employees volunteer more than 50,000 hours each year -- many of those hours company-allowed time -- to this, other educational efforts, and youth-at-risk programs. Also, the Sonat Foundation provides about $1 million annually in funding for educational programs in its areas of operation," he said.

Sonat is a worldwide energy company involved in natural gas transmission and marketing, oil and gas exploration and production, and oil services.

RALEIGH, N.C. (AUG. 30) PR NEWSWIRE - Southeastern Machine & Tool Co., which in 21 years has grown to become one of the country's largest suppliers of sheet metal products, broke ground Thursday for a 166,000-square-foot headquarters and manufacturing facility.

Jerry Richmond, who founded SMT in his garage in 1969 and now counts many Fortune 500 companies among his clients, said the new facility, which will be developed by Spectrum Properties, will allow the company to consolidate its 300 employees and three existing Raleigh facilities under one roof. Several new production systems will also increase capacity, productivity and efficiency, Richmond said.

The new plant, to be located on ACC Boulevard just off U.S. 70 near the Airport exit, is scheduled to be operational in January 1991. Ellinwood Design Associates, Ltd., of Raleigh is the design consultant for the owner. Clancy & Theys of Raleigh is the general contractor, and Design Development of Raleigh is the architectural firm. Co-developer with Spectrum is Jerry Dickens and the Eastland Development Group Inc., of Raleigh.

Among the new technologies to be employed in the plant is a water-based powder paint system, which is more environmentally sound than solvent-based paint systems. The company is also investing in computer-aided design and computer-aided manufacturing equipment.

"The new facility will be state-of-the-art and allow us to continue to meet the demand of our current customers while increasing our overall

productivity," said Richmond.

The location is also a strategic one, said Ford Gibson, director of development for Spectrum.

"The 12-acre site is very close to where the Durham connector and the Raleigh outer loop will meet, and the facility will have excellent exposure to the outer loop," said Gibson. "The location is ideal, considering many of SMT's clients are located in the Research Triangle Park."

Charlotte-based Spectrum Properties, ranked by Business North Carolina magazine as North Carolina's third largest developer of industrial space last year, has been very active in the Raleigh area since 1983. It has developed projects totaling approximately 900,000 square feet. Among their Raleigh-area projects are the Northchase Executive Center, the UCB Plaza and Northern Telecom's 100,000-square-foot training center.

TACOMA, WA (AUG. 30) PR NEWSWIRE - Weyerhaeuser Information Systems (WIS) announced today it recently marked the completion of a two-year project with the Washington State Office of the Administrator for the Courts (OAC).

The project included the design and implementation of the state-wide District and Municipal Court Information System (DISCIS). To date, there have been three successful installations of the new DISCIS system in the Seattle District Court, the Spokane District Court and the Spokane Municipal Court.

Members of the OAC; judges from various district and municipal courts, the Washington State Supreme Court and the Court of Appeals; and representatives from WIS recently attended a reception in Seattle. The purpose was to celebrate an outstanding example of government and private industry working together to achieve a common goal.

Says Mary McQueen, Washington State Court administrator, "WIS showed a real desire to help us complete this project successfully. We really felt we had more of a partnership relationship with them instead of the usual customer/supplier relationship."

The event was highlighted by the Honorable Chief Justice Keith M. Callow of the Washington State Supreme Court, and Susan Mersereau, vice president and general manager of WIS, signing the Provisional Acceptance Agreement of the DISCIS system.

The new system provides information about cases in other courts that could assist the judge or court personnel in handling the case or obtaining fines. The new system combines revenue tracking, traffic, parking case calendaring and case management functions.

Within two years, 39 district and municipal courts will be on this system state-wide. Since these courts handle approximately 62 percent of all court cases in Washington, the benefits to the courts are tremendous in terms of system responsiveness, data accessibilty and system dependability.

All courts with access to the system can view previous case histories and decrease the time they have to wait for the information. Says Cathy Grindle, Seattle District Court administrator, "With the old system, it was possible for a person to have previous tickets or arrests in another jurisdiction without our knowledge. The new system allows us to call up past histories on several different identification codes."

On Sept. 5, at 2 p.m., the Washington OAC and Weyerhaeuser Information Systems will hold a joint press preview at the Pierce County District Court and the Seattle District Court. The preview will announce the successful implementation of the new DISCIS system and mark the inclusion of its newest users, Pierce County District Court and Tacoma Municipal Court. Demonstrations will be conducted to show how quickly and easily information can be accessed state-wide.

GREENWICH, CT (AUG. 30) PR NEWSWIRE - W. R. Berkley Corporation (NASDAQ: BKLY), an insurance holding company, today announced that Gordon A. Ennis was elected to the position of senior vice president- insurance services effective Sept. 1, 1990. Ennis, 43, is currently president of Firemen's Insurance Company of Washington, D.C., a Berkley subsidiary. He succeeds Barry J. Gilway, who resigned in July 1990 to become president of the commercial division of the Maryland Casualty Insurance Company, an affiliate of the Zurich Group.

Ennis will be responsible for all of the Berkley operating companies in its Insurance Services Group. These include Employee Benefit Administration Company (Minneapolis), Rasmussen Agency, Inc. (East Orange, N.J.), North Star Risk Services, Inc. (Minneapolis), Disability Income Specialists, Inc. (Denver, Colo.), Public Risk Managers, Inc. (Brentwood, Tenn.), Southwest Risk Services, Inc. (Phoenix, Ariz.) and All American Agency Facilities, Inc. (Jacksonville, Fla.).

Ennis will continue as president of Firemen's until approximately October, when he will relocate to Berkley's corporate headquarters in Greenwich, Conn. Louis A. Golinvaux, who has been serving as interim head of the Insurance Services Group, will then resume his duties as chief executive officer of North Star Risk Services, Inc., another member of the Berkley Group. He will work with Ennis in the continued expansion of the Insurance Services segment of Berkley's business.

Ennis received his B.S. from St. Joseph's University, Philadelphia, in 1968 and earned his CPCU designation in 1984. Prior to joining the Berkley Group in 1989, Ennis was president and CEO of Rockwood Holding Company (1988-1989) and president and CEO of Merchants and Business Men's Mutual Insurance Company of Harrisburg, Pa. (1985-1988). From 1969 to 1985 he held a variety of positions in the Allstate Insurance Group.

W. R. Berkley Corporation is a holding company whose subsidiaries operate in three major segments of the insurance business: regional property casualty insurance; specialty lines of insurance (including excess and surplus lines, commercial transportation and reinsurance); and insurance services operations (including management of alternative insurance market mechanisms).

THE WOODLANDS, TX (AUG. 30) PR NEWSWIRE - Mitchell Energy & Development Corp. (AMEX: MND) today reported a decline in its second- quarter earnings but said it expects substantial improvement in operating results during the remainder of its current fiscal year.

At $5.1 million, or 11 cents per share, net earnings for the three months ended July 31 were down from the $6.5 million, or 14 cents per share, earned in the same period last year. Revenues totaled $160.1 million, compared with $148.5 million in the year-earlier quarter.

In the first half of the current year, earnings amounted to $11.8 million, or 25 cents per share, on revenues of $320.7 million. During the corresponding prior-year period, the company earned $12.6 million, or 27 cents per share, on revenues of $306.7 million.

Chairman and President George P. Mitchell attributed the reduction in second-quarter earnings principally to the world oil price decline prior to Iraq's invasion of Kuwait and to the weakening of natural gas prices in the wake of last winter's unusually warm weather. He said the decline in the exploration and production division's operating earnings was partially

offset by improved operating earnings from both the transmission and processing division and the real estate division.

Mitchell said prospects for the remainder of the year are excellent in light of the combined benefit the company is receiving from higher oil prices and, more importantly, from increased volumes and prices for ethane propane and other natural gas liquids. Natural gas liquids prices began firming during the second quarter. They were further stimulated by the Mid-East turmoil, which began after the quarter ended, and then followed oil prices to the highest level in several years. The company currently is producing more than 37,000 barrels of natural gas liquids per day and expects to increase its output to approximately 40,000 barrels per day by year end.

Residential sales at The Woodlands were at a record pace during the first half, and progress was attained in other real estate division operations, Mitchell noted. Absent the $2 million gain on the sale of a 50 percent interest in four office buildings during the prior-year first quarter, he added, the division's operating earnings were ahead for the first half as well as for the second quarter.

Mitchell Energy & Development is a large independent energy company with real estate interests. Its shares are listed on the American and Pacific Exchanges.

MINNEAPOLIS (AUG. 30) PR NEWSWIRE - William H. Spell, chairman of Sparta Corp. and Nicholas G. Grammas, president and chief executive officer of La Canasta of Minnesota, Inc., today announced the execution of a letter of intent for the merger or consolidation of their respective corporations.

Under the terms of the proposed agreement, existing Sparta shareholders will retain from 21.5 percent to 30 percent of the issued common stock of the combined companies. The exact percentage is dependent upon an incentive "earn out" arrangement based on future net income. The projected percentage ownership would change in the event of exercise of any of Sparta's outstanding common stock warrants.

The transaction is subject to satisfaction of certain conditions, including the approval of both Sparta's and La Canasta's shareholders.

Sparta Corp., based in Minneapolis, is a publicly traded blind pool formed in 1988 to raise capital for the acquisition of a business enterprise.

La Canasta of Minnesota, Inc. is a St. Paul, Minn.-based company formed in 1981. La Canasta produces and markets various food products sold to the retail consumer and specializes in institutional food service, supplying Mexican food products to regional restaurants throughout 13 states and Canada. La Canasta currently has 65 employees.

DENVER (AUG. 30) PR NEWSWIRE - Apache Corp. (NYSE: APA) today announced the completion of its Sprowls 3-33 flowing 8.0 million cubic feet (MMcf) of gas per day from the Pennsylvanian Red Fork formation.

The Apache-operated well, which produces from 140 feet of net pay between 13,870 and 14,040 feet, was tested on a 20/64-inch choke with a flowing tubing pressure of 6,170 pounds per square inch. The company holds a 66.2 percent working interest in the producer.

The well is located on Apache's Cheyenne South prospect in the Roger Mills County, Oklahoma portion of the Anadarko basin. Abutting this prospect to the south is the company's Taylor Ranch prospect, where Apache completed the Sprowls 2-5 (92 percent working interest) in the first quarter flowing 10.4 MMcf of gas per day from 127 feet of net pay in the Red Fork formation. Completion operations at another Apache well on this prospect are scheduled to begin shortly.

In total, Apache has participated in the completion of eight Red Fork gas wells in the four-county area of Roger Mills, Beckham, Washita and Custer counties during 1990.

Apache is an independent energy company engaged in exploration, development and production of natural gas and crude oil. The company's securities are traded on the New York and Midwest Stock Exchanges (symbol APA).

NASHVILLE, TN (AUG. 30) PR NEWSWIRE - Hospital Corporation of America ("HCA"), today announced that it had completed the recapitalization of its psychiatric subsidiary, HCA Psychiatric Company, on the terms and conditions previously disclosed.

In this recapitalization transaction, HCA Psychiatric has borrowed $515 million of an aggregate $545 million term and working capital facility which has been provided to it by a group of commercial banks and other financial institutions. Proceeds totalling $500 million have been transferred by HCA Psychiatric to HCA in repayment of intercompany debt. HCA will utilize the $500 million to reduce the current $638 million unpaid principal balance of its Asset Sale Bridge Loan.

HCA anticipates using the net proceeds of the $100 million remaining in escrow from the March 1990 sale of its interest in EQUICOR plus the net proceeds from other pending asset sales to repay the $138 million balance of its Asset Sale Bridge Loan due in March 1991. If the foregoing fails to provide sufficient funds to repay the balance of the Asset Sale Bridge Loan, HCA expects to fund any remaining balance with funds generated internally or with other borrowings.

The co-arrangers for the HCA Psychiatric financing include The Bank of Nova Scotia and Morgan Guaranty Trust Company of New York. This bank financing will mature December 31, 1997, and bear interest at adjusted LIBOR plus 2 1/2 percent or the prime rate plus 1 1/2 percent. HCA has not guaranteed any of the HCA Psychiatric financing, nor will HCA be contingently liable for such financing.

HCA - Hospital Corporation of America and its affiliated corporations own 76 medical-surgical hospitals and 54 psychiatric hospitals with approximately 24,000 licensed beds in the United States.

LONG GROVE, ILL. (AUG. 30) PR NEWSWIRE - Kemper National Insurance Companies has issued revised advertising guidelines aimed at keeping its commercials off golf events telecast from clubs with racial or sexual exclusionary practices. The company sponsors two nationally telecast golf tournaments and advertises on many golf events.

"The recent media focus on this issue has been a forcible reminder that there is need for those involved with professional golf to take a stand in support of non-discriminatory policies," said Gerald L. Maatman, president and chief executive officer of Kemper National.

The new guideline states: "Kemper will not advertise on golf tournaments played at clubs which the appropriate sanctioning bodies certify have discriminatory membership policies. In deciding if Kemper will or will not advertise on golf telecasts under this policy, we will make our own

judgment calls independently of the actions of other advertisers or organizations."

The revised guidelines re-affirm the insurer's policy of not advertising on programs that glorify speed, violence, racism, sexism or are otherwise offensive. The revised guidelines are being distributed to the firm's advertising agencies, professional golf organizations and the broadcast and cable networks on which Kemper National advertises.

Kemper National sponsors the Kemper Open at TPC at Avenel, a Tournament Players Course with an integrated membership in Potomac, Md. It is also a co-sponsor of the Women's Kemper Open presented at the Wailea Resort, a public facility in Hawaii.

Kemper National, with 1989 sales of $2.7 billion, sells most types of property-casualty insurance in all 50 states, the District of Columbia and some foreign markets.

INDIANAPOLIS (AUG. 30) PR NEWSWIRE - Hurco Companies, Inc. (NASDAQ: HURC) has received a research and development contract from Martin Marietta (NYSE: ML) for the development of advanced motion control technology. The R&D contract is a part of a multimillion dollar Next Generation Computer Numerical Control Contract awarded to Martin Marietta and sponsored by:

- Manufacturing Technology Directorate
- Wright Research Development Center
- Aeronautical Systems Division (AFSC) - United States Air Force
- Wright-Patterson AFB, Ohio

Martin Marietta, the National Center for Manufacturing Sciences, the U.S. Air Force, several academic institutions, U.S. CNC Machine Tool Manufacturers, and users will be cooperatively developing this technology.

This contract, in conjunction with Hurco's increased research and development investments for software and computer control technology, will result in the release of new software and CNC products over the course of the next few years.

"We are very pleased to be a part of the Martin Marietta Development Team. We expect to use Hurco's corporate and divisional resources to successfully complete the contract and to commercialize the results," said Brian D. McLaughlin, president and CEO of Hurco Companies, Inc.

Hurco Companies, Inc. is one of the largest United States-based manufacturers of computer numerical control systems for stand-alone machine tools. The end market for the company's products consists primarily of independent job shops and short-run manufacturing operations within large corporations in industries such as the aerospace, defense, medical equipment, energy, transportation, and computers.

The company is based in Indianapolis, and has additional manufacturing facilities in Detroit and High Wycombe, England, and has a sales, application engineering and service subsidiary in Munich, West Germany.

Products are sold through 120 independent agents and distributors in the United States and 26 other countries. The company also has direct sales forces in the United States, the United Kingdom and West Germany.

CONTACT: Michael K. Campbell, senior vice president and chief financial officer of Hurco Companies, Inc., (317) 293-5309.

PROVIDENCE, R.I. (AUG. 30) PR NEWSWIRE - Harvard Community Health Plan today assumed corporate and management control of RIGHA (Rhode Island Group Health Association), Rhode Island's oldest health maintenance organization.

A signing ceremony was held at RIGHA's Coro Health Center and administrative offices in Providence, just four months after an agreement-in-principle was reached between the two health plans. Among those participating were former RIGHA Chairman of the Board Edwin C. Brown RIGHA President and CEO Thomas A. Shields and Chief Medical Director Patrick H. Mattingly, M.D., and from Harvard Health, President and CEO Thomas O. Pyle.

Effective today, RIGHA becomes a corporate affiliate of Harvard Community Health Plan, which is New England's oldest and largest HMO. However, RIGHA will for the time being continue to operate as a separate health plan

within its enrollment area, which encompasses Rhode Island and much of Southeastern Massachusetts. RIGHA currently provides comprehensive health care and coverage to almost 77,000 members; Harvard Health services about 417,000 members, mostly in eastern Massachusetts.

RIGHA provides multi-specialty health care services at centers located in Providence, Warwick and Lincoln, R.I., and in Swansea and Plainville, Mass. RIGHA is also affiliated with independent group practices in Newport, R.I., and Westport, Mass.

Harvard Health and RIGHA began the process of affiliation on May 6, 1990, with the agreement-in-principle. Following an extensive financial review and the negotiation of new agreements with RIGHA's major hospitals and vendors, the two plans signed a definitive agreement on July 31st. Today's closing marks the successful resolution of other financial issues and the granting of approval for the affiliation by the Rhode Island Department of Health.

#90242p0190 08/30/1990 ~PR Newswire

CHICAGO (AUG. 30) PR NEWSWIRE - Centel Corporation (NYSE: CNT) announced today that as part of its continuing strategy to focus on the local exchange telephone and cellular communications businesses it intends to sell its electric operations. The company said it anticipates reaching an agreement to sell the properties before the end of the year.

Separately, the company announced that its board of directors declared a quarterly dividend of 21.33 cents on the company's common shares. The dividend, Centel's 181st consecutive quarterly cash payment, will be paid Oct. 31, 1990, to shareowners of record Oct. 5.

Centel provides electric service to more than 136,000 customers in Colorado and Kansas. Centel Electric had revenues of $165 million in 1989, while reporting operating income of $29 million.

"This proposed sale continues our restructuring to focus on those operations that provide greater opportunity for growth and return for shareowners," said John P. Frazee Jr., Centel's chairman and chief executive officer. "While our electric operations do not directly fit into our business mix, because of their good financial results, retention has been in the best interest of our shareowners. But recently we have received considerable interest from organizations wanting to acquire our electric properties. Because of this interest, we feel our shareowners will be best served by divesting these properties."

In the last three years, Centel has acquired more than $1 billion in cellular properties while selling its cable television operations for $1.4 billion; reached a definitive agreement to sell its Centel Communications System unit; sold Centel Federal Systems, and divested its interest in two long-distance carriers.

The company did not reveal who has expressed interest with regards to the sale of the electric properties. Smith Barney, Harris Upham & Co. Inc. has been retained as an advisor to assist in the sale.

In addition to its electric operations, Chicago-based Centel Corporation, which had 1989 revenues of $1.19 billion, provides local exchange telephone service through more than 1.6 million access lines in nine states, and operates cellular communications franchises that serve nearly 150,000 access lines in 44 markets in 15 states.

#90242p0192 08/30/1990 ~PR Newswire

DANVILLE, VA. (AUG. 30) PR NEWSWIRE - Dibrell Brothers, Incorporated (NASDAQ-NMS: DBRL) today announced income from continuing operations of $14,594,007 or $2.21 per share for its year ended June 30, 1990. Income in 1990 was negatively affected by a one-time charge in the fourth quarter of $2,246,000, or $.34 per share, related to the disposal by Dibrell of its flower growing operation in Spain. Excluding this one-time charge, income from continuing operations for the 1990 fiscal year would have been $16,840,007, or $2.55 per share, a 13 percent increase over income from continuing operations in 1989 of $14,910,968, or $2.26 per share. Net sales for 1990 increased by 13 percent to $765.4 million versus $676.8 million in 1989.

During the fourth quarter of 1990, Dibrell provided for the discontinuance

of two distinct lines of business, its home ice cream freezer manufacturing unit and its retail floral business. Losses from operations for these two businesses in 1990 totaled $925,035 net of tax, or $.14 per share, and Dibrell has provided an additional $1,648,441 net of tax, or $.25 per share to cover prospective losses on phase-out and disposal of these businesses. Including the effects of discontinued operations Dibrell's net income for 1990 was $12,020,531 or $1.82 per share compared to net income of $14,590,787 or $2.21 per share last year.

The Company said that its worldwide tobacco operations recorded a sales increase of 16 percent in 1990 to $503.5 million and that tobacco operating profits were up significantly due to improved performance in the U.S. and South America, partially offset by a decline in operating results in Turkey. Tobacco operating profits in 1990 were increased by gains on the sale of certain non-strategic business units, and reduced by a provision for costs incurred in consolidating and downsizing the administrative and marketing functions of Dibrell's European tobacco offices.

Although tobacco operating profits derived from Brazil increased in 1990 versus 1989, the contribution to income from Dibrell's 30 percent owned Brazilian affiliate was negative. The contribution to income from Dibrell's tobacco affiliates operating in Malawi increased materially in 1990 over 1989.

Florimex and Baardse, Dibrell's two flower trading units, realized an increase in sales of 9 percent to $262 million. While the flower companies had positive operating profits in 1990, such profits were decreased by the poor results of the Spanish growing project as well as operating losses at Florimex's Miami import branch and at wholesale units in Toronto and Paris. The Spanish project was abandoned in 1990 and activities at the other problem units have been terminated or curtailed. Operating profits at Florimex in 1990 were increased by gains on sales of buildings in Germany and Austria.

#90242p0193 08/30/1990 ~PR Newswire

RADNOR, PA. (AUG. 30) PR NEWSWIRE - Sun Co.'s (NYSE: SUN) Chairman and Chief Executive Officer Robert McClements Jr. today told a group of petroleum analysts in New York that the current turmoil in petroleum markets caused by the Iraqi invasion has not had a major impact on Sun's ability to acquire adequate supplies of crude oil for its five U.S. refineries.

Sun purchases approximately 600,000 barrels a day of crude oil on the open

market with some 70 percent of this demand satisfied by a diverse group of foreign crude oil producers.

David E. Knoll, president of Sun's Refining and Marketing subsidiary, said that in early 1990 Sun was purchasing approximately 2 to 3 percent of its crude oil supply from Iraq and has made up this lost supply from other producers.

In assessing the impact of the Clean Air Act on Sun's refining and marketing business, Executive Vice President Robert H. Campbell said, "It is not possible to generalize about the costs the industry will incur to comply with the mandates of the Clean Air Act. Each refiner and marketer will be affected differently, depending on such factors as the location of their operations, their particular refinery configuration, their products slate and the current condition of their facilities."

Sun said it expects to spend an average of $400 million per year in capital in its U.S. refining and marketing business during the first half of the 1990s. This increase over Sun's historical capital expenditures for this segment of the business is clearly affordable primarily from internally generated funds. Sun's 1988 acquisition of Atlantic Petroleum Corp., coupled with Sun's prior and planned capital expenditures, should enable Sun to effectively meet projected environmental standards for the refining and marketing of petroleum products.

Executive Vice President Richard W. Ince reviewed Sun's coal and coke business (Sun is the ninth largest coal producer in the United States) in light of the Clean Air Act. He pointed out that "Sun's coal is all low sulfur and located in areas of the country expected to realize higher low sulfur coal sales as utilities switch to low sulfur coal to meet the emission standards set by the Clean Air Act." Ince also discussed Sun's position with respect to coking operations and noted, "Sun's coke ovens are environmentally superior to the vast majority of coke ovens in existence today. Sun's existing coke ovens already meet the emission standards set by the Clean Air Act."

The company also indicated that it had reinstituted its stock repurchase program.

BOCA RATON, FLA. (AUG. 30) PR NEWSWIRE - Humagen, Inc. (NASDAQ: HUGE), has changed its name to First Medical International, Inc. (NASDAQ: HUGE). The announcement was made by Roberto Riva, president of the Boca Raton-based company with widespread interest in the medical field.

"The name, First Medical International, more accurately describes the changing nature of our company -- and the aggressive acquisition and growth phase we are now entering," said Riva.

First Medical International develops and markets practical, high-tech medical diagnostic testing products. The company has recently signed a letter of intent to purchase Cardio Scan, Inc., of Boca Raton, for $625,000.

Additionally, First Medical International also has the exclusive right to franchise, own and operate Medical Depot Superstores in the U.S.S.R., Mexico and Panama and a non-exclusive right to franchise, own and operate Medical Depot Superstores anywhere else outside the United States.

"Moving from being a company which has been involved primarily with research and development to a multi-operational company engaged in manufacturing, processing, distribution and retailing offers outstanding profit opportunities in the years ahead," Riva concluded.

FORT LAUDERDALE, Fla. (AUG. 30) PR NEWSWIRE - QSR, Inc. (NASDAQ: QSRI) announced today that it has successfully completed the acquisition of the exclusive rights to operate and franchise the Miami Subs restaurant concept throughout the United States. Prior to today, QSR had the rights to develop and franchise Mr. Submarine/Miami Subs restaurants in Florida. Following today's announcement, this unique and successful fast food concept will be expanded throughout the country by QSR under the name Miami Subs.

In addition to acquiring the exclusive national rights, the company also acquired two operating Miami Subs restaurants located in south Florida. Company representatives stated that no debt or stock was involved in the acquisition.

The Miami Subs and Mr. Submarine restaurant concept, which was conceived by Gus Boulis, has quickly developed in south Florida and is well known for its bright and colorful exterior design and wide variety of "gourmet" fast food, offered in in-restaurant and drive-thru fashion. There are currently 44 Mr. Submarine/Miami Subs restaurants operating in Florida.

Boulis, chairman and chief executive officer of QSR, Inc., also indicated that the company is finalizing negotiations with an experienced executive

of the fast food industry to become president of the company. Boulis stated that the company expects to successfully complete and announce these negotiations in the very near future.

GREENSBURG, PA (AUG. 30) PR NEWSWIRE - Jeffrey S. Ratner, chairman of Sulcus Computer Corp. (NASDAQ: SULC), Greensburg, Pa., and Paul Hammar, chairman of Lodgistix Inc. (NASDAQ: LDGX), Wichita, Kan., today announced that the two companies have reached an agreement in principle to merge their hospitality operations.

The consolidated Lodgistix/Sulcus operations will be the largest developer of automated hotel systems in the industry in terms of both the largest installed base and combined revenue.

Upon Lodgistix shareholders' approval, Sulcus will acquire the issued and outstanding common shares of Lodgistix (LDGX) for units of Sulcus (SULCU) and other consideration. The Sulcus unit consists of two shares of common stock and two redeemable stock warrants.

Approval of the agreement in principle was obtained without the favorable vote of George Zugmier, a founder of Lodgistix who, with another substantial shareholder, it is believed, will not vote shares owned by them in favor of the merger.

In announcing the proposed merger, the principals said that the combined operations will represent the only software development company in the industry offering automation in both the UNIX and IBM/DOS/Network environments.

They stated their respective boards cited improved opportunities in consolidating research and development and their combined worldwide sales and service networks as major factors in approving the agreement.

CONTACT: Jeffrey S. Ratner, chairman of Sulcus, (412) 836-2000, or Paul Hammar, chairman of Lodgistix, in Wichita, Kan., (316) 685-2216.

BRANCHBURG, N.J. (AUG. 30) PR NEWSWIRE - Air & Water Technologies Corporation (AMEX: AWT), formerly R-C Holding, Inc., announced today that it is offering to purchase all of its outstanding Senior Subordinated Debentures due April 15, 1998 at a price of $1,090 for each $1,000

principal amount thereof, together with accrued and unpaid interest up to the date of repurchase. In connection with the offer to repurchase, the company is soliciting consents from the holders of the debentures to amend the indenture governing the debentures to remove substantially all financial convenants applicable to the debentures. The company will not be obligated to purchase the debentures unless a majority of the debentures is tendered and consents to the amendments are obtained and the p?any has completed a private placement of not less than $100 million of senior sercurities or arranged for other new financing sources acceptable to the company for the repurchase of the debentures. The company currently has a preliminary agreement with an institutional investor to complete a $100 million private placement in mid-September 1990. The company's offer to purchase expires at 5 p.m., New York City time on Sept. 28, 1990, unless extended.

Assuming all of the debentures are tendered, the company will have successfully refinanced approximately $300 million of the $305 million principal amount of high-yield securities originally issued in connection with the leveraged buyout of Research-Cottrell, Inc. three years ago.

Air & Water Technologies Corporation, through its operating units, Research-Cottrell, Inc., Metcalf & Eddy Companies Inc. (NASDAQ: METC), and Residuals Management Group, provides a broad range of environmental services in the areas of air pollution control, water resource management, and waste by-product disposal and reuse.

EAST AURORA, N.Y. (AUG. 30) PR NEWSWIRE - Fisher-Price announced today that it has determined that the Fisher-Price metallic label on the shield of its Car Seats No. 9100 and 9101 manufactured prior to July 1989 can become loose over time. In some cases, children have removed the label, placed it in their mouths and begun choking.

Fisher-Price has received a small number of complaints regarding this label. The company is, therefore, urging consumers to periodically inspect their car seats and if the label is loose, they should simply peel it away and discard it.

The company emphasized that this problem in no way affects the crashworthiness or performance of the car seat.

Consumers who have questions on the car seat label should contact Fisher-Price at 716-652-8402 or write: Consumer Affairs Department,

Fisher-Price, 636 Girard Avenue, East Aurora, N.Y. 14052.

Car Seats manufactured since July 1989 have hard plastic labels that snap into the shield and are not affected by this problem. Seats currently available at retail all have the more recently designed nameplates.

STOCKHOLM (AUG. 30) PR NEWSWIRE - Alfa-Laval Group, the Swedish- based supplier of food engineering, industrial and agricultural systems and equipment, reported higher sales and income for the first six months of 1990.

Consolidated income after net financial items amounted to SEK 733 million, up 12 percent over comparable income of SEK 652 million in the year-earlier period.

Operating income after depreciation, SEK 663 million, was up 8 percent, from SEK 615 million in the first half of 1989.

Order bookings totaled SEK 9,341 million, 15 percent higher than orders totaling SEK 8,123 million booked in the 1989 period. Invoiced sales, SEK 7,838 million, were 17 percent higher than in the first six months a year ago (SEK 6,721).

Earnings per share for the 12 months ended June 30 were SEK 16.70, compared with SEK 15.30 in the preceding 12-month period.

The group's order backlog at June 30, 1990 amounted to SEK 7,873 million, 26 percent higher than the SEK 6,224 million backlog a year earlier.

In a statement accompanying the report, Lars V. Kylberg, president and CEO said demand in the group's key areas remains favorable and has not been affected by the slightly weaker economic climate. "Since Alfa- Laval's operations include equipment for energy conservation, increased oil prices may have a positive effect," he noted. "This, combined with the group's geographic spread and financial position, provides a relatively favorable exposure to risk." Kylberg said the group's earlier forecast of a 15-percent sales increase, and an increase in income at approximately the same rate, remains unchanged.

ENGLEWOOD, CO (AUG. 30) PR NEWSWIRE - U.S. West Cable Communications and United International Holdings (UIH) today announced the formation of a joint venture for the purpose of acquiring, developing and operating overseas cable television systems and related businesses. The name of the venture will be United Communications International (UCI). The parties have committed $100 million in equity capital to finance the venture.

Initial investments by UCI will consist of an 86 percent interest in Norkabel, the second largest cable television operator in Norway, and a 25 percent interest in Swedish Cable & Dish, the second largest cable operator in Sweden.

Norkabel currently serves 118,000 basic subscribers in 13 communities in Southern Norway and, when construction is complete, will pass 320,000 homes; Swedish Cable & Dish serves 96,000 basic subscribers throughout Sweden and expects to pass 600,000 homes.

The board of UCI will consist of an equal number of representatives from U.S. West and UIH, with UIH acting as the managing partner. Certain employees of UIH and U.S. West will join UCI's management subsidiary, including Mark Schneider as president, Mike Fries as vice president-business development, and Nimrod Kovacs, who is responsible for Eastern European opportunities.

Gary Bryson, president of U.S. West Cable Communications, said, "This venture is attractive to U.S. West both because it provides a natural vehicle for pursuing global telecommunications opportunities and because of the solid track record and management team UIH brings to the venture."

UIH President William Elsner added, "Many of the communications opportunities becoming available in Europe are extremely attractive, but

we may not have been able to pursue them all on our own. Being able to combine our efforts with the resources and expertise of U.S. West makes it a whole new ballgame. We are very enthusiastic about the prospects for UCI."

U.S. West Cable Communications, a division of U.S. West Inc. (NYSE: USW), also has international cable interests in 14 franchises in the United Kingdom with 2.5 million homes, cable systems in France with two million homes and the Hong Kong cable franchise with 1.5 million homes.

U.S. West Inc. is a $25 billion diversified company headquartered in Englewood, Colo. Its major subsidiary, U.S. West Communications, serves the communications needs of ten million customers in 14 states of the Western United States.

YORK, PA. (AUG. 30) PR NEWSWIRE - The Graham Companies announced today that it has agreed to purchase Sonoco Products' (NASDAQ-NMS: SONO) 40 percent ownership in the Sonoco Graham Co.

The Graham Companies is a privately held group based in York. Upon completion of the transaction, Sonoco Graham will be renamed Graham Packaging Co. The company will continue to be headquartered in York, with Donald C. Graham as chairman. There will be no change in the current management team.

Sonoco Graham is the world's largest manufacturer of high density polyethylene (HDPE) plastic bottles used for household chemicals, automotive lubricants, personal care and assorted food products. Sonoco Graham was formed in 1989 through a merger of the Petroleum Packaging Division of Sonoco Products and Graham Container, one of the Graham Companies. The company has 27 bottle-making plants located throughout the United States.

"By assuming full ownership of the company we are confirming our commitment to maintaining a leadership role in the plastic packaging field " said Donald C. Graham, chairman of The Graham Companies.

"HDPE bottles have gained tremendous acceptance by consumers," said Phil Yates, senior vice president. "That's why in the last seven years we've grown from an annual production of 250 million bottles to the current production of more than 2 billion bottles. What's more, over 25 percent

of that production now includes recycled plastic -- the biggest area of growth for our company," said Yates.

The Graham Companies plastic packaging activities include machinery manufacturing and plastic bottle manufacturing in the United States, South America, and Europe. The company has recently announced a national commitment to the use of recycled plastic for bottles that is estimated to take over a billion plastic bottles out of the waste stream each year. This commitment includes the Graham Recycling Co. plant in York, scheduled to open Sept. 26, 1990.

FORT LAUDERDALE, FL (AUG. 30) PR NEWSWIRE - Posting record profits from its investment in National Beverage Corp., Burnup & Sims Inc. (NASDAQ: BSIM) today reported earnings for the first quarter ended July 31, 1990, of $2.2 million, or $.23 per share, on revenues of $48.4 million, compared to $2.1 million, or $.22 per share, on revenues of $44.2 million last year.

Achieving its best quarterly profits since being formed in 1985, National Beverage benefited from programs to stabilize ingredient costs and improve product pricing. Burnup & Sims telephone operations are positioned to take advantage of future opportunities as improvements in the economy occur.

Burnup & Sims, a leading national telecommunications service company, has diversified interests in real estate, movie theatres, printing and the soft drink beverage industry. With twelve bottling facilities throughout the United States, National Beverage Corp. owns and bottles Shasta, Faygo and Spree All Natural beverages, a Sante water and various private label soft drink brands.

BURNUP & SIMS INC. CONSOLIDATED RESULTS FOR THE PERIODS ENDED JULY 31, 1990 AND 1989
(In Thousands, Except Per Share Amounts)

Three Months Ended July 31,	1990	1989
Revenues	$ 48,372	$ 44,249

MONTVALE, N.J. (AUG. 30) PR NEWSWIRE - Mercedes-Benz of North America today announced the prices for its 1991 models, which go on sale Sept. 1.

The 1991 line consists of 18 models. Manufacturer's suggested retail prices range from $28,050 for the entry 190E 2.3 sports sedan with manual transmission to $89,300 for the 500SL coupe/roadster. The sales-weighted average price increase compared to the 1990 models is 3.3 percent.

Enhanced standard features include a new 10-speaker, 100-watt sound system in the 300E and 300E 4MATIC sedans and 300CE coupe, similar to that found in the large S-class models but specifically equalized for the 300-series' interiors. In addition, the 190E 2.3 and 190E 2.6 sedans and the 300TE and 300TE 4MATIC station wagons will have an active bass speaker system as standard equipment.

The 1991 models and their manufacturer's suggested retail prices (MSRP) are as follows:

MODEL	MSRP
190E 2.3 sedan with manual transmission	$28,050
190E 2.3 sedan with automatic transmission	28,950
190E 2.6 sedan with manual transmission	32,800
190E 2.6 sedan with automatic transmission	33,700
300D 2.5 Turbo sedan with automatic transmission(A)	41,000
300E 2.6 sedan with automatic transmission	41,000
300E sedan with automatic transmission	47,200
300E 4MATIC with automatic transmission	54,150
300CE coupe with automatic transmission	57,350
300TE station wagon with automatic transmission	51,150
300TE 4MATIC with automatic transmission	57,900
350SD Turbo sedan with automatic transmission(A)	53,900
300SE sedan with automatic transmission	53,900
350SDL Turbo sedan with automatic transmission(A)	57,800
300SEL sedan with automatic transmission	57,800
420SEL sedan with automatic transmission	63,600
560SEL sedan with automatic transmission	75,100
560SEC coupe with automatic transmission	82,900
300SL coupe/roadster with manual transmission	77,500
300SL coupe/roadster with automatic transmission	78,500
500SL coupe/roadster with automatic transmission	89,300

(A) -- Diesel model; not available in California.

#90242p0235 08/30/1990 ~PR Newswire

SHIPPINGPORT, PA. (AUG. 30) PR NEWSWIRE - Duquesne Light Co. officials at the Beaver Valley Power Station Unit No. 2 declared an alert at the plant at 11:10 a.m. today.

The alert, which is the second lowest level of emergency classification designated by the Nuclear Regulatory Commission, was declared due to venting of carbon dioxide gas in the west cable vault, an area of the plant which contains electrical cables. The alert was terminated at 1:11 p.m.

There was no release of radiation, no injuries, and the plant continued to operate.

The release occurred during maintenance testing of valves in the area. One of the valves being tested leaked carbon dioxide, which decreased the oxygen level below mandated safe levels. Ventilation of the area was begun and the oxygen content has been returned to normal levels.

The carbon dioxide is stored under pressure in liquid form and is part of the fire suppression system. The tank will be emptied prior to repair of the valves.

The Nuclear Regulatory Commission is being kept up-to-date on the plant's condition. Plant personnel are also in touch with state and local emergency management agencies to advise them of the situation, which is standard procedure in the event of an alert.

Duquesne Light officials stress that the situation did not present any threat to the health and safety of the public.

Beaver Valley Power Station Unit 2 (BVPS No. 2) is an 833,000-net-kilowatt nuclear-power generating plant. The plant is located on the Ohio River in Shippingport, approximately 22 miles northwest of Pittsburgh.

#90242p0246 08/30/1990 ~PR Newswire

NEW YORK (AUG. 30) PR NEWSWIRE - The Cooper Companies, Inc. (NYSE: COO) today reported its fourth successive quarterly profit. Net income applicable to common stock was $422,000 or $.02 per share on sales of $11.5 million for the third quarter ended July 31, 1990, compared with a net loss applicable to common stock of $14.9 million or $.63 per share on sales of $12.2 million in the same period a year ago.

For the nine months ended July 31, 1990, net sales were $34.9 million compared with $42.0 million for the year-ago period. The company reported net income applicable to common stock of $2.3 million or $.09 per share compared with a net loss applicable to common stock of $58.8 million or $2.51 per share in the same period a year ago.

Results from continuing operations for the first nine months of fiscal 1990 and 1989 are not directly comparable primarily due to the dispositions of the company's AQUAFLEX(R) soft contact lens business in the United States and Japan in the first quarter of 1989 and its international contact lens business in May of 1989.

Net income for the nine months ended July 31, 1989, includes a combined net loss of $11.9 million on the sale of discontinued operations and certain other assets and businesses. This amount represents the net effect of the following items: (i) the reported $9.3 million for gain on sales of assets and businesses, which represents primarily a gain on the sale of the company's AQUAFLEX soft contact lens business, net of a loss on the sale of its international contact lens business, and (ii) the reported $21.2 million loss on the sale of discontinued operations, which represents adjustments to the loss on the sale of Cooper Technicon, Inc. on June 29, 1989.

In the second and the third quarters of 1990, the company decreased certain tax liabilities due to favorable negotiations related to offshore subsidiaries and state income taxes, in the aggregate amount of $2.6 million, of which $1.4 million was recorded in the third quarter. The benefit of reducing these tax liabilities appears in income from continuing operations. In addition, in the third quarter and first nine months of 1990, the company generated gains on purchases of its 10-5/8

percent convertible subordinated reset debentures due 2005 of $2.6 million or $.10 per share, and $10 million, or $.41 per share, respectively. Also, for the nine months ended July 31, 1990, the company reported interest income (net of interest expense) of $7.2 million. For the comparable year-ago period, the company reported interest expense (net of interest income) of $12.3 million.

The Cooper Companies, Inc. develops, manufactures and markets optometric and ophthalmic products in the United States and Canada through its CooperVision subsidiary.

SANDUSKY, OHIO (AUG. 30) PR NEWSWIRE - Cedar Fair Management Company, the managing general partner of Cedar Fair, L.P. (NYSE: FUN), has finalized plans for more than $9 million in capital expenditures for the 1991 operating season at its Sandusky, Ohio amusement/ theme park, including another world-record roller coaster. Cedar Fair, L.P. owns and operates two amusement/theme parks: Cedar Point, located on Lake Erie between Cleveland and Toledo, and Valleyfair, near Minneapolis-St. Paul.

Richard L. Kinzel, president and chief executive officer of Cedar Fair Mangement Company, reported that approximately $7.5 million of this total will be invested to build a massive new traditional-style wooden roller coaster. "The new coaster, yet to be named, will be 160 feet tall, which will make it the tallest wooden coaster in the world, to complement our Magnum XL-200, the tallest steel coaster ever built," Kinzel said. Designed to travel at speeds over 65 mph, the new coaster will be Cedar Point's tenth roller coaster, adding to its own mark in the Guiness Book of World Records for having more coasters than any other park in the world.

"This is the second year in a row that we've allocated over $9 million in capital improvements for Cedar Point," said Kinzel. "This extraordinary new coaster will stand as a monumental symbol of Cedar Point's commitment to quality in world-class rides and coasters, while maintaining our philosophy of providing the finest entertainment for the entire family."

Kinzel said that capital expenditures for the Valleyfair park are in the process of being finalized and will be announced at a later date.

DETROIT (AUG. 30) PR NEWSWIRE - U.S. car/truck production for this week is estimated at 197,972 units, up 7.6 percent from last week's build 183,981, Ward's Automotive Reports said today.

Scheduled U.S. vehicle production for this week is 4.4 percent higher than 1989's same-period total of 189,718, Ward's reported.

Estimated U.S. car output for the week ending Sept. 1 is 124,038, bringing the year-to-date estimate for 1990 to 4,098,013, 87.6 percent of like-1989's total of 4,676,004 cars, according to Ward's.

U.S. truck output scheduled at 73,934 this week, just down from last week's build of 75,574, bringing the estimated year-to-date total to 2,618,979. The YTD total stands at 92.1 percent of last year's year-to-date production of 2,843,001.

Of this week's estimated U.S. car output, GM's share was 43.1 percent; Ford Motor Co. planned 24.6 percent of all cars; Chrysler Corp. slated 14.0 percent; Honda of America Mfg. Inc., 7.0 percent; Toyota Motor Mfg. USA Inc., 3.6 percent; Mazda Motor Mfg. (USA) Corp., 2.9 percent; Diamond-Star Motors Corp., 2.6 percent; Nissan Motor Mfg. Corp., 1.2 percent; Subaru-Isuzu Automotive Inc., 0.6 percent. New United Motor Mfg. Inc., going through model changeover, produced 0.4 percent.

BATTLE CREEK, MI (AUG. 30) PR NEWSWIRE - Kellogg Company (NYSE: K) has filed suit in the U.S. District Court for the Northern District of Texas to protect its right to provide truthful information on packages of Kellogg's Heartwise cereal. The suit asks that the Texas attorney general and health commissioner be restrained from acting against the labeling or distribution of Heartwise cereal packages in Texas.

This action follows threats by Stephen Gardner, a Texas assistant attorney general, to coerce changes in the labeling of Heartwise cereal. The assistant attorney general claims that the use of the name Heartwise, a heart symbol, and references to Henry Ford and Riverside Methodist hospitals on the packages infer a health claim that Heartwise lowers cholesterol. They have threatened to seize the product unless Kellogg makes the demanded changes, admits it violated the law, and pays the state a large sum of money.

"The assistant attorney general's threat is an irresponsible and politically motivated attack on our right to communicate scientifically supported health information about our products to consumers," said Joseph M. Stewart, Kellogg Company's senior vice president - corporate affairs. "The statements on our Heartwise cereal packages are supported by leading scientific organizations and health professionals, who have affirmed that a diet high in soluble fiber and low in fat can reduce elevated cholesterol levels.

"The assistant attorney general's position would prohibit us from disseminating this important information. It also shows blatant disregard for the contribution that high-soluble-fiber products can make in improving the American diet. This is a disservice to the citizens of Texas. Since our discussions have been fruitless, we will now depend on the courts to bring an end to this unwarranted intrusion into our right to commercial free speech."

Stewart continued: "Heartwise contains psyllium, a natural grain with more than eight times the soluble fiber of oat bran. This grain has been consumed as a food for centuries in other parts of the world, and in the United States in fiber supplements, cereals, certain health foods and other products.

"For more than 80 years, Kellogg Company has consistently provided valuable nutrition information and healthful food products to consumers. Over the years, we have received much recognition and many awards for our leadership role in nutrition communications. We refuse to stand by and let our reputation be damaged by such reckless and unconstitutional attacks by politically motivated officials."

LA JOLLA, CALIF. (AUG. 30) PR NEWSWIRE - Intermark, Inc. (AMEX: IMI) today announced that the shareholders of both Intermark and Triton Group Ltd. voted overwhelmingly to approve all proposals considered at the companies' Annual Shareholders Meetings, including the merger of the two companies. Under the approved merger plan, structured as a tax-free reorganization, Triton shareholders will receive 1.4 shares of Intermark Common Stock for each share of Triton Common Stock, and Triton Group Ltd. becomes a wholly owned, private subsidiary of Intermark. As part of the merger, Intermark shareholders also voted to approve an increase in the number of Intermark's authorized shares from 23,000,000 to 30,000,000 consisting of 22,000,000 shares of Common Stock and 8,000,000 shares of Preferred Stock.

Charles R. Scott, Chairman and Chief Executive Officer of Intermark and Triton, stated that the approved merger represents the culmination of a long-standing plan to combine the two companies, and that shareholders of both companies will benefit from the transaction. Said Scott, "The 'new' Intermark possesses greater operating strengths, and the Company's stock is expected to enjoy enhanced marketability and visibility." Scott noted that Intermark's 14 Partner Companies have annual revenues of $2.1 billion $912 million in assets, and employ 22,400 people. "Also", Scott added, "all shareholders will now participate directly in a broader portfolio of Partner Companies in a simplified corporate structure, which presents an exciting array of opportunities for future growth."

The merger was subject to the approval of holders of a majority of outstanding shares of Intermark, and a majority vote of the non-Intermark owned shares voted at the Triton Annual Shareholders Meeting. The merger was effective upon filing of a Certificate of Merger in the State of Delaware today, at which time Triton's Common Stock was removed from further trading on the New York and Pacific Stock Exchanges. Intermark's stock will continue to trade on the American Stock Exchange under the symbol "IMI."

Intermark is a $2 billion operating/holding company whose business is to acquire a controlling interest in, operate through and add value to well-established, successful, mid-sized American growth companies in broadly diverse industries.

DETROIT (AUG. 30) PR NEWSWIRE - The promotion of Ronald M. Pirtle to executive in charge of General Motors' Corporate Strategic Planning Staff effective Sept. 1, 1990, was announced today by Robert T. O'Connell, executive vice president and chief financial officer.

Pirtle, 36, has been the comptroller of Pontiac Motor Division since 1988. A native of Jackson, Tenn., he joined GM in 1972 as a Chevrolet-sponsored cooperative student at General Motors Institute (GMI) in Flint, Mich. He received a bachelor's degree in industrial administration from GMI in 1977, and in 1980 earned his MBA from the Harvard Graduate School of Business Administration.

After graduating from GMI, Pirtle worked for Chevrolet Motor Division in industrial engineering until 1978 when he took an educational leave. In 1980, he joined the GM Financial Staff where he held a variety of analytical positions until his promotion in 1984 to director of operations analysis. In June 1985, he was named director of cost analysis and in December of that year he became director of budget analysis.

In 1987, Pirtle joined the Flint Automotive Division of the Buick-Oldsmobile-Cadillac Group as manager, finance and business planning. He was appointed comptroller of Pontiac Motor Division in 1988.

In his new position, Pirtle will oversee the continued development and implementation of GM's companywide strategic business management efforts. He succeeds Michael E. Naylor, who recently was appointed general director, Military Vehicles Operation.

In his new position, Pirtle will report to Leon J. Krain, vice president in charge of the General Motors Financial Staff.

BROOKLYN, NY (AUG. 30) PR NEWSWIRE - Bali Jewelry, Ltd. (NASDAQ: BALI), a leading manufacturer of gold jewelry products, today reported sales and earnings in the three and nine month periods ended June 30, 1990. The company attributed the decline in earnings to a decline in the price of gold which reduced its inventory valuations and to a change in marketing strategy.

BROOKLYN, NY (AUG. 30) PR NEWSWIRE - Private Brands, Inc. (NASDAQ: PRIB), a leading designer and manufacturer of knitted contemporary leisure wear and, through its Bali subsidiary, of gold jewelry products, today reported a decline in sales and earnings in the three and nine month periods ended June 30, 1990, from comparable periods ended June 30, 1989.

Ronnie Gross, chairman of the board, attributed the decline to a change in marketing strategy for the jewelry division and to a decline in the price of gold during the quarter which impacted on jewelry inventory valuations:

PRIVATE BRANDS, INC.

Periods ended	Three Months		Nine Months	
June 30:	1990	1989	1990	1989
Total sales	$3,495,667	$8,367,646	$21,329,038	$28,322,185
Inc. (loss) bef. taxes	(88,461)	485,229	(150,026)	1,988,980
Net income	8,192	282,786	66,739	1,135,320
Divs. on pfd. stock	82,810	82,850	248,430	248,532
Net inc. per share of common stock	$(.01)	$.02	$(.02)	$.09
Avg. number of shares outstanding	8,365,190	9,864,190	8,365,190	9,947,507

The board also voted the regular cash dividend of $.08 per share on its preferred stock payable on Nov. 9, 1990, to holders of record on Oct. 22, 1990.

PONTIAC, MICH. (AUG. 30) PR NEWSWIRE - First Federal Savings Bank and Trust (FFSBT), a wholly owned subsidiary of First Federal Bancorp, Inc. (AMEX: FFS) (FFB), has agreed to sell its Port Huron, Mich., branch office to the State Bank of Croswell (SBC) as part of its previously announced restructuring plans.

The announcement was made jointly by Leo D. Ottoni, president and CEO of FFB and FFSBT, and Robert S. Wait, president of SBC.

"We have been systematically tightening our operations for months and will continue to do so," Ottoni said. "This sale is just one more step in our continuing program."

FFB is listed on the American Stock Exchange under the symbol FFS. The sale is subject to approval by the Office of Thrift Supervision, the Michigan Financial Institution Bureau and the Federal Reserve Bank of Chicago.

"We believe this acquisition will enable us to provide our customers with convenient service in Port Huron," Wait said.

Eastern Michigan Financial Corporation (EMFC) is the parent company for SBC and the Sanilac County Bank. SBC has branches in Croswell, Lexington and Lakeport, and Sanilac County Bank has branches in Deckerville and Sandusky, Mich.

EMFC had total assets of $108 million as of June 30, 1990. SBC had total assets of $73 million as of June 30, 1990.

FFSBT is the fifth-largest thrift institution in Michigan. It has 28 branches in six southeastern Michigan counties and employs approximately 400 people. The bank was chartered more than 54 years ago.

FFSBT is a member of the Federal Home Loan Bank System and its deposits are insured up to the applicable limits by the FDIC. FFB had total assets of $1.4 billion on March 31, 1990.

CHARLOTTE, N.C. (AUG. 30) PR NEWSWIRE - Duke Engineering and Services, Inc., of Charlotte, N.C., and James Martin and Associates (JMA) of Reston, Va., have announced they will join forces to provide a wide range of services to the expanding utility market.

The primary product to be offered under the joint marketing agreement will be the Utility Planning Enterprise Model. This model provides a unique assessment of the business processes of a utility along with the information used to perform these processes.

The companies will combine the utility industry experience of Duke Engineering, the marketing and engineering affiliate of Duke Power Co. (NYSE: DUK), with the technical expertise of JMA, a worldwide leader in Information Engineering.

John Norris, Duke Engineering and Services president, said the models offer utilities a unique guide for planning strategic corporate direction and for implementing a full scale information architecture. "In the mid-1980s, we developed these models to help us map where we wanted to be and how we were going to get there," said Norris. "It has worked extremely well for us, and through the process we gained valuable insight that could benefit utilities across the country."

For example, Duke Power Co. is using the model to implement its information architecture. They have developed several relational database applications including Electrical System database, Materials and Equipment database and a Customer Service System.

In addition, the companies will offer consulting services in the areas of information strategic planning, business area analysis and application development. John Wyatt, JMA president, said Duke Engineering and JMA personnel will provide clients with extensive experience and background in these services. "With our combined talent and resources, we can provide the utility industry with services of the highest quality," he commented. Wyatt said that the new operation was well underway with a recently signed contract with People's Natural Gas of Pittsburgh.

CONTACT: Becky Apter of Duke Power Company, 704-373-5584 (office) or 704-598-1654 (home), or Holly Pollinger of the Adams Group, 301-279-5555 (office), for James Martin and Associates

LOS ANGELES (AUG. 30) PR NEWSWIRE - Bechtel Corp. has been chosen by ARCO Products Company of Los Angeles to initiate a major refinery modernization for ARCO (NYSE: ARC) facilities near Bellingham, Wash.

The program will commence in October with initial engineering and procurement provided by Bechtel's Southern California Regional Office, according to Del Zambon, manager of Business Development for Bechtel Petroleum, Chemical, and Industrial Company.

The central element of the refinery program, according to Zambon, will be the addition of a diesel hydrotreater. The result will be the reduction of the sulfur content in diesel fuels, providing cleaner burning fuels than in use today.

ARCO's Cherry Point facility near Bellingham processes approximately 178,000 barrels of Alaska North Slope crude oil per day, providing diesel, jet, automotive and fuel gases.

"This award is significant for Bechtel," Zambon said. "As industry strives to meet and exceed environmental requirements, Bechtel's engineering and procurement teams will be able to work with industry leaders to apply proven state-of-the-art processes and technologies," Zambon continued. "ARCO's program is an excellent example of bringing Bechtel's resources to meet today's needs," according to Zambon.

Bechtel, founded in 1898, is one of the world's leading engineering-construction management firms, and is headquartered in San Francisco. Bechtel's Los Angeles Regional Office offers the full range of Bechtel services, including environmental, power, space and defense, telecommunications, and transportation, in addition to its petroleum operations.

PITTSBURGH (AUG. 30) PR NEWSWIRE - National Intergroup Inc. (NYSE: NII) announced today that a hearing on the terms of the previously announced settlement of certain litigation relating to its pending tender offer for all outstanding cumulative convertible preference units of Permian Partners, L.P. was held as scheduled on Monday, Aug. 27, 1990, and that the parties plan to submit additional information to the Delaware Court on Tuesday, Sept. 4, 1990.

NII said that the court had indicated at the hearing that it intends to rule on the settlement promptly after receipt of such information. In addition, as announced on Wednesday, Aug. 29, NII plans to amend the terms of its tender offer with respect to the terms of the Contingent Value Rights offered thereby, and upon such amendment, plans to further extend the tender offer for a minimum of 10 business days.

LOS ANGELES (AUG. 30) PR NEWSWIRE - Liam Neeson, Sir John Gielgud and Joely Richardson have joined the cast of Twentieth Century Fox's "Shining Through," which stars Michael Douglas and Melanie Griffith, and is written and to be directed by David Seltzer, it was announced today. The film, which will be made in association with Sandollar Productions, will start filming Oct. 1 in London, Berlin and Austria.

A romantic spy thriller set during World War II, "Shining Through" is based on the best-selling novel by Susan Isaacs and chronicles the daring adventure of a Brooklyn-born secretary (Griffith) working in the New York office of the OSS, who persuades her boss (Douglas) to send her on a one-time mission to gather information in the home of a high ranking Nazi officer, Dietrich (Neeson), in Berlin. Gielgud portrays Sunflower, Griffith's key spy contact in Berlin, and Richardson plays Marguerite, a German girl who befriends Griffith.

Liam Neeson is the star of the current box office hit "Darkman." Among his other films are "Suspect," "The Mission," and "The Good Mother." Sir John Gielgud, one of the world's most respected actors, has among his many credits "Chariots of Fire," "Arthur," "Beckett," "Julius Caesar" and the BBC series "Brideshead Revisited." Joely Richardson starred in "Wetherby" with Vanessa Redgrave.

Twentieth Century Fox is primarily engaged in the financing, development, production, distribution and marketing of motion pictures throughout the world and is a unit of Fox Inc.

SMAMOKIN, PA (AUG. 30) PR NEWSWIRE - Central Pennsylvania Financial Corp. (NASDAQ: CPSA) announced today it is commencing a stock repurchase program to acquire up to 100,000 shares of the corporation's common stock, which represents approximately five percent of the outstanding common stock.

The program will be dependent upon market conditions and there is no guarantee as to the exact number of shares to be repurchased by the corporation.

John M. O'Brien, president and chief executive officer of the corporation, stated the board of directors authorized the repurchase program, which is expected to be completed within six months.

O'Brien said the board of directors considers the stock to be an attractive investment at current price levels. According to O'Brien, the repurchases generally would be effected through open market purchases. Although he did not rule out the possibility of unsolicited negotiated transactions or other types of repurchases.

Central Pennsylvania Financial Corp. is the parent company of Central Pennsylvania Savings Association. The association is the 18th largest federally insured savings institution in Pennsylvania.

Originally chartered in 1873, Central Pennsylvania conducts business from offices in Williamsport, Danville, Lewisburg, Shamokin Dam, Sunbury, Camp Hill, Mount Carmel, Shamokin and Hershey, Pa. Its Hamilton-Reliance division conducts business from offices in Norristown, Wayne, Warminster, West Point, Pa., and Philadelphia.

ORLANDO, FL (AUG. 30) PR NEWSWIRE - Joseph R. Wright Jr. and Robert E. Evanson have been elected directors of Harcourt Brace Jovanovich, Inc. (NYSE: HBJ) Alvin V. Shoemaker has resigned as a director of the company.

Wright is a vice chairman and a director of W. R. Grace & Co., New York. Before joining W. R. Grace & Co., he was director, Office of Management and Budget in President Reagan's Cabinet from 1988-1989 and Deputy Director from 1982-1988. Wright has served in the Department of Commerce (1981-1982) and the Department of Agriculture (1971-1976), as well as having been President of Citicorp Retail Services and Retail Consumer Services, Citicorp, Inc. (New York) and a vice president of Booz, Allen and Hamilton from 1966-1971. He is a graduate of Colorado School of Mines and holds a master's degree from Yale University.

In addition to being elected a director, Robert E. Evanson, who is an executive vice president and chief financial officer of Harcourt Brace Jovanovich, Inc., was also elected treasurer of the company. Evanson has been with Harcourt Brace Jovanovich since 1985; previously he was with Harper & Row, Publishers, Inc. He is a certified public accountant and was previously a partner in the firm Arthur Andersen & Co.

The directors also elected the following individuals to new positions: Bill M. Barnett becomes a senior vice president of the company. Barnett, who joined HBJ in 1961, has been a vice president of the company since 1983. He was appointed president of the College Division of Holt, Rinehart and Winston, Inc., a subsidiary of the company, in May 1990. Previously, he had been president of the College Department of Harcourt Brace Jovanovich, Inc.

Otto J. Nicols was elected controller of the company. Nicols joined the company in 1986, after HBJ acquired Holt, Rinehart and Winston and W. B. Saunders from CBS Inc. Nicols was elected an administrative vice president of the company in February 1990.

C. Anson Franklin joins the company as a vice president in charge of Corporate Communications. Franklin was assistant administrator for External Affairs at the U.S. Agency for International Development.

Previously he served as Assistant Secretary of Energy (Congressional, Intergovernmental, and Public Affairs) and assistant press secretary at the White House.

Harcourt Brace Jovanovich publishes general books, school and college textbooks, and psychological tests, as well as medical and scientific books and journals. It is also a major underwriter of life, health, and accident insurance through its subsidiaries Federal Home Life Insurance Company, PHF Life Insurance Company, and The Harvest Life Insurance Company.

#90242p0303 08/30/1990 ~PR Newswire

STAMFORD, CT (AUG. 30) PR NEWSWIRE - Debt-ridden Edgell Communications Inc. is looking for a way out. The beleaguered trade magazine publisher is offering investors a financial restructuring that in theory would increase everyone's stake in the company in exchange for more time to make ends meet, according to a report in the Sept. 15 issue of Folio:'s Publishing News. But one accountant who hasn't seen the specifics of the Edgell plan says such offers typically "exchange one worthless piece of paper for another." And other observers say that because of its preoccupation with its debt, the Cleveland and Duluth, Minnesota-based company's magazines are losing ground and stagnating in their markets. Even the company's chief acknowledges at least some magazines may be sold. Last year, Edgell posted $44 million in losses on revenues of $204 million.

VDT Radiation Levels Addressed at Conde Nast

The safety of video display terminals is a growing concern at one magazine company, according to a report in the Sept. 15 issue of Folio:'s Publishing News. Glamour magazine has reorganized its offices to ensure staffers are kept from within four feet of the backs and sides of a given terminal. Glamour's precaution stems from a recent test by the magazine Macworld of several popular VDT models that found radiation approaching levels associated with cancer is emitted at close distances. The Glamour move also is a response to studies showing that more radiation is emitted from the backs and sides of VDTs than the fronts. Glamour parent company Conde Nast Publications Inc. is considering employee seminars that would cover posture, hand placement, lighting and positioning of the VDT.

Environmentally Speaking, You Can Judge a Magazine by its Wrapper

The New Yorker was applauded two years ago when it stopped using plastic polybag wrappers and returned to brown paper wrappers. Now, according to a report in the Sept. 15 issue of Folio:'s Publishing News, The New Yorker

is going a step farther: it is using recycled paper for its paper kraft wrap. It took The New Yorker a while to find recycled paper strong enough to survive the binding process, but as concern for the environment grows, more and more printers are taking steps to return to kraft wrapping.

Is Your Recycled Paper Really Recycled?
It might depend on your definition of what's recycled. But a report in the Sept. 15 issue of Folio:'s Publishing News indicates very little of the recycled paper used by magazines contains "post-consumer" paper fibers - that is paper headed for the landfill that's been used by its ultimate consumer. The problem is twofold, industry figures say: first, post-consumer recycled paper presents drawbacks in quality, though they can be overcome. And second, a universal definition of recycled paper still needs to be established.

Penton Hops the Fast Track
The changing of the guard at Cleveland's Penton Publishing has brought a new atmosphere - and a much faster pace to the trade magazine publishing company. The staid style that was a company trademark is out, according to a report in the Sept. 15 issue of Folio:'s Publishing News. Arriving with new president Dan Ramella and new CEO (and former president) Sal Marino is a reorganization that stresses innovation, entrepreneurship, new revenue streams, and most of all, editorial quality.

One-Stop Marketing at Meredith
Meredith Corporation's new publishing director, Jay Burzon, is establishing a support group to further the company's "end-to-end marketing" efforts. In a question and answer session featured in the Sept. 15 issue of Folio:'s Publishing News, Burzon discusses a growing wave in magazine publishing: "You begin by advertising in our magazines and you end up in the store," he says. "We do everything, all along the marketer's pipeline, to determine where they need help -- whether it's research, sampling, promotion, event handling, in-store merchandising, or advertising."

MIAMI (AUG. 30) PR NEWSWIRE - The board of directors of General Development Corporation (NYSE: GDV) today named Thomas J. Hutchison chief executive officer effective Sept. 1, in addition to his duties as president and chief operating officer. Charles Simons remains chairman of the board.

"The appointment of Tom Hutchison as chief executive officer is a key

planned step in our effort to establish an entirely new senior management team for General Development," Simons said. "Since becoming president in July he has demonstrated the leadership and talent needed to bring General Development successfully through its reorganization process."

Hutchison, 49, has more than 25 years experience in real estate development and management, most recently as head of Hutchison Development Group of Easton, Md. He earlier was chief executive officer of Murdock Development Group of Los Angeles for seven years.

A native of South Bend, Ind., Hutchison attended Purdue University and the University of Maryland.

Hutchison is a member of the board of directors of Burris Foods, Inc., the Bank of Maryland and the Maryland State Bank; on the board of sponsors of Loyola College; the advisory council of the Peabody Institute of the John Hopkins University and has been a member of the Young Presidents Organization since 1979.

He has served on the board of directors of the John F. Kennedy Institute for Handicapped Children, the National Aquarium, the University of Maryland Medical System and on the Governor's Salary Commission of the State of Maryland.

VALLEY FORGE, PA (AUG. 30) PR NEWSWIRE - Alco Standard Corp. (NYSE: ASN) today announced that it has reached a decision to divest the companies within its Alco Food Systems Group.

Although these companies collectively are profitable, well-run businesses with dedicated management and employees, the company said they do not appear to have the inherent capacity to achieve the long- term growth goals established by Alco Standard.

No sales transactions are currently pending, and the amount of proceeds to be realized from the divestitures is not presently known; however the proceeds will be retained until the evaluation of various investment opportunities has been completed.

Ray B. Mundt, chairman and chief executive officer, said, "The actions we are recommending are in keeping with Alco's long tradition of responding and adapting to an increasingly competitive and changing world. They are also consistent with our commitment to take those steps which are necessary to maximize the growth of shareholder value over the long term."

The decision to sell these companies requires the retroactive restatement of the results of the Alco Food Systems segment from continuing to discontinued operations. After this restatement, earnings per share from continuing operations for the first nine months of fiscal 1990 were $1.59 compared with $1.63 in fiscal 1989, when earnings were favorably impacted by tax benefits associated with the utilization of the pre-acquisition net operating loss of Saxon Industries. Operating income from the company's continuing operations during the first three quarters of fiscal 1990 were $148.7 million, up an impressive 19 percent over $125 million in the first three quarters of fiscal 1989.

In addition, the company said it expects to establish reserves of approximately $8 million in the fourth quarter, or 13 cents per share, in connection with a judgment entered in unrelated litigation. Although the company said it believes it has excellent grounds to prevail on appeal, it is appropriate to establish these reserves at this time.

Alco Standard Corp., headquarterd in Valley Forge, is a publicly held company specializing in high growth, service-intensive industries. For its fiscal year ended Sept. 30, 1989, revenues were $4.1 billion.

#90242p0329 08/30/1990 ~PR Newswire

CLEVELAND (AUG. 30) PR NEWSWIRE - BP Oil announced today that customers who purchased home heat oil on the Sohio deferred billing program and the budget "keep-full" program from Aug. 1-15 will receive a 16.5-cent per gallon price reduction credit. The average customer (with an average delivery of 200 gallons) will receive a $33 credit on his bill, which will be mailed starting Sept. 15.

"Our price reduction program adjusts early August home heat oil prices to July prices," said Hugh Hanna, senior vice president, retail marketing, BP Oil.

"Because our deferred billing customers and budget 'keep-full' customers don't schedule their specific delivery dates they might have received a delivery during early August when oil prices were higher than July. To be fair, we are adjusting the price for early August deliveries to the July price levels," commented Hanna.

CONTACT: Anne Straitiff, (216) 586-6762; or Nancy Heinen, (216) 586-5342; both of BP Oil.

ANN ARBOR, MICH. (AUG. 30) PR NEWSWIRE - The world's No. 1 pizza delivery company and the world's No. 1 soft drink company today announced an expansion of their highly successful business partnership: Domino's Pizza stores now offer diet Coke.

For years Domino's Pizza has been able to offer consumers two popular products: hot pizza and ice-cold cans of Coca-Cola Classic. Now that union has grown to include the phenomenally successful diet Coke, the world's best-selling diet soft drink. Diet Coke was named the new product of the decade by Advertising Age magazine.

"We've been considering this for some years now, and the time is right," said Domino's Pizza President Dave Black, who announced the go- ahead at a national meeting of Domino's franchises last week in Atlanta, headquarters of Coca-Cola USA.

"Coca-Cola Classic has been a winner for us for a decade and we expect that the addition of diet Coke to our menu will further strengthen our leadership position in the marketplace," Black said. "When a product ranks first in the diet soft drink category, it's got a tremendous amount of clout and obvious consumer appeal. We're proud to offer it."

Domino's Pizza stores sold more than $75 million worth of Coca-Cola Classic in 1989.

Domino's Pizza has more than 5,300 stores throughout the United States and 21 international markets. Coca-Cola products are sold around the world.

CITY OF INDUSTRY, CA (AUG. 30) PR NEWSWIRE - Stor Furnishings International Inc. (NASDAQ: STOR) reported sharply higher sales and a reduced loss in the first quarter of fiscal 1991, Harvey G. Knell, chairman and chief executive officer, announced today.

The company also announced that it has signed a long-term lease for a fourth Stor supercenter to be opened in a major Texas metropolitan market in the Spring of 1991.

For the 16 weeks ended July 20, 1990, sales climbed to $22,714,000 from $16,264,000, in the corresponding period a year ago. A net loss of $1,638,000, equal to 28 cents per share, was sustained, compared to a loss of $4,102,000, or $1.04 per share, in the first period of fiscal 1990.

The net loss in this year's first quarter reflects the write-off of approximately $400,000 in prepaid production costs of an advertising campaign that the company has determined it may not be utilizing.

The per share calculations are based on 5,807,000 weighted average shares outstanding in the latest period, and 3,960,000 weighted average shares in the prior year. The increase is a reflection of Stor's initial public offering of 2,250,000 shares of common stock on April 27, 1990.

Knell commented: "The primary reason for the substantial rise in sales is the fact that our third supercenter in the Del Amo Fashion Center was open for the full quarter this year, whereas last year it was not open until June.

"It is important to add, however, that our original supercenter, here in the City of Industry, and our second unit in Tustin, both reported improved sales in the 16 weeks ended July 20, 1990. The three supercenters each contributed to our 39.7 percent sales increase with comparable store sales up 13.7 percent versus the same period of the prior year.

"Opening the Del Amo supercenter had an important impact on last year's first quarter results. Preopening expenses amounted to $1,827,000 in that quarter. There were no comparable charges in the first 16 weeks of fiscal

1991."

Knell added: "A key element in Stor's strategy is the opening of additional supercenters. Our initial public offering was made, in part, to help us fund this expansion. Unfortunately, our efforts in this area have been complicated by the unsettled state of real estate financing market.

SALISBURY, N.C. (AUG. 30) PR NEWSWIRE - The following is a response by Food Lion, Inc. (NASDAQ-NMS: FDLN) to the United Food and Commercial Workers union (UFCW) call for a boycott of Food Lion stores:

How ironic it is on this Labor Day weekend for a union leader to call for

the destruction of more than 45,000 jobs of Food Lion employees in retaliation for their desire to remain union free. Such blatant threats and arrogant disregard of true employee free choice is the kind of coercion of employees that totally desecrates the purpose and spirit of Labor Day.

The fact is, Food Lion opens more than 100 stores each year and adds more than 5,000 employees each year. Food Lion could not do this without offering competitive wages and excellent benefits. On average, Food Lion receives three to four applications for every available job. In America today, 93 out of every 100 retail workers have chosen to remain union-free. Given this fact, it is even more reprehensible that the United Food and Commercial Workers union would call for a boycott of Food Lion stores because the men and women working at these stores do not want to join the UFCW.

Labor Day is not Labor Union Day. Labor Day is a day to honor all working men and women of America.

MEMPHIS, TN (AUG. 30) PR NEWSWIRE - Holiday Inn Worldwide, the world's leading hospitality chain, recently signed an agreement with the Florida Youth Soccer Association, Inc. (FYSA) making it the official hotel of the FYSA.

More than 3,000 FYSA member soccer teams representing some 60,000 registered youth soccer players and 4,000 coaches participate in approximately 50,000 soccer matches throughout the state of Florida during one year.

"Holiday Inn hotels of Florida are proud to be the official hotel of the FYSA and look forward to working with them over the next year. We recognize the increasing popularity of soccer as an amateur sport within the state of Florida and know that this agreement will be a perfect complement to our SPORTS RATES program," says Buddy LaCour, president, Holiday Inn hotels of Florida.

Because the majority of travel for FYSA members is within the state of Florida, more than 100 participating Holiday Inn hotels in the Florida Hotel Marketing Association (HMA) have developed a special lodging and sweepstakes promotion for FYSA coaches, players and families.

FYSA members staying at participating Holiday Inn hotels in Florida become

eligible for weekend-getaway-for-two drawings when they send copies of their hotel guest folios to Florida Youth Soccer Association, 207 Hillcrest Street, Orlando, Fla. 32801. Drawings will be held quarterly through May 10, 1991.

"Although the majority of FYSA travel is within the state of Florida, our players and coaches also travel nationally and internationally. It was important that we select a hotel whose quality, service and rates we could depend on to serve as our home no matter where we travel," says Dr. Thomas Fleck, director of Educational Services and Coaching at FYSA.

For more than four years, the Holiday Inn SPORTS RATES program has offered special rates to amateur and professional sports groups, as well as individuals who direct sports-related travel such as coaches, athletic directors and professional scouts, according to Wilson Whitley, director, Sports Marketing, Holiday Inn Worldwide.

FYSA coaches and officials will receive SPORTS RATES identification cards entitling them to discounted rates starting at 20 percent off Holiday Inn hotels' non-discounted rates.

Reservations for SPORTS RATES rooms can be made by contacting any one of the 820 participating Holiday Inn hotels and asking for SPORTS RATES rooms. Reservations for 10 or more rooms can be made by calling 1-800-238-5510.

ROSEMEAD, CALIF. (AUG. 30) PR NEWSWIRE - What can you do if you want to help increase our nation's energy security? Try energy conservation! Southern California Edison has recently doubled its conservation budget with programs that help encourage energy efficiency and lessen our dependence on foreign resources.

These include:

- Residential Energy Management Incentive Program. This program provides cash rebates to residential customers who purchase and install energy efficient appliances (subject to certain restrictions), such as evaporative coolers, air conditioners, heat pumps and heat pump water heaters.
- Welcome Home Program. Incentives offered to builders who construct homes, condominiums and apartments which surpass state energy efficiency standards.
- Customer Assistance Programs. These are designed to help qualified, low-income customers, senior citizens, the

permanently handicapped, and non-English speaking customers control their energy use. These include residential energy surveys, energy efficient relamping, evaporative cooler maintenance, installing clock thermostats, weatherization items and bilingual communication.

-- Design for Excellence Program. This program awards money and recognition to the non-residential business community for integrating energy efficiency into building design.

CIA Energy Surveys. Commercial, industrial and agricultural customers can obtain energy management information from specially trained energy services representatives.

-- Hardware Rebate program. This program provides cash rebates to commercial, industrial and agricultural customers who purchase and install energy efficient hardware that reduces energy usage or shifts demand.

-- Pump Test Program. Agricultural customers and water districts can have their water pumps tested and evaluated by Edison.

-- Electric Motor Pump Test Program. Commercial, industrial and agricultural customers are encourage to use energy efficient electric motors as a pumping source to replace polluting internal combustion engines.

For more information about Edison's energy efficiency programs, call Edison's toll-free Action Line at 1-800-952-5062.

DALLAS (AUG. 30) PR NEWSWIRE - American Airlines' AAdvantage members will earn double miles on selected nonstop transcontinental flights Sept. 5 through Oct. 31. Markets included in the promotion are New York's Kennedy-Los Angeles (LAX), Newark-Los Angeles, Boston-Los Angeles, Washington, D.C.'s Dulles-Los Angeles, Kennedy-San Francisco, Kennedy-San Jose and Kennedy-San Diego.

The double mile bonus is equal to actual flight miles. For example, a coach class Kennedy-Los Angeles flight provides 2,475 miles. The AAdvantage member will earn a total of 4,950 miles for the trip.

This bonus is in addition to any other bonus the member may be eligible for, for example, the first class bonus of 50 percent, or the California Corridor bonus.

CHICAGO (AUG. 30) PR NEWSWIRE - Centel Corporation (NYSE: CNT) announced today that James A. Lovell Jr., executive vice president and a member of the board of directors, has retired from the company's board, effective today. Lovell, 62, will remain a consultant with the company.

"Jim Lovell has been an integral part of the success of Centel," said John P. Frazee Jr., Centel's chairman and chief executive officer. "His insights, gained from his experience as an astronaut, pilot and business leader, have helped us tremendously. He is respected and admired, not just here at Centel, but by people all across the world."

With Lovell's retirement, Centel has 12 members on its board. "I am very satisfied at what we have accomplished at Centel," Lovell said. "The company has enjoyed many successes and I'm happy to have played a part in them. I look forward to remaining in the Chicago area and intend to remain active in other civic and corporate organizations."

Lovell joined Centel in 1980 while serving as president of Fisk Telephone Systems when Centel acquired the company. He was elected executive vice president in 1984 and became a member of the Centel board in 1985.

During his career with Centel, Lovell held a variety of executive positions, managing the company's human resources, corporate communications, investor and government relations, technical planning and data services departments. He also served as president of Centel Communications, where he directed the company's cable television and business systems operations.

A former astronaut, Lovell served as command module pilot and navigator on the Apollo 8 moon mission and was spacecraft commander for the Apollo 13 flight. He held the record for time in space, 715 hours, until surpassed by the Skylab flights. He retired from active Navy duty in 1973. Among his many honors, he has received the Presidential Medal for Freedom, the NASA Distinguished Service Medal, the Navy Distinguished Service Medal, two Navy Distinguished Flying Crosses, and in 1989 he was presented with the French Legion of Honor by the government of France.

He is a member of the board directors of Bally Manufacturing Inc. (NYSE: BLY), DeSoto Inc. (NYSE: DSO), and Federal Signal Corporation (NYSE: FSS).

HOUSTON (AUG. 30) PR NEWSWIRE - Stewart & Stevenson Services Inc. (NASDAQ: SSSS), a leading manufacturer of diesel and gas turbine powered equipment, today announced net earnings of $7,542,000 or 51 cents per share on revenues of $160,006,000 for the second quarter ending July 31, 1990. These results compare to income of $6,439,000 or 47 cents per share on revenues of $146,378,000 for the same period one year ago. Earnings for the first six months totaled $14,779,000 or 99 cents per share on revenues of $303,702,000 compared to revenues of $274,069,000 and net income of $13,037,000 or 95 cents per share for the first half of 1989.

Once again, we are pleased to announce a modest improvement over the prior year. The 8.5 percent increase in quarterly earnings per share was achieved in spite of the heavy deliveries (exceeding $18 million) under the Peace Shield contract a year ago.

Each of the company's two segments is performing well. At the quarter's end the level of unfilled equipment orders totaled $304 million. While unfilled orders are somewhat flat in comparison to the prior quarter, it is important to note that the company operation and maintenance contracts, which are not reported in this backlog, have grown dramatically in recent years. These contracts, which involve the operation of power generation and cogeneration facilities, currently exceed $70 million and will be included in future backlog announcements.

Consolidated operating results for the three and six months ended July 31, 1990 were as follows:

	Dollars in thousands except per share data	
Three Months Ended July 31,	1990	1989
Sales	$160,006	$146,378
Net earnings	7,542	6,439
Net earnings per share	.51	.47
Total shares outstanding	14,907	13,762
Six Months Ended July 31,		
Sales	$303,702	$274,069
Net earnings	14,779	13,037
Net earnings per share	.99	.95

BALTIMORE (AUG. 30) PR NEWSWIRE - Westinghouse Electric Corp. (NYSE: WX) today announced it has assumed a key role in the planned development of

Worldbridge Centre, a high-technology Asian-themed cultural, trade and investment complex planned for Eastern Baltimore County's Middle River area.

The announcement was made by Richard A. Linder, president of Westinghouse's Electronic Systems Group here, and Asia/USA Development Corp. President Dean Gitter.

Westinghouse will become project manager and systems integrator as well as one of the limited partners of Asia West Limited Partners, a new organization led by general partner Asia/USA Development Corp. Gitter, who has spearheaded the Worldbridge effort since its inception, will remain president and chief executive of Asia/USA Development Corp.

Westinghouse's Commercial Systems Divisions -- a unit of the Electronic Systems Group -- will serve as prime systems manager for the business and entertainment complex which will be devoted to increasing trade, communication and cultural exchange between the eastern United States and the Asia Pacific region.

The first phase of the $1 billion, 1,000-acre project is scheduled for completion in 1993-94.

"Through this association with Asia/USA Development Corp., we look forward to their completing a state-of-the-art facility that advances the concept of a world trade and financial center showcasing a host of 21st century technology," Linder said. "By participating in this project, we hope to expand the sales of our systems and technology worldwide as well as enhance the business and cultural base of both the state of Maryland and Baltimore County."

Committed to continuous growth, Westinghouse established the Commercial Systems Divisions this past January to capitalize on its world-class engineering and systems capabilities in non-defense sectors.

"We are pleased that a firma with Westinghouse's engineering, communications and systems integration expertise has recognized the world-class scope of this project and put its resources and technological prowess behind it," Gitter said. "Westinghouse plays a major role in the international trade arena and is ideally positioned to help move this project forward."

The first two elements of Worldbridge Centre will be the Pacific World Trade & Investment Center patterned after existing world trade centers in Taiwan, Japan and Korea, and the Asia/USA Worldpark designed as a first-class entertainment and educational facility similar to Disney's Epcot Center.

Other planned elements of the project include an East-West retail shopping center, a world-class hotel and conference center, and a country club-style residential complex.

DALLAS (AUG. 30) PR NEWSWIRE - Southwest Airlines is spreading its promotional wings over some new turf -- the gridirons of the nine universities of the Southwest Conference.

The Dallas-based airline today announced a broad, sports-themed program tied to its umbrella sponsorship of the conference whose member schools include: The University of Arkansas, Baylor University, University of Houston, Rice University, Southern Methodist University, The University of Texas, Texas A&M University, and Texas Tech University.

"We're very proud and excited to become associates with the Southwest Conference and its schools," said Southwest Airlines Chairman of the Board President and Chief Executive Officer Herb Kelleher. "The relationship is more natural than just a name we share," Kelleher continued. "The Southwest Conference programs and those of its member schools embody competitiveness and teamwork which are also key ingredients in the continued success and growth of our company."

Southwest Airlines Vice President for Sales and Marketing Don Valentine said the conference sponsorship marks the first significant use of college-level sports to market Southwest Airlines' services. Valentine also explained the sponsorship is integrated with the airline's plan to observe its 20th anniversary in 1991.

The sponsorship packages give Southwest Airlines exclusive title rights as

the "Official Airline of the Southwest Conference."

Highlight of the program is a special hour-long videotape, "Legends of the Southwest Conference," which will focus on conference football greats from the last 20 years. The video was developed jointly with Coca-Cola, and will be available to consumers at special Coca-Cola displays at participating grocery outlets throughout the conference beginning in early September.

"This exciting video retrospective comes at an important period of conference evolution. We think it will be a 'must-have' for every conference football fan," said Guy Thomas, Coca-Cola Enterprises.

Internally, the conference sponsorship will focus on Southwest Airlines' frequent flyers. The Southwest Airlines "Pass-Sport" will offer Southwest Airlines COMPANY CLUB members free sports-themed merchandise as a travel incentive during the eight-week promotion. Members who fly eight roundtrips will be able to select an item bearing their favorite conference school's logo.

ANN ARBOR, Mich. (AUG. 30) PR NEWSWIRE - Great Lakes Bancorp (NASDAQ-NMS: GLBC) and Union Federal Savings Bank of Indianapolis announced today they have signed a definitive agreement to exchange Great Lakes' six branches in Indianapolis for four branches owned by Union Federal Savings in Hamilton and Middletown, Ohio. Great Lakes recently acquired Dollar Federal Savings Bank in Hamilton.

"This exchange strengthens Great Lakes' market position in the Hamilton area," said Dennis E. Pearsall, executive vice president of banking services at Great Lakes Bancorp. "Both Great Lakes and Union Federal will realize cost efficiencies from concentrating their resources to achieve greater market share."

Jerry Von Deylen, president of Union Federal, said, "The six Great Lakes branches will complement our existing Indianapolis network. They fill market gaps in the metro area where we were looking to add branches."

Dollar Federal, a subsidiary of Great Lakes Bancorp, has $140 million of deposits and five branches in Butler County, north of Cincinnati. Butler County is the second-fastest growing county in Ohio. The addition of Union's four branches will add $130 million of deposits to Dollar Federal.

Union Federal, Indiana's largest privately held savings bank, operates 39

branches, as well as Union Federal Savings Bank of Frankton. The six branches that Union Federal will receive in the exchange have $110 million of deposits.

Great Lakes Bancorp has 58 branches in Michigan and operates Dollar Federal Savings Bank, with five branches, in Hamilton. Great Lakes also operates Great Lakes Mortgage Co., a mortgage banking subsidiary. With $3.7 billion in assets, Great Lakes Bancorp is Michigan's second-largest savings bank.

The exchange is subject to the approval of federal regulators.

ALEXANDRIA, VA (AUG. 30) PR NEWSWIRE - PHP Healthcare Corporation (NASDAQ-NMS: PHPH), a major supplier of medical services and personnel for the Department of Defense, reported a 77 percent increase in earnings before extraordinary items for its first quarter ended July 31, 1990, when compared to the quarter ended July 31, 1989.

First quarter earnings before extraordinary items increased to $824,000 (25 cents per share) over $466,000 (12 cents per share) for the comparable quarter last year. The increase in net earnings was even more favorable, increasing to $824,000 (25 cents per share) over a net loss of $284,000 (8 cents loss per share) for the comparable quarter last year.

The company also achieved its highest quarterly revenues in its history. Revenues increased 36 percent to $22.9 million over $16.8 million for the comparable quarter last year.

Management attributes its strong performance to the increased demand for services by the Department of Defense and the commencement of new projects. Charles H. Robbins, the company's president and chairman, stated, "Our improved performance is a result of our long-term commitment to meeting diversified critical healthcare needs through innovative, cost-effective health delivery partnerships with governments at the local, state and federal levels." PHP is meeting these critical health care needs in five major areas: ambulatory care, medical staffing, mental health, long-term care and total managed care.

#90242p5707 08/30/1990 ~PR Newswire

MINNEAPOLIS (AUG. 30) PR NEWSWIRE - GV Medical, Inc. (NASDAQ:GVMI) today announced that it has submitted an application to the U.S. Food and Drug Administration (FDA) to begin human clinical studies of a new laser system designed to remove plaque from clogged coronary arteries. The application submitted to the FDA is for an investigational device exemption (IDE), the first step in the regulatory process for new medical devices.

Initial clinical work is scheduled to begin later in 1990 at the Cleveland Clinic Foundation. The laser system, which features diagnostic as well as therapeutic capabilities, is being developed under an agreement between Massachusetts Institute of Technology, the Cleveland Clinic Foundation and

GV Medical.

James R. Grabek, president of GV Medical, said the new laser system was designed to overcome shortcomings demonstrated by the systems currently available. "The system uses a unique source of laser light and delivery capabilities that make it a true third-generation product," Grabek said. "We look on the new system as a major step in the evolution of laser angioplasty, and we are pleased to be associated with MIT and the Cleveland Clinic Foundation in this effort."

Grabek said papers reviewing research conducted by MIT and the Cleveland Clinic Foundation into the diagnosis and treatment of atherosclerosis with various laser systems will be presented on Friday, Sept. 7, at the Fourth International Workshop on Future Directions in Interventional Cardiology in Santa Barbara, Calif., sponsored by the American College of Cardiology. The papers, which will include certain aspects of the new system being developed for GV Medical, will be delivered by Dr. Michael S. Feld, director of the George R. Harrison Spectroscopy Laboratory at MIT, and Dr. John R. Kramer, Jr., cardiologist at the Cleveland Clinic Foundation.

GV Medical, based in Minneapolis, also produces the LASTAC(R) System, which uses direct laser energy to vaporize arterial plaque, creating a channel into which a balloon catheter can be inflated to complete the opening of the vessel. The system has been approved by the FDA for use in leg arteries, and has been under clinical evaluation in coronary arteries since March of 1988. More than 1,500 procedures using the LASTAC System have been performed worldwide, including 170 coronary procedures, the company said.

PHILADELPHIA (AUG. 30) PR NEWSWIRE - Consolidated Rail Corp. (NYSE: CRR) is investing $28 million to upgrade sections of its Chicago Line, which links Chicago and Albany, N.Y.

The work, which began in May and is scheduled to be completed in late fall is part of Conrail's capital program for 1990. The project includes the installation of more than 205,000 crossties and the surfacing (raising and smoothing) of more than 720 miles of supporting railbed. The work is being done in Illinois, Indiana, New York, Ohio, and Pennsylvania.

The 800-mile-long Chicago Line, one of Conrail's busiest rail corridors, runs via Buffalo, N.Y., Cleveland and Toledo, Ohio, and Elkhart, Ind. Conrail's high-speed, high-priority intermodal trains, carrying a wide

variety of consumer products, use the route daily. Other trains on the line carry commodities such as new motor vehicles, automotive parts, coal, food products, steel, grain and a variety of manufactured goods.

"Conrail's capital program enables us to provide safe, reliable and customer-responsive service," said James A. Hagen, Conrail's chairman, president and chief executive officer. "Projects such as this will provide a sound track structure essential to Conrail's ability to compete in the transportation marketplace."

MAHWAH, NJ (AUG. 30) PR NEWSWIRE - Graham W. Whitehead, CBE, president of Jaguar Cars Inc. and a director of Jaguar Ltd. in the UK, has announced that he will retire from the company, effective Oct. 1, 1990. This month Whitehead celebrates 45 years of service with Jaguar Cars and/or its predecessor companies. He will be 62 years of age on Sept. 13.

Michael H. Dale, 55, has been appointed president of Jaguar Cars Inc. He had been senior vice president with responsibility for the company's sales operations and marketing activities.

In making his announcement Whitehead stated: "After 45 years in the business and with my 62nd birthday coming up, I think it is an appropriate time to turn the presidency over to my successor. Handing the presidency over to Mike Dale will ensure a smooth transition. Mike has been responsible for our sales, marketing, parts and service activities for a long time. He and I have worked together closely for many years and he has my full support and best wishes."

In a tribute to Graham Whitehead, Bill Hayden, chairman and chief executive of Jaguar Ltd. in the UK, stated: "Graham W. Whitehead has been one of the outstanding motor industry executives of his generation. Of his 45 years service to the British motor industry, more than 30 have been spent representing it in North America. During his time as president of Jaguar and its predecessor companies in the U.S., he has been responsible for export sales of almost one million British motor cars worth in excess of $10 billion.

Born in Kidderminster, England, he began his automotive career as an engineering staff apprentice with Wolseley Motors Ltd. in 1945. From 1955 on he held various posts overseas with British Motor Corporation Ltd., becoming senior sales executive for BMC (USA) Ltd. in New York in 1959.

When British Motor Corporation/Hambro Inc. was established in 1963, he continued as senior sales executive and later was named executive vice president.

When British Motor Holdings (USA) Inc. was formed through merger of BMC/Hambro and Jaguar Cars Inc., Whitehead was named president. In 1968 he became president of British Leyland Motors Inc. when that company was formed through merger of British Motor Holdings and Leyland Motor Corporation of North America. He was made managing director of the North American division of British Leyland International in 1971. The U.S. company was re-named Jaguar Cars Inc. in March of 1983.

IRVINE, CA (AUG. 30) PR NEWSWIRE - Toshiba America Information Systems Inc. (TAIS) and Tech Data Corp. (NASDAQ: TECD) jointly announced today that the legal action taken by TAIS has been dropped. The companies reported that several recent meetings between the two companies have been instrumental in developing a plan to address the remaining points at issue.

"We feel a better understanding of both sides of the issues has been reached, allowing us to agree on an action plan," stated Tom Scott, vice president of sales for Toshiba. John Higgins, vice president of marketing for Tech Data of Clearwater, Fla., stated, "We believe the plan will provide the basis for rapid resolution of all issues."

Toshiba America Information Systems is a wholly owned subsidiary of Toshiba America Inc. Seven divisions within TAIS market a wide range of office automation products within the United States. The Toshiba Computer Systems Division markets and supports high-quality Toshiba portable personal computers and peripherals for the United States marketplace.

CONTACT: Howard Emerson of Toshiba America Information Systems Inc., Computer Systems Division, 714-583-3925; or Brenda Bennett of Hill and Knowlton Inc., 714-752-1106, for Toshiba America Information Systems.

CONCORD, CA (AUG. 30) PR NEWSWIRE - Fibreboard Corp. (AMEX: FBD) today announced that the court in the "Cimino" asbestos personal injury consolidated trial in Beaumont, Texas yesterday approved an agreement and stipulation between Fibreboard and other parties to the action that provides substantial relief from appeal bonding requirements.

Fibreboard had been concerned that it might be unable to obtain bonds to stay the execution of future judgments which might be entered in the approximately 2400 personal injury cases that have been consolidated in "Cimino." If bonds were required in an amount sufficient to cover the possible judgments in all these cases in order to pursue appeal of those judgments, the company had said that it might be forced to seek protection afforded by the bankruptcy laws.

The stipulation announced today, among other things, should allow Fibreboard to appeal all relevant issues arising out of the trial. It will be required to post a bond covering only the first nine individual actions on which judgment is expected to be entered. Fibreboard expects to be able to obtain bonds in amounts sufficient to cover these nine judgments, estimated by Fibreboard to be approximately $3 million. While there are additional trial court proceedings in the coming weeks which could further affect the stipulation, the company believes that the agreement and stipulation approved yesterday substantially resolves its concerns regarding its ability to appeal adverse judgments in the "Cimino" case.

Fibreboard anticipates it will be several months before the issues in "Cimino" will be appealed. At that time, the court is expected to enter final judgments in approximately 175 cases against Fibreboard and the other co-defendants. However, the court will stay execution of all judgments pending appeal to the Fifth Circuit and will require a bond to be posted covering only 9 of the final judgments. An appeal to the Fifth Circuit Court of Appeals may take up to 18 to 24 months. Fibreboard Chairman and President Lawrence C. Hart stated, "Fibreboard continues to believe that many procedures used in "Cimino" violate both federal and state due process requirements and it intends to assert this and other issues to the Fifth Circuit."

Fibreboard Corp., headquartered in Concord, Calif, manufactures lumber, hardwood plywood, moulding and millwork, agricultural container components composite structural lumber, precision molded industrial insulation and fireproofing materials. It also owns and operates Northstar-at-Tahoe, a ski resort and year-round vacation and conference center in California.

HILTON HEAD ISLAND, S.C. (AUG. 30) PR NEWSWIRE - Southern Links Magazine Publishing Associates (SLMPA), publisher of the award-winning "Southern Links" magazine, has announced it will launch a twin bi-monthly publication, "Western Links," on January 1, 1991.

"We are tremendously excited about 'Western Links,'" said Jack Purcell, publisher of the Southern Links and managing partner of SLMPA. "Like its twin publication, 'Western Links' will serve a strong niche not presently served by traditional golf magazines. And by expanding to the West, we're now considered a 'national buy,' which is an important point to our advertisers. The West is a vibrant, growing golf market, and we anticipate great success."

"Southern Links" is a bi-monthly, request-controlled circulation publication based in Hilton Head Island, S.C. The two-year-old magazine focuses on highlighting new golf courses, resorts and communities of the golf-rich South, as well as the traditions and values that are shaping the future of golf.

Like its twin publication, "Western Links" will be a "where to" rather than a "how to" golf magazine, offering readers an attractive package of spectacular photography, outstanding writing and an upbeat, easy-to-read format. In accordance with its name, "Western Links" will concentrate on the 13 western states -- including Hawaii -- offering in-depth travel pieces about some of the world's finest golfing destinations.

According to Purcell, "Western Links" will showcase the best of western golf and highlight what is best about the game of golf. It also will explore emerging trends and controversial issues, offer exclusive interviews with golf's legends and leaders, and provide new insights into the rich history, traditions and future of the sport.

"Southern Links" has a request-controlled circulation of 170,000 with an estimated readership of over 500,000 in all 50 United States, plus Canada and the Caribbean. "Western Links" has a projected request-controlled circulation of 40,000 for 1991. Advertisers will now be offered a national advertising package of 210,000. The average reader for both magazines is 48 years old, plays 55 rounds of golf each year, and has an average annual income of $118,000.

(AUG. 30) UPI - Iraqi President Saddam Hussein says ''Kuwait is part of Iraq'' and that his country will NOT pull out of the oil-rich emirate it invaded almost four weeks ago. In an interview, Saddam also flatly denied that there are any behind-the-scenes negotiations underway toward an Iraqi withdrawal from Kuwait... as has been reported. Yet, the Iraqi leader seemed to suggest he is open to ''new ideas'' to resolve the crisis. In his words- ''Any idea that may be submitted to us, will certainly get our response.''

The two most powerful men in the Soviet Union are vowing to bury their differences. Soviet President Gorbachev and Russian republic president Boris Yeltsin met for five hours in Moscow Wednesday and agreed to work together for the sake of the country. During a break, the two made an UNprecedented appearance on an official television news show. They stood side by side... at times laughing and finishing each other's sentences.

West German officials say talks between Chancellor Helmut Kohl and the opposition Social Democrats ended early Thursday in Bonn with NO agreement on new abortion legislation. Further talks are scheduled for Thursday evening. The matter is the last hurdle to a key unification treaty. All parties involved agree that for an interim period after the October 3rd unification, abortion will remain legal in what's now East Germany and generally illegal in West Germany. The time frame for passage of a permanent law by an all-German government is what's hanging things up.

The collapse of a subway grating in midtown Manhattan Wednesday night left one person dead and two more injured, one critically. New York authorities say the three... apparently homeless... were sitting atop the grating when it gave way. One victim crawled to safety. A second was pulled from the wreckage by rescuers. But the third was killed... pinned beneath a compressor.

(AUG. 30) UPI - SPORTS TRANSACTIONS

BASEBALL

Baltimore - Acquired pitcher Brian Dubois on waivers from Detroit.

Chicago - Activated pitcher Rick Sutcliffe from 60-day disabled list; optioned pitcher Dave Pavlas to Iowa of American Association (AAA).

Houston - Activated first baseman Glenn Davis.

Montreal - Recalled outfielders Moises Alou and Rolando Roomes and pitcher Howard Farmer from Indianapolis of American Association (AAA).

New York (NL) - Placed shortstop Kevin Elster on 60-day disabled list.

Oakland - Acquired outfielder-designated hitter Harold Baines from Texas for two players to be named; optioned outfielder Dann Howitt to Tacoma of Pacific Coast League (AAA).

Philadelphia - Signed outfielder Lenny Dykstra to a 3-year contract.

Seattle - Signed free agent Ken Griffey Sr.; placed pitcher Mike Schooler on 15-day diabled list.

Texas - Placed pitcher Mike Jeffcoat on 15-day disabled list, retroactive to Aug. 21; activated pitcher Kevin Brown from 15-day disabled list; recalled outfielder Juan Gonzalez from Oklahoma City of the American Association (AAA).

Toronto - Optioned pitcher Rob Macdonald to Syracuse of the International League (AAA).

BASKETBALL

Cedar Rapids (CBA) - Named Steve Kahl assistant coach.

Charlotte - Named Tom Nissalke assistant coach.

Houston - President Ray Patterson retired, effective Sept. 1.

COLLEGE

Canisius - Named Raymond Hennessy assistant baseball coach.

Dartmouth - Named Mike Brass strength and conditioning coach and Steve Plisk his assistant.

Manhattan - Named Liam Frawley graduate assistant trainer.

Monmouth - Named Jeff Stapleton assistant director of athletics.

FOOTBALL

Atlanta - Placed linebacker Galand Thaxton on injured reserve.

Cincinnati - Signed wide receiver Reggie Rembert.

Dallas - Acquired tight end Rob Awalt from Phoenix for 1991 draft pick; released defensive end Lybrant Robinson.

Detroit - Signed linebacker Jimmy Williams to a 1-year contract.

Indianapolis - Placed running back Eric Dickerson on non-football injury reserve list.

NY Jets - Waived cornerback Irvin Smith; activated center Jim Sweeney.

Philadelphia - Signed running back James Gray.

Phoenix - Traded tackle Mike Zandofsky to San Diego and tight end Rob Awalt to Dallas for draft picks.

San Diego - Waived wide receiver Elliott Searcy.

Hockey

New Jersey - Named Doug Sulliman assistant coach.

#90242u0148 08/30/1990 ~United Press International

WASHINGTON (AUG. 30) UPI - Despite its flaw, the Hubble Space Telescope has discovered an unusually dense galaxy that could contain a mysterious

black hole and an unexpected ring around an exploded star, NASA announced.

The new discoveries demonstrate the $1.5 billion telescope can perform valuable science until its embarrassing blurry vision can be corrected, NASA project scientist Edward Weiler said Wednesday.

''We've always talked about (the telescope) giving us discoveries and the unexpected. In terms of that, I think the dream is still alive,'' Weiler said at a news conference televised from the Goddard Space Flight Center in Greenbelt, Md..

The telescope's wide-field planetary camera captured an image Aug. 17 of what was considered a ''rather boring'' galaxy located about 40 million light years away from Earth.

Astronomers were surprised to find the galaxy, known as NGC 7457, had a core that is the second most dense ever seen, said Tod Lauer of the National Optical Astronomy Observatory.

The core of the galaxy apparently contains at least 30,000 closely packed suns, which is 400 times denser than astronomers could tell from images taken by telescopes on Earth, Lauer said.

''This is vastly denser than we would have expected this galaxy to be,'' Lauer said. ''This is very interesting to me because it's a lot more concentrated than we would have expected these galaxies to be.''

Although the galaxy's core could contain a long-sought black hole, the scientists said it was premature to make that conclusion.

Black holes are formations astronomers theorize exist that contain a huge amount of mass compacted into an extremely small area, making its pull of gravity so strong that nothing, not even light, can escape.

''This image ... is certainly not inconsistent with a black hole. However it's not inconsistent with other explanations,'' Weiler said. But he added ''It's either a black hole or a place you would not want to live.''

On Aug. 23, the telescope's faint object camera took an image of supernova 1987a, a star that exploded about 160,000 light years from Earth in February 1987.

The image showed that the star was unexpectedly surrounded by a ring of hot material, said Duccio Macchetto of the European Space Agency, which built the camera.

''We knew that there should be some material around this star. But what we did not expect to see was a ring as we see here,'' he said. ''We have

found something that we didn't know was there.''

Nino Panagia of the European Space Agency said that in ''trying to make sense out of this beautiful image'' scientists believe the ring formed during the last 1 million years before the star exploded and was later compressed.

''In this one single image we have the complete evolution of that star in the last million years. That makes it very, very important,'' he said.

Officials plan to release more scientific data collected by the telescope on Sept. 19 at the Space Telescope Science Institute in Baltimore.

''Today's two images were appetizers and hopefully that will be the main course,'' Weiler said.

The telescope was expected to answer profound questions about the universe by peering deep into the univere with advanced optic system from a perch high above Earth's obscuring atmosphere.

But about a month after the long-awaited observatory was ferried into space in April, officials discovered one of its supposedly perfect mirrors was curved incorrectly, preventing sunlight from focusing sharply.

The defect, combined with other problems, triggered a storm of criticism against NASA, even though officials said it could still conduct valuable research and could be fixed when a camera is replaced in 1993.

-30- 3972

#90242u0153 08/30/1990 ~United Press International

ISLAMABAD, PAKISTAN (AUG. 30) UPI - Ousted Prime Minister Benazir Bhutto Wednesday accused the interim government of blackmailing her into renouncing politics, and said the government was trying to isolate her by setting up special courts as a witch hunt against her supporters.

''These courts are basically aimed at my husband and my other supporters '' she said. ''They are trying to blackmail me in the courts, but I won't be blackmailed.''

President Ghulam Ishaq Khan had announced the formation of special tribunals Tuesday to assess ''accountability'' of anyone that, in the opinion of the interim government, committed offenses that were ''shocking to public morality or had led to public outrage or created panic or an atmosphere of fear or anxiety.''

His presidential decree allows the interim government for the first time to prosecute people not elected to public office.

Benazir's businessman-husband, Asif Ali Zardari, has been widely accused of corruption by the caretaker government and it is thought he might be one of the first to be called before the new courts.

The courts appear ready to hear charges ranging from kidnapping and rape to forging documents or cheating. The presidential decree has also made it an offense to bring the courts into ''hatred or ridicule.''

Benazir claimed that the accountability process, ironically written into the constitution by her father, Prime Minister Zulfikar Ali Bhutto, was being made a pretext to suppress her supporters.

Bhutto's Pakistan Peoples Party criticized the actions of the president as ''illegal and unconstitutional'' when on Aug. 6 he sacked Bhutto's government and dissolved the National Assembly and appointed a caretaker government to run until elections scheduled for Oct. 24. The government has been criticized in the Pakistani press for its anti- Bhutto stance.

Many analysts are becoming convinced that the interim government will do anything to ensure that Bhutto does not contest the elections. Bhutto has accused the caretaker government, under Ghulam Mustfa Mustafa Jatoi, of trying to imprison her husband in an effort to isolate her.

Observers believe she would be very much alone without her husband. Her mother, a minister in Benazir's administration, has already left the country, traveling to London for an operation. Her brother Murtaza lives in exile in Syria, tried in absentia under martial law before Benazir came to power.

Another brother was poisoned mysteriously in France five years ago while her father was hanged by President Zia-ul Haq in 1979 for conspiring to murder a political opponent.

Furthermore, many workers from Benazir's Pakistan Peoples Party have been arrested in southern Sind province in the last two days. The Peshawar-based daily The Frontier Post Wednesday reported that police detained some relatives without warrants when they could not find the people they were looking for. None has yet been charged.

Jatoi's caretaker government is also having serious credibility problems among Western analysts. Jatoi himself has lost two seats in the past in his home constituency and he has appointed a Cabinet whose sole uniting feature is its hatred of Bhutto.

In fact, several former PPP leaders changed sides last week, prompting speculation among analysts that the interim government is offering money and land to encourage deserters from Bhutto's ranks.

The president's only answer to charges of horse trading was that ''horses were free to graze where they liked.''

Immediately after her ouster, even Benazir's physical safety was not secure for the first 24 hours after her ouster. In fact, she believed she was under house arrest. Troops surrounded her official residence and movement in and out was curtailed. Even her kitchen staff were ordered home by military personnel, forcing her to order food from a nearby hotel.

There was also a fear that her name had been placed on the exit control list, preventing her from leaving the country.

Minister of Information Syeda Abida Hussain Tuesday denied accusations that Bhutto was being hounded by the interim government.

''She has had complete freedom of movement and speech and has had every occasion to meet members of the national and international press,'' Hussain said.

#90242u0189 08/30/1990 ~United Press International

(AUG. 30) UPI - A report says the C-I-A and other U-S military special forces are aiding the Kuwaiti resistance against Iraqi forces in occupied Kuwait. Intelligence sources are quoted as saying resistance forces almost every day ambush Iraqi convoys carrying troops and supplies and attack storage facilities. One Pentagon official describes the resistance as a force of a few thousand Kuwaiti soldiers who escaped to Saudi Arabia just ahead of the Iraqi invasion four weeks ago.

Lockheed unveiled its version of the next generation of supersonic fighters Wednesday at its flight test facilities in Palmdale, California. Its chairman used the ceremony to whip up support for the 70-BILLION-dollar program by invoking the Mideast crisis. A team made up of Lockheed, Boeing and General Dynamics is competing with a Northrup-McDonnell Douglas team for a contract to build 750 Advanced Tactical Fighters for the Air Force. The planes would replace the F16 fighters... both of which have been sent to Saudi Arabia in response to Iraq's invasion of Kuwait.

Red Cross officials say 85 people in the earthquake-ravaged northern Philippines have died in the past four days in floods and landslides triggered by heavy rains. Another 15-hundred people were left homeless when 250 villages along Dalton Pass, 110 miles north of Manila, were washed away. The rain was spawned by Typhoon Abe as it swirled in the Pacific Ocean toward Japan.

The gung-ho crew of the shuttle Columbia returned to Cape Canaveral, Florida, Wednesday night as final preparations continued toward Saturday's scheduled pre-dawn blast-off. The planned 10-day astronomy mission came within hours of launch May 29th... only to be grounded by a hydrogen fuel leak. The flight is the fourth of 1990 and the first since April.

-30- 1972

#90242u0190 08/30/1990 ~United Press International

(AUG. 30) UPI - A task force of more than 100 law officers are working to solve the string of college student murders that have terrorized the University of Florida community in Gainesville. Police theorize the killer who stabbed and blungeoned five students to death since late last week sought out dark-haired petite young women. They also feel he knew his victims and forced his way into their apartments. The F-B-I is working on a psychological profile of the killer.

Researchers in the forests of the Pacific Northwest, counting the number of northern spotted owls, have stumbled upon a possible new complication in the fight to save the endangered species. They say the birds may be mating with their more common cousins, the barred owl- producing a hybrid that the biologists call a ''sparred owl.'' Scientists AREN'T sure whether the cross-breeding is merely a quirk of nature or a potential genetic threat to the spotted owl.

-30- 1093

#90242u0223 08/30/1990 ~United Press International

CAPE CANAVERAL, Fla. (AUG. 30) UPI - Working around the clock, engineers sailed through the repaired shuttle Columbia's smooth-ticking countdown Thursday with the ship's gung-ho crew looking forward to a long-delayed predawn blastoff Saturday.

''We're just as enthusiastic as we ever were about having an absolutely first-class, state-of-the art scientific mission and we hope to come back having seen some things that nobody's ever seen before,'' said astronaut Jeffrey Hoffman of the crew's planned 10-day astronomy mission.

Hoffman and his six crewmates flew to Florida Wednesday night for final preparations, and veteran shuttle skipper Vance Brand said his team was eager to finally take off after coming within hours of launch May 29 only to be grounded by a hydrogen fuel leak.

''It's great to be back again!'' he told reporters at the shuttle landing strip Wednesday night. ''We've been waiting all summer (and) we're just more than happy to be back again. We know we're going this time.''

Liftoff of the 36th shuttle mission, the fourth of 1990 and the first

since April, is scheduled for 1:17 a.m. Saturday and Air Force meteorologists predict a 60 percent chance of acceptable conditions at launch time.

Brand, 59, Hoffman, 45, co-pilot Guy Gardner, 42, John ''Mike'' Lounge, 44 Robert Parker, 53, and civilian astronomers Ronald Parise, 39, and Samuel Durrance, 46, plan to spend the next two days boning up on their busy flight plans and making final preparations for launch.

Once in orbit, the astronauts will work around the clock in two shifts training a battery of high-tech telescopes on planets, stars and galaxies to study high-energy light that cannot penetrate Earth's atmosphere.

Columbia's countdown began on time at 1 a.m. Wednesday, and work at launch pad 39A has proceeded smoothly toward liftoff.

Engineers checked out critical main engine computers Wednesday and closed out the shuttle's engine room before work Thursday to pump hydrogen and oxygen aboard Columbia to power its electricity-producing fuel cells.

Launch originally was scheduled for May 30, but just a few hours before blastoff, sensors detected hydrogen gas spewing into Columbia's engine compartment and NASA managers reluctantly put the flight on hold.

Subsequent tests traced the leak to the shuttle's 17-inch-wide fuel line ''disconnect'' fitting, a massive connector between the shuttle and its external tank that allows the tank to be jettisoned in space.

It now appears that tiny glass beads that somehow got into the fitting scratched critical seals, allowing explosive hydrogen to leak out during fueling operations.

The disconnect fitting was replaced with one taken from the new shuttle Endeavour and, after the shuttle Atlantis was grounded by a similar leak, Columbia was cleared for a second launch attempt Saturday.

Unlike the Hubble Space Telescope, launched from Discovery April 25 during the most recent previous shuttle flight, the ''Astro'' telescopes aboard Columbia will remain mounted in the shuttle's payload bay throughout the flight.

And while the instruments aboard Columbia are far more modest than the $1.5 billion Hubble, they are expected to give scientists on Earth critical insights into the nature of energetic quasars, possible black holes, the fiery hearts of active galaxies and other high-energy astronomical enigmas.

To collect as much data as possible, Columbia's crew will work in two

12-hour shifts throughout the flight with Brand, Gardner and Lounge responsible for keeping the shuttle shipshape and pointed in the right direction. The telescopes will be operated by Parker, Hoffman, Parise and Durrance.

Parise and Durrance are the first non-professional astronauts to fly on the shuttle since satellite engineer Gregory Jarvis and New Hampshire school teacher Christa McAuliffe blasted off aboard Challenger Jan. 28, 1986, for what turned out to be its final voyage.

Like Challenger, NASA's oldest shuttle will be making its 10th flight and at 59, Brand, veteran of three previous space missions, will become the oldest person to fly in space and only the sixth to blast off four times.

Along with accomplishing the primary goal of the mission - turning Columbia into an operational observatory - the shuttle fliers also plan to participate in a NASA educational pilot program, teaching an astronomy lesson from space that will be beamed into middle school classrooms back on Earth.

-30- 4716

#90242u0226 08/30/1990 ~United Press International

UNITED NATIONS (AUG. 30) UPI - Secretary-General Javier Perez de Cuellar's meeting in Jordan Thursday with Iraq's foreign minister will be the United Nations' first diplomatic move to try peacefully solving the Persian Gulf crisis.

The meeting with Iraqi Foreign Minister Tareq Aziz in Amman was hailed by the the U.N. Security Council's 15 member states as timely and helpful while American troops and heavy war equipment landed in Saudi Arabia and war threatens the Middle East.

The situation in the gulf, aggravated by gradual Iraqi action to take over Kuwait and its oil fields since the Aug. 2 invasion, is so bleak that U.N. officials said anything Perez de Cuellar can bring back, save a war, is welcome.

By going to Jordan to meet Aziz, Perez de Cuellar dramatically emphasized the need for a peaceful settlement and abruptly shifted the dangerous military confrontation to the negotiating table.

His move surprised many governments. President Bush said he could not foresee any non-military solution to the crisis. Perez de Cuellar retorted by saying he hoped Bush will not undermine his mission.

U.N. officials said Perez de Cuellar took a ''calculated risk'' by meeting with Aziz, whom he has known for many years during the negotiations

leading to the cease-fire in the 1980-88 war between Iran and Iraq.

Perez de Cuellar is facing his toughest mission. If his efforts succeed, it will be the culmination of a career that has lasted 50 years - the last 8 1/2 as U.N. secretary-general.

But it would also mean protracted peace negotiations that may last years, keeping the U.S.-led multinational force in the Persian Gulf indefinitely and the world economy in perpetual turmoil because of diminished oil production and a trade embargo that is hurting scores of countries as well as Iraq.

If he failed, he would not be blamed for trying considering tough demands Iraqi President Saddam Hussein has put forward, backed by his strong armed forces and the threat of chemical weapons.

Clovis Maksoud, the permanent representative of the Arab League at the United Nations, said the announcement of the Amman meeting has somewhat lowered tension and has ''already prevented a collision ''ension

Maksoud called Perez de Cuellar the ''world's conscience.''

''He should insist on carrying out Security Council resolutions and securing peace'' when he talks with Aziz, Maksoud said.

Malaysian Deputy Ambassador Redzuan Kushairi, whose country is a member of the Security Council, said the meeting is ''timely.''

''It is the most difficult mission for the secretary-general, and we do not expect him to produce a miracle,'' Redzuan said.

To skeptics who questioned his move, Perez de Cuellar said he never used the word ''optimistic'' or ''pessimistic'' before engaging in a difficult mission. He said he was always ''hopeful.''

''I am hopeful because I cannot imagine a human being not wanting peace,'' he said.

Since announcing his peace initiative Sunday, Perez de Cuellar appeared in major American television networks promoting peace talks for the gulf crisis. He subtly reminded countries that have deployed naval forces in the gulf that a full-scale blockade has not been allowed by the Security Council and to do so would undermine his talks with Aziz.

The council authorized limited military enforcement of the trade embargo on Iraq as that country defied U.N. calls to withdraw its more than 100,000 troops from Kuwait.

The 70-year-old Peruvian diplomat has been successful in past years in negotiating the cease-fire between Iran and Iraq and the complete withdrawal of Soviet troops from Afghanistan in Feb. 15, 1989. He was also personnally involved in other negotiations in Central America and southern Africa.

''I decided to take this initiative on my own,'' Perez de Cuellar said this week after presenting his plan to the Security Council, emphasizing the fragility of his mission.

Since the Aug. 2 invasion, the Security Council has adopted five resolutions, first condemning Iraq and demanding its withdrawal from Kuwait. As Iraq refused, the council imposed stringent trade and military sanctions to force it to comply with the demand.

The council then declared the annexation of Kuwait ''null and void,'' demanded the freedom for foreigners in Kuwait and Iraq and authorized military enforcement of the embargo.

PLAINFIELD, Ill. (AUG. 30) UPI - With the last of the missing accounted for, victims of a deadly tornado in northern Illinois turned their attention toward repairing their shattered lives and protecting what was left of their homes.

''We are satisfied that we located all the people,'' Police Chief D.E. Bennett said late Wednesday night.

The death toll from the storm stood at 24 and of the nearly 350 injured, 70 remained hospitalized Wednesday night - 11 of them in critical condition, area hospitals reported.

Gov. James R. Thompson declared Will County a state disaster area and President Bush issued a federal disaster declaration later in the day.

''In 14 years in this job, I've seen a lot of natural disasters - tornadoes, winds, snow, blizzards and hail, floods. Nothing in my personal experience in 14 years compared with this devastation,'' Thompson said after touring Plainfield.

''

The storm struck at mid-afternoon Tuesday, destroying Plainfield High School, a church and countless homes before heading for Crest Hill and an apartment complex. The storm also struck near Louis-Joliet Mall.

Among the dead were a nun trapped in a school where she worked as principal, three employees of Plainfield High School and several residents of the apartment complex ripped open by the sudden storm.

The National Weather Service said it was unclear whether the destruction was caused by one tornado or several but that the majority of the damage was caused by one powerful storm.

The weather service acknowledged that it issued no tornado watch before the storm hit and that the first warning was issued six minutes after the tornado destroyed the apartment complex.

No warning sirens sounded prior to the disaster in Plainfield or Crest Hill, although Will County Sheriff John Johnsen said he heard the Joliet siren.

The emphasis Wednesday night was on security. Police from more than two dozen counties, state police, National Guardsmen and Chicago Park district security personnel helped Will County authorities patrol tornado-ravaged areas to discourage looters.

Will County Executive Charles Adelman said the outpouring of support from the surrounding area was so heavy, many volunteers were being turned away.

Hundreds of people answered the urgent call for blood and waited in hours-long lines throughout the day to donate, area officials reported.

The Salvation Army and Red Cross opened shelters throughout the area and offered food, bedding and clothes to the victims.

''We're getting just hundreds and hundreds of calls from people as far away as Iowa offering time, food and generators,'' said Salvation Army spokesman Robert Cotner. ''It's really incredible.''

The Soviet Union, which received help from Illinoisans during the Armenian earthquake in December 1988, offered its assistance to victims of Tuesday's tornado.

A Soviet Embassy official in Washington called Illinois' office in Washington and said they wanted damage and homeless figures so they could lend a hand.

''When the Armenian earthquake went down, Illinois sent a substantial amount of aid to the Soviet Union and they want to reciprocate in some way '' said Tim Leonetti, legislative liaison for the Illinois Emergency Services and Disaster Agency.

Numerous corporations answered the call for help sending cash donations, soft drinks, food, clothing, paper products and even offering hotel accomodations to the homeless.

Ham radio operators set up stations throughout the area where all communication has been virtually shut down. A total 200 telephone technicians worked through the night and were to be joined by an additional 100 Thursday morning, said Illinois Bell spokesman Geoff Potter.

''We hope to have everyone back in service by Sunday,'' Potter said.

A telephone terminal that handled 2,500 Plainfield lines was uprooted by the storm and was still missing, Potter said.

#90242u0314 08/30/1990 ~United Press International

(AUG. 30) UPI - Around the world... around the clock... news from United Press International:

U-N Secretary-General Javier Perez de Cuellar tries a diplomatic approach today to solve the Persian Gulf crisis. He will go to Jordan to meet with

Iraq's foreign minister. President Bush says he can NOT foresee any NON-military solution. U-N officials call Perez de Cuellar's trip a ''calculated risk.''

The two most powerful men in the Soviet Union have agreed to put aside their differences for the sake of their nation. President Mikhail Gorbachev and Russian leader Boris Yeltsin pledged to work together in the face of severe economic and political problems facing the Soviet Union.

The seven astronauts who will be on the shuttle Columbia's flight flew to the spaceport at Cape Canaveral, Florida, last night. Launch is set for Saturday morning. Shuttle commander Vance Brand said- ''It's great to be back again.'' In May, the shuttle was close to takeoff when tecnicians found a fuel leak and grounded it.

A homeless man was killed in Manhattan last night when a subway grating collapsed. Police say he was sitting on the grating when it fell and he was pinned down by a compressor. Two other homeless people were injured, one critically. The accident happened near Penn Station in an area frequented by indigent people.

Police say an 82-year-old man killed his seriously ill 80-year-old wife in Winona, Minnesota, and then killed himself yesterday. Police say Raymond Harbrecht walked into the hospital and chatted briefly with nurses. When he went into his wife's room, the nurses heard two shots.

#90242u0320 08/30/1990 ~United Press International

(AUG. 30) UPI - The standoff between Canada's government and Mohawk Indians ended peacefully yesterday as the Indians and army troops both removed barricades at reservations. Traffic was rerouted during the dispute because a barricade cut off a major bridge to Montreal. A final solution to the problem is still being negotiated.

The Philippines Red Cross says landslides in the past few days have killed 85 people in the northern Philippines. 250 houses were washed away, leaving 15-hundred people homeless. The landslides were caused by a week of heavy rains spawned by a typhoon. The area also was rocked by an earthquake last month.

Abortion is the last issue standing in the way of the two Germanys becoming one. They agree that for a time after unification on October 3rd, West Germany will continue to outlaw abortion and East Germany will continue to allow it. The question is what policy should be permanent. Negotiations continue tonight.

Former President and Mrs. Reagan visited the Mayo Clinic in Rochester,

Minnesota, yesterday for physical examinations. A small piece of cancerous skin was found near Mrs. Reagan's nose and a plastic surgeon removed it. The Reagans are to return to their home in California today.

Three fans rushed the stage during the taping of last night's ''Into the Night'' television show in Los Angeles, prompting a guard to draw his gun. A stagehand then tackled the guard and said- ''don't shoot.'' NObody was hurt. The British rock band the Mission/U-K was performing at the time.

#90242u0522 08/30/1990 ~United Press International

(AUG. 30) UPI - Iraqi President Saddam Hussein denies that secret negotiations are going on for Iraq's withdrawal from Kuwait. In a broadcast interview, Saddam repeated his insistence that Kuwait is part of Iraq. A White House source said a former senior administration official brought a proposal from Iraq. A Long Island newspaper said Iraq offered to withdraw if the economic sanctions are lifted and Iraq regains access to the Persian Gulf.

Five people were shot to death today in a condominium complex in Sydney, Australia. Police say a man went berserk and shot them at close range. A suspect in his early 20's was arrested. The police say he was related to one of the victims. The victims were three men an a psychological profile. Criminologists speculate the killer is white, older than his victims and has a history of violence. Four young women and one young man have been stabbed or beaten to death in Gainesville. Two people were found dead yesterday 20 miles east, but police do NOT believe their deaths are connected to the Gainesville murders.

A federal appeals court panel has upheld a death sentence for Robert Alton Harris, who was convicted of killing two 16-year-old boys so he could use their car for a bank robbery. Harris was 12 hours from dying in California's gas chamber in April when he received a stay of execution. The sentence still can be overturned by the full appeals court or by the Supreme Court. The defense wants a hearing to consider whether psychiatrists who testified at Harris's trial were competent.

-30- 1713

#90242u0569 08/30/1990 ~United Press International

(AUG. 30) UPI - Iraqi President Saddam Hussein denied secret negotiations were under way for Iraq's withdrawal from Kuwait, adding his nation had no intention of withdrawing from the oil-rich emirate Baghdad invaded four weeks ago.

A White House source said Wednesday that national security adviser Brent Scowcroft met with a former senior administration official who carried one

of many back-channel proposals from Iraq along the lines of one reported in the Long Island, N.Y., newspaper Newsday.

Under the proposal, Iraq reportedly said it would be willing to withdraw from Kuwait if U.N.-mandated economic sanctions were lifted and Iraq regained access to the strategic Persian Gulf.

Saddam, in an interview broadcast Wednesday by CBS News, flatly denied there were behind-the-scenes negotiations under way toward an Iraqi withdrawal from Kuwait, which it invaded Aug. 2 in a land and oil dispute.

He said his country has no intention of pulling out of Kuwait and he has not sent out any peace feelers to the West.

''Kuwait is part of Iraq,'' Saddam said through an interpreter. ''We have said this, and the legislative bodies in Iraq have issued a clear decree ... saying that Kuwait is an Iraqi province.''

U.N. Secretary-General Javier Perez de Cuellar left for Jordan for a scheduled meeting Thursday with Iraqi Foreign Minister Tareq Aziz, and former presidential candidate Jesse Jackson arrived in Baghdad and was expected to meet senior Iraqi leaders, Baghdad Radio said.

Diplomacy aside, the U.S.-led military buildup continued in an effort to protect Saudi Arabia from tens of thousands of Iraqi troops posted near the Saudi border. Pakistan said it would send 2,000 troops to Saudi Arabia Thursday for the defense of Islamic sites in the kingdom. Their arrival will be the first military participation in the crisis by a non-Arab Moslem nation.

Military experts estimate Iraq has slightly less than 1 million fighting men at its disposal facing 50,000 U.S. forces in Saudi Arabia, 70,000 Saudi forces and 7,000 other Arab troops.

NBC News reported Wednesday the Kuwaiti resistance, supported by the CIA and other U.S. military special forces, has made daily guerrilla raids into Iraqi-occupied Kuwait.

Quoting intelligence sources, the network reported that almost every day resistance forces have ambushed Iraqi convoys carrying troops and supplies and attacked storage facilities.

NBC reported that Kuwaiti and Saudi leaders are funding the secret operation, but the CIA is providing organization and intelligence, maps, special weapons and target selection guidance.

Sources told NBC that the Green Berets were offering some assistance, mostly weapons instruction and infiltration tactics. Sources said no U.S.

troops were involved in the raids.

In Washington, the State Department said Wednesday it received instructions about arrangements for the release from Iraq and Kuwait of American women and children through the U.S. Embassy in Baghdad, but cautioned there was still no certainty they would be allowed to leave.

Saddam said Tuesday all foreign women and children, including an estimated 1,000 American women and children in Iraq and occupied Kuwait, would be allowed to leave beginning Wednesday.

State Department spokeswoman Margaret Tutwiler said the United States will provide a list of the Americans as soon as possible, but it was not known how long it will take to process the exit visas Iraq said was required by each woman and child. Tutwiler also said Iraq's response to a request for 15 medical hardship cases to leave was an offer of examinations and medicine.

#90242u0588 08/30/1990 ~United Press International

(AUG. 30) UPI - Despite blasting the first grand slam of his career, Chris Gwynn experienced a brief moment of deja vu.

Gwynn's homer helped Los Angeles take an 11-2 lead over Philadelphia in the sixth inning Wednesday night, similar to the 11-3 advantage the Dodgers blew August 21 when the Phillies scored nine in the ninth for the victory.

''It crossed my mind briefly when we were up by so many runs but I never thought about it again,'' said Gwynn, who also hit a solo home run and knocked in five runs. ''I figured we'd just close this one out, go home and try to win another one (Thursday).''

The Dodgers had no problem maintaining their lead Wednesday night, defeating the Phillies by a comfortable 12-2 margin.

Gwynn also reached a second milestone, slamming two homers in one game for the first time in his career. Gwynn's solo home run in the first inning off Phillies starter Tommy Greene, 1-2, put the Dodgers up 1-0.

''Home runs just happen,'' said Gwynn, who was making only his third start since June 24 because of Kal Daniels' back injury. ''I'm just happy to hit the ball hard. When you get a chance to play you want to do something.

''I've never hit a grand slam in my life. Ever. I've never hit two home runs in one game. Never.''

Fernando Valenzuela, 12-10, gave up five hits and two runs in five innings to win his third straight start and hand the Phillies their seventh loss in eight games.

Reliever Tim Crews followed with four perfect innings to keep the Phillies at bay.

The victory, coupled with Cincinnati's 7-1 loss to St. Louis, moved the second-place Dodgers within 5 1-5 games of the first-place Reds in the National League West.

The Dodgers broke open the game with an eight-run sixth inning off three Philadelphia pitchers.

''We're not doing fundamental things very well and a major-league team shouldn't be like that,'' Phillies manager Nick Leyva said. ''I'll take the blame. It was a bad performance and I'm tired of looking at ''lam

Elsewhere in the National League, San Francisco edged Montreal 6-5, New York dropped San Diego 2-1, St. Louis pounded Cincinnati 9-1, Pittsburgh blanked Atlanta 10-0 in seven, and Houston shutout Chicago 1- 0.

In the American League it was: Toronto 7, Milwaukee 3; Boston 7, Cleveland 1; New York 3, Baltimore 2; Minnesota 6, Chicago 1; Detroit 4, Seattle 2; Kansas City 6, Oakland 0; and California 9, Texas 2.

Giants 6, Expos 5

At Montreal, Robby Thompson's solo homer with two outs in the ninth inning following Kevin Mitchell's second home run of the game, rallied San Francisco. The Giants entered the ninth trailing 5-4 and grabbed the victory with Thompson's 13th homer off loser Bill Sampen, 10-5. Jeff Brantley, 5-3, worked two hitless innings of relief for the win. Sampen, 10-5, allowed both ninth-inning homers and struck out one.

Mets 2, Padres 1

At New York, Daryl Boston singled home Howard Johnson with one out in the ninth inning lifting New York. The victory kept the Mets two games behind the Pittsburgh Pirates in the National League East. Johnson led off the ninth with a single off reliever Greg Harris, 7-6. Bob Ojeda, 7-5, picked up the win with two innings of one-hit relief.

Cardinals 9, Reds 1

At Cincinnati, Bob Tewksbury tossed a six-hitter to lead St. Louis. Tewksbury, 9-4, lost his shutout in the eighth inning when Chris Sabo hit his 23rd homer of the year. Tom Browning, making his first start since

Aug. 17, allowed seven runs and 10 hits over 7 2-3 innings.

Pirates 10, Braves 0, 7 innings

At Atlanta, Barry Bonds drove in five runs to back the two-hit pitching of Doug Drabek and pace Pittsburgh in a game stopped in the seventh inning because of rain. Drabek improved to 17-5, walking none and striking out five. The loss snapped a four-game losing streak for the Pirates. Drabek is now 10-2 following a Pirate loss this season.

Astros 1, Cubs 0

At Houston, Mark Portugal scattered eight hits over seven innings and the Houston Astros spoiled Rick Sutcliffe's return with a 1-0 victory. Portugal, 8-9, tied a season-high with nine strikeouts in recording the win. Sutcliffe, 0-1, making his first start since Oct. 1, 1989, gave up only two hits and one earned run over five innings. He struck out two and walked three before being lifted in the sixth.

-30- 4576

#90242u0590 08/30/1990 ~United Press International

TOKYO (AUG. 30) UPI - The stock market greeted a long-expected rise in the key interest rate Thursday with a rally that boosted share prices 3 percent.

The market's leading indicator, the 225-issue Nikkei average, shot up 775.17 points in active trading to 25,669.96. The rise represented a 3.0 percent gain for the Nikkei, which had fallen 815.97 points the day before.

The broader Tokyo Stock Price Index moved up 44.60 points to 1,956.02. TOPIX shed 36.09 points Wednesday.

An estimated 530 million shares were traded, up from 430.24 million the day before.

The market's apparently perverse reaction to the 0.75 percentage point rise in the nation's official discount rate, now 6.0 percent, was actually one of relief, brokers said.

Investors became convinced Wednesday that the Bank of Japan's key rate would go up and consequently the market plunged 3.2 percent.

When the announcement came Thursday morning, it was less than many people had feared, prompting a rally.

''For the time being, as far as interest rates are concerned, all negatives are out,'' said analyst Yutaka Nakai of Daiwa Securities.

Individual investors led the charge, Nakai said, buying heavily in nearly all sectors.

In addition to relief that the interest rate decision was finally over, investors were spurred on by hopeful signs in the Middle East, brokers said.

News that Iraq planned to release all women and children from among its foreign hostages was particularly encouraging, they said.

But institutional investors hung back, especially after a remark by Bank of Japan's governor, Yashushi Mieno, suggested to the market that Middle East events could cause the central bank to consider yet another rate hike down the line.

But the institutions' absence was more than made up for by individuals and arbitrageurs, who were buying heavily in the market, brokers said.

Among small investors, there was growing confidence that the market had bottomed out, brokers said.

-30- 2176

#90242u0591 08/30/1990 ~United Press International

(AUG. 30) UPI - The Blue Jays, pardon the expression, killed two birds with one stone.

Tony Fernandez hit Toronto's first home run in 11 games Wednesday and the Blue Jays snapped a five-game losing streak while defeating the Milwaukee Brewers 7-3.

''The Jays are not going to be blanked forever,'' Milwaukee pitcher Mark Knudson said. ''I don't think that anybody doubts Toronto being a more talented ball club than we think we are, but Boston is playing with more heart than most teams in this division.''

Toronto, which was shut out three straight times by the Red Sox over the weekend, remained six games behind the division leaders, who captured their sixth straight. The Blue Jays will hit the road for the next six games.

''It's very important to leave on a positive note,'' Blue Jays Manager Cito Gaston said. ''We had a bad weekend, but a really good day today and hopefully, we can continue successfully.''

Toronto had gone a club record 385 at-bats without a home run before Fernandez homered to cap Toronto's five-run fourth inning.

Greg Myers opened the fourth off Knudson, 10-7, with a single and Junior Felix doubled him to third. Manny Lee followed with a two-run single and advanced to second on the throw home.

Glenallen Hill struck out and Mookie Wison singled Lee to third. Fernandez then blasted his third home run, off reliever Paul Mirabella, to give Toronto a 7-1 lead.

''It's kind of amazing, (Fernandez) is hitting .216 against left- handed pitchers,'' Brewers Manager Tom Trebelhorn said. ''He hasn't hit a home run batting right-handed all season and he drops the right-field wall for three.''

Elsewhere in the American League: Boston clubbed Cleveland 7-1, New York nipped Baltimore 3-2, Minnesota slugged Chicago 6-1, Detroit edged Seattle 4-2, Kansas City blanked Oakland 6-0, and California bombed Texas 9-2.

In the National League, it was: San Francisco 6, Montreal 5; New York 2, San Diego 1; Los Angeles 12, Philadelphia 2; St. Louis 9, Cincinnati 1; Pittsburgh 10, Atlanta 0; Houston 1, Chicago 0.

-- AROUND THE AL --

Red Sox 7, Indians 1

At Cleveland, Ellis Burks drove in two runs with a home run and sacrifice fly and Dana Kiecker hurled seven scoreless innings to lead Boston to its sixth straight victory. The win moved the Red Sox 15 games above .500 for the first time this year and allowed them to maintain their six-game lead over Toronto in the A.L. East.

Yankees 3, Orioles 2

At Baltimore, Matt Nokes and Kevin Maas hit back-to-back home runs in the sixth inning, powering the New York Yankees to their fourth straight victory.Tim Leary, 8-16, got the win. Dave Righetti pitched the ninth for his 29th save. Anthony Telford, 1-1, took the loss.

Twins 6, White Sox 1

At Minneapolis, Greg Gagne homered, doubled and stole three bases - including home - and Mark Guthrie pitched a five-hitter. Chicago, who committed five errors, dropped its fifth-straight game and third straight to Minnesota.Guthrie, 5-7, earned his first major-league complete-game victory.

Tigers 4, Mariners 2

At Seattle, Cecil Fielder hit his major league-leading 42nd home run and Walt Terrell allowed five hits over 7 1-3 innings. Terrell, 3-2, got the win. Jerry Don Gleaton worked the final 1 2-3 for his ninth save. Matt Young, 6-14, took the loss.

Royals 6, Athletics 0

At Oakland, Calif., Kevin Appier fired a four-hit shutout and Bo Jackson drove in four runs. Appier, 11-4, carried a no-hitter through 5 2-3 innings before Rickey Henderson beat out an infield single to shortstop in the sixth. Appier posted his third shutout and complete game of the year.

Angels 9, Rangers 2

At Anaheim, Calif., Lance Parrish drilled a three-run homer to cap California's seven-run outburst in the seventh inning to help the Angels complete a three-game series sweep. Jim Abbott, 9-12, was the winner. John Barfield, 3-2, took the loss.

TOKYO (AUG. 30) UPI - Japan said Thursday it will offer $1 billion in assistance to Middle East nations that have suffered economically from Iraq's invasion of Kuwait and to the U.S.-led multinational force building in the region.

Finance Minister Ryutaro Hashimoto said Prime Minister Toshiki Kaifu conveyed the decision in a telephone conversation with President Bush.

Japan said Wednesday it would contribute medical personnel and civilian transport to the U.S.-led multinational forces in Saudi Arabia and elsewhere in the Middle East.

Hashimoto told a news conference the $1 billion fund will be used to support the multinational forces and Middle East nations affected by Iraq's invasion and annexation of neighboring Kuwait Aug. 2.

The Foreign Ministry said financial aid will be provided to Jordan, Turkey and Egypt, which it said ''are confronted with urgent and serious economic difficulties.''

The ministry said Japan will bear ''a substantial share of the financial burden necessary for evacuee relief,'' and in the initial step, more than $10 million will be offered for refugee relief in Jordan, where tens of thousands of people have fled from neighboring Iraq and Kuwait.

The ministry said 424 Japanese, including 84 women and children, have been stranded in Iraq since the crisis erupted.

The Iraqi government said it will allow all women and children to leave the country Wednesday, but Foreign Ministry officials said there have been no reports they have left the country.

About 200 Japanese who were evacuated from Kuwait to Iraq have been confined at a hotel in Baghdad, together with foreigners from other countries, the officials said. About 20 of them were taken to an unknown location and their whereabouts remain unknown, the officials said.

The Japanese Embassy in Kuwait was temporarily shut down after Iraq cut off utilities and water, and the last two diplomats who held out at the embassy flew to Baghdad Wednesday, they said.

The embassy still remains officially open although it has no staff, they said.

(AUG. 30) UPI - Here is a roundup of top events Tuesday in the Persian Gulf crisis stemming from the Aug. 2 Iraqi invasion of the oil-rich emirate of Kuwait.

Iraqi President Saddam Hussein denied secret negotiations were under way for Iraq's withdrawal from Kuwait, adding his nation had no intention of withdrawing from the oil-rich emirate Baghdad invaded four weeks ago. A White House source said Wednesday that national security adviser Brent Scowcroft met with a former senior administration official who carried one of many back-channel proposals from Iraq. Under the proposal, Iraq reportedly said it would be willing to withdraw from Kuwait if U.N.-mandated economic sanctions were lifted and Iraq regained

acces UNITED NATIONS - Secretary-General Javier Perez de Cuellar's meeting in Jordan Thursday with Iraq's foreign minister will be the United Nations' first diplomatic move to try peacefully solving the Persian Gulf crisis. The meeting with Iraqi Foreign Minister Tareq Aziz in Amman was hailed by the the U.N. Security Council's 15 member states as timely and helpful.

WASHINGTON - State Department spokeswoman Margaret Tutwiler said the Iraqi Foreign Ministry said that the women and children would be allowed to leave Iraq as soon as transportation arrangements could be worked out. She said each woman and child would require an exit visa. As part of their instructions, the Iraqis asked for a list of the names of the American women and children who would be applying for exit visas.

TOKYO - Japan said Thursday it will offer $1 billion in assistance to Middle East nations that have suffered economically from Iraq's invasion of Kuwait and to the U.S.-led multinational force building in the region. Finance Minister Ryutaro Hashimoto said Prime Minister Toshiki Kaifu conveyed the decision in a telephone conversation with President Bush.

WASHINGTON - President Bush has offered to sell Saudi Arabia advanced warplanes, tanks and anti-aircraft missiles to beef up its defenses against the increased threat from Iraq. White House spokesman Roman Popadiuk said Bush has informed Congress of the possible sale of 24 F-15 fighters, 150 M-60 tanks, 200 Stinger anti-aircraft missiles and several thousand tank-killing depleted uranium shells.

#90242u0637 08/30/1990 ~United Press International

BEIJING (AUG. 30) UPI - China said Thursday it has no plans to evacuate thousands of Chinese nationals from Iraq, where by some accounts the government of President Saddam Hussein is barring their departure.

Foreign Ministry spokeswoman Li Jinhua said Beijing does not currently intend to mount in Iraq the kind of massive airlift that brought nearly 5,000 Chinese home from Kuwait in the past week.

Li stubbornly rebuffed all other questions about the Chinese workers in Iraq, refusing to say if China feels they are safe, whether Beijing has contacted Baghdad about their status or whether they indeed are free to leave.

''We don't have any plans for evacuation (of Chinese in Iraq) for the time being,'' Li said at a weekly Foreign Ministry news briefing.

Chinese sources say several thousand Chinese workers have been prevented from leaving Iraq, whose million-strong army conquered tiny neighboring Kuwait Aug. 2.

Li refused to confirm or deny reports that some of the Chinese workers are in Iraq under terms of military supply and maintenance contracts. Until the invasion, China was the third largest supplier of weapons to Iraq.

Beijing's failure to mount an evacuation suggests the hard-line Chinese leadership is nearing paralysis in its policy toward the Persian Gulf crisis - unable to act decisively for fear of antagonizing Saddam.

Beijing's response to the Kuwait invasion was firm and squarely supported Western efforts to isolate Iraq, but the government has steadily lowered its political profile toward the crisis.

China initially denounced the invasion, calling for an Iraqi pullout from Kuwait and suspending arms sales to Baghdad in accordance with a U.N. Security Council embargo. As a member of the Security Council, China itself voted for the embargo.

But last weekend China quietly capitulated to Iraq's demand that all

nations close their Kuwait embassies, abandoning its stated resolve to maintain a mission in defiance of Iraq's conquest.

And despite Beijing's supporting vote for a Security Council resolution authorizing ''appropriate'' measures to enforce the U.N. embargo, Chinese leaders insist these do not include military measures.

Since vowing to stop arming Iraq, China has not publicly announced any new measures to support the embargo and has not contributed to the military force dispatched to the region to protecting Saudi Arabia and other gulf states.

Beijing only last month established relations with Riyadh.

The Foreign Ministry spokeswoman repeated China's assertion that the closing of Kuwait Embassy did not indicate a change in the government's position toward the crisis.

''China has earnestly implemented the (Security Council) resolutions,'' Li said without further explanation.

Li also refused to comment on reports that 10 Middle Eastern countries have threatened to boycott next month's Beijing Asian Games if Iraq is allowed to participate.

TOKYO (AUG. 30) UPI - The Tokyo Stock Exchange said Thursday it will raise the interest rates charged on margin trading beginning Friday to keep pace with the central bank's decision to raise its official discount rate.

The exchange said the interest charged to investors buying stocks on credit will be raised to 9.2 percent annually from the present 8.5 percent.

It said the interest charged to investors selling stocks on credit for settlement within six months will rise to 4.75 percent from 4 percent.

The rate on special margin transactions for settlement within three months will go up to 6.50 percent from 5.75 percent, the exchange said.

The interest rates are tied to the official discount rate, which was raised by the central bank to 6.0 percent, up 0.75 percentage points effective Thursday.

(AUG. 30) UPI - U-N Secretary-General Javier Perez de Cuellar is heading to Jordan to meet with Iraq's foreign minister on what he calls an ' vain. Iraqi President Saddam Hussein said in a television interview last night that Baghdad has NO intention of pulling out of Kuwait. Speaking through an interpreter, Saddam said- ''Kuwait is part of Iraq.'' Saddam also

flatly denied that there are any behind-the- scenes negotiations going on to get Iraq to withdraw from Kuwait.

The Miami Herald reports that a personality profile of the killer who stabbed and bludgeoned five students in Gainesville is possibly a security guard or a hospital worker. The paper, quoting knowledgeable sources, says a profile done for investigators shows the killer who has terrified the University of Florida community probably is in his late 20's or early 30's. It says the serial killer probably is NOT a sworn police officer or doctor but works along the lines of a security guard or hospital orderly.

NASA managers kept an eye on the skies over Cape Canaveral as engineers work on a problem telescope in the shuttle Columbia. It has been a smooth countdown to an early Saturday blast-off of Columbia and its seven-man crew on a 10-day astronomy flight. Forecasters say there is a 60 percent chance of favorable weather at launch time. Engineers are trying to find the source of a problem involving a telescope in the shuttle's payload bay. Officials were unable to receive data from the telescope early today.

NEW YORK (AUG. 30) UPI - CBS has named Johnathan Rodgers, a Chicago TV executive, as president of the network's Television Stations Division.

Rodgers, vice president and general manager of WBBM-TV, a CBS-owned station in Chicago, will take over for Eric W. Ober, recently appointed president of CBS News following the resignation of David Burke.

Rogers, a 14-year CBS veteran, formerly was executive producer of CBS's morning and evening news shows and ''Nightwatch.''

#90242u1093 08/30/1990 ~United Press International

WASHINGTON (AUG. 30) UPI - U.S. factory orders advanced 1.6 percent - or $3.8 billion - to $240.3 billion in July on another wave of aircraft buying, the Commerce Department reported Thursday.

The July increase in orders follows a decline of 1.9 percent in June and a gain of 2.2 percent in May, according to the monthly report compiled by the department's Census Bureau.

''Most of the increase in orders in July was for durable goods, up $3.5 billion, or 2.8 percent to $128.2 billion,'' the report said. ''Within the major industries, transportation equipment had the largest gain, up $1.6 billion, or 4.9 percent to $34.9 billion.

''A large increase in aircraft and parts was partially offset by a decline in motor vehicles and parts,'' the report said. ''Most of the other major industries had smaller increases.''

Aircraft have led many of the gains in factory orders this year as the world's airlines scramble to rebuild their aging jet fleets.

Not counting transportation equipment, factory orders increased 1.1 percent in July, a government spokesman said. Not counting defense hardware, orders advanced 1.8 percent, the spokesman said.

The Commerce Department also reported that July orders for non- durable goods were up by $200 million, or a mere 0.2 percent, to $112.1 billion.

Manufacturers' inventories, meanwhile, jumped 0.7 percent - or $2.6 billion - to $373.3 billion last month - in the largest one month increase since a gain of 0.8 percent in January.

Bigger inventories usually signal a slowdown in sales, which would be consistent with the slow pace of consumer spending as the domestic economy flirts with a recession.

The inventory-to-shipments ratio, which tracks delivery time, increased to 1.57 in July from 1.55 in June.

Shipments of factory goods slipped 0.8 percent - or $2 billion - in July to $237.5 billion. Unfilled orders increased 0.6 percent - or $2.9 billion - to $520.4 billion last month.

Overall factory orders ''have been relatively flat since December 1988, averaging $235.9 billion per month,'' the report said. ''Shipments have also been relatively flat since December 1988, averaging $233 billion per month.''

DETROIT (AUG. 30) UPI - Alleged mob figure Anthony Giacalone demanded $250,000 from Teamsters President Frank Fitzsimmons for arranging the murder of former union chief Jimmy Hoffa, according to a newly released FBI report.

The report was disclosed during hearings in Newark, N.J., this week on federal attempts to oust Charles ''Chuckie'' O'Brien from his post with the Teamsters southern conference at Hallandale, Fla.

O'Brien, Hoffa's foster son, has long been a key figure in the FBI investigation of Hoffa's disappearance from a parking lot of a Michigan

restaurant in July 1975. He is believed dead.

The information in the FBI report comes from Jackie Presser, another former Teamsters president who died in 1988.

Presser told the FBI in 1978 that Giacalone called Fitzsimmons, demanded money and reminded him that ''it never ends.''

Hoffa was president of the union when he was convicted of jury tampering in 1964 and Fitzimmons suceeded him. Hoffa served nearly five years until he was pardoned by President Richard Nixon and at the time of his disappearance he was believed to be planning to take the Teamsters presidency from Fitzsimmons in a 1976 election.

The FBI report says Fitzsimmons, who has since died, refused to pay Giacalone.

O'Brien, then an official with Teamsters Local 299 in Detroit, went to Washington, D.C., in June 1978 in an unsuccessful effort to collect from Fitzsimmons, according to the report.

''There is no way that ever happened,'' O'Brien told the Detroit News Wednesday. ''I never talked to Fitz about money for Giacalone.''

O'Brien and Giacalone have denied any involvement in Hoffa's disappearance.

The hearing in Newark was conducted by a retired federal judge named to preside over a series of sessions dealing with allegations that the nation's largest union is controlled by organized crime.

It also was disclosed that O'Brien admitted talking with Giacalone by telephone five times and meeting with him four times within five days at about the time of Hoffa's disappearance. And officials said a Hoffa confidant told the FBI Giacalone asked him to set up meetings with Hoffa on six different July dates before the disappearance, although no meeting resulted.

The FBI contends Hoffa was lured to the restaurant to meet with Giacalone and New Jersey Teamsters figure Anthony Provenzano, ostensibly so that Giacalone could mediate a bitter feud between the other men.

#90242u1104 08/30/1990 ~United Press International

(AUG. 30) UPI - High winds buffeted the Northwest Thursday, whipping up dust and blowing down trees as a cold front moved across the region and thunderstorms swept the South, knocking out power near Atlanta.

Clear, pleasant weather stretched across the Northeast and rain hit the Southwest.

High winds buffeted Washington state Wednesday, prompting warnings from the National Weather Service as a storm moved eastward across the state. The winds, which whipped up dust and blew down trees in extreme southeastern Washington, preceded a cold front moving across the state.

The gusty winds that topped 50 mph blew through western Idaho Thursday moving eastward across the state. Visibility was cut to less than a mile by dust blown by the high winds.

Thunderstorms lashed parts of the South early Thursday. Much of Georgia, Alabama and the Carolinas were under severe thunderstorm warnings during the early morning.

Severe thunderstorms swept through metro Atlanta Wednesday evening with powerful lightning, strong winds and torrential rain, causing some property damage and knocking out power to 25,000 homes.

Trees and power lines were downed, buildings damaged and streets littered with debris as the storms struck at the end of a record 98- degree day. Utility crews struggled through the night to restore service.

Police said lightning struck about five homes near Covington, sparking small fires. Other strikes triggered fires in Duluth and Dacula.

Marble-size hail was reported in North Carolina where a marine warning was in effect Thursday in the coastal waters as a broken line of thunderstorms brought heavy rain and lightning. Inland storms also were reported over the southeast part of the state.

The region baked Wednesday with Warner Robins, Ga., reporting a temperature of 105, Macon and Columbus, Ga., 102, and Augusta, Ga., 101. Muscle Shoals, Ala., and Huntsville, Ala., also had 102.

Patchy, dense fog blanketed southeastern Kentucky, cutting visibility to near zero at higher elevations and making driving dangerous.

Rain was common west of the Cascades but a drying trend was expected by Friday afternoon due to high pressure moving inland and better weather was expected for the holiday weekend.

In California, a weakening cold front moved onshore along California's north coast Wednesday, spreading light precipitation from the coastline into the mountains but it was sunny and warm inland with highs in the 80s and 90s.

Clear weather covered most of the Northeast and New England and early morning clouds reported over Cape Cod disappeared after sunrise.

(AUG. 30) UPI - Diplomatic efforts figure heavily in the Persian Gulf situation today. U-N chief Javier Perez de Cuellar met with the French foreign minister in Paris in advance of a meeting with Iraqi Foreign Minister Tariq Aziz. Perez de Cuellar told French T-V that he does ''NOT want to give the impression that we have a solution at hand.'' He described talks with Aziz as being ''extremely difficult and delicate.''

The U-N chief scheduled a meeting with Aziz today, but unconfirmed reports indicate it has been postponed until tomorrow. And in other developments, diplomats say it likely will take at least one week to process exit visas for foreign women and children trapped by the invasion of Kuwait.

The Tokyo government says Japan will give one-BILLION dollars in aid to Middle East nations hurt economically by Iraq's invasion of Kuwait and to the multi-national force in the region. At a news conference today, the Japanese finance minister says Prime Minister Kaifu telephoned President Bush to inform him of Japan's decision.

U-S factory orders were up in July. The Commerce Department reports that orders advanced one-point-six percent last month on another wave of aircraft buying. Orders, mostly for durable goods, increased three-point-eight-BILLION dollars, to 240-point-eight-BILLION dollars. Transportation equipment showed the largest gain.

A small earthquake shook parts of northeast Arkansas, but there are NO reports of damage or injuries. The Memphis State University Earthquake

Center says the tremor registered three-point-four on the Richter scale and was felt in Blytheville and several other communities along the New Madrid Fault in Mississippi County.

(AUG. 30) UPI - Canadian troops and Mohawk Indians put down their weapons after a last-minute deal ended a tense stand-off that threatened to turn violent. The Mohawks and the federal and Quebec provincial governments cut a deal today ending one of the most bitter disputes in Canadian history. The seven-week dispute concerned the expansion of a golf course to land the Mohawks claim as ancient burial ground.

Soviet Interior Ministry troops surrounded the headquarters of an illegal Armenian nationalist group in the Armenian capital today. The Armenian National Army then laid down its weapons in compliance with a disarmament deadline set by the Armenian parliament. The group's leaders were arrested but officials say about 50 fighters escaped.

New abortion legislation is holding up agreement on a key unification treaty for West Germany. Chancellor Helmut Kohl and opposition Social Democrats failed early today to reach an accord in the latest round of negotiations on the sensitive issue. But more talks are set for this evening in a further bid to find a compromise.

Utility crews struggled through the night to restore power to 25- thousand homes in Atlanta after violent thunderstorms battered the metropolitan area last night. Trees and power lines were downed, and streets were littered with debris in the wake of storms that also hit parts of Alabama and the Carolinas.

NEW YORK (AUG. 30) UPI - Latest metal market prices as quoted Thursday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 81.50-82.50 c-lb.

Antimony, domestic, refined in alloy, $1.25-1.40 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 133.00-137.00 c-lb.

Lead, common, U.S. primary producers 50.00-58.00 c-lb.; U.S. non- primary (secondary) producers 54.00-58.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $250.00-$270.00 76-lb. flask.

Nickel, briquettes delivered to customers, merchant, N.Y., $4.50- 4.75 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $110.00-$115.00 per troy ounce.

Platinum, soft, 99.5 fine, producer - $480.00-$490.00; dealer- approx., $483.00-$488.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $114.00-$122.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $105.67 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 283.75 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $7.80-9.59 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.00-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 82.00-88.00 c-lb.

#90242u1279 08/30/1990 ~United Press International

SAN DIEGO (AUG. 30) UPI - Uncertainty about the next America's Cup torpedoed skipper Peter Isler's attempts to sign up corporate sponsors and forced him to fold his defense sydnicate.

Isler said in a release Wednesday that his team, Isler Sailing International, had not been able to secure the sponsorship money needed to continue preparing for the 1992 regatta.

''Unfortunately, we have not made sufficient timely progress toward obtaining the level of financing required of a winning effort,'' Isler said. ''Time is so short that rather than compromising our campaign's chances of victory, we have decided to withdraw.''

Isler said the protracted legal battles between the San Diego Yacht Club and New Zealand made it virtually impossible for American teams to approach companies for help in raising the approximately $25 million needed to mount a challenge.

Aside from the uncertainty over the date, the races would have been staged in far-away New Zealand had the Kiwis prevailed in court.

''The confusion ... precluded us from going to corporations with a specific proposal during the critical period when foreign teams were moving ahead and when U.S. corporations were in their budget process for 7/8 Team Dennis Conner, Beach Boys USA and Triumph America as the teams that will compete for the right to defend the America's Cup on behalf of the San Diego Yacht Club.

The America's Cup Organizing Committee said it regreted Isler's decision.

''Your pledge of support to the American defense is most welcome and I am certain your team's substantial assets can and will be put to good use by one or more of the remaining defense teams,'' Gene Trepte, chairman of the ACOC Defense Committee, said in a letter to Isler.

Isler was the first American to formally enter the America's Cup derby and obtained major sponsorship from Hewlett-Packard, the computer giant that also backed Isler's team on the World Match Racing Circuit.

CHICAGO (AUG. 30) UPI - Twenty-nine people were indicted Thursday by a federal grand jury in an alleged nationwide gambling ring headquartered in Chicago's Chinatown.

The indictment also names four groups, including the On Leong Chinese Merchants Association of Chicago, one of Chinatown's most influential

organizations.

Charges include racketeering conspiracy, operation of an illegal gambling business, tax conspiracy and individual tax offenses. It also seeks forfeiture of businesses used in the gambling operation and about $11.5 million in gambling proceeds.

The indictment charged the gambling ring operated in Chicago, New York City, Detroit, Minneapolis, Pittsburgh, Houston and Atlanta, starting in some areas as early as 1974.

#90242u1365 08/30/1990 ~United Press International

WASHINGTON (AUG. 30) UPI - Mayors David Dinkins and Jimmy Kemp couldn't be more different. Yet, the liberal black New York Democrat and the white Republican from Meridian, Miss., face a common enemy they fear could cost their citizens thousands, if not millions, of dollars.

Dinkins and Kemp are among the mayors - from both large and small cities - who are mincing no words about preliminary census figures released this week that they claim are drastically undercounting their areas.

If those numbers hold, the mayors say, their citizens will be cheated because the billions of dollars in federal grants that are doled out each year are often based on the official census head counts.

''This is unadulterated nonsense,'' Dinkins said, calling the Census Bureau tally ''statistical grand larceny.''

''Our worst fears have been realized,'' added Kemp, whose area was used for a trial census in 1986. ''I just don't think a system is going be reliable if it is based on people filling out a form and sending it back in.''

As expected, the preliminary census numbers showed a shift of population - and with it political clout and money - from the industrial Northeast and Midwest to the West and other Sun Belt states.

Two basic issues are at stake in the census count. The number of members each state will send to the House of Representatives is calculated on the basis of the census and, within each state, the amount of federal money localities receive for a variety of programs is geared to the tally.

The mayors of losing cities each have 15 days to appeal the census count and there is a chance the Census Bureau will adjust their figures upward. But that is far from a sure bet and some city officials have begun to look for help to Congress, where hearings on the subject will be held next

month.

Also pending is a federal lawsuit filed by New York and other major cities challenging the count.

In almost all the cities where undercounts are being claimed, the mayors' argument is the same: The census method of having citizens fill out and return census forms severely hurts the poor and minorities. Those people, the officials claim, may be more leery about returing forms to the government and, in any event, may have more difficulty reading the forms in the first place.

They also contend that, especially in poverty-ridden areas, immigrants and others are not being counted because they are doubling- and tripling-up in apartments and housing projects.

''One out of six people got the long form and, gosh dog, I looked at one of the long forms and it would take a Philadelphia lawyer to fill it out '' claimed Kemp.

The problem has prompted som odd alliances, such as the one between Kemp and Dinkins. The Missiissippi Republican noted he and Dinkins were so different, ''it's almost like we don't speak the same language, but we have the same problem. The same thing that's going to make him lose in this census count is going to make me lose.''

Dinkins estimated that in his city - where he believes the undercount has been almost 1 million, the loss of federal money could total in the billions of dollars.

''New Yorkers have been undercounted, underfunded and underrepresented for far too long,'' the mayor said. ''In 1990, the statistical shortchanging of our city and others throughout the nation must, once and for all, stop.''

''It's going to mean big bucks for the big cities,'' noted Lance Simmons of the U.S. Conference of Mayors, adding that ''wherever immigrants congregate, the count was probably low.''

Simmons stressed that the count was particularly important ''in a year of budget constraints at all levels of government. There are 17, 18 states out there now saying they are in a recession.''

Also bothering the mayors is that once the numbers are made final, they will stand until the next census in 2000 - a prospect that for losing cities means they will be stuck with what they view as an unfair figure for 10 years.

''There's almost half a billion dollars in city money we get each year that depends on the census data,'' noted David Balinger of the Philadelphia Planning Commission. ''This loss is not just for one year but for the 10 years we use the data.''

Also at issue are predictions that with a reorganized Congress that is geared more toward the Sun Belt, long-term federal policies that favored the Midwest and Northeast may be in for some changes.

For example, low-income energy assistance, which is now directed to poor people who have trouble paying heating bills, may start to be reconfigured to pay more attention to the air conditioning costs of the poor.

That, predicted Randy Erben, the head of the Washington office of the state of Texas, will cause ''some pitched battles'' between state in the Frost Belt and those in the Sun Belt.

-30- 5086

#90242u1367 08/30/1990 ~United Press International

DETROIT (AUG. 30) UPI - A top Ford Motor Co. executive, insisting reports about delays in new models ''are totally wrong,'' said Thursday the No. 2 automaker will substantially raise product spending for 1990-95 from the $23 billion spent during the last five years.

Robert Rewey, vice president of sales operations for Ford's North American Automotive Operations, said Ford remains committed to its product plans, and that by the fall of 1991 six of its assembly plants will have been changed over to build substantially redesigned products.

Among those will be all-new Ford Crown Victoria and Mercury Grand Marquis full-sized sedans, to debut this spring as 1992 models. Those rear-drive cars, to feature a new 4.6 liter V8 engine, will be built at Ford's plant in St. Thomas, Ontario, where the current versions are made.

''Spending will be up by a long shot, even adjusted for inflation,'' Rewey said during a media briefing to discuss the company's 1991-model products.

It was reported last week that the mid-sized Ford Taurus and Mercury Sable cars, introduced for 1986, would not undergo major design changes until 1997 or 1998, three years later than planned.

''Those reports are totally wrong, totally incorrect,'' Rewey said.

While Ford will not officially disclose future product plans, company sources said the front-drive Taurus and Sable cars will undergo a major body restyling for the 1992-model year, and undergo a complete platform or underbody redesign for 1995 or 1996.

''It was the product that turned us around in the 1980s,'' Rewey said. ''We're not losing sight of that.''

But industry obeservers say Ford should have already overhauled its popular Taurus and Sable cars by now to capitalize on the sales success of those cars and counter newer designs like Honda's Accord and General Motors Corp.'s Chevrolet Lumina.

Ford's Taurus and Sable cars are now entering their sixth model year with only minor drivetrain improvements to improve engine and transaxle performance for 1991.

''Uncertainty about clean air legislation in Washington put many of our engine programs on hold, which has cost us,'' said one company engineer with Ford's front-wheel-drive car programs. ''We had to wait until there were much more clearly identified objectives.''

Ford, which enjoyed industry-record profits during the late 1980s, has already introduced several 1991 models, including its all-new Ford Escort and Mercury Tracer subcompacts.

But Rewey acknowledged that troubles with the launch of the Escort and Tracer have resulted in lower than expected sales.

''We have had two or three major problems,'' he said, including a production problems that caused an overabundance of three-door versions, while the wagon, GT and five-door models have been in demand.

Ford also was saddled with too many leftover 1990-model Escorts, discounted heavily with rebates.

''That has caused our dealers significant problems in getting the 1991s rolling,'' Rewey said, but noted that inventories should be in balance by early October.

On Wednersday evening, Ford President Philip E. Benton Jr. said while the automaker has not officially changed its U.S. industry sales forecast of 14.5 million cars and trucks for 1990, it is less confident those levels will be met.

Benton also indicated that internal company sales forecasts for 1991 will probably be lowered this fall.

''I would say our confidence level (for 1990) has dropped a bit,'' Benton said before addressing the Automotive Industry Action Group in Detroit. ''We probably will lower our forecasts for 1991.''

Ford has noticed a ''pullback in demand'' for its large cars in several parts of the country, including Florida, because of rising fuel prices due to Middle East tensions, Benton said.

But he also said Ford remains confident it will meet government- mandated corporate average fuel economy levels for 1990, despite a slower-than-expected startup of the fuel-efficient Escort and Tracer.

#90242u1371 08/30/1990 ~United Press International

(AUG. 30) UPI - Residents of tornado-ravaged Plainfield, Illinois, turned their efforts to repairing their homes and lives after 24 people were killed in Tuesday afternoon's tornado. Police chief D-E Bennet says officials are satisfied that all the missing people have been accounted for. Nearly 350 people were injured, and 70 remained hospitalized... 11 of them in critical condition.

Police in Gainesville, Florida, are keeping silent on details of the slayings of five students found this week in private apartments near the University of Florida. Police told a news conference today that the killer left enough evidence to his ensure his arrest and conviction. The F-B-I did a personality profile of the serial killer that a news report says will show the suspect may be a security guard or hospital orderly and probably is in his late 20's or 30's.

Air Force investigators have found the flight recorder from a U-S military plane that crashed yesterday, killing 13 U-S servicemen and injuring four others. Air Force officials found the device late yesterday in woods near the U-S Air base at Ramstein, West Germany, where the CA Galaxy transport plane crashed after takeoff. An Air Force spokesman says the injured soldiers are in ''stable condition'' at an army hospital.

#90242u1376 08/30/1990 ~United Press International

(AUG. 30) UPI - A tropical wave could mean trouble for a planned Saturday launch of the shuttle Columbia on a 10-day astronomy mission. The forecast calls for a 60 percent chance of favorable launch time weather, but NASA engineers are keeping tabs on a tropical wave that could cause problems. Columbia is to blast off from Cape Canaveral with a seven-man crew.

A new F-B-I report says alleged mob figure Anthony Giacalone tried to shake down Teamsters Union President Frank Fitzsimmons. The report says Giacalone demanded 250-thousand dollars for arranging the murder of former union boss Jimmy Hoffa. The report says Fitzsimmons, who has since died, refused to pay Giacalone. The information in the report comes from Jackie Presser, another former Teamsters president who died in 1988. Hoffa's body

has never been found since he disappeared in 1975.

Pakistan's ousted prime minister is accusing the interim government of blackmailing her into renouncing politics. Former Prime Minister Benazir Bhutto also says the government of President Ghulam Ishaq Khan is trying to isolate her by setting up special courts as a witch hunt against her supporters. Khan sacked Bhutto's government three weeks ago and dissolved the National Assembly.

#90242u1378 08/30/1990 ~United Press International

(AUG 30) UPI - It could take at least a week to process exit visas for foreign women and children trapped by the invasion of Kuwait, diplomats said, while the U.N. secretary-general prepared to meet Iraq's foreign minister in Jordan.

U.N. Secretary-General Javier Perez de Cuellar met in Paris with French Foreign Minister Roland Dumas Thursday and said his mission was ''to obtain the implementation of the (U.N.) resolutions.''

The resolutions call for the withdrawal of Iraqi forces from Kuwait, re-establishment of the deposed government and release of all foreigners held hostage after Baghdad's Aug. 2 invasion. The U.N. Security Council also approved the use of force, if necessary, to enforce a U.N.-sanctioned embargo against Iraq.

''I do not want to give the impression that we have a solution at hand,'' Perez de Cuellar told French television in advance of his meeting with Iraqi Foreign Minister Tariq Aziz. He described his mission as ''extremely difficult and delicate.'' The U.N. chief's meeting with Aziz was scheduled for Thursday but unconfirmed reports said it had been postponed until Friday.

Saudi Foreign Minister Prince Saud al Faisal arrived in Cairo for Thursday's meeting of the Arab League foreign ministers, saying the basic solution to the crisis was Iraq's withdrawal from Kuwait and restoration of the government.

''If we bear this in mind and international efforts intensified, there would still be hope in resolving the crisis,'' he said.

In other developments:

-The New York Times reported Thursday the Kuwaiti resistance had killed or wounded ''a couple hundred'' Iraqi troops and destroyed a few tanks and more than 20 behicles, according to a U.S. government official. NBC television Wednesday said the resistance was supported by the CIA and

other U.S. military special forces, and had made daily guerrilla raids into Iraqi-occupied Kuwait.

-The United States reportedly was expected to begin a plan in which U.S. allies would be asked to help share the cost of the U.S. deployment in the Middle East. The Washington Post cited a senior administration official saying the plan could be implemented as soon as Thursday.

-The British Foreign Office said 32 more Britons were taken from their homes in Kuwait overnight and taken to civilian sites in Baghdad. A total of 197 Britons are in Iraqi custody.

Tuesday Iraqi President Saddam Hussein offered to release all Western women and children who wanted to leave Iraq and on Wednesday, Iraq asked the United States and other countries to supply the names of women and children under its control seeking exit visas to leave.

Norwegian Foreign Ministry spokesman Bjorn Blokhus told UPI Iraqi authorities informed the country's embassy in Baghdad that ''it will take at least a week to process the necessary papers to allow anyone out.'' Blokhus also said the embassy had been told the move included men, women and children, despite the Iraqi announcement Tuesday excluding men.

Britain has not been able to confirm that foreign men detained by Iraq would be released and a process still ''has to be organized'' to provide exit visas, a weary-sounding Foreign Office spokesman said in London.

''Your guess is probably as good as mine. We really don't know'' when Western foreigners will be allowed to leave, the spokesman said.

Both the State Department and the British Foreign Office said they had no information regarding reports that planes would not be allowed to pick up Western women and children from Iraq unless they were carrying food and medicine for Iraq.

''We have not heard anything from the Iraqi authorities,'' a British Foreign Office spokesman said.

At the same time, a White House source said national security adviser Brent Scowcroft met with a former senior administration official who carried one of many back-channel proposals from Iraq along the lines of one reported in the Long Island, N.Y., newspaper Newsday.

Under the proposal, Iraq reportedly said it would be willing to withdraw from Kuwait if U.N.-mandated economic sanctions were removed and Iraq obtained access to the strategic Persian Gulf. But Saddam told CBS News Wednesday his country had no intention of pulling out of Kuwait and flatly denied the existence of any behind-the-scenes negotiations.

''Kuwait is part of Iraq,'' Saddam said through an interpreter. Iraq annexed Kuwait shortly after the invasion and on Tuesday decreed the tiny oil-rich emirate Iraq's 19th administrative province.

Despite requests from Iraq to supply the names of women and children held in Iraq and Kuwait to expedite their departure, the State Department has cautioned there was still no certainty of their release. More than 10,000 Western and Japanese foreigners remain.

Norwegian government spokesmen said they were worried about delivering passports and lists of nationals to the Iraqi authorities.

''What they'll get is a full list of all our nationals in Iraq and Kuwait and where they are,'' said one official, who requested anonymity. ''That is what we have been trying to keep from them throughout this crisis.''

Mohammed al-Mashat, Iraqi ambassador to Washington, offered the prospect of a wider solution to the hostage crisis Wednesday by suggesting that male ''guests'' also would be permitted to leave if the United States gave an assurance that it would not attack Iraq.

Margaret Tutwiller, U.S. State Department spokesman, responded, ''We reject any notion that there should be any conditions attached to the immediate safe departure of all foreign nationals, including Americans, who wish to depart from Iraq and Kuwait.''

''However, as a separate matter, I would reiterate what the president has said since the beginning of the crisis, and that is that U.S. forces are being sent to the region to deter further Iraqi aggression and to defend themselves if attacked,'' she said.

In an interview published Thursday in the Egyptian newspaper Al- Gomhuria, Abdul Halim Badawi, Egypt's ambassador to the United Nations, said he believed the ''main target of the U.S. movements is to get rid of Saddam Hussein whether by force or by other means.'' Badawi said he also believed the United States was waiting for the results of the economic embargo.

''Whatever the results of the crisis, a new map for the Middle East will be prepared by dividing some of the existing entities,'' he said.

''I believe some of the existing countries will disappear from the map of the Middle East and the first of such countries is Jordan,'' Badawi said, adding he believed there was a ''possibility for the return of Kuwait, but the ruling family has little chances'' of returning to power.

In another development, Syria flatly denied any disorders or demonstrations occurred in Syrian cities near the border with Iraq in

recent days. Minister of Information Mohammed Salman told reporters in Damascus that rumors had been spread by ''malignant'' sources in an adjacent Arab country.

Unconfirmed reports from Jordan, Syria's southern neighbor, said Syria had sent troops to its Eastern border with Iraq to quell violent pro-Saddam demonstrations and ''tens of people'' had been killed. Salman said no soldiers had been sent to the Syrian-Iraqi border and the forces in the region at the present had been based there for several years.

SEATTLE (AUG. 30) UPI - Washington natives who are vocal in their displeasure at the influx of Californians had better be more discreet or else start thinking defensively. Californians are fighting back.

A 31-year-old Seattle area woman learned the hard way Tuesday when she yelled, ''Go back to California'' at a Jeep with California plates that cut her off.

The driver of the Jeep, a clean-cut guy about 35 wearing a tie, screeched to a halt, roared back, jumped out screaming obscenities and pummeled her small truck, police said.

''I was so stunned that he would stop his vehicle and back up three car lengths, then start using the 'f-word' and other names. I thought I was dead. He did a beautiful karate kick to my truck,'' the woman said.

The woman said she stopped the man by dialing 911 on her car phone.

''Thank goodness for my mobile phone. He just looked at me and said, 'Fine.' Then he said a few other choice words and raced off.

''California is nice ... but I really think he had a California attitude. I guess I am biased toward them, especially after this.

''I think they're just really rude drivers. My God, they shoot people down there. This guy might have blown me away. They ruined their own state and now they come up here and think they're going to move us over with their rudeness and fast driving.

''He's probably living up here and hasn't paid for his Washington license plates and driver's license so he's ripping off the taxpayers in Washington,'' she said.

#90242u1413 08/30/1990 ~United Press International

MANILA, PHILIPPINES (AUG. 30) UPI - The government will hold preliminary talks with communist guerrillas for a cease-fire in metropolitan Manila and areas devastated by a July 16 earthquake, officials said Thursday.

Defense and military officials earlier ignored a communist truce offer made five days after the quake, which measured 7.7 on the Richter Scale and left more than 1,600 people dead.

But on Wednesday, President Corazon Aquino directed her security advisers to consider proposals in the Senate for talks with both leftist and rightist extremists battling her government.

Aquino's action came amid a series of almost daily bombings in the past two weeks blamed on mutinous soldiers threatening to stage another coup attempt.

Justice Secretary Franklin Drilon told reporters preliminary talks would be held with Senator Wigberto Tanada and representatives of human rights groups and the Roman Catholic church.

Drilon said the talks would cover the rebel proposal for truce in quake-ravaged areas. Although metropolitan Manila was not included in the initial proposal, Drilon included the capital in the proposed cease- fire.

He said a special Cabinet committee that will implement Aquino's directive ''recognizes the importance of peace and development in the country and shares the sentiments which impelled the Senate to call for a cessation of hostilities.''

But when asked if the committee will sit down with rebel soldiers, who have tried six times to oust Aquino, Drilon said, ''not at this point.''

The leader of the rebel soldiers, fufixive army Col. Gregorio Honasan, proposed a truce during the earthquake, but the offer was not accepted.

After the military launched an offensive in the southern island of Mindanao against Col. Alexander Noble, a former deputy chief of staff in Aquino's security unit, Honasan announced on Aug. 15 the resumption of hostilities.

Earlier peace talks on ending a 21-year communist rebellion led by the 19,000-member New People's Army collapsed in February 1986 over rebel demands for power-sharing.

Defense Secretary Fidel Ramos, meanwhile, denied Thursday charges by rightwing rebels he was behind a plot to oust Aquino. He said the charges were meant to ''drive a wedge'' between Aquino and the military.

#90242u1415 08/30/1990 ~United Press International
BRUSSELS, BELGIUM (AUG. 30) UPI - The Persian Gulf crisis demonstrates the NATO charter's restriction on ''out of area'' activity is outdated and should be amended, leaders of NATO's political arm said Thursday.

Their remarks were echoed by British Prime Minister Margaret Thatcher in remarks made in Helsinki.

The North Atlantic Treaty, which created the Western alliance in 1949, limits NATO to common defense within the alliance's geographical area.

''Changed global circumstances demand a changed NATO charter in order to allow the alliance to confront, promptly and directly, threats to its members' security, from wherever those threats emanate,'' said Patrick Duffy, president of the North Atlantic Assembly.

The Assembly includes parliamentarians from all 16 NATO nations.

Countries like Iraq have weaponry comparable to NATO and Warsaw Pact arsenals, so a neat distinction between ''in area'' and ''out of area'' is ''profoundly anachronistic since it derives from a fundamentally outdated threat assessment,'' Duffy said.

He was joined in the statement by U.S. Sen. William Roth and a member of the Turkish Parliament, Zeki Yavuzturk, both vice presidents of the Assembly.

The pronouncement, reflecting a growing sentiment in some European circles follows a trip by Duffy and other Assembly members to Turkey and Italy in the past few weeks.

Thatcher, in Helsinki, said only Britain and France had done ''significantly more than the minimum'' to enforce economic sanctions against Iraq.

''NATO must be prepared to undertake out-of-area defense, otherwise we shall not have a defensive reply to the threats to our supplies, of which oil is obviously one,'' she said.

Despite widening support for a change in the NATO charter, a change will be difficult to achieve because of NATO's requirement for agreement among members, analysts said. France, which pulled out of NATO's integrated command structure in 1966, would particularly object to any expanded role for the alliance.

NATO foreign ministers met in Brussels on Aug. 10, eight days after Iraq invaded Kuwait. They endorsed United Nations sanctions against Iraq but took no common military position due to the restriction that the gulf was ''out of area'' for NATO action.

North Atlantic Assembly leaders applauded the United States, Britain and Turkey for their response to the gulf crisis and said they are ''convinced that we (NATO) cannot continue to address these 'out of area' crises on an ad hoc basis.''

The nine-nation Western European Union stepped into the military vacuum to a degree, agreeing on Aug. 21 to coordinate military activities of its members who dispatched forces to the Persian Gulf. Nations acting under the WEU umbrella were Britain, France, Belgium, Spain, Holland and Italy.

West Germany sent warships to the Mediterranean but not the gulf, citing its constitutional bar against military activity in non-NATO areas.

Failure to amend the NATO charter would strain the NATO alliance, they said, because the United States will resent being repeatedly relied upon as top cop, and southern-flank NATO members will ''question the value of an alliance which professes itself incapable of addressing direct threats to the safety of their citizens.''

A political and military redefinition of NATO neatly fits U.S. goals of retaining influence in Europe. But a recasting of the alliance to achieve these goals is not certain.

Some European leaders, including most in the French government, would prefer the 12-nation European Community to assume the Eruope's political leadership in the 1990s Europe. The Western European Union and the 35-nation Conference on Security and Cooperation in Europe could also play at least part of the role that several of the NATO leaders want the alliance to play.

#90242u1416 08/30/1990 ~United Press International

(AUG. 30) UPI - Led by a rise in U.S. gasoline of nearly 7 cents a gallon oil prices shot up in early trading Thursday as tension from the Persian Gulf crisis reasserted its influence on the market.

''Tensions have resurfaced after being in the background for a week,'' said Ed Kevelson of Dean Witter Reynolds' International Energy Futures Group in New York.

''Yesterday's peace rumors are not there today,'' said Bill Hinton of New York's Stotler & Co.

Prices fell sharply Wednesday on the belief that Iraq's President Saddam Hussein was seeking a diplomatic settlement of his Aug. 2 invasion and occupation of Gulf neighbor Kuwait.

New York Newsday reported Wednesday that Iraq had secretly offered to pull back from Kuwait in exchange for a lifting of the Aug. 6 U.N. embargo on Kuwaiti and Iraqi exports and for guaranteed access to Kuwait's ports.

But Thursday's market was focusing on a delay in peace talks between Iraqi and U.N. officials and more truculent statements emanating from Baghdad.

At midday, unleaded gasoline for September delivery was up 6.88 cents to 91.59 cents a gallon on the New York Mercantile Exchange, while home heating oil had gained 4.61 cents to 76.25 cents a gallon.

The benchmark West Texas Intermediate crude for October delivery had added $1.21 to $27.13 a barrel.

On the U.S. Gulf Coast spot market, where crude is bought and sold to the highest bidder, WTI had risen $1.05 to $27 a barrel.

On the European spot market, the United Arab Emirates' Dubai light - the key OPEC crude from the Middle East shipped mainly to the Far East - was up 62 cents to $23.92 a barrel.

Britain's widely traded North Sea Brent crude was ahead 77 cents to $26.90 a barrel.

Hinton said the rally also was being helped by reports that Saudi Arabia may have trouble increasing its daily output by 2 million barrels to help offset the 4 million barrels a day lost through the U.N.-ordered embargo.

The trader said the Saudis are reportedly ''placing ads all over the place'' for oil workers to replace those who have fled Saudi Arabia because of war fears.

In advance of his Amman, Jordan, meeting with Iraqi Foreign Minister Tariq Aziz, U.N. Secretary General Javier Perez de Cuellar told a French television audience: ''I do not want to give the impression that we have a solution at hand.''

He described his mission as ''extremely difficult and delicate.'' The U.N. chief's meeting with Aziz, originally scheduled for Thursday, was postponed until Friday.

There also were unexpected delays in Iraq delivering on its promise Tuesday to allow dependents of Western embassy personnel to leave the

country.

Norwegian Foreign Ministry spokesman Bjorn Blokhus told United Press International that Iraqi authorities had informed his country's Baghdad embassy that ''it will take at least a week to process the necessary papers to allow anyone out.''

#90242u1419 08/30/1990 ~United Press International

PLAINFIELD, IL (AUG. 30) UPI - Debbie Weglarz and her husband kept $1,500 stashed in their garage for a rainy day.

The rains came Tuesday. So did a tornado. Now they can't find their garage.

''It's gone,'' Weglarz said Thursday. ''Not just the garage. Everything's gone.''

The Weglarz family, whose home used to be five miles north of Plainfield, is among hundreds who lost their homes to the savage storm that cut a swath from Plainfield to Joliet, southwest of Chicago.

Twenty-four people were killed by the twister and another man died of carbon monoxide poisoning when he tried to use a gas generator at his home. Sixty-three of the 355 people injured remained hospitalized Thursday eight in critical condition.

The Will County Emergency Services and Disaster Agency pegged losses to private homes and businesses at $100 million. The damage was so overwhelming that President Bush needed only hours to respond to Gov. James R. Thompson's plea for a federal disaster declaration. Thompson issued a similar state declaration Wednesday, after tourning the devastated area.

The Weglarz family lived in their now destroyed home for 11 years. After the storm, the house, the garage, even the grand piano were gone. A neighbor's boat rested where their front door used to be.

Insurance adjusters swarmed over Plainfield and nearby Crest Hill, where an apartment complex was destroyed, assessing damage and writing checks to victims to cover their living expenses.

''We don't even have any idea how many claims there will be,'' said Greg Rossiter of Allstate Insurance Co. ''All we know at the moment is that we alone have 14,000 home and auto policies in the Plainfield and Joliet areas.''

Several insurance companies set up temporary claims offices to take

reports and one savings and loan offered unsecured loans of $200. Secured emergency loans of up to $10,000 also were offered.

Storm-shocked victims carrying plastic garbage bags combed a cornfield adjacent to the wrecked apartment complex, searching for belongings strewn by the storm.

At least 10 dump trucks lined up at the apartment complex to collect debris and tow trucks dragged mangled cars from streets and fields.

Plainfield officials summoned structural engineers to assess the soundness of damaged buildings.

''The emergency is over,'' said Police Chief D.E. Bennett.

''Everyone knows what comes next,'' Weglarz said. ''It's time to rebuild.''

He and his wife will start with an emergency $6,000 check from their insurance company pending an evaluation of their loss.

Volunteers from the Salvation Army and Red Cross set up relief efforts throughout the stricken area. Scores of people lined up to give blood after hospitals reported shortages of types O and B, both negative and positive.

A propane tank near a Baptist Relief Organization truck exploded at the Crest Hill complex Thursday, injuring four people. The propane tank was being used by a mobile kitchen providing food for tornado victims. Police Sgt. James Albritton said officials could not immediately determine the cause.

The Joliet K mart served as a central gathering point for canned food and clothing donations to tornado victims.

Offers of aid even came from the Soviet Union, grateful for the help Illinois residents offered following the earthquake in Armenia.

''I'm absolutely amazed that the loss of life is not in the hundreds with casualties in the thousands,'' the governor said after his tour,

The tornado struck just one day before classes were scheduled to begin at Plainfield High School, which was leveled. School officials canceled all elementary and high school classes for this week and have decided to split the high school population among other schools in the area. Students will begin half-day classes starting Sept. 6.

#90242u1446 08/30/1990 ~United Press International

SRINAGAR, INDIA (AUG. 30) UPI - Dozens of daily and weekly newspapers in the Kashmir Valley staged a one-day strike Thursday to protest alleged harassment by Indian security forces who are trying to put down a Moslem uprising in the region.

Local papers, whose circulation has surged because of coverage given to the conflict, were unavailable at news stands for the first time since mid-January, when a 2-year-old Moslem secessionist movement flared into a popular uprising against Indian rule.

Some newspapers hoisted black flags on their buildings to protest alleged harassment by security forces, and reporters in the state summer capital of Srinagar wore black armbands in solidarity with the one-day strike.

Editors in the Kashmir Valley charge that Indian security forces have searched newsrooms without cause, detained reporters, harassed street vendors and refused to recognize curfew passes issued to journalists. They also claim the state government stopped advertising in local papers in January to pressuzGo?

The most highly publicized case of government harassment of the news media came in June, when soldiers abducted Yousuf Jameel, a Srinagar-based correspondent for the British Broadcasting Corp. and the news agency Reuters.

High-level officials in New Delhi and in Jammu and Kashmir state repeatedly denied any military involvement in the incident, and the Indian government was publicly embarrassed when soldiers released Jameel one day after his abduction.

The strike Thursday was called by the Kashmir Editors Conference, headed by Ghulam Nabi Shaida, the editor of the daily newspaper Wadi Ki Awaz, or ''Voice of the Valley.''

''We can't bear government harassment any more,'' said Shaida, whose newspaper office was searched by Indian intelligence agents Aug. 24. ''They have been raiding our offices, beating up our hawkers and not respecting any valid curfew passes.''

''The government wants to gag us, but we are not going to be cowed,'' he added. ''If the government does not stop repression of the ''ression of the

Sofi Ghulam Mohammad, editor of the Srinagar Times, the area's largest newspaper with a circulation of about 10,000, charged that Indian security forces had arrested two of his staff members recently. He said authorities released the two only after he obtained an order from the state high court.

''We have to work under two pressures: the pressure from the militants and the authorities. But the authorities want to suffocate us. We are not going to accept that repression,'' Mohammad said.

Scattered violence continued Thursday in the Kashmir Valley. Moslem rebels ambushed a vehicle carrying a senior superintendent of police in the town of Anantnag, wounding the official and five other security men in the car.

The Moslem separatist movement in the region gained widespread popular support in mid-January, when security forces opened fire on a crowd of demonstrators and killed at least 35 people.

The rebels claim that Moslems in Kashmir need a separate state because of years of discrimination against the region by successive Hindu-dominated administrations in New Delhi.

#90242u1450 08/30/1990 ~United Press International

WASHINGTON (AUG. 30) UPI - The 1989 infant mortality rate, at 9.7 per 1,000 live births, was the lowest ever recorded in the United States, while deaths due to AIDS rose to become the 11th leading killer, the government said Thursday.

The 1989 data, released by the National Center for Health Statistics, also showed life expectancy reaching a record high of 75.2 years and a continuing decline in death rates for various diseases.

Infant mortality rates reflect deaths of children before their first birthday. The 1989 infant mortality rate was 9.7 per 1,000 live births, 2 percent lower than the 1988 rate of 9.9 and the lowest-ever recorded rate for the nation.

However, the decline in infant mortality has slowed in the past several years, particularly for black infants for whom the rate is more than twice that for whites, the report said.

A breakdown of 1989 infant mortality figures by race was not available. But Sandra Smith, a spokeswoman for the health statistics center, said she presumes the gap identified in 1987 continues: 8.6 deaths per 1,000 live births for whites and 17.9 deaths for blacks.

''Although we've made progress in reducing this nation's infant mortality, we must do better,'' Health and Human Services Secretary Louis Sullivan said, adding progress is needed to improve maternal and infant health.

''In particular, we must continue to direct prevention, education and

health care opportunities to our minority and poor citizens where infant mortality strikes hardest,'' he said.

A 1986 U.N. ranking of countries that keep infant mortality rates and have populations of at least 1 million found the United States ranked 26th at 10.4 deaths, with Japan leading at 5.2 deaths and Romania with the worst record at 25.6. Among the nations with better rates than the United States were Western European countries, Canada and Hong Kong.

Acquired immune deficiency syndrome continued in 1989 to ravage the population, leaving an estimated 21,360 dead from the HIV infection. The death toll represented a 32 percent increase over 1988, when an estimated 16,210 people died from the disease.

The spiraling number of AIDS deaths caused the disease to become the 11th leading cause of death in 1989, up from 15th place in 1988.

Of the 21,360 deaths, 64 percent were white males, 24 percent black males and about 6 percent each for white and black females. However, the report noted that the death rate was worst for black males - 35.3 deaths per 100,000 population, followed by 13.5 for white males, 8.3 for black females and 0.9 for white females.

The report also found that life expectancy at birth reached a record high of 75.2 years in 1989, up from 75 years in 1987 and the provisional estimate of 74.9 years in 1988.

But the data for blacks was not as encouraging as for other groups. In 1989, preliminary data showed life expectancy increased six months for white males but only one month for black males. For both white and black women, life expectancy increased by about 2.5 months from 1988 to 1989.

There were 2.15 million deaths in 1989, 1 percent lower than in 1988.

Age-adjusted death rates (rates that correct for demographic shifts) reached the lowest level ever recorded in the United States in 1989, with declining rates for heart disease, stroke, accidents, pneumonia and influenza, atherosclerosis and septicemia.

Along with AIDS, diabetes continued an upward death spiral, with approximately 47,000 deaths in 1989, making it the seventh leading cause of death.

The 10 leading causes of death in 1989, in decending order, were heart disease, cancers, stroke, accidents, chronic obstructive pulmonary diseases, pneumonia and influenza, diabetes, suicide, chronic liver disease and homicide.

Among the other 1989 findings:

-About 4 million babies were born, the largest number reported since 1964.

-About 2.4 million marriages, or 9.7 per 1,000 population, the same as in 1988.

-About 1.16 million divorces, or 4.7 per 1,000 population, the lowest level since 1974.

#90242u1468 08/30/1990 ~United Press International

GAINESVILLE, FL (AUG. 30) UPI - The serial killer who stabbed and bludgeoned five college students is possibly a security guard or hospital orderly and has knowledge of weapons and crime scenes, a psychological profile reportedly shows.

Police said they have been flooded with calls and letters from people claiming to have information about the killer who has terrified the University of Florida community.

''We don't know who he is .... he may appear as normal as you or I except he murders people,'' Police Lt. Sadie Darnell said. ''We're nowhere near saying we've got a suspect but we're very encouraged with the cooperation we're getting.''

The Miami Herald, quoting sources, reported Thursday that the profile being prepared for investigators shows the killer probably is in his late 20s or early 30s.

The Herald report did not indicate what the profile was based on but said the killer probably is not a sworn police officer or a doctor, but works more along the lines of a security guard or a hospital orderly.

The report said authorities believe the five slayings are the work of one person who is knowledgable of weapons and crime scenes and who frequents places where students congregate - bars or clubs.

Police encouraged Gainesville residents to report anything - even a ''gut reaction'' - that might help them track the killer, but also appealed for calm.

''We've had officers who have been out on a call and have been met at the door by guns,'' Darnell said. ''We don't want any additional tragedies.''

Police officials held a news conference Thursday but refused to reveal much about the investigation for fear of spoiling it. They declined to say

when the FBI would finish drafting a pscyhological profile of the killer.

''Again we do not have a profile. It's too early,'' Darnell said.

Alachua County Sheriff's Lt. Spencer Mann said the FBI had provided investigators with ''preliminary information'' but declined comment on a Miami Herald report about the profile.

Tampa television station WTVT reported receiving a letter, signed only with the initials ''K.T.,'' from someone claiming to know the killer. The letter, postmarked in Tampa, said the murderer was a failed medical student and was leaving Gainesville.

''Letters like that, we've received at least 30 of those ... I don't believe that's unusual,'' Darnell said.

Calls poured in at the rate of 1,400 per hour to the 150-member task force investigating the murders. Some suspicious sightings turned out to be nothing more than tree branches brushing against the sides of houses, Darnell said.

She said investigators had no physical description of the suspect although they were checking various reports of suspicious sightings from the victims' neighbors.

Terror has gripped the college community since authorities discovered the bodies of the five students earlier this week, all in apartments within 2 miles of the University of Florida campus.

Four of the dead were University of Florida students and the fifth was a student at Santa Fe Community College in Gainesville.

Police believe the killer sought out slender young women with brown hair and forced his way into their apartments to kill them. All the victims fit the description, except for one young man who was the boyfriend of one of the women.

Darnell sought to clarify police reports that the killer knew his victims.

''There is a possibility that the suspect or suspects may have been watching the victims for a short period of time but they were not acquainted in any meaningful way,'' Darnell said.

Mourners jammed the First Baptist Church in Pompano Beach Thursday for the funeral of one of the victims, Sonya Larson, 18, of Deerfield Beach. Her body was cremated.

Larson and her roommate at the University of Florida, Christina P. Powell,

17, of Jacksonville, were found stabbed to death in their apartment late Sunday.

Funerals were scheduled around the state Friday for Powell and the other victims - Christa Hoyt, 18, of Gainesville; Tracey Paules, 23, of Palm Springs North; and Manuel Taboada, 23, of Carol City.

Gainesville Mayor Courtland Collier expressed sympathy for the victims' families and sought to reassure parents of students in Gainesville.

''Neighborhoods are being flooded with police officers. We're doing everything we can,'' Collier said.

The reassurances did little to calm the edgy community. Fearful residents at the Gatorwood apartment complex, where two of the murders occurred, reported hearing breaking glass Thursday and suspected a burglary was in process. Police answering the call were met by residents armed with bats, bricks and bottles.

''It turned out it was a poor maintenance man who broke some glass and was surrounded by eight or nine offiicers,'' Darnell said.

Classes continued on schedule Thursday at the Univerity of Florida, but the few students attending were mostly men.

#90242u1470 08/30/1990 ~United Press International

NEW YORK (AUG. 30) UPI - Some $2.7 billion of Sears, Roebuck & Co. senior debt was placed on credit alert Thursday by Fitch Investors Service Inc., which cited a bleak financial outlook for the nation's largest retailer.

Fitch, which lowered its rating of Chicago-based Sears' senior debt in April, said ''the likelihood of a recession and another poor Christmas selling season, as well as the probability of material write- offs'' could lead to another downgrade.

The rating agency said Sears' first-half results demonstrate a ''dramatically worsening financial situation.''

Sears' merchandise group lost $117 million in the first half, vs. a profit of $36 million in the same period of 1989.

The slumping retailer shifted to an everyday low price strategy in the first half of last year that has failed to catch on with consumers.

''Financial deterioration in this division, the replacement of its chief executive ... and and the planned layoff of several thousand employees

strongly indicate that Sears' strategic focus has not met its objective and overall credit quality is weakening faster than expected,'' Fitch said in a statement.

Fitch also said it expected the company's Coldwell Banker real estate operation ''will continue to lose money given the current downturn in the real estate market.''

#90242u1473 08/30/1990 ~United Press International

DUBLIN, IRELAND (AUG. 30) UPI - Freed Irish hostage Brian Keenan said Thursday he believed he was kidnapped in Beirut because the pro-Iranian Moslem extremists who seized him thought he was British.

Still pale and visibly shaken by his ordeal of more than four years, Keenan said at an emotional news conference at Dublin Castle that he had tried to learn why he was taken hostage April 11, 1986, shortly after the United States bombed Libya with British support.

''I demanded to know why they had taken me. I refused to eat for six days, and they showed me a copy of The (London) Times,'' which included coverage of the bombing, Keenan said.

''They told me that that (Libyan bombing) was the reason, and I didn't believe them. They thought that I was British,'' said the Belfast-born Keenan, who holds both Irish and British passports.

Keenan, 39, broke down several times during the lengthy news conference when asked about fellow hostages Terry Anderson and Thomas Sutherland, both Americans, and especially Briton John McCarthy, with whom he was held.

''I will do anything, anything, without reservation, that the friends of John of McCarthy or the parents of John McCarthy ask of me,'' he said in a voice choked with emotion.

Keenan described his captors as being about 30 years old, with a mental age of 12.

''Some of them were reasonable, but with limited knowledge of the world. Some of them would not participate in the beatings,'' he said.

''The top leadership never spoke to me directly, and they never spoke about themselves,'' he said. ''We did speak about Iran quite frequently, but they never tried to brainwash me.''

Despite being held in a small, dark, mosquito-filled basement room, often chained to a wall and blindfolded for most ot his captivity, Keenan said

he held no desire for vengeance against his captors.

''I have no desire for retribution,'' he said.

Keenan said he and other hostages had had their lives threatened because of adverse publicity in the American press.

Keenan refused to offer details on what he had earlier told his doctors were frequent beatings during his first months in captivity, saying he would not permit the press to engage in ''voyeurism,'' especially since the lives of other hostages were still at risk.

Instead, he talked of the hostages' daily routine.

''Every day was the same. They gave us a rind of bread, a slice of processed cheese and a cup of tea. For lunch there would be 'dogshead' soup,'' he said, using a disparaging Irish expression. ''Some of the food in the middle period was very bad.''

For the last nine months of his capitivity, until he was released late Aug. 24, Keenan was held in a south Beirut suburb under vastly improved conditions, including daily rations of fruit y?

0 5/8yc had excellent cuisine. The room was frequently cleaned,'' he said.

Keenan said he never lost hope that he would one day be freed.

''I never allowed myself to think that they would shoot me. I kept telling myself and telling them, 'You have taken away from me my liberty. You do not take my freedom. That you can never take,''' he said.

When asked how it felt to be free, Keenan said: ''I spent 4 1/2 years in a hole. How would you feel?''

Keenan said he still was being interviewed by a psychiatrist and must have further dental work done before he can leave the Mater Clinic for his Belfast home.

#90242u1474 08/30/1990 ~United Press International

JEFFERSON CITY, MO (AUG. 30) UPI - Condemned killer George Gilmore awaited word Thursday on whether the Supreme Court would stay his execution for slaying an 83-year-old woman in a crime spree targeting elderly and handicapped people.

Gilmore, who is confined at the Potosi Correctional Center, was scheduled to receive a lethal injection at 12:01 a.m. Friday.

His attorneys, James Delworth of St. Louis and Kevin Collins of Dallas, filed an appeal earlier this week with Supreme Court Justice Harry Blackmun and filed another Thursday in U.S. District Court in St. Louis.

In their appeals, defense attorneys argued the jury that convicted Gilmore of first-degree murder should have been told to consider his impoverished childhood and his educational level before recommending the death penalty.

The nation's highest court rejected two previous appeals by Gilmore during his 10-year legal fight to avoid the death penalty.

If the sentence is carried out, Gilmore would be the 136th person executed in the United States since the Supreme Court lifted its ban on capital punishment in 1976. He would be the fourth inmate executed in Missouri in 1990.

Leonard Laws, one of Gilmore's partners in the rampage of murder and robbery, was executed May 17 for his role in one of the crimes. Laws, was executed by injection at Potosi for the 1980 shotgun slayings of an elderly couple.

Gilmore was the leader of a band of thugs who terrorized elderly and handicapped people for several years in east-central Missouri, committing robberies and murders.

His death warrant stemmed from the 1979 murder of Mary Watters, 83, who lived alone in Robertsville. She was shot twice with a revolver during a robbery.

As Gilmore and his accomplices were breaking into Watters' home, the terrified victim fired at Gilmore with a shotgun but missed him. The only loot taken from her home was the shotgun and a small radio. The articles were sold for $20 each. Watters had no money.

Dale Riley, assistant director of the Missouri Division of Adult Institutions, said plans for the execution proceeded on schedule Thursday. He said prison officials were confident the execution would be carried out.

Gilmore, 44, apparently was confident his execution would be stayed, prison officials said. They said he did not request any special last meal and asked to eat regular prison fare several hours before his execution.

Earlier this month, St. Louis County Circuit Judge James Hartenbach rejected Gilmore's request that he be assigned to work as a barber on death row, where he was confined since April 23, 1982.

Gilmore, who was convicted of five murders that produced four death

sentences and a life sentence, said he expected his convictions to be overturned. He said cutting hair would give him ''a substantial opportunity to be a productive citizen upon release from incarceration.'' The condemned prisoner also said it would enable him to collect Social Security benefits.

In rejecting the request, the judge said there were no plans for releasing Gilmore from prison.

Gilmore was an automobile mechanic from Mineral Point, a tiny community located only a few miles from the maximum-security prison at Potosi.

ST. THOMAS, VIRGIN ISLAND (AUG. 30) UPI - A key prosecution witness in the drug and perjury trial of District of Columbia Mayor Marion Barry was sentenced Thursday to five years unsupervised probation and community service on four drug convictions.

Charles Lewis was sentenced on two counts of cocaine possession and two counts of cocaine distribution in U.S District Court as his relatives looked on.

Lewis, a friend of Barry's and a former D.C. personnel department employee is restricted to the Virgin Islands under the sentencing. The details of his community service were not spelled out.

U.S. Attorney Terry Halpern, in a motion filed with the court Wednesday, asked that Lewis be given ''very favorable consideration'' for cooperating with the government in Barry's drug and perjury trial.

Barry was convicted Aug. 10 of one misdemeanor count of cocaine possession and acquitted on another possession count. U.S. District Judge Thomas Penfield Jackson declared a mistrial on the 12 remaining counts after the jury said it was deadlocked.

Prosecutors are expected to announce Sept. 17 whether they will retry him on the deadlocked counts.

Lewis could have been sentenced from 41 to 51 months in prison for drug convictions in 1989. He will spend no time in jail.

The motion said Lewis ''testified truthfully'' and provided investigators with information that led to Barry's indictment. It also said Lewis helped provide information about ''program abuses'' in a joint D.C.-Virgin Islands personnel project conducted in 1988. The project came under investigation after officials raised questions about spending.

Lewis's help was ''invaluable to the prosecution of a public official who had been violating the narcotics laws and making false declarations under oath in concealing his drug abuse,'' Halpern said in the motion.

Lewis testified he used crack with Barry in December 1988 at the Ramada Inn in Washington and used cocaine and marijuana with the mayor in the Virgin Islands in 1986 and 1988.

(AUG. 30) UPI - The head of the United Nations arrived in Amman, Jordan, today in a bid to resolve the Persian Gulf crisis. U-N Secretary-General Perez de Cuellar says he will meet with Iraq's foreign minister tomorrow morning instead of today as previously scheduled. U-N sources in New York indicate that the meeting was delayed because of a scheduling problem, NOT for political reasons.

Leaders of the political arm of NATO want the alliance to re-define the organization's military role in light of the Persian Gulf crisis. Officials say the NATO charter limits the Atlantic Alliance to military action within the European and North Atlantic region. That excludes NATO from actions of crucial interest to the alliance, such as the Persian Gulf. Officials from NATO's political arm urged in Belgium today that changes be made in the NATO charter.

Japan offered one-BILLION dollars in aid today to the multi- national force in the Persian Gulf and to Middle East nations hurt economically by Iraq's invasion of Kuwait. Japan's finance minister told reporters that the one-BILLION-dollar fund will be used to support the U-S-led multi-national force as well as Jordan, Turkey and Egypt. Yesterday, Japan said it would contribute medical personnel and civilian transport to U-S-led forces in Saudi Arabia and elsewhere in the region.

(AUG. 30) UPI - West Germany wants to limit total troop strength in a future united Germany to 370-thousand. Foreign Minister Hans-Dietrich Genscher formally presented the proposal in Vienna today during talks on reducing conventional forces in Europe. West German Chancellor Helmut Kohl agreed to the figure of 370-thousand during talks last month with Soviet President Gorbachev in Moscow.

A federal grand jury in Chicago indicted 29 people in an alleged nation-wide gambling ring based in Chicago's Chinatown. The On Leong Chinese Merchants Association... one of Chinatown's most influential

organizations... was among four groups named in the indictment. Officials allege that the gambling ring also operated in New York City, Detroit, Minneapolis, Pittsburgh, Atlanta and Houston... starting in some areas as early as 1974.

Hurricane Gustav and the remnants of Tropical Storm Hortense are plowing northward over the open Atlantic, posing little threat except to shipping interests. Forecasters at the National Hurricane Center in Miami say both storms are two to three days away from Bermuda and it's too early to tell whether the island will be threatened. Gustav's maximum sustained winds are near 90 miles an hour.

COLOMBO, SRI LANKA (AUG. 30) UPI - Security forces airlifted soldiers, food and weapons into a military camp that has been besieged for four days by Tamil rebels firing rockets and mortars, a senior defense official said Thursday.

Ranjan Wijeratne, the minister of state for defense, told reporters that helicopters of the Sri Lankan air force carried out the rescue operation Wednesday morning despite heavy gunfire from guerrillas of the Liberation Tigers of Tamil Eelam.

Hundreds of Tamil rebels surrounded the Sri Lankan military camp in Mullaitivu, 240 miles northeast of Colombo, Monday and pounded the base with rockets and mortars. At least six soldiers were killed and 40 wounded in the fighting.

Wijeratne said at least 100 Tamil militants were killed in the attack.

Helicopters were dispatched Wednesday to evacuate the wounded soldiers, he said. One helicopter landed amid heavy mortar fire and ferried 40 wounded soldiers to a newly built hospital in Anuradhapura town, the defense official said.

Authorities have said the rebel attack on the base was aimed at diverting the military's attention from a week-long offensive in nearby Jaffna, where the army has been trying to break a siege around a 300- year-old Dutch-built fort.

About 200 Sri Lankan soldiers have been trapped inside the fort since mid-June, when hostilities erupted between the Tamil rebels and the Sri Lankan government.

More than 2,600 soldiers, rebels and civilians have been killed mid-June, when Tamil guerrillas simultaneously attacked four military camps in

eastern Sri Lanka.

Tiger rebels are fighting to establish a separate Tamil nation in northern and eastern Sri Lanka. They claim that the country's minority Tamil community, which is mostly Hindu, needs a separate nation because of years of discrimination by the majority sinhalese, who are predominantly Buddhist and who control the Colombo government.

WASHINGTON (AUG. 30) UPI - Early findings suggest the experimental drug DDI may prolong AIDS patients' lives as long or longer than AZT, the only goverment-approved drug to combat the AIDS virus, researchers said Thursday.

Government scientists said their study of 58 patients with AIDS or a complex of AIDS-related symptoms, called ARC, showed 88 percent of patients were alive 21 months after starting dideoxyinosine, or DDI, treatment. That compares with a 50 percent survival rate at 21 months among similar patients in early tests of zidovudine or AZT, and the 25 percent survival rate at 21 months found in the past among patients who received no treatment

''We were quite taken by the survival of patients. It is pretty good,'' said Dr. Robert Yarchoan of the National Cancer Institute, who co-authored the study published in the British journal Lancet.

Yarchoan emphasized the study was small and did not directly compare the effectiveness of AZT, which is made by Burroughs Wellcome Co., of Research Triangle Park, N.C., with DDI, made by Bristol-Myers Squibb Co. of New York. Tests to directly compare the two drugs in up to 2,500 AIDS patients are now underway, and results should be available in about a year.

However, the early findings ''suggest DDI has a shot at being a good, first-line drug,'' Yarchoan said.

''This gives you a sneak preview. It increases the odds those studies are going to be positive,'' he said. ''DDI is looking at least as good as AZT ... but I don't think you can conclude which is better from this.''

Neither AZT nor DDI, which both attack an enzyme the virus needs to reproduce, is a cure for AIDS. But both appear to slow the disease's lethal progression.

One problem with AZT has been that its toxic side effects like anemia and bone marrow suppression have forced about one-third of AIDS patients to discontinue treatment. About 15 percent to 20 percent of AIDS patients

have had to discontinue DDI due to side effects like pain in nerve endings and potentially fatal inflammation of the pancreas, Yarchoan said.

Because the two AIDS drugs carry different toxicities and likely also generate different drug resistance, researchers hope it may be possible to extend AIDS patients' lives even further with treatments that alternate the two agents.

Currently, about 10,000 Americans with AIDS or symptoms of AIDS are taking DDI in traditional government-sponsored tests or in a new ''expanded access'' plan in which Bristol-Myers provides the drug free to people unable to participate in such tests.

The study pointed out one major benefit DDI may have over AZT: increasing levels of vital immune cells, rather than just keeping the levels from dropping further.

''With DDI, in people who were not previously on AZT for longer than four months, we see a very good rise in CD-4 counts (counts of immune cells targeted by the AIDS virus) that is higher and more pso'onged than with AZT,'' Yarchoan said. The positive effect on immune cell counts - an average increse of 18 percent persisting for at least nine months - was significantly less pronounced among patients who previously received long-term AZT therapy.

NCI researchers said those findings may explain why immune cell counts have not gone up substantially in patients receiving DDI through the expanded access program since most have received AZT for six months before going on DDI. The study also found high levels of fatty substances called triglycerides in the blood may predict pancreatic inflammation, offering doctors a possible way of catching that side effect before it poses a serious threat to patients.

#90242u1565 08/30/1990 ~United Press International

TALLAHASSEE, FL (AUG. 30) UPI - Attorney General Bob Butterworth accused Phillips Petroleum on Thursday of selling gasoline to its independent distributors at a higher wholesale price than the retail price charged at its company-operated stations.

In a complaint to a Broward County Circuit Court, Butterworth requested an immediate injunction to halt the alleged price- discrimination practices by Phillips. He also asked the court to fine the company $5,000 for each violation.

According to Butterworth, Phillips was selling gasoline at its company-owned stations anywhere from 5 cents to 10 cents a gallon less

than the price it was charging the independent operators.

The action came one day after independent station operators from south Florida held a news conference to complain about the higher gasoline prices they had to pay compared to those paid by company-owned gas stations.

The independents say they have had to pass the higher prices they have been forced to pay since the Iraqi invasion along to consumers, causing them to lose customers as motorists search for the lowest gas prices available.

''The evidence gathered thus far suggests that independent jobbers and distributors could buy Phillips gas cheaper at a company-operated station than by buying wholesale direct from the company,'' Butterworth said.

''Ultimately, it is consumers who are penalized by the lack of meaningful competition,'' said Butterworth, adding that such actions are a violation of Florida's Motor Fuel Marketing Practices Act.

The act makes it unlawful ''for any refiner engaged in commerce in this state to sell any grade or quality of fuel at a retail outlet below refiner cost, where the intent is to injure competition.''

The move against Phillips, which is based in Bartlesville, Okla., was the first such action taken by the state of Florida since gas prices began to rise after the Aug. 2 invasion of Kuwait by Iraq.

At least one other state has brought price-gouging charges against a major oil company, said Trisha Spillan of the attorney general's office. North Carolina officials recently filed suit against Exxon Corp.

In announcing the action against Phillips, Butterworth warned that his office will also begin issuing subpoenas to operators of service stations ''in any area of Florida where gas prices appear to be unreasonably out of line (from prices)in the rest of the state.''

Previously, subpoenas have been issued only to oil companies.

#90242u1578 08/30/1990 ~United Press International

WASHINGTON (AUG. 30) UPI - The State Department accused the Iraqi government Thursday of entangling Western women and children in a web of bureaucratic red tape and confusion, putting them on an ''emotional roller coaster'' that is both inhumane and disgraceful.

The assessment was made more than two days after President Saddam Hussein

had announced that Western women and children would be free to leave Iraq and Kuwait, if they chose to go.

But State Department spokeswoman Margaret Tutwiler said that no Westerners have been able to leave, and Iraqi authorities are putting out a bewildering and sometimes conflicting set of orders about what paperwork would be required.

In the latest version presented to American officials in Baghdad, the procedures require a list of all those who wish to leave. Each woman on the list has to write a letter, saying she wants to depart. That letter has to be accompanied by a translation into Arabic, and a certification from an Iraqi fiscal ministry certifying that all taxes have been paid.

Although it has not been made clear, American officials believe that women who wanted to leave Kuwait might be forced to make the arduous road trip to Baghdad from Kuwait in order to get the necessary stamps and exit visas.

However, some Iraqi officials are reported to be giving different instructions, including a demand for the address of each person wishing to leave. Some Western dependents have told U.S. officials they will not supply their address, since that will give the Iraqis the information needed to pick up their husbands who will be left behind.

Tutwiler said no American women have been permitted to leave. She said, ''This emotional roller coaster is inhumane and disgraceful.''

The Iraqi ambassador to Washington, Mohamed al-Mashat, speaking to reporters after an hour-long session with State Department officials, said that the procedures ''are normal, given the circumstances.''

Tutwiler said, ''These are not normal circumstances.''

She said, ''The decent thing to do is to waive the routine, normal bureaucratic processes.''

Both Tutwiler and al-Mashat denied that there was an official Iraqi request that charter planes, if they were to be used for the evacuation, would have to carry in food and medicine for the Iraqi population.

Al-Mashat called the report, ''Nonsense. Absolutely not true.''

RESEARCH TRIANGLE PARK, NC (AUG. 30) UPI - Glaxo Inc. has acquired the rights to a class of natural compounds that come from Chinese trees and shows promise for fighting cancer, executives said.

Glaxo and Research Triangle Institute reached an agreement, announced Wednesday, giving the pharmaceuticl company world-wide development and marketing rights to compounds called campotothecin analogues.

Glaxo secured a worldwide license giving it rights to the compounds which were invented at the Research Triangle Institute, an independent research organization.

In return, Glaxo will provide a grant to the institute to support rsearch into the compounds and also agreed to pay the institute royalities. Terms of the grant and the royalty arrangement were not disclosed.

The analogues' parent compound, camptothecin, is isolated from Camptotheca acuminata, a variety of tree that grows in China.

The synthetically produced analogues have key differences in their chemical structures, resulting in a new compound that may prove useful against cancer.

Glaxo executives said camptothecin analogues have shown promise in inhibiting an enzyme required for cell reproduction. In early tests the compounds appear to work through a different mechanism than anti-cancer drugs currently available.

''We're obviously pleased with the opportunity to explore compounds that may show activity in an area where new therapies are so desperately needed '' said Dr. Charles A. Sanders, Glaxo Inc.'s chief executive officer. ''One of our key strategies is to provide new treatments for unmet patient needs, and this agreement holds promise in helping us fulfill that goal.''

Dr. Monroe E. Wall, RTI's chief scientist for chemistry and life sciences, said the partnership is good for both organizations. He said cancer patients may benefit from the transaction in the future.

''Taking a compound into the clinic and possibly to market involves resources far beyond what the Institute could provide alone,'' he said. ''We're delighted with Glaxo's involvement.''

About one million new cases of cancer are diagnosed each year in the United States. It is the country's second leading cause of death after heart disease.

Sanders added that Glaxo's acquisition of rights to camptothecin analogues was further evidence of the company's commitment to cancer research.

Glaxo researches, develops, manufactures and markets prescription medicines, including those for the treatment of gastrointestinal disorders

respiratory ailments, cardiovascular diseases, infectious diseases and diseases of the skin. Glaxo Inc. is a subsidiary of London- based Glaxo Holdings PLC.

#90242u1645 08/30/1990 ~United Press International

SAN ANTONIO (AUG. 30) UPI - A squadron of Texas military reservists was pressed into active duty within 24 hours of the deaths of nine colleagues who had volunteered their services in support of Operation Desert Shield.

The Air Force disclosed Thursday that the 230-member 68th Military Airlift Squadron, part of the all-reserve 433rd Military Airlift Wing based at Kelly Air Force Base in San Antonio, was activated Wednesday night.

Nine members of the 433rd were among the 13 people killed Tuesday night in the fiery crash of a military C-5A cargo plane in West Germany en route to Saudi Arabia with supplies for U.S. troops stationed there.

Seven of the dead were members of the 68th. One of the four injured survivors also is a member of the 68th. Two of the dead worked for a maintenance division of the 433rd.

More than 200 members of the 433rd, including most members of the 68th, had been volunteering their services in support of Operation Desert Shield since Aug. 5, repairing planes and ferrying cargo and troops to the Middle East in response to Iraq's invasion of Kuwait Aug. 2.

Staff Sgt. Timothy Warren, a spokesman for the 443rd, said the activation of the 68th had nothing to do with the deaths of the volunteers.

''It's just unfortunate it all happened at the same time,'' Warren said.

''It's just that the Department of Defense felt a need to have the people activated. We've been doing a lot of missions, hauling a lot of things, and reached the point where we couldn't do it with volunteers,'' he said.

The 68th is made up of the pilots, flight engineers and load masters that fly the 433rd's fleet of 15 giant C-5A Galaxy cargo planes. The C-5A is the largest aircraft outside the Soviet Union and is capable of carrying 85 tons.

Supervisors at the 433rd spent Thursday notifying members of their units about the 90-day call-up period, which can be extended by Congress.

Prior to the call-up, supervisors had been working around the civilian job schedules of reservists who volunteered their services for a few days at a time, Warren said.

Supervisors found it especially hard to juggle the schedules of reserve pilots, many of whom were commercial airline pilots trying to work around their civilian flight schedules.

''Even though people are coming out, there were some people who just couldn't get away from their jobs,'' he said.

The deaths of the first reservists killed during Operation Desert Shield did not slow volunteer transport missions that still were under way Wednesday.

And Air Force officials said there had been no decrease in the number of volunteers as a result. ''If anything, people are more motivated right now '' Warren said. ''They realize the seriousness of what we're doing.''

Still, the mood was somber a day after the news of the deaths filtered back to San Antonio.

''When people greet you in the hallway, it's not jolly. People are just resolved to working. They're coping with the loss,'' Warren said.

#90242u1698 08/30/1990 ~United Press International
CAPE CANAVERAL, FL (AUG. 30) UPI - Engineers worked to resolve trouble with a telescope aboard the shuttle Columbia Thursday and geared up for fueling Friday that will determine if the presumably leak-free orbiter can take off Saturday as planned.

''We're just as enthusiastic as we ever were about having an absolutely first-class, state-of-the art scientific mission and we hope to come back having seen some things that nobody's ever seen before,'' astronaut

Jeffrey Hoffman said of the planned 10-day astronomy mission.

If all goes well, Columbia and its seven-man crew will blast off at 1:17 a.m. EDT Saturday to kick off NASA's first shuttle flight in four months after a disappointing summer of fuel leaks that grounded the shuttle fleet and wrecked the space agency's launch schedule.

Hoping for the best, Hoffman, 45, commander Vance Brand, 59, co- pilot Guy Gardner, 42, John ''Mike'' Lounge, 44, Robert Parker, 53, and civilian astronomers Ronald Parise, 39, and Samuel Durrance, 46, flew to Florida Wednesday night for final preparations.

Out at launch pad 39A Thursday, engineers spent the day troubleshooting an apparent problem with the Broad Band X-ray Telescope, one of four astronomical instruments mounted in Columbia's payload bay.

Ground data from the high-tech telescope was interrupted and then lost when Columbia's left-hand payload bay door was closed for launch earlier this week, prompting speculation that a cable relaying data to the launch control center was somehow damaged.

Tests were scheduled Thursday to make sure the telescope's radio data transmission system was working properly. Otherwise, Columbia's countdown ticked smoothly toward zero with Air Force meteorologists predicting a 60 percent chance of acceptable conditions at launch time.

''We're looking forward to a 1:17 a.m. launch Saturday morning and we're glad to be back in business,'' said NASA test director Albert Sofge.

Once in orbit, the astronauts plan to work around the clock in two shifts training their ''Astro-1'' telescopes on the most violent objects in the universe to learn more about the structure and evolution of the cosmos by studying high-energy light that cannot penetrate Earth's atmosphere.

But first, Columbia must get past fuel loading Friday afternoon without springing any hydrogen fuel leaks like the one that grounded the spaceship May 29, the night before the shuttle's first launch attempt.

The leak ultimately was traced to Columbia's 17-inch-wide hydrogen ''disconnect'' fitting, a massive connector that allows the shuttle's external tank to be jettisoned in space.

Columbia's disconnect was replaced with one taken from the new shuttle Endeavour and, after Atlantis was grounded by a similar leak in July, Brand and his colleagues were cleared for another launch try this week.

After extensive tests, engineers blamed Columbia's leak on tiny glass beads that somehow got inside the disconnect fitting and scratched

critical seals. Whether a similar problem crippled Atlantis remains to be seen, but engineers said they were confident Columbia is leak-free.

If an unacceptable leak does appear, however, it is unlikely it could be fixed at the launch pad, raising the prospect of another lengthy launch delay.

But Brand told reporters he was optimistic about an on-time liftoff.

''We're ready to go,'' he said. ''We have a great ship out there ... and we have all the confidence in the world in that machine, Columbia. It's a great ship.''

The goal of the flight is to extend humanity's vision into the invisible ultraviolet and X-ray regions of the electromagnetic spectrum.

Unlike the Hubble Space Telescope, launched from Discovery April 25 during the most recent previous shuttle flight, the ''Astro'' telescopes aboard Columbia will remain mounted in the shuttle's payload bay throughout the flight.

To collect as much data as possible, Columbia's crew will work in two 12-hour shifts throughout the flight with Brand, Gardner and Lounge responsible for keeping the shuttle shipshape and pointed in the right direction. The telescopes will be operated by Parker, Hoffman, Parise and Durrance.

Along with accomplishing the primary goal of the mission - turning Columbia into an operational observatory - the shuttle fliers also plan to participate in a NASA educational pilot program, teaching an astronomy lesson from space that will be beamed into middle school classrooms back on Earth.

#90242u1706 08/30/1990 ~United Press International

ATLANTA (AUG. 30) UPI - Government researchers may have identified the substance that contaminated the dietary supplement L-tryptophan and caused a potentially deadly blood disorder in at least 1,500 Americans, a report said Thursday.

An analysis of an agent suspected as the cause of the muscle- weakening disease eosinophilia myalgia syndrome or EMS shows it is similar in structure to the amino acid itself, a U.S. Centers for Disease Control report said.

The researchers found the substance, called di-tryptophan aminal of acetaldehyde, by analyzing samples of L-tryptophan taken by people

stricken by EMS, the CDC said in its Morbidity and Mortality Weekly Report.

Symptoms of the rare disorder include severe muscle pain, fatigue, breathing difficulties, cough, skin rashes, swelling of the arms and legs and fever. Some symptoms disappear while others persist or reappear. In some cases, patients have signs of heart failure and paralysis.

The over-the-counter supplement was commonly taken for insomnia, premenstrual syndrome, stress reduction and other ailments before the FDA ordered it off the market after the EMS outbreak surfaced.

As of Aug. 24, 1,536 EMS cases had been reported in the United States and Puerto Rico. Twenty-seven people have died from the disease.

Minnesota and Oregon health officials found earlier this year that EMS cases only occurred among people who had ingested the supplement manufactured by one of six Japanese producers, a company called Showa Denko K.K. of Tokyo.

The researchers concluded the disease was caused by a substance used in the company's unique method of processing L-tryptophan or a byproduct of that process.

Work since that discovery has been focused on isolating and reproducing the substance in the contaminated supply so it can be tested in animals to determine if it, in fact, causes the disease.

''It may be the causative agent or it may only be a marker of the process that produces the causative agent,'' said Larry Needham, a CDC chemist working to confirm that the L-tryptophan derivative causes EMS. ''Until we take this compound and test it in animals to see if it produces EMS or EMS-like symptoms, we cannot definitely be sure it is the cause.''

Dr. Michael Osterholm, Minnesota state epidemiologist, said researchers in his laboratory, have arrived at similar conclusions about the same substance.

''It is statistically very strongly implicated as the one chemical constitutent that differed in its presence in products used by cases versus product used by healthy people,'' Osterholm said. ''And when it was present, it was present in higher levels.''

The Minnesota Department of Health, working with researchers at the Mayo Clinic, reported Aug. 9 that the mystery agent may have been introduced by a 1988 change in the company's manufacturing process.

That change included altering a bacterium through genetic engineering techniques to produce greater quantities of the amino acid and reducing

the amount of charcoal used for purification.

The contamination could have been caused by the new bacteria, the reduced charcoal, or a combination of the two, the researchers said.

(AUG. 30) UPI - Iraq's ambassador to Washington says there is NO truth to reports that Baghdad is demanding that Western governments with citizens detained in Iraq fly in food and medicine to provide for the detainees' needs. The denial came as Western journalists were allowed for the first time to speak with the foreigners in Iraqi custody.

Efforts toward a negotiated end to the Persian Gulf crisis continued as U-N Secretary-General Perez de Cuellar arrived in the Jordanian capital for talks with Iraq's foreign minister. And in Cairo today, at least one dozen of the Arab League's 22 members are expected to show up for a meeting about Iraq's aggression.

Residents of tornado-stricken communities southwest of Chicago are in the process of piecing their lives back together three days after a vicious twister ripped through the region. Officials in hard-hit Plainfield,

Illinois, have called in structural engineers to determine if still-standing buildings are safe, and insurance companies are on hand to begin responding to claims.

Final preparations are under way for the scheduled Saturday launch of the shuttle Columbia at Cape Canaveral. NASA officials are keeping an eye on weather conditions, which Air Force forecasters say should be O-K for liftoff. Space agency technicians are spending today trying to fix a problem affecting one of the four telescopes the craft carries in its payload.

Bloodshed has been averted for the time-being in Armenia... where an illegal nationalist group today laid down its arms. The surrender of weapons by the Armenian National Army came after the southern Soviet republic's Interior Ministry troops surrounded rebel headquarters. However it is reported that some 50 armed fighters escaped government forces.

(AUG. 30) UPI - The Philippine government is ready to hold preliminary talks with communist guerrillas for a cease-fire in metropolitan Manila and regions devastated by a July 16th earthquake. The government earlier ignored a communist truce made shortly after the quake but has decided to talk following a two-week rash of bombings.

Five people were injured today in Joliet, Illinois... just west of Chicago... when a Red Cross truck that was helping victims of Tuesday's deadly tornadoes in Will County exploded. The truck was parked at an intersection next to a propane tank. Officials believe the tank exploded first... setting off the truck blast.

Prison officials in Jefferson City, Missouri, say condemned killer George Gilmore appears confident that U-S Supreme Court Justice Harry Blackmun will stay his execution, scheduled for just after midnight. Gilmore has NOT ordered a last meal, even though the high court twice has rejected his appeals to avoid the death penalty.

A 33-year-old Jonesville, Michigan, man is free on 100-thousand dollars bond after confessing to the murder and mutilation of his 19- year-old live-in girlfriend. Jeffrey Van Patten told police that he shot Kimberly Knight with a shotgun, burned the body, cut it into pieces and then fed them to his dogs.

Florida Attorney General Bob Butterworth filed a complaint against Phillips Petroleum today, charging the oil company with price-gouging. Butterworth says Phillips Petroleum has been charging its independent distributors more for gasoline than it charges company-operated service stations.

#90242u1792 08/30/1990 ~United Press International
WASHINGTON (AUG. 30) UPI - The United States sent its first combat troops from Europe to Saudi Arabia and ordered Air Force F-16 fighters from Spain to Qatar - the second gulf nation to publicly open its bases to U.S. forces in two weeks, the Pentagon said Thursday.

For the second consecutive day, U.S. naval forces in the Red Sea boarded two commercial vessels - a Sri Lankan and a Panamanian ship bound for Jordan's port of Aqaba - but allowed them to proceed when it was determined they were not carrying embargoed goods for Iraq, Pentagon spokesman Pete Williams said.

The United States has intercepted, mostly by radio contact, about 250 ships in the Persian Gulf and the Red Sea since the U.S. intercept operation began Aug. 16, Williams said. Slightly more than 10 have been boarded, he said.

At the same time, the aircraft carrier USS John F. Kennedy and its escort ships moved Thursday from the Atlantic Ocean into the Mediterranean, where it is expected to relieve the carrier USS Dwight D. Eisenhower.

The United States is maintaining three aircraft carrier battle groups in the Middle East, providing strong sea and air firepower in the region. The USS Independence is in the Gulf of Oman; the USS Saratoga is in the Red Sea.

Williams announced that the tiny gulf nation of Qatar had agreed to allow U.S. forces to use its bases in support of Operation Desert Shield, the military effort in Saudi Arabia and the gulf to deter Iraqi aggression.

He said F-16 Fighting Falcon fighters from the 401st Tactical Fighter Wing at Torrejon Air Base in Sxbeing sent to Qatar. He declined to disclose numbers, but 48 of the wing's 72 planes were believed going.

''The first elements left Spain yesterday and have now arrived in Spain,'' Williams said.

Qatar became the second gulf nation to publicly accept U.S. forces on its soil in as many weeks. The United Arab Emirates announced it had opened up its bases to C-130 Air Force cargo planes on Aug. 20, when Defense Secretary Dick Cheney was visiting there. Oman also is believed to be helping, but has not acknowledged it publicly.

Williams also announced that ''elements of the U.S. Army Europe's 12th Aviation Brigade and aviation elements of the 3rd Armored Division are now deploying to Saudi Arabia'' from West Germany.

These are the first U.S. combat troops to be sent to Saudi Arabia from Europe, but Williams said this had been previously planned and was not a change in the U.S. military's buildup. Previously, only medical and cargo-hauling speciality units had been sent from Europe.

The combat units from Europe were taking AH-64 Apache attack helicopters, UH-60 Blackhawk utility helicopters, OH-58 observation helicopters, CH-47 Chinook cargo-hauling helicopters and UH-1 Huey utility helicopters, he said.

A U.S. official said between 60,000 and 70,000 American troops are now in Saudi Arabia as part of Operation Desert Shield. A total of more than 100,000 are expected to be in place by the first week of October.

Williams dismissed reports of long delays in getting tanks and other heavy armor over to Saudi Arabia, saying there had been ''problems with a couple of fast sealift ships'' but that he was ''unaware of any big problem.''

''I think overall that the lift operation has gone pretty well,'' he said, adding that the United States has shipped more people and material to Saudi Arabia in three weeks than it moved during the first three months of the Korean War.

#90242u1820 08/30/1990 ~United Press International

SAN FRANCISCO (AUG. 30) UPI - A federal appeals court Thursday dismissed Las Vegas singer Wayne Newton's $5 million libel judgment against NBC, ruling the evidence failed to show malice toward Newton. The original $19 million jury verdict was the largest libel award in American history.

Three NBC stories in 1980 and 1981 claimed Newton had financed his 1980 purchase of the Aladdin Hotel with mob money and that organized crime figures were the hidden ownership behind the resort.

A Las Vegas jury found National Broadcasting Company, Inc. guilty of defaming Newton in the broadcasts and awarded him $19 million in damages. The trial judge in February 1989 reduced the amount to $5.2 million.

The 9th U.S. Circuit Court of Appeals Thursday unanimously ruled in a 50-page opinion, "Our review of the uncontroverted testimony, together with the cumulation of the circumstantial and documentary evidence, reveals almost no evidence of actual malice, much less clear and convincing proof."

Newton's lawyers had argued at the time of the trial that the network had a "total absence of institutional conscience." The Newton lawyers said the

stories were designed to curry favor with Tonight Show host Johnny Carson.

Carson lost out to Newton in a bid to buy the Aladdin Hotel and Casino in Las Vegas in 1980. Testimony indicated the $85 million Alladin purchase was funded by the Valley Bank of Nevada. Sued along with NBC were journalists Brian Ross and Ira Silverman, who were involved in the story.

NBC attorney Floyd Abrams said during the trial that Newton created his own problems by turning to crime figures Guido Penosi and Frank Piccolo for help in halting death threats against his family.

Newton argued that NBC showed malice by publishing statements that Piccolo was a hidden partner in Alladin despite having Nevada Gaming Board testimony that Valley Bank financed the purchase.

The appeal court noted that testimony also showed that hidden interest in a casino is normally not actual ownership of a hotel but an interest in the "skim, the amount of casino receipts not reported to the appropriate authorities as receipts."

Judge William Norris wrote, "The fact that Ross and Silverman knew about the Valley Bank financing has little probative value on the issue of the journalists' actual malice in 1/2't Piccolo claimed to be a hidden partner in the Alladin." Newton was playing Las Vegas 36 weeks a year at the time the three broadcasts were aired.

In the late 1970s, Newton earned $236,000 a week from Howard Hughes' Summa Corp. for performances. He earned $8.5 million a year, making him at the time, the highest-paid performer in Las Vegas history.

Penosi and Piccolo were indicted in 1981 on charges of trying to extort Newton, entertainer Lola Falana and their business manager Mark Moreno. Piccolo was gunned down in 1981 before he went to trial. Penosi was acquitted at two federal trials in Connnecticut.

#90242u1835 08/30/1990 ~United Press International

ISLAMABAD, PAKISTAN (AUG. 30) UPI - Three bombs exploded in different cities around Pakistan Thursday, killing at least 11 people and injuring 38, security officials said.

The most powerful blast killed seven passengers on a crowded train traveling from the northern city of Rawalpindi to Lahore in eastern Punjab province. Other passengers waiting at a nearby station rushed the injured to hospital, officials said.

The blast occurred when the train was pulling into the station in the

small town of Kalyam Awan about 18 miles from the capital.

Other explosions occurred in the towns of Faisalabad and Muredeke, but officials refused to link the three blasts. No group has claimed responsibility for causing the explosions and it was not immediately clear whether the bombs were aimed at any particular group of people.

The political situation in Pakistan has been tense since Aug. 6 when the president sacked Benazir Bhutto's government, charging it with corruption and nepotism. He declared a state of emergency throughout the country, and formed a caretaker government to run until elections scheduled for Oct. 24.

The interim government has committed itself to assessing the ''accountability'' of all members of the previous National Assembly. It has set up special tribunals to hold rapid trials of those who have, in its view, committed offenses ''shocking to public morality or had led to public outrage.''

Last Wednesday, 26 people were killed in the southern port of Karachi when groups armed with sophisticated automatic weapons opened fire on a political rally in several parts of the city.

Nearly 50 people have been arrested so far in connection with the killings most of them associated with Bhutto's Pakistan People's Party. Some analysts have accused anti-PPP forces of organizing the attack in order to incriminate Bhutto and so prevent her from contesting the elections.

#90242u1840 08/30/1990 ~United Press International

SAN FRANCISCO (AUG. 30) UPI - A federal appeals court Thursday dismissed Las Vegas singer Wayne Newton's $5 million libel judgment against NBC, ruling the evidence failed to show malice toward the entertainer.

The original $19 million jury verdict was the largest libel award in U.S. history.

Three NBC news stories in 1980 and 1981 claimed organized crime figures had a hidden interest in Newton's purchase of the Aladdin Hotel in 1980.

A Las Vegas jury found National Broadcasting Company, Inc. guilty of defaming Newton in the broadcasts and awarded him $19 million in damages.

The trial judge in February 1989 reduced the amount to $5.2 million.

The 9th U.S. Circuit Court of Appeals Thursday unanimously ruled in a 50-page opinion, ''Our review of the uncontroverted testimony, together with the cumulation of the circumstantial and documentary evidence,

reveals almost no evidence of actual malice, much less clear and convincing proof.''

Newton's lawyers had argued at the time of the trial that the network had a ''total absence of institutional conscience.'' The Newton lawyers said the stories were designed to curry favor with Tonight Show host Johnny Carson.

Carson lost out to Newton in a bid to buy the Aladdin Hotel and Casino in Las Vegas in 1980.

Testimony indicated the $85 million Aladdin purchase was funded by the Valley Bank of Nevada.

Sued along with NBC were journalists Brian Ross and Ira Silverman, who were involved in the story.

NBC attorney Floyd Abrams said during the trial that Newton created his own problems by turning to crime figures Guido Penosi and Frank Piccolo for help in halting death threats against his family.

Newton argued that NBC showed malice by publishing statements that Piccolo was a hidden partner in Aladdin despite having Nevada Gaming Board testimony that Valley Bank financed the purchase.

The appeals court noted that testimony also showed that hidden interest in a casino is normally not actual ownership of a hotel but an interest in the ''skim, the amount of casino receipts not reported to the appropriate authorities as receipts.''

Judge William Norris wrote, ''The fact that Ross and Silverman knew about the Valley Bank financing has little probative value on the issue of the journalists' actual malice in stating that Piccolo claimed to be a hidden partner in the Aladdin.''

Newton was playing Las Vegas 36 weeks a year at the time the three broadcasts were aired.

In the late 1970s, Newton earned $236,000 a week from Howard Hughes' Summa Corp. for performances. He earned $8.5 million a year, making him at the time, the highest-paid performer in Las Vegas history.

Penosi and Piccolo were indicted in 1981 on charges of trying to extort money from Newton, entertainer Lola Falana and their business manager Mark Moreno.

Piccolo was gunned down in 1981 before he went to trial. Penosi was acquitted at two federal trials in Connnecticut.

#90242u1850 08/30/1990 ~United Press International
MEXICO CITY (AUG. 30) UPI - Mexico, the U.S.'s third-largest trading partner, will soon request President Bush to start negotiations on a free trade agreement, U.S. officials said Thursday, adding the talks may last as long as five years.

"If our free trade negotiations with Canada are any indication, I think negotiations with Mexico should take between four and five years," said a U.S. Embassy official. He said soon after Mexican President Carlos Salinas de Gortari requests the negotiations to begin, Bush will seek Congressional approval to do so.

The U.S. official did not say when Salinas would make the formal request, but emphasized, "the request is forthcoming fairly quickly. It should be relatively soon."

Another U.S. diplomat, who also spoke on the condition of anonymity, said if Salinas wants to accelerate the process he must send the request within the next 14 to 15 days. He noted Congress is scheduled to resume its session during the second week of September. "If Salinas delays the request, he will have to wait until next year," said the diplomat.

Bush and Salinas, who met in Washington in June, jointly announced negotiations would begin next year on the free trade agreement that would include trade barriers, tariffs, investements, goods, services, copyrights and trademarks.

The U.S. Embassy official said that negotiations with Mexico will be a very tedious process because so many issues are involved between the two nations that share a 1,933-mile long border.

U.S.-Mexican bilateral trade rose to about $53 billion in 1989, and is likely to reach some $56-57 billion this year. Mexico had a trade surplus of $2.2 billion in 1989 with the United States. Mexico's trade surplus with Washington during January-March of this year was reported at $880 million.

"A lot of areas will be a basis for negotiations and their success will depend on how much both sides want to achieve," said the official. "I cannot tell you what would be the sticking points but Mexico would like to include labor as service. Our reaction to that is fairly obvious and that is 'No.'"

He said there are some agricultural products that would also create some problems, but significant progress could be made in areas such as tourism

and telecommunications.

"Mexicans are eagerly interested in the U.S. market... They are literally looking for a free trade agreement as we have with Canada. This is an ideal time to negotiate the agreement," said the official. "I think both economies will be significantly better off. There will be no losers, no winners."

The diplomat said the idea of a free trade agreement with Mexico has yet to draw attention of potential supporters and critics in the United States. "I think when the process begins, interested groups would start lobbying in favor or against," said the diplomat. "In Mexico, some center-left parties and smaller industrial groups are opposing the idea, but Salinas himself is very much interested in free trade with the United States. It is a very important part of his economic recovery plan."

U.S. diplomats said trade with Mexico is likely to increase significantly in the near future becasue of the gradual opening of the Mexican economy to foreign goods and investments.

"We have keen interest in Mexican telecommunications industry," said the U.S. Embassy official, adding that interest will increase since the government announced the privatization of its giant, state-run Telefonos de Mexico telephone company. The government has placed 51 percent of Telmex's common stocks on sale. The estimated value of Telmex is about $8 billion.

Mexican sales of telecommunications equipment in 1989 is estimated at $409 million, and is expected to grow at an annual rate of six percent through 1991. Imports from the United States in 1989 in this sector were only $63.4 million and should grow at an annual rate of about ten percent through 1991, according to a U.S. Embassy report.

#90242u1875 08/30/1990 ~United Press International

DETROIT (AUG. 30) UPI - Chrysler Corp. had little reaction Thursday to reports that its bonds have been trading at distressed levels because of Wall Street's concerns about the No. 3 carmaker's ability to raise money and pay debts.

Spokesman Steve Harris, who estimated Chrysler's long-term and current debt at $4.335 billion, said recent downgrades of the bonds' ratings by debt-rating agencies were unjustified. He noted all agencies still consider the bonds to be investment grade.

''We don't think the facts justify that kind of activity,'' Harris said of the downgrades. ''We think we deserve a better rating.''

Wall Street corporate bond traders were quoted Thursday as saying the market had pushed the rate of return on Chrysler's bonds to a level comparable to that of junk bonds, considered risky because of the failure of many deals financed by these high-yield instruments.

Like other companies, Chrysler sells bonds on financial markets to raise money. But the yields on its bonds have been ranging as high as 13.75 percent -up more than 2 percentage points in the past 30 days.

Rating firms like Standard & Poor's and Moody's Investors Service lowered Chrysler's credit ratings in June and July, with some rating them just one grade above junk bonds.

In late trading Thursday afternoon, the price of Chrysler's common stock was at $12.875 a share on the New York Stock Exchange, down 25 cents from Wednesday's close and less than half its 52-week high of $27.125, achievedSept. 1, 1989. The 52-week low was reached a week ago, when Chrysler's stock closed at $11.875.

Most investors are concerned about Chrysler's 16.3 percent slide in U.S. vehicle sales so far this year. Rising gasoline prices that could hurt sales of its Jeeps is another concern.

But some experts said Chrysler has enough cash reserves, now estimated at about just above $3 billion, to keep key product programs going.

''I think their cash pile will tide them over a couple of years of very low earnings,'' said Mary Anne Sudol, of Fitch Investors Service, a New York rating firm that in June lowered the securities ratings of Chrysler Financial Corp. but affirmed its ratings for parent Chrysler Corp.

''We have a spending program of $15.6 billion during the next five years '' said Chrysler's Harris. ''We remain committed to that, and we have the funds to make it happen.''

Still, Sudol said, it's going to be tough for Chrysler through the rest of 1990 and the first part of 1991.

''But I would say that also applies to the other Big Two,'' she said, referring to General Motors Corp. and Ford Motor Co. ''I just don't see

any meaningful pickup in auto sales.''

Sudol noted that Chrysler is more dependent on the North American market than GM or Ford, which have extensive overseas operations. Chrysler said Thursday its export sales during the first seven months of 1990 rose 20 percent from year-ago levels, to over 35,000 units. Most of that was in Europe.

''But the growth in Europe has really decelerated this year,'' Sudol noted adding that Chrysler may not get much benefit from export sales.

Speculation still persists about Chrysler forming a partnership with another major automaker to survive in the long term in what has become a saturated and brutally competitive market.

''Over the longer term, we see Chrysler allied with another car company, most probably a European one like Fiat, Volkswagen or Peugeot,'' Sudol said. ''Those are the three where there are some interesting '''Thos

For the short term, Chrysler may be able to score some gains at the expense of Ford because of the timing of new cars and truck introductions.

''The product lineup that's coming from Chrysler is very attractive,'' Sudol said. ''I just wish they had it sooner.''

#90242u1878 08/30/1990 ~United Press International

LOS ANGELES (AUG. 30) UPI - A man described by psychologists as a sexually obsessed fan pleaded guilty Thursday to seven counts of mailing threatening letters to actress Stephanie Zimbalist.

Michael L. Shields, 42, also sent copies of his letters to Zimbalist's father, actor Efrem Zimbalist Jr., to her brother, to her talent agency, and to singers Rosemary Clooney and Patrice Munsel.

As part of a plea bargain in which 13 other counts will be dismissed, Shields faces a maximum of a year in prison when he is sentenced Oct. 22.

The Plymouth, Mich., resident also will be ordered to undergo psychiatric treatment and to turn over his vast collection of Zimbalist memorabilia to the behavioral science unit of the FBI, Assistant U.S. Attorney Carol Gillam said.

Gillam said psychologists determined Shields had an "eroto-manic" fixation on the actress and one expert said Shields "displays almost all the characteristics of those who have attacked and killed public figures." Erotomaniacs exhibit abnormally strong sexual desires.

The prosecutor said Shields will be ordered to stay away from Zimbalist, her family and refrain from writing letters to them or to any law enforcement officers involved in the case. Zimbalist, who canceled live theater performances out of fear for her life because of the letters, was satisfied with the plea agreement, Gillam said.

In court Thursday, Shields was initially reluctant to admit to U.S. District Judge John Davies that the stream of letters he sent Zimbalist in the past two years were threatening. Finally, however, he said they did contain "veiled threats."

Mostly signed "Your secret admirer," the letters contained such phrases as "I'll find you," "You can run but you can't hide," and "I'm watching your house" - a message sent with a photograph Shields apparently had taken of Zimbalist's Los Angeles home.

He sent more than 200 letters to Zimbalist - best known as the co-star in

the television series "Remington Steele" - beginning in August 1988 and purchased a semiautomatic rifle before trying to track her down in Los Angeles. He has been in custody since his March 2 arrest at a San Fernando Valley hotel. Shields' lawyer described him as "a pest."

GDANSK, Poland (AUG. 30) UPI - Shipyard workers at the birthplace of the Solidarity labor movement gave Prime Minister Tadeusz Mazowiecki a frosty reception Thursday on the eve of the 10th anniversary of the union he helped found with Lech Walesa.

Not a single worker applauded Mazowiecki as he called for unity in the same shipyard hall where the historic accord that created the East Bloc's first independent labor union was signed on Aug. 31, 1980, by strike leaders and representatives of the communist government.

Instead, the embattled head of Poland's Solidarity-led government, who faces strong disapproval of his economic policy, fielded more than three hours of hostile questioning from an audience of hundreds of shipyard workers.

Mazowiecki even told his audience he would resign if the public demands it.

''I am a free man and I am not tied to the prime minister's armchair,'' Mazowiecki said. ''I will be prime minister as long as people will approve of me.''

Mazowiecki is also under pressure from his former mentor, Walesa, who has accused him of delaying political reforms and of foot-dragging on efforts to remove former Communist Party officials from key government positions. Walesa did not attend the meeting Thursday.

The prime minister denied the government is delaying political reforms but said neither is his government, which has been in office less than a year, ''able to work miracles.''

The chilly reception for Mazowiecki was in sharp contrast to a scene at the same site 10 years ago when the crowds enthusiastically welcomed him when he marched into the Gdansk shipyard with a group of intellectuals to help Walesa and the striking workers form the Soviet bloc's first independent union.

Mazowiecki returned to the shipyard for a conference on the eve of the 10th anniversary of the historic moment, which created the momentum that

eventually led to the revolutions of 1989 that overthrew communism throughout Eastern Europe.

''Poland is crossing a stormy river and there is no retreat,'' Mazowiecki told the silent workers. ''Poland has a chance to survive when there is a mutual understanding. We struggle in the same hall so that Poland could develop in a democratic way.''

Solidarity activists who helped lead the 1980 national strike together with Walesa and Mazowiecki said he has disappointed them as prime minister.

''We gave you the key to resolve various problems,'' Leszek Ziolkowski from the Northern shipyard said during a discussion after Mazowiecki's brief speech. ''But we don't see any effects.''

Ziolkowski said the government promised some improvement in living standards, but it has not taken place.

''The patience of the people has run out,'' he declared.

Another activist, Henryk Woldyga, said that nothing has changed despite Solidarity's promises 10 years ago of a better future. ''The poor have remained poor and the rich got richer,'' he said.

He attacked Mazowiecki for not being tough enough against the former communist managerial groups who still hold key jobs - a criticism Walesa has repeatedly made in the past of his former adviser.

''The communist system has been preserved,'' Woldyga said.

Mazowiecki defended his administration, which will celebrate its first anniversary next month, against charges it has been delaying political reform.

He said the workers should not expect changes overnight after four decades of communism, and the government cannot be blamed for the decline of Solidarity's sway over the population of 38 million from 10 million at its height to 2 million today.

''There must be some reasons that we don't witness as much enthusiasm as we had before,'' he said. ''This government is not able to work miracles.''

#90242u1946 08/30/1990 ~United Press International

LOS ANGELES (AUG. 30) UPI - The judge in the largest record industry payola case in U.S. history said Thursday prosecutors withheld evidence that could absolve a former prominent independent record promoter and two

others on trial.

U.S. District Judge James Ideman said he may dismiss the case because prosecutors failed to disclose that a key prosecution witness gave perjured testimony at his own trial, an overlapping tax and drug- related case, last year.

''The material should have been turned over to the defense long ago and it was not turned over,'' Ideman said.

The judge said he would rule Tuesday on whether to dismiss the 57- count indictment against Joseph Isgro, 43, one of the nation's top record promoters in the 1980s.

He is accused of making cash and cocaine payments to radio station personnel in exchange for the air play of records he promoted. No radio station employees were indicted.

Also named in the indictment are Raymond Anderson, 49, a former vice president for promotions at Columbia Records, and Jeffrey Monka, 31, a convicted cocaine dealer charged with laundering money for Isgro.

The prosecution witness, Dennis Di Ricco, a former lawyer, apparently perjured himself when he testified at his trial for tax evasion and obstruction of justice in San Francisco. He was convicted.

Di Ricco's testimony before the grand jury in the Isgro case contradicted his trial testimony on more than 70 points, defense attorneys said.

Ideman found that William Lynch, a veteran prosecutor with the Justice Department, failed to present Di Ricco's trial testimony to the grand jury. On Wednesday, the judge had said ''the integrity of the indictment is possibly an issue.''

Lynch maintained that Di Ricco's trial testimony was not ''exculpatory'' - the type that could exonerate defendants - and that the prosecution was not required to turn it over to the defense.

In court documents, Lynch also said exculpatory evidence need not be given to the defense until shortly before the witness it pertains to testifies.

Di Ricco has yet to testify in the trial, now in its second week.

Isgro promoted records for Columbia, MCA, RCA, Warner Bros. and Polygram records, handling the music of such artists as Michael Jackson, Bruce Springsteen, Barbra Streisand, Dionne Warwick and others.

#90242u1955 08/30/1990 ~United Press International
ATLANTIC CITY, NJ (AUG. 30) UPI - Somebody is trying to give away developer Donald Trump's debt-ridden Taj Mahal Casino Resort, but the gambling palace said Thursday it is all a ''senseless prank.''

At least ''several hundred'' people who entered a raffle to win a 1990 Rolls-Royce automobile have received bogus letters telling them they are winners, said Karen Tuso, a spokeswoman for the Taj Mahal.

And the letters, printed on the casino's elegant red, gold and blue stationary, don't stop at handing out the Silver Cloud car. Some have said the customers won the entire resort, Tuso said.

Other versions of the letter say the prize is a weekend on the Trump Princess yacht, currently cruising Japanese ports in search of a buyer, she said.

''Those letters are unauthorized and counterfeit and are the results of a senseless prank,'' she said. ''Although the Trump Taj Mahal Casino Resort has had nothing to do with this obvious fraud, we apologize for any inconvenience.''

One version of the letters, released by the casino, has a hint that it is something less than legitimate. At one point the letter says that at the awards ceremony, ''Donald will reveal his bold new vision for Atlantic City, in a legendary speech entitled, 'Whorehouses of ''legendary

To enter the ''Raja's Riches'' contest, a patron fills out an entry form and deposits it in one of three drums next to the three cars parked at the property, Tuso said.

Each night those drums are emptied into a larger drum where the winners are drawn from, she said. The master drum shows no signs of tampering, she added.

The contest has run through the summer, with cars given away in June and July and the third drawing for the $155,000 car scheduled for Sept. 16, she said.

''One woman who got one of the letters told us she knew it was a fraud because she knew it would have come in registered mail,'' Tuso said.

Telephones in the casino's consumer marketing office have been busy as people call in to verify their prizes, she said.

''The consumer marketing department is being inundated with calls,'' she said. ''They are apologizing and people are being very understanding. It

really is a nuisance, whoever did it really pulled a prank.''

Wayne Marlin, a spokesman for the state Division of Gaming Enforcement, said officials are trying to determine ''whether there were any breakdowns in the internal control procedures. We have an audit being conducted and operational agents are looking at the whole raffle situation.''

#90242u1960 08/30/1990 ~United Press International

BONN, West Germany (AUG. 30) UPI - The East German parliament Thursday rejected a decision to move files of the former communist security police to West Germany.

The new development further complicated negotiations on a key German unification treaty which is already hanging in the balance because of disagreements over abortion legislation for a united Germany.

East German parliamentarians said they would reject the treaty if it retains a draft clause which states that the files compiled by the now-disbanded State Security police, known as Stasi, will be transferred to West Germany.

In a move to eliminate the clause, the Volkskammer, the East German parliament, Thursday passed a bill saying that East Germany will retain responsibilty for the files after Oct. 3 unification.

During 40 years of hard-line Communist rule, the Stasi collected data on six of the 17 million East German citizens and on two million foreigners. The documents have been sealed since the ouster of the hard- line Communist government last fall.

In negotiations on the unification treaty, the East and West German governments had agreed to remove the files from East Berlin to the federal archives in the West German city of Koblenz.

East German deputies argued that this would give the West German secret service unlimited access to the files of six million East Germans after unification.

''This is an affront to all those who fought against the (Communist) regime,'' said Wolfgang Ullmann, a member of the East German opposition Buendnis 90 party.

A two-thirds majority in the East and West German parliaments is needed to ratify the treaty, which sets out the legal and financial aspects of unification.

If the treaty is not ratified, the West German parliament could unilateraly set the framework for unification, an option most parties said they would reluctantly accept if necessary.

In Bonn, West German Chancellor Helmut Kohl is due to meet again late Thursday night with the leader of the Social Democratic Party for further negotiations on the abortion issue, following talks which ended in a stalemate in the early hours of the morning.

The parties agree in principle that a unified Germany will have dual legislation, under which abortion will remain legal in East Germany and generally illegal in West Germany.

But they do not agree on how long a united Germany will keep the dual legislation.

Kohl's Christian Democratic Union wants the unification treaty to include a clause stating that a new law will have to be passed within two years.

The SPD insists the dual legislation should remain in force for four years - apparently for fear that if no agreement is reached within two years, the current West German law would prevail and abortion would automatically become illegal in East Germany.

#90242u1977 08/30/1990 ~United Press International

NEW YORK (AUG. 30) UPI - Vander Beatty, a former state senator and congressional candidate from Brooklyn, was shot in the head and killed Thursday while campaigning for a Democratic party position.

Beatty was shot twice in the head at his office at 1:22 p.m. and died at 1:45 p.m. at Brooklyn Jewish Hospital, police said.

Police were searching for a man who was reported to have fled the scene after the shooting.

Beatty, 49, an imposing 6-foot-tall politician was once a Brooklyn political powerhouse and leading black activist, but was brought down by an avalanche of scandal.

He left his state Senate post in 1982 to make an ill-fated bid to run for the U.S. House seat held by longtime Rep. Shirley Chisholm.

In an attempt to force a new election after his defeat by Major Owens, he and others forged voter registration cards and he was later convicted of forgery and election fraud stemming from the scheme.

Beatty was shot in the Prospect Heights section of Brooklyn as he was campaigning for a party post outside his office, said Athan Voralis, a waiter at the nearby Tom's Restaurant.

''I was at the counter and the post office guy came running in and shouted to the cops (inside the restaurant) and told them what happened,'' Voralis said.

''The cops went flying out the door,'' he said.

Beatty was born in Wilmington, N.C., on Feb. 5, 1941. He was graduated from Johnson C. Smith University, North Carolina College and New York University, where he served as a professor.

He was elected to the Assembly in 1970 and to the state Senate in 1972. In January 1975 he was elected deputy minority leader of the state Senate.

Beatty served in the state Senate for 10 years until he gave up the post in his failed bid for Congress.

#90242u1987 08/30/1990 ~United Press International
WASHINGTON (AUG. 30) UPI - The number and assets of healthiest thrifts shrunk in the second quarter while those of troubled institutions grew, federal regulators reported Thursday.

The Office of Thrift Supervision warned that a recession could further weaken the beleaguered savings and loan industry. Bailing out the industry is expected to cost taxpayers hundreds of billions of dollars while swelling the federal deficit.

In a quarterly report, the OTS showed that the number of the healthiest thrifts fell by 89 between the first and second quarter, to 1,175 from 1,264. The healthiest thrifts represented 48 percent of all thrifts during the second quarter, down from 50 percent in the first.

Assets of the so-called Group I of thrifts - those that are well capitalized and profitable - declined to $363 billion from $404 billion. The healthiest thrifts now have only 35 percent of the industry's total assets, down from 38 percent in the first quarter.

''Given the slowdown in the economy and the real estate market in many sections of the country, we are not surprised by the slippage in the healthiest group,'' said OTS Director Timothy Ryan.

Despite the shrinking number of healthy thrifts, Ryan said it is still ''too early to detect a trend'' in the industry as a whole.

He warned, however, that a recession, higher interest rates and a further worsening of the real estate market could multiply the number of weak institutions.

''If current economic conditions continue or get worse, it's very possible we will see additional deterioration when we report on the groups again in three months,'' the OTS chief said.

Still, the OTS statistics showed that 232 thrifts - including 52 transferred to the Resolution Trust Corp. for liquidation or sale - were reclassified in a lower group during the second quarter, while only 73 climbed up the ladder.

Bucking the trend and to the OTS's surprise, 34 thrifts climbed out of the Group IV of most troubled institutions, Ryan noted.

Group IV is composed of those institutions that the OTS expects to transfer to the RTC. In most cases, the graduating thrifts were able to recapitalize and obtain OTS approval of capital plans.

Group IV had a net decline of 64 thrifts, including 51 sent to the RTC. The number of the most troubled thrifts fell to 246 in the second quarter from 310 in the first, while assets declined to $166 million, or 16 percent of industry assets, from $195 million.

Assets in the Group IV continue to be concentrated in a few relatively large institutions, with 73 percent of assets held by 41 institutions with assets of at least $1 billion each, the OTS said.

The undercapitalized and money-losing thrifts of Group IV also continue to be concentrated geographically, with 29 in Texas, 25 in Florida and 22 in California, the agency said.

According to the OTS report, nearly all of the 106 institutions leaving Group I fell into Group II, which includes thrifts that meet or are expected to meet capital requirements and generally have lower profitability than Group I institutions.

The number of thrifts in Group II rose to 680 in the second quarter from 620 in the first, and assets expanded to $351 million, or 33 percent of industry assets, from $326 million in the first quarter.

Group III, troubled thrifts with poor earnings and low capital, saw its share of institutions grow to 352 in the second quaarter from 311 in the first, with assets expanding to $169 million, or 16 percent of industry assets, from $149 million.

The total number of savings and loan associations fell to 2,453 in the April-June period from 2,505 in the first quarter as a result of 52 institutions being transferred to the RTC, Ryan said. Total thrift assets fell to $1.05 billion from $1.07 billion.

#90242u2118 08/30/1990 ~United Press International

(AUG. 30) UPI - Government pressure to keep gasoline pump prices down will hold oil-company profits to modest increases in the near term but a rise of about 20 percent is seen this year because of the Mideast crisis, analysts said Thursday.

Fred Leuffer of C. J. Lawrence Morgan Grenfell Inc., of New York, said his forecast of a 24 percent earnings rise in 1990 is based on the oil companies being able to pass on to consumers the higher cost of crude oil.

That has not happened yet. Gasoline prices at the pump have risen 15.45 cents, or 13.1 percent, while crude oil prices have risen as high as one third since Iraq's Aug. 2 invasion of Kuwait threw oil markets into turmoil.

Prior to the invasion and the Aug. 6 U.N. embargo on Iraqi and Kuwaiti exports, Leuffer was estimating a 1990 increase in oil company operating earnings of only 4 percent.

Leuffer said he is now forecasting an additional 26 percent rise in

industry profits in 1991 compared to his pre-invasion estimate of no increase next year.

As a consequence of the invasion and embargo and the anticipated shortage of supplies, Leuffer said he has raised his estimated average cost of U.S. crude by $3, or 15 percent, to $22.50 a barrel in 1990 and $5, or 25 percent, to $25 a barrel in 1991.

Other analysts said the public outcry over oil companies raising gasoline pump prices within hours of the invasion has prevented as yet the full cost of the crude increases being passed along to consumers.

In the wake of the hew and cry, President Bush in a White House news conference publicly asked the oil companies to show restraint in raising pump prices.

''Government and consumer pressure has forced the major companies to show restraint in raising product prices and the result has been a squeeze on marketing margins to the point that they were negative in August,'' said George Friesen of the Deutsche Bank Group in New York.

''The oil companies haven't been able to pass on higher crude costs to the pump because of consumer and government pressure,'' said Rosario Ilacqua, vice president of Rochschild Inc. in New York.

''The higher costs are not being passed along to the consumer,'' concurred Frank Knuettel, senior oil analyst at New York's Prudential- Bache Securities Inc.

The extent to which the near-term profits of individual oil companies will rise depends on the extent to which their operations are weighted toward crude oil production and away from the retail marketing of gasoline and other petroleum products.

The analysts also said there would be a squeeze on petrochemical profits because of the higher cost of oil ''feedstocks'' from refineries.

They said it was difficult to revise earnings for the third quarter ending Sept. 30 this soon after the Aug. 2 invasion.

''To be very specific is impossible at the moment,'' Kneuttel said, but the major oil companies integrating crude production with refining and marketing should come out in relatively good shape.

''By and large the integrated oil companies will come out with higher profits,'' he said.

But Friesen said, ''Overall earnings in the third quarter might not be any

better than projected before the crisis.'' If he had to guess, the analyst said the invasion might result in a third-quarter earnings rise of 5-10 percent over the second quarter.

''Directionally, we're up, but I can't give you an estimate,'' said Jim Murchie of Sanford Bernstein in New York.

The analysts singled out Atlantic Richfield Co. as one oil company benefitting particularly from the Persian Gulf crisis because it pumps enough crude to satisfy all its refining and marketing needs.

The stock of the Los Angeles-based ARCO was $129.375 a share Aug. 1. In late trading on the New York Stock Exchange, ARCO's common stock fell $2.25 Thursday to $133.50 a share.

ARCO gained favorable publicity by announcing it would freeze gasoline pump prices after Bush's appeal.

Ilacqua said that ARCO might have been faced with an embarassing rise in profits given the company's control over its crude supply.

On ARCO's freeze of pump prices, the analyst said, ''I think its a strategy to improve their position in the gasoline market. A company could only do this if it has its own crude.''

Friesen said, ''I wouldn't be surprised if Exxon Corp.'s earnings were lower in the third quarter because it buys 50-60 percent if its oil from the outside.''

For the year, however, Leuffer has revised his 1990 estimated earnings per share for Exxon upward 55 cents to $4.20 a share as a result of the Mideast crisis. The 1991 projection was raised $1.10 to $5 a share.

He has revised ARCO's 1990 earnings estimate upward $1.55 a share to $11.40 a share. The 1991 ARCO projection was raised $4.60 to $14.60 a share.

British Petroleum, which also produces almost all its own crude used in the United States, was given an estimated earnings increase of $1.05 a share in Leuffer's revision to $5.10 a share.

#90242u2140 08/30/1990 ~United Press International
WASHINGTON (AUG. 30) UPI - The number of motorists around the world facing price hikes at the gas pump is soaring almost as quickly as gasoline prices, and many of them have watched glassy-eyed as the cost of fueling their vehicles jumped two, three or four times to levels 30 percent or

more over July levels.

Within the past week, drivers in Chile, Australia and Hong Kong got their first shocks at service stations thanks to increased crude-oil prices and uncertainty in the market over the Persian Gulf crisis.

For the third time, motorists in West Germany watched prices skip up this week to about $3.08 a gallon, while Britons, Poles and Belgians all dug deeper into their pockets to pay for gas.

Nations facing higher gas bills this week include: Italy, at $5.13 a gallon, up 30 percent since Iraq invaded Kuwait on Aug. 2; France, $4.29; Britain, $3.61; Hong Kong, $3.18; Australia, $2.39; Chile $1.40; and the United States, $1.30.

Several other nations - Japan, Poland, the Philippines and Thailand - expect price increases if the Mideast crisis continues much longer.

But France and Italy announced this week they are putting the brakes on rapid price hikes for a short time.

French oil companies, which had raised prices 15 percent during the Gulf crisis, said they would help French motorists return from their August vacations by reducing prices about 40 cents a gallon until Monday. The French will pay about $4.29 a gallon through the holiday weekend.

The Italian government Tuesday decided to hold prices at about $5.13 a gallon - probably the world's highest gas prices - for three months to try to stifle a trend toward higher inflation. The government will underwrite the Italians' fuel-pump prices - which officials estimate will cost $520 million - with a special emergency fund.

Inquiries turned up no reports of gas lines except in the African nation of Sierra Leone, where workers walked to their jobs this week because of a shortage of fuel. All public and private transportation was ended as a result of gas shortages.

British oil companies raised gas pump prices by about 60 cents a gallon Thursday, producing prices of about $3.61 per U.S. gallon.

But Philip Lambert, an oil specialist with the investment firm Kleinwort Benson, said the companies actually are biting the bullet themselves rather than passing along the brunt of the recent oil price spike to consumers in order to keep a measure of public support.

Sir Gordon Borrie, director general of the British Office of Fair Trading, has asked British oil companies to explain pricing policies as a result of the Gulf crisis.

Australia lifted a three-week price freeze Wednesday, and prices jumped 16 cents a gallon to $2.39. Allan Fels, chairman of Australia's Price Surveillance Authority, said the agency rejected calls by oil companies for increase of between 33.9 cents and 39.3 cents a gallon.

Fels remained wary of the companies' pricing and suggested that Australia consider pegging gas-pump prices to crude oil instead of gasoline prices worldwide.

In the Philippines, President Corazon Aquino's government has held gas prices at $1.07 a gallon, in part out of fear some of her opponents would use the price hikes as an occasion to mount another coup attempt, sources said. Some analysts said gas price hikes of 25 percent to 50 percent are expected at some point.

Japan has held prices to $3.10 a gallon but is considering a 26-cent-a-gallon hike in late September.

Poland, which has held gas prices at $1.07 since Iraq invaded Kuwait, announced Thursday it will raise prices by 30 percent.

Thailand says it will raise prices if the Gulf crisis continues another month or two.

A couple of nations have taken gas-conservation measures. India, for example, has asked motorists to leave their cars at home one day a week and Korea has closed gas stations between midnight and 4 a.m.

#90242u2151 08/30/1990 ~United Press International
NEW YORK (AUG. 30) UPI - The dollar strengthened against the Japanese yen in thin New York trading Wednesday despite an overnight interest rate hike by the Bank of Japan, and also gained ground on the main European currencies.

Analysts said the Japanese discount rate hike, to 6 percent from 5 1/4 percent, was long anticipated and written into currency rates. In addition it hit just as the dollar was on an upswing from its recent extreme lows.

''It certainly wasn't a surprise,'' said currency manager Robert White of First Interstate Bank Corp. in Los Angeles. ''That's the basis of the fact that the dollar moved higher. The market had rumored it for weeks.''

Amsterdam Rotterdam Bank foreign exchange vice president Lee Stalzer said the dollar slipped on news of the hike, ''but went right back up.''

Late in the New York trading session, the dollar was quoted at 1.5665 German marks, well up from 1.5585 marks Wednesday, and at 144.25 Japanese yen, also up from 143.50 yen the previous day.

Stalzer said many participants were buying dollars to square positions before the long weekend, comforting the U.S. unit.

White said the dollar was boosted, too, when the Federal Reserve did not ease short-term rates as heavy rumors had suggested.

In general, he said, the dollar is ''losing some of its downside'' momentum as the Persian Gulf crisis eases and currency market participants moderate their ''extraordinarily bearish sentiment'' on the U.S. economy.

Other New York dollar rates: 1.2960 Swiss francs, up from 1.2895; 5.2510 French francs, ahead from 5.2230; and 1,161.50 Italian lire, up from 1,154.75.

The British pound skidded to $1.9170 from $1.9455.

In Europe, the dollar strengthened on short-covering ahead of the weekend and on side effects of the Japanese rate hike.

Dealers bought the unit to cover short positions established in recent bouts of heavy dollar selling, said James Capel economist Geoff Dennis.

It rose in Frankfurt to 1.5650 German marks from 1.5565, and gained in Zurich as well, to 1.2969 Swiss francs vs. 1.2850.

In London, the pound slid to end at $1.9210 vs. $1.9480, abandoned by players who bought it as a high-interest refuge in the Gulf crisis. The pound and the Swiss franc were less attractive after Japan's rate hike.

The dollar rose in Paris, Brussels and Milan, to 5.2615 French francs vs. 5.2050, 32.22 Belgian francs vs. 31.89 and 1,163.30 lire vs. 1,148.10.

In Tokyo, the U.S. dollar eased against the Japanese yen after the increase in the key Bank of Japan interest rate. The dollar closed at 144.10 yen, down 0.25 yen from Wednesday's 144.35 yen.

Gold closed $4 an ounce higher in Zurich at $389.50 compared with $385.50. It also was higher in London, at $389 vs. $385.37 Wednesday.

Republic National Bank in New York closed cash gold at $387 an ounce, up from $385.70 Wednesday. The New York Commodity Exchange settled contract gold at $386.70 an ounce, ahead from $385.30.

Silver was unchanged in Zurich at $4.85 an ounce, and was higher in London at $4.85 an ounce vs. $4.84 the previous day.

Republic closed cash silver at $4.834 an ounce, down from $4.84. Comex silver finished at $4.807 an ounce, off from $4.826.

#90242u2178 08/30/1990 ~United Press International

CAPE CANAVERAL, FL (AUG. 30) UPI - Engineers struggled Thursday to resolve a potentially crippling glitch with a telescope aboard the shuttle Columbia to keep the presumably leak-free ship on track for a long-delayed pre-dawn liftoff Saturday.

The problem involved a loss of data from one of the four telescopes making up Columbia's $150 million astronomy payload. If a suspect electrical unit in the cargo bay has to be replaced, the shuttle's launch could be delayed up to a week, engineers said.

A management meeting was scheduled for Thursday night to debate the results of afternoon tests but officials said a final decision on whether to proceed with the countdown or to delay it for repairs might not be made until Friday. "It's not looking very good," said one official who requested anonymity.

Assuming the telescope problem can be resolved and if the weather cooperates, Columbia and its seven-man crew will blast off at 1:17 a.m. EDT Saturday to kick off NASA's first shuttle flight in four months after a disappointing summer of fuel leaks that grounded the shuttle fleet and wrecked the space agency's launch schedule.

Hoping for the best, Hoffman, 45, commander Vance Brand, 59, co-pilot Guy Gardner, 42, John "Mike" Lounge, 44, Robert Parker, 53, and civilian astronomers Ronald Parise, 39, and Samuel Durrance, 46, flew to Florida Wednesday night for final preparations.

Out at launch pad 39A Thursday, engineers spent the day troubleshooting a problem with the Broad Band X-ray Telescope - the BBXRT - one of four astronomical instruments mounted in Columbia's payload bay.

Ground data from the high-tech telescope was interrupted and then lost when Columbia's left-hand payload bay door was closed for launch earlier this week, prompting speculation that a ground cable system might have been damaged somehow.

But tests to make sure the telescope's data transmission system would work properly in space were inconclusive. "They did not get any signal" from the telescope, one official said.

If the ship's payload bay doors have to be opened for an inspection, launch would be delayed at least one day and if the suspect electrical unit must be replaced, the flight could be put on hold for a week or more.

Otherwise, Columbia's countdown ticked smoothly toward zero with Air Force meteorologists predicting a 60 percent chance of acceptable conditions at launch time.

Once in orbit, the astronauts plan to work around the clock in two shifts training their "Astro-1" telescopes on the most violent objects in the universe to learn more about the structure and evolution of the cosmos by studying high-energy light that cannot penetrate Earth's atmosphere.

But first, Columbia must get past fuel loading Friday afternoon without springing any hydrogen fuel leaks like the one that grounded the spaceship May 29, the night before the shuttle's first launch attempt.

The leak ultimately was traced to Columbia's 17-inch-wide hydrogen "disconnect" fitting, a massive connector that allows the shuttle's external tank to be jettisoned in space.

Columbia's disconnect was replaced with one taken from the new shuttle Endeavour and, after Atlantis was grounded by a similar leak in July,

Brand and his colleagues were cleared for another launch try this week.

After extensive tests, engineers blamed Columbia's leak on tiny glass beads that somehow got inside the disconnect fitting and scratched critical seals. Whether a similar problem crippled Atlantis remains to be seen, but engineers said they were confident Columbia is leak-free.

If an unacceptable leak does appear, however, it is unlikely it could be fixed at the launch pad, raising the prospect of another lengthy launch delay.

But Brand told reporters he was optimistic about an on-time liftoff. "We're ready to go," he said. "We have a great ship out there ... and we have all the confidence in the world in that machine, Columbia. It's a great ship."

The goal of the flight is to extend humanity's vision into the invisible ultraviolet and X-ray regions of the electromagnetic spectrum. Unlike the Hubble Space Telescope, launched from Discovery April 25 during the most recent previous shuttle flight, the "Astro" telescopes aboard Columbia will remain mounted in the shuttle's payload bay throughout the flight.

To collect as much data as possible, Columbia's crew will work in two 12-hour shifts throughout the flight with Brand, Gardner and Lounge responsible for keeping the shuttle shipshape and pointed in the right direction. The telescopes will be operated by Parker, Hoffman, Parise and Durrance.

#90242u2186 08/30/1990 ~United Press International

UNITED NATIONS (AUG. 30) UPI - The five permanent members of the U.N. Security Council Thursday made public their plan for a U.N.-administered government of Cambodia until elections are held and a new government is formed.

The plan calls for a cease-fire between the Vietnamese-backed Cambodian government and resistance groups, followed by U.N. administration of the government of Cambodia. Representatives of the current government, the three-party rebel coalition led by former Prince Norodom Sihanouk and the Khmer Rouge rebels are to serve as U.N. advisers in a Supreme National Council.

The supreme council will relegate all ''necessary powers'' to the U.N. Provisional Authority in Cambodia (UNPAC) to implement the plan once it is signed by all parties, according to the U.N. plan.

The Security Council designers of the plan - the United States, the Soviet

Union, China, France and Britain - said none of the Cambodian factions, which have been at war for 11 years, is to have a ''dominant position'' over any other on the supreme council.

The transitional government run by UNPAC will be headed by a special envoy of the U.N. secretary-general. The Cambodian Supreme National Council will advise UNPAC and the members of the rebel groups will be confined to specific geographic areas under U.N. control.

Diplomats said the United Nations will occupy the ministries of foreign affairs, defense, interior, information and transportation in the transitional government. UNPAC is to monitor the cease-fire and organize general elections.

Senior U.S. officials said this week that UNPAC will have about 20,000 military and civilian personnel, costing up to $5 billion for a two-year period. It would be the largest U.N. peacekeeping operation in the U.N.'s 45-year history.

UNPAC is to verify the cease-fire among the factions and disarm them.

The U.N. blueprint called for the future Cambodian government to observe neutrality and not engage in military alliance with other countries and to abstain from introducing foreign forces or military bases in Cambodia. It also said the government should strictly adhere to international conventions on human rights.

The plan said the Supreme National Council should be formed immediately, but it left open a thorny question about how the group's council will be set up; simply providing that all are to be represented and no one dominant over the others. The plan defined the SNC as representing the ''independence, sovereignty and unity of Cambodia.''

Disagreements among warring Cambodian factions on how to share power in such a council have held up progress in other areas aimed at settling the 11-year-old conflict, which began with the Vietnamese occupation of the country in December, 1978.

Sihanouk's three-party anti-Vietnamese resistance movement said Thursday in Bangkok it welcomed the Security Council peace plan.

And Khmer Rouge leader Khieu Samphan said on Khmer Rouge radio that ''the party of Democratic Cambodia (the Khmer Rouge) totally supports the statement of the five permanent members on Cambodia.''

The Khmer Rouge, which ruled Cambodia from 1975 until it was ousted from power by invading Vietnamese troops in 1978, was responsible for the death of more than 1 million people.

The factions agreed to attend a meeting in Jakarta next month with the members of the Association of the Southeast Asian Nations - Thailand, Malaysia, Singapore, Brunei, Indonesia and the Philippines - to discuss Security Council plan. Thai authorities said they are trying to persuade the Phnom Penh regime to attend the meeting.

#90242u2192 08/30/1990 ~United Press International

WASHINGTON (AUG. 30) UPI - Animal tests used by the government to determine whether chemicals pose a cancer risk to humans are virtually worthless for gauging low-level threats found in daily life, scientists claimed Thursday.

However, other experts countered that, despite their weaknesses, traditional mouse and rat tests remain the best way to protect the public from chemicals with cancer-causing potential.

In articles published in two leading scientific journals, Bruce Ames and Lois Gold of the University of California-Berkeley spelled out their objections to the routine use of high-dose tests in rodents to determine if a chemical constitutes a serious cancer risk.

The major problem lies in the enormous levels of chemicals given the test animals, said Ames and Gold, noting recent evidence indicates it is likely the quantity - not the makeup - of a chemical that triggers tumor formation.

High doses of chemicals, both natural and man-made, frequently spur rapid cell division that leads to cancer, while such cell division does not occur at low doses, they said.

A computer study by the University of Nebraska Medical Center in Omaha, published in the journal Science along with Ames' commentary, also found that cell proliferation appears to be the primary way chemicals which do not damage genetic material cause cancer.

In papers published in Procedings of the National Academy of Sciences, Ames and Gold reiterate their past claims that man-made chemicals pose no greater cancer risk as a group than natural chemicals found in fruit, vegetables or spring water.

About half of the 77 natural chemicals tested in high-dose rodent tests caused cancer in the animals - about the same proportion as has been found for the 350 synthetic chemicals checked in that manner, they noted.

In addition, they estimated the average American's intake of natural carcinogens found in foods like coffee, cabbage and mushrooms is about 1500 milligrams per day - far greater than the average daily intake of .09 milligrams from man-made pesticide residues.

''We have to rethink our current testing system. What it does is focus attention on very minor things,'' Ames said. ''A lot of assumptions about what consistutes a cancer risk are turning out not to be true.''

The California researcher said high-dose rodent tests are probably only valuable for situations where people would be exposed to very high

chemical concentrations, like in the workplace or when taking medication.

''These tests are not useful for telling anything about cancer risk at very low doses,'' Ames said.

However, he offered no alternative way of checking chemicals for cancer-causing potential at low levels like those found in pesticide-treated fruit or dioxin-contaminated soil.

Ellen Silbergeld, senior scientist with the Enviromental Defense Fund, said the track record of high-dose rodent tests has been pretty good. ''Overall, every human carcinogen causes cancers in animals. And as far as the other way, we do not know of any animal carcinogen that has been shown not to cause cancer in humans,'' she said.

Silbergeld, whose group last year released a study that created the public uproar that led to the withdrawal of Alar, a growth-promoting chemical used on apples, also emphasized that high-dose tests only signal that a chemical has the power to cause cancer and are not intended to establish the dose at which the cancer threat occurs.

''High-dose tests are really just to answer 'yes' or 'no' to the question if a chemical could be a carcinogen,'' she said.

#90242u2205 08/30/1990 ~United Press International

MANAGUA, Nicaragua (AUG. 30) UPI - The five Central American countries are slowly beginning to fight the region's reputation as a bridge for drug traffickers between South American producers and U.S. consumers, officials said Thursday.

Representatives from Costa Rica, El Salvador, Guatemala, Honduras, and Nicaragua participated in a two-day ''drug summit'' that began Thursday to try to extend the regional cooperation agreements that have recently worked at forging peace and economic accords to the issue of drug trafficking.

''The problem of drug trafficking is not a problem of one country, or of one region,'' said Alvaro Cuevas, Guatemala's deputy interior minister. ''It is a problem of the producers, the traffickers, and the consumers. We are in the middle. Central America is the bridge.''

The meeting was called by the five Central American presidents when they met in Antigua, Guatemala, in June and is an extension of talks by officials that have been running alongside presidential summits since the August 1987 ''Esquipulas II'' peace accords.

Officials at the current meeting agreed that recent strides toward regional peace and economic union have finally allowed them to work together to prevent drug traffickers from using their countries as refueling stops and transit routes between South America and the United States.

The onset of peace and the easing of trade and transit restrictions have also made it easier on the drug traffickers, some officials said.

''Nicaragua is now being used as a bridge for international drug traffic, and just a few months ago, for the first time, a plane was captured here that had departed from Colombia with a large shipment of cocaine,'' Nicaraguan Justice Minister Duilio Baltodano said.

Evidence of drug trafficking in Nicaragua was relatively little under the former Sandinista government, which was embroiled in a bloody war against the Contra rebels and was somewhat economically isolated by trade embargoes.

With the war now over and the government of President Violeta Chamorro instituting capitalist-style changes in the socialist economy, officials are worried drug traffickers will step up their use of Nicaragua as a conduit point, particularly in the remote east coast region.

''I understand that our Central American brothers have encountered similar circumstances in one form or other,'' Baltodano said at the meeting Thursday. ''Now is the time to unite our efforts and resources so that Central America does not fall victim to this omen and so that we can eradicate and control drug trafficking with the backing of the United Nations and Organization of American States.''

Marcio Coello Valladares, Honduran deputy interior minister, said the officials are mainly working on internal, regional methods of stopping drug traffickers.

''The measures we adopt will affect all of us,'' he said.

Cuevas, however, said they also planned to act as a group in working with the United States and other big drug-consuming countries and with the governments of Colombia and other major drug-producing countries.

He also said the five countries are cooperating on efforts to reduce consumption and production of drugs within Central America.

''In the case of Guatemala, we have a big problem with poppy seed production, but we are working to destroy the plantations,'' Cuevas said.

One of the roots of the drug trafficking problem in Central America has

been corruption and links of government and police officials to the drug traffickers, an issue that was not brought up during the public session of the meeting.

Nicaraguan Deputy Foreign Minister Ernesto Leal said the countries had already begun sharing material resources as well as cooperating in judicial, technical, diplomatic and educational areas to combat drugs.

''What we are doing on the regional level reflects the international cooperation to fight drugs that is currently going on at the world level '' Leal said.

#90242u2209 08/30/1990 ~United Press International

WASHINGTON (AUG. 30) UPI - Sales of stock, bond and income mutual funds slipped to $12.5 billion in July from $13 billion in June, the Investment Company Institute said Thursday. But the funds' total assets set a new record last month.

The national association of the mutual fund industry said that the funds' July 1989 sales were $9.7 billion.

Based on a spot check of fund executives, activity appears to reflect investor concern with the stock market, interest rates and the U.S. economy, the institute said.

Assets of all mutual funds reached a record $1.054 trillion in July from June's $1.035 trillion.

Assets of stock and bond funds increased to $586.7 billion in July from $582.2 billion in June. Assets of money market funds rose to $467.8 billion in July from $453.1 billion in June.

Sales of stock mutual funds totaled $5.9 billion last month, down from $6.6 billion in June. July 1989 sales were $3.8 billion. Growth-and-income funds led all categories, with sales of $1.8 billion, the institute said.

Sales of bond and income funds totaled $6.6 billion, up from $6.4 billion in June and $5.8 billion in July 1989. Long-term municipal bond funds continued to lead all bond and income funds, with July sales of $2.7 billion vs. $2.4 billion in June. These funds sold $2.3 billion in July 1989.

The institute said that new sales of long-term funds were brisk, but some investors switched into short-term funds. Sales were strong among several specialty funds categories, such as international, global and

energy-related funds, in July and appear to have stayed strong for most of August.

WASHINGTON (AUG. 31) UPI - Early findings suggest the experimental drug DDI may extend AIDS patients' lives as long or longer than AZT, the only goverment-approved drug to combat the AIDS virus, researchers said Thursday.

Government scientists said their study of 58 patients with AIDS or a complex of AIDS-related symptoms, called ARC, showed 88 percent of patients were alive 21 months after starting dideoxyinosine, or DDI, treatment. That compares with a 50 percent survival rate at 21 months among similar patients in early tests of zidovudine or AZT, and the 25 percent survival rate at 21 months found in the past among patients who received no treatment

''We were quite taken by the survival of patients. It is pretty good,'' said Dr. Robert Yarchoan of the National Cancer Institute, who co-authored the study published in the British journal Lancet.

Yarchoan emphasized the study was small and did not directly compare the effectiveness of AZT, which is made by Burroughs Wellcome Co., of Research Triangle Park, N.C., with DDI, made by Bristol-Myers Squibb Co. of New York. Tests to directly compare the two drugs in up to 2,500 AIDS patients are now underway, and results should be available in about a year.

However, the early findings ''suggest DDI has a shot at being a good, first-line drug,'' Yarchoan said.

''This gives you a sneak preview. It increases the odds those studies are going to be positive,'' he said. ''DDI is looking at least as good as AZT ... but I don't think you can conclude which is better from this.''

Neither AZT nor DDI, which both attack an enzyme the virus needs to reproduce, is a cure for AIDS. But both appear to slow the disease's lethal progression.

One problem with AZT has been that its toxic side effects like anemia and bone marrow suppression have forced about one-third of AIDS patients to discontinue treatment. About 15 percent to 20 percent of AIDS patients have had to discontinue DDI due to side effects like pain in nerve endings and potentially fatal inflammation of the pancreas, Yarchoan said.

Because the two AIDS drugs carry different toxicities and likely also generate different drug resistance, researchers hope it may be possible to extend AIDS patients' lives even further with treatments that alternate the two agents.

Currently, about 10,000 Americans with AIDS or symptoms of AIDS are taking DDI in traditional government-sponsored tests or in a new ''expanded access'' plan in which Bristol-Myers provides the drug free to people unable to participate in such tests.

The study pointed out one major benefit DDI may have over AZT: increasing levels of vital immune cells, rather than just keeping the levels from dropping further.

''With DDI, in people who were not previously on AZT for longer than four months, we see a very good rise in CD-4 counts (counts of immune cells targeted by the AIDS virus) that is higher and more prolonged than with AZT,'' Yarchoan said. The positive effect on immune cell counts - an average increse of 18 percent persisting for at least nine months - was significantly less pronounced among patients who previously received long-term AZT therapy.

NCI researchers said those findings may explain why immune cell counts have not gone up substantially in patients receiving DDI through the expanded access program since most have received AZT for six months before going on DDI. The study also found high levels of fatty substances called triglycerides in the blood may predict pancreatic inflammation, offering doctors a possible way of catching that side effect before it poses a serious threat to patients.

#90242u2251 08/30/1990 ~United Press International

TRENTON, NJ (AUG. 30) UPI - Federal law will require banks to clear checks more quickly beginning this weekend, but consumer advocates and bankers disagreed Thursday on whether the new law will be a consumers' blessing or a bankers' nightmare.

Permanent provisions of the Expedited Funds Availability Act of 1987 go into effect Saturday, requiring that banks clear checks and make funds from them available within two business days for local checks and five days for non-local checks.

The limits are shortened from the three-day period for local checks and seven days for non-local checks that have been required under the law since Sept. 1, 1988.

''The holdup at the bank will be a thing of the past starting Saturday,'' New Jersey Public Interest Research Group spokeswoman Patricia Dorsey said.

''Consumers - not banks - will earn millions of dollars in interest on deposited funds,'' she said.

New Jersey PIRG and its parent consumer organization, U.S. PIRG, were among the groups that lobbied for the new law. In 1985 and 1986, the group issued reports claiming delays as long as two weeks in clearing checks.

Dorsey said long check-clearing periods inconvenience consumers who cannot get their money and allows banks - not consumers - to collect interest while waiting for checks to clear.

The new law was opposed by bankers, who argued that clearance times had to be long enough to ensure that checks were good. Without sufficient clearance time, check-kiting schemes could abound, bankers said.

''We have had concerns in the past over the shortening of funds availability standards mainly because of the problems that can surface and result in check fraud rings,'' said New Jersey Bankers Association spokesman Kurt Schaub.

''Clearly, the opportunity for fraud is increased'' under the shortened limits of the new law, he said.

In preparation for the new limits, banks across the country have instituted use of new automated procedures and equipment to speed the process of clearing a check, he said.

Under the old system, clearing a check was a largely manual process of

mailing items from one bank to another and could take as long as two weeks to clear a California check, for example, presented at a New Jersey bank, he said.

Schaub said the new procedures have allowed banks to comply with the temporary three- and seven-day limits, and should allow them to comply with the new two- and five-day limits.

''The change is going to take place,'' he said. ''I can't say we're 100 percent comfortable with the new schedule, but we are going to do our best.''

The Federal Reserve Board, the main point along the check-clearing system between banks, asked Congress earlier this year to continue the three- and seven-day schedule. The Senate Banking Committee defeated an amendment to do that in July.

Dorsey said her organization plans to monitor banks' compliance with the law and would oppose any limits to go back to the longer limits.

#90242u2281 08/30/1990 ~United Press International

NEW YORK (AUG. 30) UPI - Stocks closed sharply lower Thursday as waves of program selling in the last hour of trading wreaked havoc with a very thin pre-holiday market.

The Dow Jones industrial average, which rose 17.58 Wednesday, tumbled 39.11 to close at 2593.32. With an hour of activity to go, the Dow was down 18 points.

Among broad market gauges, the New York Stock Exchange composite index lost 2.25 to 175.23. The price of an average share fell 45 cents. Standard & Poor's 500-stock index dropped 5.48 to 318.71.

Declines led advances 992-466 among the 1,970 issues crossing the NYSE tape. Volume amounted to about 120,890,000 shares, down from the 134,240,000 traded Wednesday. Trading was the lightest since the 119.39 million shares traded July 9.

The Dow was down 18 points with an hour of trading left, down 36 as of 3:30 p.m., and bottomed out with a loss of 50 at about 10 minutes before the closing bell, triggering the exchange's rule curbing program selling when the Dow falls 50 or more points.

Analysts blamed the exaggerated effect of program selling - used to profit on price spreads between stocks and stock-index futures - in a very thin market for the late plunge.

''Program trading was estimated to be as much as 15 percent of volume today,'' said James Andrews, first vice president in charge of institutional trading at Janney Montgomery Scott Inc. in Philadelphia. ''. in Philadelphia.

The exchange will be closed Monday for Labor Day, and Andrews said that given the still unresolved situation in the Mideast, many players wrapped up business until after the weekend, making for a very thin market.

''A lot of portfolio managers are looking to take off tomorrow, so they just wanted to even up positions before the holiday,'' he said. ''So I don't really think you can read too much into this.''

Stocks drifted at lower levels all day but a midday bout of program selling exacerbated early losses tied to higher oil prices and lower bond prices, which mean, respectively, more inflation and higher interest rates.

In New York trading, October crude oil futures closed up 85 cents at $26.77 a barrel. Oil plunged almost $2 a barrel Wednesday after the Organization of Petroleum Exporting Countries' agreement to boost production to make up for the oil lost in the Iraq-Kuwait embargo.

Treasury bonds also reversed course from Wednesday. Long-term Treasuries were down about 3/4 point late Thursday, after the Bank of Japan's decision to raise its discount rate to 6 percent from 5.25 percent. The yield on the bond rose to 8.99 percent from 8.92 percent late Wednesday. Treasury issues rallied as much as 1 1/8 points Wednesday.

On the trading floor, Placer Dome was the most active issue, unchanged at 17 5/8.

Wal-Mart followed, down 1 1/4 to 27 3/4 as retailers were weak amid fears of an imminent recession. Philip Morris was third, down 1 to 44 1/2.

Among the other blue chips, General Electric was down 3/4 to 61 7/8 in active trading, AT&T lost 1 to 31 1/2, also in heavy trading, and IBM tumbled 2 1/8 to 101 3/4 after announcing price hikes on some of its hardware and software products as of Jan. 1. Merck slumped 2 to 80, General Motors lost 1 3/8 to 39 1/4 and Coca-Cola tumbled 1 3/8 to 41 1/4.

Oil issues held firm during the plunge in oil prices Wednesday but lost ground as prices rose Thursday. Exxon fell 1 to 48 7/8, Texaco lost 1 1/8 to 62 1/8 and Chevron tumbled 1 1/2 to 75 1/4. The three are Dow stocks.

Elsewhere, Circus Circus Enterprises sank 2 to 47 7/8 after reporting a 25 percent drop in second-quarter earnings, which reflected expenses associated with the opening of its Excalibur resort.

Newmont Mining plunged 3 3/8 to 44 1/2. It has filed to offer 12 million common shares and 6 million warrants to buy additional shares.

And Melville sank 3 to 42. Smith Barney is said to have cut its investment rating and earnings estimates for the company.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 144,972,110 shares, downfrom 165,666,930 shares traded in the previous session.

Prices fell in moderate trading on the American Stock Exchange.

The Amex Market Value index lost 1.32 to 322.91. Declines led advances 290-221 among the 772 issues traded. The price of an average share fell 4 cents. Composite volume totaled 12,449,150 shares vs. 13,160,100 traded Wednesday.

Salomon's put warrants on the Tokyo market's Nikkei index led the Amex issues, unchanged at 16.

The National Association of Securities Dealers composite index fell 3.10 to 378.68.

KOLOLI, Gambia (AUG. 30) UPI - Negotiators seeking a solution to the Liberian civil war Thursday named an interim president, vice president and National Assembly to run the country until elections can be held in a year diplomatic sources said.

The sources said Amos Sawyer, who was instrumental in drafting Liberia's current Constitution, was chosen to serve as interim president in a secret ballot by the approximately 60 delegates attending the conference.

Sawyer was appointed by current President Samuel Doe in 1982 as chairman of the committee that wrote Liberia's new Constitution in 1984, but as head of the Liberian People's Party was arrested in 1984 and held in jail long enough to prevent him from running in the 1985 election.

A former professor of political science at the University of Liberia, his agreement to serve as interim president means he will abandon his long-held desire of becoming an elected president to replace Doe permanently.

Bishop Roland Diggs of the Lutheran Church of Liberia was named to serve as interim vice president, according to the sources. Diggs is also a

member of the Interfaith Meditation Committee that has moderated the talks.

Diggs was first nominated for the post of interim president but lost on a secret vote, according to one participant who requested anonymity.

The conference, which is being sponsored by the Economic Community of West African States, was expected to formally announce the choices and close the negotiations Friday morning.

Sources close to the talks said negotiators were acting on the assumption the proposed interim government did not need the approval of either Doe or National Patriotic Front guerrilla leader Charles Taylor because they expect the 3,000-man peacekeeping force now in Liberia soon will be able to establish full control of the country.

The latest reports from the field indicated the force made up of troops from five West African nations was advancing toward the center of the capital of Monrovia from the city's port, which they control.

But reports that Burkina Faso, which opposes the intervention by troops from Nigeria, Sierra Leone, Guinea, Gambia, and Ghana, is sending arms and troops to support Taylor may make the task of establishing a cease-fire more difficult than originally expected.

The interim National Assembly, whose members were chosen without a formal vote, will be made up of a representative from each of Liberia's 13 provinces and a member of the seven political parties present at the talks including Doe's National Democratic Party of Liberia.

Rebel leader Prince Johnson's National Patriotic Front of Liberia movement was recognized as a political party by the conference and will have a seat in the interim National Assembly, the sources said.

The interim government will be based in an undetermined location in neighboring Sierra Leone until the peacekeeping force is able to establish a cease-fire, according to several sources.

A draft resolution prepared by the conference's technical committee recommends an elaborate chain of events to install the new president in keeping with the country's current constitution.

Doe, who came to power in a bloody coup in 1980, is to dismiss his Cabinet and obtain the resignation of the speaker of the House of Representatives as well as the deputy speaker and the president pro- tempore of the Senate before resigning himself.

The current vice president, Harry Moniba, would then assume the presidency appoint the Sawyer as interim vice president and resign, paving the way

for Sawyer to become president.

If Doe is unwilling to follow the plan Moniba would be named president, appoint Sawyer to a lone Cabinet position, obtain the necessary resignations, and then resign himself.

(AUG. 30) UPI - U-N Secretary-General Perez de Cuellar arrived in Amman, Jordan, today and expressed hope that his meeting with Iraq's foreign minister will lead to a peaceful resolution to the Persian Gulf crisis. The two men are scheduled to meet tomorrow in the Jordanian capital. Despite his cautious optimism, Perez de Cuellar denied having a blueprint for peace. He also said he does NOT have the authority to bend U-N-imposed sanctions against Iraq.

The controversy surrounding country clubs hosting golf matches is now affecting the tournament held for the Southern Governors' Association. Three corporations- M-C-I, Telecom-U-S-A and Ross Laboratories- withdrew their sponsorship today because of the membership policy of the all-white country club in Natchez, Mississippi, that was to host the event. The match has been canceled.

One of the most influential organizations in Chicago's Chinatown community was one of four groups named today in an federal grand jury indictment aimed at an alleged nation-wide gambling ring. The On Leong Chinese Merchants Association of Chicago was one of the groups named. 29 people also were indicted. The ring is said to be headquartered in Chicago's Chinatown.

The European commercial rocket launcher is set for its second mission following a February 24th accident in which two Japanese communications satellites were destroyed. A French-built Ariane blastoff this evening. The rocket is to carry a pair of European communications satellites into orbit.

A federal appeals court today ruled that N-B-C acted without malice when it reported that organized crime figures played a role in Las Vegas singer Wayne Newton's 1980 purchase of the Aladdin Hotel. Newton sued the network and won 19-Million dollars in damages. Last year, that figure was reduced to five-Million dollars. Today's action by the Ninth U-S Circuit Court of Appeals dismisses the five-Million-dollar libel judgment.

NEW YORK (AUG. 30) UPI - The Federal Reserve Board said Thursday that the basic U.S. money supply, narrowly defined under the name of M1, rose $2.7 billion in the latest reporting week. The broader aggregates M2 and M3 also rose.

M2 increased by $6.5 billion and M3 increased by $5.1 billion.

M1, which is made up of cash, checking accounts and NOW accounts - money that is available for immediate spending - rose to a seasonally adjusted average of $817.6 billion in the week ended Aug. 20 from a revised $814.0 billion the week before.

Over the latest 13 weeks, M1 averaged $810.2 billion, a 2.2 percent rate of increase from the previous 13 weeks, the Fed reported.

The broader measure of money, M2, averaged an estimated $3,306.4 billion in the latest week, up from a revised $3,299.9 billion. M2 includes M1, plus passbook savings, small time deposits, including money market deposit accounts, consumer money market mutual funds and certain other short-term assets.

M3, which includes M2 plus large time deposits, repurchase agreements longer than one day at banks and thrifts, and institutional money market funds, averaged $4,091.0 billion in the latest week, ahead from a revised $4,085.9 billion, the Fed said.

#90242u2434 08/30/1990 ~United Press International

CAIRO, Egypt (AUG. 30) UPI - The West pressed Iraqi President Saddam Hussein Thursday on when he would fulfill his promise to free foreign women and children in his custody, and the U.S. State Department said Iraq's use of red tape to delay departures was disgraceful.

State Department spokeswoman Margaret Tutwiler accused the Iraqi government of delaying the promised departure in a web of red tape and broken promises. There are an estimated 3,000 U.S. nationals in Iraq and Kuwait.

Tutwiler said new procedures announced by the Iraqi authorities meant that women and children who wanted to leave had to present a letter with an Arabic translation asking permission to depart. She said the hostages also had to have a stamp from an Iraqi ministry certifying all Iraqi taxes had been paid.

For foreigners still in Kuwait, that would mean a possible arduous journey to Baghdad.

The bottom line, according to the State Department, is that no U.S. women and children have been able to leave Kuwait or Iraq, despite Saddam's promise Tuesday that they would be allowed to go.

Tutwiler called the Iraqi procedure ''an emotional roller coaster that is both inhumane and disgraceful.''

Iraqi Ambassador Mohammed al Mashat spent about an hour talking to State Department officials for the second day Thursday but could give no firm date on when foreign women and children would be allowed to leave.

Al Mashat also denied Iraq was demanding Western nations fly in food and medicine aboard the planes that would take the foreign women and children out of the country.

In London, the Foreign Office said British diplomats in that city and Baghdad had received ''very little in the way of detail'' on the anticipated release of women and children. There are nearly 4,000 Britons trapped in Iraq and Kuwait.

The Foreign Office said 32 more Britons were taken from their homes in Kuwait and taken to civilian sites in Baghdad Thursday morning. A total of 197 Britons are believed to be in Iraqi custody, but none of them is a diplomat.

The Foreign Office said British diplomats were allowed access to a group of British women and children taken by Iraqi troops to a downtown Baghdad hotel early Thursday from detention centers so they could be interviewed by foreign television crews.

In Bonn, the West German Foreign Ministry said Iraq distributed travel forms to German women and children, and that the West German Embassy in Baghdad helped distribute applications and fill out the forms for 200 people. About 740 Germans are in Iraqi custody.

But the German Foreign Ministry said it did not know when Iraq would issue exit visas and how German nationals would be allowed to travel out of Iraq. Bonn said it was prepared to get its nationals out either by air or overland to Jordan or Turkey.

In Oslo, Norwegian government spokesmen said they were worried about an Iraqi request calling on them to deliver passports and lists of 52 nationals to the Iraqi authorities.

''What they'll get is a full list of all our nationals in Iraq and Kuwait and where they are,'' said one official. ''That is what we have been trying to keep from them throughout the crisis.''

The Italian government said Thursday Iraqi authorities withdrew passports from six Italians living in the SAS hotel in Kuwait City. The Italians were still living in the hotel but no charges had been made against them. There are about 460 Italians in Iraq and Kuwait.

U.S. and British television networks were able to film women and children apparently transported from detention in strategic sites to Baghdad to prepare for possible evacuation.

A correspondent for Cable News Network who spoke to some of the hostages said none of them appeared to know when they might be released.

#90242u2464 08/30/1990 ~United Press International

BOSTON (AUG. 30) UPI - A ''small'' California company with offices in Woburn, Mass., has won a contract worth up to $402 million to provide computer workstations and related services for military intelligence activities, the Air Force said Thursday.

Infotec Development Corp. of Santa Ana won the five-year contract in part because it is small and minority-owned, said Kevin Gilmartin, a spokesman at Hanscom Air Force Base in Bedford, Mass. A company spokesman, James Cradduck, said Infotec has about 600 employees.

Under the agreement, Infotec will buy computer systems from manufacturers and provide a variety of computer-related services, including installing the equipment at up to 75 sites around the world, Gilmartin said.

The contract is part of a ''networking capabilities'' program designed to give Air Force and other military intelligence installations the capacity to use workstations - small but powerful desk-top computers - instead of much larger and more expensive main frame computers, said Maj. James Daday the program manager.

The computers will primarily be used in intelligence data handling, mostly by the Air Force but also by other Defense Department agencies, Daday said.

The bulk of the contract is indefinite, the final figure based on how many of the intelligence facilities ask for the authorized equipment and services, Gilmartin said. He said up to $200 million in hardware and a maximum of $194 million in installation costs are included in the contract. Only an $8 million portion for other services is definite, Gilmartin said.

Infotec last year reportedly had $53 million in revenues, more than many small, publicly held corporations. The majority owner is J. Fernando

Niebla, a Mexican-American.

Infotec, primarily a developer of software and an integrator of computers and hardware, specializes in military work.

But their status as a small business was key in getting this contract, said Daday, the Air Force program manager.

''Essentially, the Small Business Administration is the one that had this (contract) be set aside'' for a small company, Daday said.

#90242u2519 08/30/1990 ~United Press International

NEW YORK (AUG. 30) UPI - Assets of the nation's 520 money market mutual funds fell by $542.2 million to $407.45 billion in the week ended Wednesday, the Investment Company Institute reported Thursday. Average fund yields dropped.

The Washington-based institute said broker-dealer fund assets decreased $701.6 million to $165.37 billion, assets of general purpose funds increased $931.9 million to $143.38 billion and institutional fund assets fell $722.5 million to $98.7 billion.

Mutual funds were revised for Aug. 22 to $407.99 billion. The increase reported Aug. 22 was revised to $6.21 billion.

The Investment Company Institute, a national association of the American investment company industry, reports the assets of money market funds to the Federal Reserve Board each week.

The Donoghue Organization, of Holliston, Mass., said that average seven-day simple yields were at 7.48 percent, down from 7.51 the previous week, while 30-day simple yields eased to 7.50 percent from 7.52.

The average maturity of fund portfolios was unchanged at 45 days.

The Bank Rate Monitor, of North Palm Beach, Fla., gave average rates as follows: money market deposit accounts, 5.89 percent, down from 5.91; Super-Now accounts, unchanged at 4.98 percent; six-month certificates of deposit, 7.53 percent, up from 7.51 percent; 1-year CDs, 7.62 percent, up from 7.61 percent; 2 1/2-year CDs, 7.69 percent, up from 7.68 percent; and 5-year CDs, 7.80 percent, up from 7.79.

The average rate for a one-year, adjustable-rate mortgage was 8.30 percent up from 8.27.

The average rate on a 15-year, fixed-rate mortgage rose in the latest week

to 9.81 percent from 9.69, and the average rate for a 30- year, fixed-rate mortgage reached 10.12 percent from 10 percent.

The average rate for a four-year automobile loan was unchanged at 12.27 percent.

-30- 2012

#90242u2521 08/30/1990 ~United Press International

WASHINGTON (AUG. 30) UPI - The Resolution Trust Corp., in the largest contract it has awarded, Thursday named J.E. Robert Co. to manage some $2.4 billion assets that were owned by University Federal Savings Association of Houston.

The Alexandria, Va.-based J.E. Robert will be paid $21.8 million to manage the properties over three years and $19.6 million to dispose of the properites over that period.

The RTC said the actual management fee and property disposition fee will depend on the contractor's performance. Under its dispositon incentive system, the amount of fees earned would depend on both the speed of property sales and the amount of cash recovered.

The assets include $1.5 billion in nonperforming commercial loans and $835 million in commercial real estate owned by University Federal.

''We're working to sign contracts by the end of the year to manage and dispose of $20 billion to $30 billion of assets,'' said David Cooke, the RTC's executive director. ''Currently, the RTC is reviewing proposals from the private sector on more than 100 separate asset management and dispositon contracts.''

Cooke said such contracts are designed to promote timely sales at the highest posible prices rather than encouraging the contractors to hold the properties.

Separately, the residential asset portfolio of University Federal was awarded to Northcorp Realty Advisors Inc. of Dallas. The contract calls for the management and disposition of 431 single-family residential nonperforming loans with a book value of $21.6 million, and 1,215 single-family repossessed residential real estate assets with a value of $96.6 million.

Northcorp will be paid $2.4 million over a three-year period to manage the properties. The firm will also earn about $1.9 million in fees for disposing of the asets.

The total book value of assets held by University Fedral was about $3.8

billion when the thrift's deposit franchise was sold in October of 1989.

NCNB Texas National Bank purchased the deposit franchies and some of the thrift's assets from the RTC. Under an interim arrangement, the NCNB Corp. subsidiary also assumed management of the remaining assets.

#90242u2525 08/30/1990 ~United Press International

ABOARD THE USS INDEPENDENCE (AUG. 30) UPI - U.S. naval bomber pilots declared Thursday their readiness to strike military targets deep within Iraq, even at the risk of possibly harming thousands of Western hostages believed held as human shields at vital facilities by President Saddam Hussein.

Rear Adm. Jerry Unhur told reporters during a day-trip to the USS Independence that the U.N.-sanctioned blockade against Iraq is working ''extremely well,'' with Iraqi ships shying away from U.S., British and French naval forces and Baghdad's fighters avoiding any challenges in the skies.

''It appears that the Iraqis are being very conservative,'' said the commander of the battle group linked to the 80,000-ton vessel, which was steaming through waters between Oman and Iran near the Straits of Hormuz that lead into the Persian Gulf.

''At this point the Iraqis have not challenged us, and probably rightly so.'' Unhur said the USS Wisconsin, a World War II-era battleship armed with 16-inch guns and Tomahawk cruise missiles, had recently been topped up with fuel and was steaming through the gulf.

''The battleship complements very nicely the rest of the naval assets that are here,'' he said, explaining that it was patrolling the gulf with other destroyers and cruisers. ''It provides signficant firepower for inland targets.''

Washington has warned of Baghdad's ''war-making'' potential, and analysts believe any U.S. and Arab ground action to dislodge Iraqi troops from Kuwait would include an all-out air and naval assault on some 300 military and industrial targets deep within the Iraq.

The barrage would presumably involve the Wisconsin and other vessels capable of dispatching the extremely accurate cruise missiles from offshore.

Saddam's movement of seized Western nationals to unnamed military facilities is clearly aimed at creating a deterrent against such an operation, but a group of bomber pilots said they were willing to risk

paying such a price.

Cmdr. Don Nickles, the leader of a squadron of A-6E intruder bombers, said his aircraft were capable of destroying Iraqi military command centers, where he believed there would not be ''many hostages standing around in there.''

Nickles was asked about the prospects of his aircraft, which are armed with laser-guided ''smart bombs,'' inadvertently harming some of the hostages. He paused, then said: ''We are going to get a target, and our job is not to worry about who is there and not there. Someone else has to worry about the hostages.''

Unhur said Iraq had moved Silkworm and Exocet anti-ship missiles into Kuwait, but said these had not been activated against U.S. forces. The admiral said Saddam had constructed sea defenses in Kuwait because he apparently feared a seaborne invasion by the U.S. Marines.

''I think the Iraqis are worried that we will invade them and push them out,'' Unhur said.

He said the ships under his command in the gulf and northern Arabian Sea were routinely monitoring and intercepting about 300 merchant vessels to ensure that all goods except for medicene did not reach Iraq.

He said about five vessels had been boarded, the most recent in the Red Sea on Tuesday.

The operation is staged through the vessel's combat control room, a high-tech cocoon deep within the carrier where operators sit in a permanent blue twilight to ease their eyes to sophisticated monitors.

A data base has information on all the world's known merchant ships, and can instantly place on a color screen the locations of all known positions of U.S. naval vessels around the planet.

-30- 3858

#90242u2549 08/30/1990 ~United Press International

WASHINGTON (AUG. 30) UPI - President Bush announced an effort Thursday to persuade other nations of the world to share the costs - both military and economic - of the massive push to force Iraq from Kuwait.

At a White House news conference, Bush said he was sending Secretary of State James Baker and Treasury Secretary Nicholas Brady on a multi-nation trip to coordinate contributions and donations to defray the costs of the operation.

Bush declared that it was important that the burdens of the operation, which has mostly been a U.S.-sponsored effort, be shared by ''anyone with a stake in international order.'

The United States, he said, was ''more than willing to bear our fair share of the burden ... but we also expect others to bear their fair share.''

Bush stressed that the costs of the operation involved not only the military operation, the brunt of which is falling on the United States, but also economic hardships being endured by countries observing the international economic boycott against Iraq.

''The sanctions are beginning to take hold,'' Bush said. ''We want to make sure that countries contributibng to this effort are not penalized.''

Specifically, Bush singled out Turkey, Egypt, Jordan and countries of Eastern Europe as needing economic help and added that the United States would also seek to have other nations pay for some of its military costs. The president, however, did not specify how much money he expected would be funneled to the United States.

Bush, who has been told by Japan that it is willing to contribute to the effort, said the United States was trying to take ''leadership in trying to sort out who should help whom.''

''That was voluntary, but it's got to be coordinated,'' he added.

Welcoming ''strong indications of support'' from abroad, Bush said the burden-sharing plan ''should help create a context in which sanctions against Iraq can be sustained with the intended effect.''

Later, as Bush returned to his seaside home in Kennebunkport, Maine to continue his summer vacation, White House spokesman Marlin Fitzwater told reporters the president telephoned several world leaders, including West German Chancellor Helmut Kohl, Egyptian President Hosni Mubarak, Turkish President Turgut Ozal and the exiled emir of Kuwait, Jaber al Ahmad al Sabah.

Fitzwater said he had no list of countries that have made specific commitments to Bush's call for multinational assistance, but said ''at least a half dozen'' have offered money and supplies.

The Pentagon raised its estimate of the cost of the Middle East operation Tuesday to $46 million a day through Sept. 30, straining resources and severely complicating deficit-reduction talks between the administration and Congress.

That figure was more than double an initial estimate Aug. 17, which was

made before the call-up of almost 50,000 National Guard and Reserve personnel and a sharp increase in the price of fuel being used to transport U.S. forces.

Concern over the cost of the Middle East operation surfaced Tuesday in a meeting between Bush and some 150 members of Congress, who backed his actions to date but underscored a need for broader international participation in the campaign against Saddam Hussein.

''It is important that the considerable burden of the effort be shared by those being defended and those who benefit from the free flow of oil,'' Bush said. ''Indeed, anyone with a stake in international order has an interest in ensuring that all of us succeed.''

Though Bush said there was ''no total price tag'' in mind, administration officials said the proposed fund could top $10 billion, to be used both to cushion the impact of sanctions on countries dependent on trade with Iraq and to defray the costs of military deployments in the region.

#90242u2561 08/30/1990 ~United Press International

(AUG. 30) UPI - President Bush says Washington will seek international assistance to finance the Middle East troop deployment. Speaking at the White House this afternoon, Bush said senior members of his administration will solicit funds from- in his words- ''anyone with a stake in international order.'' Bush said some of the money raised would assist those nations most adversely affected by sanctions against Iraq.

The State Department is accusing the Baghdad government of subjecting Western women and children who want to leave Iraq to a maze of bureacratic red tape. Two days ago, Iraqi leader Saddam Hussein said women and children detained in Iraq and Kuwait could leave if they want to. But the State Department says those who want to leave must meet a variety of regulations... including a letter of intent with an Arabic translation.

A study released today by the Congressional Budget Office disputes President Bush's claim that a cut in capital gains taxes will be good for the economy. The study says slashing taxes on profits from the sales of assets would NOT significantly boost economic output or growth. The study adds that lower capital gains taxes would create a tax incentive for companies to retain earnings, rather than pay dividends.

The path toward German unity hit a new snag today as East German's parliament rejected a decision to move to the West files compiled by the former communist security police. It had been decided during re-unification talks that the files would be transferred to the West. East German legislators say they will vote against the re-unification treaty if

it contains a transfer clause. Approval of the treaty requires a two-thirds majority in both German parliaments.

GREENWICH, Conn. (AUG. 30) UPI - United Parcel Service has been chosen by the federal government to operate a new all-cargo air route to Japan, further expanding the company's international service, officials said Thursday.

UPS and Emery Air Freight of Palo Alto, Calif., were the only two companies to compete for the designation, said UPS spokesman Robert Kenney.

The U.S. Department of Transportation made the decision based on a recommendation by Administrative Law Judge Burton Kolko, said Patrick V. Murphy Jr., deputy assistant secretary for policy with the department.

''We expect this market will be a very profitable one and it opens up many opportunities for shippers in the U.S. and Japan to take advantage of this capacity to move their products,'' Kenney said.

UPS will operate six flights a week starting Oct. 1 with one Boeing 747 cargo plane that will leave from the company's air hub in Louisville, Ky., stop in Anchorage and head on to Narita Airport in Tokyo.

Kenney said the company expected to eventually expand service to Japan.

Emery was awarded backup authority on the route.

The cargo route was authorized Nov. 6, 1989, in an agreement between Japan and the U.S. calling for a substantial expansion of air service between the two countries.

''The department concluded that the UPS proposal in this case will afford more public benefits to U.S. shippers and other consumers in the U.S.-Japan cargo market,'' the transportation department said in a prepared statement.

(AUG. 30) UPI - Freed Irish hostage Brian Keenan says thought his pro-Iranian captors kidnapped him because they thought he was British. Moslem extremists seized the Irish educator in Lebanon in 1986... several days after U-S forces bombed Libya. During an emotional news conference in Dublin today, Keenan said his captors showed him newspaper reports detailing the American military action when he asked why he was kidnapped.

There was NO stay of execution today for convicted murderer George Gilmore who is scheduled to die by lethal injection early tomorrow in Missouri. The Supreme Court for a third time in a decade rejected Gilmore's appeal to avoid the death penalty. Gilmore was sentenced to death for the 1979 murder of an elderly woman. The sentence is to be carried out at the Potosi Correctional Center.

Four people were injured- one critically- in an explosion today in the already tornado-devasted community of Crest Hill, Illinois. Officials say a mobile kitchen truck set up by a Baptist group to provide relief for tornado victims was set ablaze by a nearby propane tank that blew up. Today's accident occurred near the ruins of an apartment complex destroyed by Tuesday's twisters.

One of the nation's largest AIDS service organizations unveiled a sexually explicit board game designed to educate people about the deadly disease. The game... ''Speaking of Sex''... has players make decisions about different high- and low-risk sexual activities in order to advance around the game board. Developers of the game say it gets people to ask questions about AIDS.

#90242u2660 08/30/1990 ~United Press International

CINCINNATI (AUG. 31) UPI - Federated Stores Inc. and two subsidiaries said Thursday they will negotiate with the Internal Revenue Service on IRS claims for $585.6 million in additional taxes sought as part of the companies' bankruptcy reorganization.

The subsidiaries are the Allied Stores Corp. and Federated Department Stores Inc.

The companies said the IRS filing, which had been expected by the Sept. 4 bar date for the IRS's submission of claims, was an important step in expediting emergence from Chapter 11.

The companies said they dispute and will vigorously defend against the $585.6 million in claims compiled by the IRS, but they noted the IRS staff had been extremely cooperative in helping to expedite the Chapter 11 tax claims process.

The companies said they hoped to negotiate a settlement with IRS representatives on most of the issues involved in the agency's audit over the next several months.

The IRS claims, exclusive of interest, are based on a Chapter 11- related audit for tax years 1984 through 1988.

The claims involve a number of tax issues, including the deductibility of merger and takeover expenses in both the Federated and Allied acquisitions by the Campeau Corp., and deferral of taxes on the gain from the sale of assets subsequent to the corporate acquisitions. Various other issues were unrelated to the takeovers or the sales of assets.

The $585.6 million being sought by the IRS represents pre- acquisition claims of $141.5 million against Federated and $118.7 million against Allied, in addition to claims of $325.4 million against parent FSI.

Claims against FSI are inclusive of Federated and Allied for the post-acquisition periods, said the companies, since federal tax law stipulates members of a controlled group (such as the companies comprising the FSI group) share tax liabilities for the whole.

Interest on the amounts currently totals $125 million, a sum that would fall as claims are reduced in a negotiated settlement, the companies said.

The companies said they and an IRS staff member will attempt to resolve disputed issues through negotiation. Failing that, U.S. Bankruptcy Court would have jurisdiction over remaining claims.

The companies said they currently were analyzing and processing a large number of other creditor claims, some of which could be material, submitted in time to meet a general Aug. 1 bar date.

These claims, they said, along with other categories of claims still to be submitted, also will be addressed as part of the companies' Chapter 11 reorganization.

#90242u2666 08/30/1990 ~United Press International

AUSTIN, Texas (AUG. 31) UPI - The Texas Railroad Commission, responding to a request by President Bush, Thursday approved a 20,000-barrel-a-day increase in the state's oil production to help counter looming shortages caused by the Middle East crisis.

The action was largely symbolic, since Texas produces about 1.7 million barrels a day, and the worldwide oil shortfall expected from the Iraq-Kuwait embargo is expected to be up to 5 million barrels a day.

The amount is also insignificant in comparison to the production increase agreed to by members of the Organization of Petroleum Exporting Countries earlier this week. Saudi Arabia agreed to increase production by 2 million barrels a day, United Arab Emirates, 700,000; Venezuela, 600,000; and Nigeria, 100,000.

Railroad Commission Chairman Kent Hance conceded that 20,000 barrels would not make a dent in the shortage, but he said the state is obliged to do what it can.

''I think if you look at a 4 million to 5 million barrel shortfall, it's pretty insignificant, and yet we're going to be probably the second or third largest increased producer in the United States that can make some impact.'' he said.

Hance said if the stalemate continues and Iraqi or Kuwaiti oil remains unavailable, gasoline prices could rise to $1.50 per gallon and oil could go to $35 per barrel.

#90242u2668 08/30/1990 ~United Press International

BEIRUT, Lebanon (AUG. 30) UPI - The pro-Syrian government of President Elias Hrawi will launch a military operation to oust rebel army commander Gen. Michel Aoun if he does not concede by Sept. 9, official sources said Thursday.

''Gen. Aoun will have to make up his mind within a maximum period of 10 days: either to relinquish power peacefully and join the legitimate government (of Hrawi) or he will be uprooted by a military operation,'' an official source told United Press International.

The source, who requested anonymity, said force would be the last resort to put an end to Aoun's rebellion.

The Christian general, who commands a 15,000-strong army, has refused to relinquish power to Hrawi, also a Christian Maronite, and leave the presidential palace in Baabda, 5 miles southeast of Beirut.

Hrawi was elected president last November as a result of an Arab- brokered peace accord endorsed by the majority of Lebanese lawmakers in Taif, Saudi Arabia.

The source said Syria, the main power broker in Lebanon, started massing troops along the mountainous front lines with Aoun in Souk El Gharb, 7 miles southeast of Beirut.

''The Syrians are massing troops but they will not use force before exhausting all peaceful alternatives,'' the source said.

''Their approach resembles the American way in dealing with (Iraqi President) Saddam Hussein in the gulf.

''This time, Hrawi's government and the Syrians are determined to end Aoun's mutiny even if they were left with the last option, which is force '' the source said.

The source said this was at the core of a one-day summit meeting held between Hrawi and Syrian President Hafez Assad Wednesday in Damascus.

The meeting was attended by Lebanese Prime Minister Selim Hoss and Parliament Speaker Hussein Husseini as well as high-ranking Syrian officials.

''Syria pledged to provide complete assistance to the legitimate authorities to extend its sovereignty on Lebanese territory and remove all obstacles in the way of the peace process,'' said a statement issued by the presidency after the summit.

Military sources in Beirut said preparations were under way by the Lebanese Army Command loyal to Hrawi to pave the way for a takeover of areas controlled by Aoun in Christian east Beirut.

Among the measures was the merger of certain Army brigades, the military sources said.

#90242u2687 08/30/1990 ~United Press International

LAS VEGAS, Nev. (AUG. 31) UPI - Bally Manufacturing Corp. won Nevada Gaming Commission approval Thursday to acquire KGN Leisure Ltd., a gaming device route operator based in Durham, England.

The corporation is acquiring the route operation, which has 1,000 to 1,300 gambling machines, for two million pounds, officials told the state.

Nat Solomon, a member of the board of directors of Bally and an experienced British gaming executive, will be chief executive officer of KGN Leisure, a wholly owned subsidiary of Bally.

The firm already is licensed in Great Britian.

Bally needed Nevada Gaming Commission approval to acquire KGN Leisure because state law requires Nevada gambling licensees to obtain state gaming agency permission before investing in foreign gambling.

Unrelated to the application, Bally representative Barton Jacka said the company planned to open its $10 million gaming machine manufacturing plant in Las Vegas Sept. 13. The company's current plant in Bensenville, Ill., closes Friday. The Las Vegas plant site is near McCarran International Airport.

Bally is the world's largest manufacturer of gambling machines.

#90242u2688 08/30/1990 ~United Press International

PLAINFIELD, Ill. (AUG. 30) UPI - Debbie Weglarz and her husband kept $1,500 stashed in their garage for a rainy day.

The rains came Tuesday. So did a tornado. Now they can't find their garage.

''It's gone,'' Weglarz said Thursday. ''Not just the garage. Everything's gone.''

The Weglarz family, whose home used to be five miles north of Plainfield, is among hundreds who lost their homes to the savage storm that cut a swath from Plainfield to Joliet, southwest of Chicago.

The number of people killed by the twister rose to 26 Thursday with the deaths of two hospitalized children, and a man died of carbon monoxide poisoning when he tried to use a gas generator at his home. Sixty-one of the 355 people injured remained hospitalized Thursday, eight in critical condition.

The Will County Emergency Services and Disaster Agency pegged losses to private homes and businesses at $100 million. The damage was so overwhelming that President Bush needed only hours to respond to Gov. James R. Thompson's plea for a federal disaster declaration. Thompson issued a similar state declaration Wednesday, after tourning the devastated area.

The Weglarz family lived in their now destroyed home for 11 years. After the storm, the house, the garage, even the grand piano were gone. A neighbor's boat rested where their front door used to be.

Insurance adjusters swarmed over Plainfield and nearby Crest Hill, where an apartment complex was destroyed, assessing damage and writing checks to victims to cover their living expenses.

''We don't even have any idea how many claims there will be,'' said Greg Rossiter of Allstate Insurance Co. ''All we know at the moment is that we alone have 14,000 home and auto policies in the Plainfield and Joliet areas.''

Several insurance companies set up temporary claims offices to take reports and one savings and loan offered unsecured loans of $200. Secured emergency loans of up to $10,000 also were offered.

Storm-shocked victims carrying plastic garbage bags combed a cornfield adjacent to the wrecked apartment complex, searching for belongings strewn by the storm.

At least 10 dump trucks lined up at the apartment complex to collect debris and tow trucks dragged mangled cars from streets and fields.

Plainfield officials summoned structural engineers to assess the soundness of damaged buildings.

''The emergency is over,'' said Police Chief D.E. Bennett.

''Everyone knows what comes next,'' Weglarz said. ''It's time to rebuild.''

He and his wife will start with an emergency $6,000 check from their insurance company pending an evaluation of their loss.

Volunteers from the Salvation Army and Red Cross set up relief efforts throughout the stricken area. Scores of people lined up to give blood after hospitals reported shortages of types O and B, both negative and positive.

A propane tank near a Baptist Relief Organization truck exploded at the Crest Hill complex Thursday, injuring four people. The propane tank was being used by a mobile kitchen providing food for tornado victims. Police Sgt. James Albritton said officials could not immediately determine the cause.

The Joliet K mart served as a central gathering point for canned food and clothing donations to tornado victims.

Offers of aid even came from the Soviet Union, grateful for the help Illinois residents offered following the earthquake in Armenia.

#90242u2787 08/30/1990 ~United Press International

NEW YORK (AUG. 30) UPI - Jennifer Capriati and Steffi Graf both won in runaway fashion Thursday, racing to within one step of a fourth round showdown in the U.S. Open.

The 14-year-old Capriati, an exuberant, delightful addition to big- time tennis, won nine games in a row to overwhelm Patricia Hy, 6-3, 6-1, and then declared her desire to win ''America's tournament.''

Graf, seven years younger than Capriati and winner of America's tournament the last two years, also coasted into the third round with a 6-1, 6-3 victory over Australian Rachel McQuillan.

If the two women win their next matches, they would meet in the fourth round. Last Sunday, in an exhibition at Mahwah, N.J., Capriati carried Graf to a third set before losing 7-5.

''This is the tournament I want to win most because I'm American and it's my own turf,'' sai Capriati, the 13th seed. ''It's America's tournament, so that makes it even more special.''

Hy, born in Cambodia and now living in Canada, had two points to go up 4-1 but Capriati turned things around quickly and captured nine games in a row.

''She was hitting her forehand well and I was making errors,'' said Capriati, the 13th seed. ''I cut down on the errors and she wasn't hitting the forehand for winners any more.''

Graf, the top seedd, needed 55 minutes to dispose of McQuillan and commented on the possible confrontation with Capriati by saying, ''It should be an exciting match to play against her here.''

Boris Becker, one short step from the top, came across a former great on the way down, and the result was an easy straight sets victory that catapulted the men's defending champion into the third round.

Becker, effective with his booming serve although he registered only two aces, crushed Yannick Noah, 6-4, 6-2, 7-6 (7-2), on a soft, sunny afternoon.

Becker, who often experiences difficulty in the early stages of major championships, such as the French where he was ousted in the first round, has yet to drop a set here.

''You can't win them all, you can't win 10 tournaments in a row,'' the 22-year-old West German said. ''That's not the way it's ever been, and that's not the way it is.

''But I'm No. 2 now, very close to No. 1, and that's pretty good, don't you think.''

Stefan Edberg, ranked No. 1 in the world, was beaten in the first round here, just as he was at the French Open, but is assured of retaining the top position in the next rankings.

Noah, who ranked among the top 10 for six years in a row, now has fallen to No. 35 and is disturbed about the state of his game. He didn't have a single break point in the first two sets, and although he converted on his only opportunity in the eighth game of the third set, he allowed Becker to

break back in the next game.

''I'm not happy with the way it went,'' said the 30-year-old Noah, who lost to Becker in the 1989 Open quarterfinals. ''I'm going to go home and think what comes next.

''I can't think of taking a break if I want to come back. If I take a break, it's for good.''

Becker was successful on 69 percent of his first serves.

The other seeds to play were successful, with the exception of No. 14 Jim Courier, a 4-6, 6-4, 7-6 (8-6), 7-6 (7-5) loser to South African Gary Muller. Muller delivered 24 aces, 10 of them in the final set, and added 25 service winners.

Monica Seles, the French champion and seeded third here, easily defeated Ros Fairbank-Nideffer, 6-2, 6-2, although she got a headache from the heat. The 16-year-old Yugoslavian has won 43 of her last 44 matches.

Americans Brad Gilbert, Aaron Krickstein and Michael Chang, seeded Nos. 8, 9 and 11 respectively, all won in straight sets. Gilbert defeated Rich Leach, 7-6 (7-4), 6-4, 6-2, Krickstein beat Jason Stoltenberg, 6-4, 6-2, 6-4, and Chang was a 7-6 (7-3), 6-3, 6-2 winner over Jimmy Arias.

Krickstein, an Open semifinalist last year, hurt a muscle below his right shoulder while serving in the third set, and said he was concerned about his third round match with Pat Cash.

Goran Ivanisevic, the No. 15 seed, won in four sets from Jean- Philippe Fleurian.

Muller, ranked No. 61 in the world, credited his serve with carrying him past Courier into the third round, the farthest he ever has gone in a Grand Slam.

''Anytime you can play well and beat a seed at the Open it's a great win, no matter what seed it is or how well you think you should do,'' he said. ''It's always nice to come through in those kinds of matches.''

Seles broke service in the opening game of each set, while Fairbank-Nideffer, a difficult opponent ranked No. 25, could break only once.

Seles, scheduled to play the second round match Wednesday night, was delighted when rain forced a postponement after a long delay.

''The last time I lost to her we started playing at 10:30,'' she

explained. ''I didn't want to play her that late. She has slow strokes and she can put you to sleep very quickly.''

Among the women, fourth seed Zina Garrison defeated Angelica Gavaldon, 6-4 6-0. Also winning were No. 6 Arantxa Sanchez Vicario, No. 7 Katerina Maleeva, No. 10 Conchita Martinez, No. 12 Jana Novotna and No. 16 Barbara Paulus.

#90242u2913 08/30/1990 ~United Press International

(AUG. 30) UPI - The only word on the release of Westerners being held in Iraq is news of more bureaucratic snags that will keep them trapped in the country. U-S State Department spokeswoman Margaret Tutwiler accused Baghdad today of delaying the departures in a web of red tape and broken promises. Westerners must now write a letter, with Arabic translation, asking permission to leave... as well as prove they have paid all Iraqi taxes.

A spokesman for Israeli Prime Minister Yitzhak Shamir today brushed aside Iraqi threats with tough words. Baghdad's threat to attack the Jewish state if war broke out in the Persian Gulf prompted the spokesman to vow that Israel would forcefully defend itself. The spokeman said Israel has proven in the past it can fight... and- in the spokesman's words- ''any aggressor will live to regret his actions.''

U-S officials say President Bush can expect Mexico to ask for negotiations on a free trade aggreement. A U-S Embassy official says judging by the Canadian talks, negotiations with Mexico will probably take between four and five years. He says soon after the official request, Bush will seek congressional approval of the talks. Mexico is America's third-largest trading partner.

South African security forces were deployed to a black township after white authorities cut off the community's water, sewage and electricity. Officials say they took the action after residents of the township boycotted payment for the services. Riot squads and army troops arrived in the area after receiving reports that ''people gathered in groups'' to protest the cutoff of services.

#90242u2921 08/30/1990 ~United Press International

(AUG. 30) UPI - Researchers say early results of a new AIDS medication are promising. In a published study, they say 88 percent of patients with AIDS or AIDS-related symptoms were alive 21 months after starting treatment with D-D-I. That compares with a 50- percent survival rate for AIDS patients in early tests of the only government-approved AIDS drug, A-Z-T. People with AIDS who received NO treatment had a 25-percent survival rate after 21 months.

The Miami-based rap group 2-Live Crew will make its debut appearance this fall on pay-per-view television. The head of the company slated to

distribute the November 8th performance says the controversial rappers have designated a ''significant'' portion of the show's proceeds for the American Civil Liberty Union's efforts to fight censorship. The group has been deemed obscene by a Florida judge and various communities across the nation.

The sister of a Texas death row inmate found strangled earlier this week says her brother had been threatened by other condemned prisoners. Bettye Gutierrez says letters from her brother, Calvin Williams, told of threats from other prisoners who he owed money. Investigators have said the death may have been a suicide, but it's still under investigation.

An Air Force explosive expert says his staff will practice their skills on a rusty Soviet World War Two sea mine that washed ashore on a remote Alaskan island earlier this year. Senior Master Sergeant Michael David did NOT say how he planned to employ the 38-inch-diameter UNarmed steel mine. Air Force officials say the device turned up June 6th, but announced its presence only today.

#90243b0012 08/31/1990 ~Business Wire

OVERLAND PARK, KS (AUG. 31) BUSINESS WIRE - U.S. Sprint will begin providing communications relay service throughout the state of Texas on Sept. 1. Known as Relay Texas, the service will allow Texas residents who are deaf, hard of hearing, or speech impaired to communicate over the telephone with persons who have normal speech and hearing.

The Public Utility Commission of Texas awarded the Relay Texas contract in March to Sprint Services, a unit of U.S. Sprint. Operating out of Austin, Relay Texas will be operational 24 hours a day, 365 days a year. More than 100 people from the Austin area have been hired to serve as customer relay agents. An additional 50 may be hired within the next year.

To communicate with the center, persons who are speech and/or hearing impaired will use a Telecommunications Device for the Deaf (TDD) or other compatible equipment. TDD users will dial a toll-free access number and will be in direct contact with a Sprint Services relay center agent. The agent will then connect the call to the requested number.

Once the call is placed, the agent will remain on-line to serve as a conduit between the two parties. A message typed into the TDD system is viewed by the agent, who then translates it orally to the party with normal speech and hearing.

The agent then receives the oral response, converts it into written form, and relays it back through the TDD system. Calls may be initiated by either a TDD user or a person with normal speech and hearing.

According to Peggy Fields, director of operations for Relay Texas, agents have received extensive training in deaf awareness and sensitivity, as well as American Sign Language transliteration. This enables agents to identify a variety of sentence structures and language patterns used exclusively by people who are speech or hearing impaired.

"We are committed to providing Texas residents with the highest quality of service possible," Fields said. "As part of this commitment, our agents have spent many hours in class learning how to relay conversations and emotions accurately over the telephone.

"Through our participative training and role playing, agents are able to understand the special communications needs of users who are speech or hearing impaired and help provide them the equal communications access they need."

Fields says that customer relay agents may handle as many as 175,000 calls a month. Nearly $4 million has been invested by Sprint Services in state-of-the-art electronic switching and computer equipment, building improvements, furniture and fixtures for the Relay Texas center.

#90243b0050 08/31/1990 ~Business Wire

DENVER (AUG. 31) BUSINESS WIRE - Com-Tek Resources Inc., the Denver-based oil and gas company, announced Friday that it has reached an agreement in principle to merge with Crescent Oil and Gas Corp., also of Denver, on the basis of Com-Tek issuing an initial 5.6 million new shares to acquire 51 percent of the company.

Crescent's major asset is its gas properties in Montana, including producing wells, with some five billion cubic feet of proved gas reserves.

Jim Ellerton, president and chairman of Com-Tek Resources, said that the merger, when completed, would result in an enlarged company with positive cash flow from its current operations, virtually no debt, and substantial economies of scale at an administrative level.

The proposed merger is subject to approval by both companies' board of directors, the relevant regulatory agencies, and a definitive agreement to be completed by Sept. 30, 1990. The transaction is to be deemed effective from July 1, 1990, and completion is expected to take place in January 1991, with Com-Tek issuing a further 5.4 million shares to acquire the remaining shares in Crescent.

Ellerton said he looks forward to Al Ramer, president of Crescent, who is a geologist, joining the company, noting that there were no other extra staff costs attached. He also looked forward to welcoming Ron Grooms, a director of Crescent, to the board of the merged company. Grooms is senior vice president, treasurer and chief financial officer of Financial Programs Inc. (a subsidiary of INVESCO MIM Plc) and INVESCO Trust Co.

Separately, Com-Tek reported for the quarter ended June 30, 1990, oil and gas sales reaching $104,147 for the three months compared to $76,831 in the corresponding period in 1989. The increases represented in part new sources of revenue from the Leavenworth, Kan., gas interests acquired in July 1989. Better results from the company's Canadian properties also contributed.

These results were achieved despite lower oil and gas prices during the quarter, with the average price approximately $16 per barrel of oil equivalent. Recent events and the substantial rise in worldwide energy prices means the company is optimistic that average prices for its oil and gas production are likely to be higher in the current quarter.

Fees from consulting and other sources totalled $101,986 giving a total revenue for the quarter of $207,068 ($78,669). Total revenues for the first nine months of the company's fiscal year were $448,077 ($223,939). Total expenses for the quarter were $150,945 ($190,606) giving a net income of $56,123 compared to a loss of $111,937 in the same quarter of the previous year.

SAN JOSE, CALIF. (AUG. 31) BUSINESS WIRE - KLA Instruments Corp. (NASDAQ/NMS:KLAC) announced Friday it has expanded its printed circuit board equipment unit (KLASIC) into a stand-alone division, consistent with the prior announcement of Patrick H. Lamey Jr. as KLASIC general manager.

Friday's expansion announcement comes partly as a result of significant product line additions and record new orders achieved by KLASIC during KLA's fourth fiscal quarter, ended June 30, 1990.

KLASIC's initial product, the KLA Series 3000 AOI (Automated Optical Inspection) System, was originally introduced in 1988, and has recently achieved superior competitive performance in a wide variety of difficult inspection tasks including complex outer layers.

During the past 18 months, KLA has positioned KLASIC for continued growth through significant product line additions such as the KLA CAM-3000 (Computer Aided Manufacturing), System, the KLA IRC (Inspection Repair Center), the KLA DataDrive (database inspection reference source), and the KLA Assistant Series (data analysis software).

Lamey, a corporate vice president and a six-year employee, was previously vice president of Corporate Strategic Marketing and has served in various key marketing and management positions at KLA. Lamey reports to Bob Anderson, KLA chairman.

The KLASIC Division was formed approximately three years ago to apply KLA's High Speed Image Processing technology to inspection and process control applications in production of complex printed circuit boards.

During October 1989, several units of the KLASIC division were consolidated with KLA's reticle and photomask division (RAPID), the oldest division of KLA, as a productivity and efficiency measure during a period of flat printed circuit board industry sales. KLASIC's restructuring into a full stand-alone division was effective July 1, 1990.

KLA Instruments Corp. is a leading innovator of industrial image automation systems.

ANAHEIM, CALIF. (AUG. 31) BUSINESS WIRE - Rockwell International Corp.'s Defense Electronics organization Friday announced a restructuring of its communications, avionics, and command and control business units to maximize their market and technical strengths.

The company's Collins Government Avionics Division (CGAD) and the communications and intelligence business segment of Collins Defense Communications (CDC) are being combined to form the Collins Avionics and Communications Division, which will be headquartered in Cedar Rapids, Iowa.

Concurrently, the command and control systems business segment of Collins Defense Communications in Richardson, Texas, is being combined with the Autonetics Command and Control Systems Center located in San Bernardino, Calif., to form the Command and Control Systems Division (CCSD). The new division will have headquarters in Richardson.

''The moves are a continuation of a process that began in March 1990 when the corporation formed Defense Electronics by combining its Autonetics businesses with one of its Collins defense businesses,'' said John A. McLuckey, Rockwell's Defense Electronics president.

''It has been our long-term plan to capitalize on the breadth of capabilities of our various business units, and realign these businesses by key core competencies to maintain our market leadership positions and penetrate new markets,'' added McLuckey.

''In June 1990, we restructured our Anaheim and Georgia businesses. With today's announcement, we are completing the process of realigning our business segments.''

The new Collins Avionics and Communications Division will be headed by Jack D. Cosgrove, president, and Robert P. Marovich, executive vice president. ''The combination of CGAD and CDC's communications and intelligence business will significantly enhance our competitive posture for the future,'' Cosgrove said.

''The complementary strengths in RF engineering and digital signal processing capabilities, combined with ever-increasing common markets and common customer focus, led to this very natural combination,'' he added.

Rockwell International is a $12 billion multi-industry company applying advanced technology to a wide range of products in its electronics, aerospace, automotive and graphics businesses.

RICHARDSON, TX (AUG. 31) BUSINESS WIRE - Rockwell International Corp.'s Defense Electronics organization Friday announced the formation of the new Richardson-based Command and Control Systems Division (CCSD) that will better position the company in the growing command and control market.

The new division was formed by merging the Richardson-based command and control systems business segment of Collins Defense Communications (CDC) with the San Bernardino, Calif.-based Command and Control Systems Center -- formerly part of Rockwell's Autonetics Strategic Systems Division.

CCSD will have headquarters in Richardson and will be headed by Ronald A. Kodimer, who is appointed vice president and general manager, and Edward J. Stephens, executive vice president. The division also has major facilities in San Bernardino and Shreveport, La.

Concurrent with this announcement, the company's Cedar Rapids, Iowa-based Collins Government Avionics Division is being combined with the communications and intelligence business segment of Collins Defense Communications to form the Collins Avionics and Communications Division (CACD).

CACD will have headquarters in Cedar Rapids and will be headed by Jack D. Cosgrove, president, and Robert P. Marovich, executive vice president.

Other Defense Electronics Divisions that continue to report to McLuckey are: Autonetics Strategic Systems Division headed by Dr. Thomas L. Gunckel, vice president and general manager; Autonetics Marine and Aircraft Systems Division headed by Kenneth F. McQuade, vice president and general manager; and the Tactical Systems Division headed by Paul B. Smith vice president and general manager.

Rockwell International is a $12 billion multi-industry company applying advanced technology to a wide range of products in its electronics, aerospace, automotive and graphics businesses.

#90243b0073 08/31/1990 ~Business Wire
REDMOND, WA (AUG. 30) BUSINESS WIRE - Nintendo of America Inc. has launched its newly formed relationship with Foote, Cone & Belding (FCB)/San Francisco with three television commercials which showcase

Nintendo's creative philosophy: having fun through game play transcends all ages.

By incorporating real-life scenarios in all three commercials, Nintendo demonstrates how its Game Boy portable video game system can play a role in the lifestyles of two disparate age groups: kids and teens, ages 6-17; and adult males, ages 18-49.

According to Vice President of Marketing Peter Main, Nintendo faced the challenge of educating adult players that Game Boy isn't just for kids, while continuing to fuel the enthusiasm that younger players already have for the portable video game system. ''A growing number of Game Boy players -- more than 40 percent -- are adults, in great part because they understand that it is not only enjoyable, but acceptable to play. Our new adult Game Boy spot plays on real-life reactions to the game play experience by demonstrating that it's okay to have fun,'' he explained.

The commercial, ''Never Get Old,'' which premieres Sept. 3, portrays three adult males playing Game Boy in work environments. Their reactions are communicated visually, not verbally, a departure for Nintendo, and are heightened by music which emphasizes the substantive nature of Game Boy to the potential adult player.

The commercial will be seen nationally on the Fox Network during prime time, as well as in 10 major spot markets during prime time, late fringe and sports programming. FCB used a ''kids-talking-to-kids'' approach to reach more of Game Boy's youthful core target audience. According to FCB Group Creative Director Tim Price, the campaign is both novel and powerful because of its simplicity.

Young players express in their own jargon how they feel about the Game Boy hardware system as well as the new Game Boy game title, ''Qix.'' ''It doesn't matter if adults know what 'slammin' or 'Nintendo-word' means, it just matters that the kids understand and relate,'' Price explained.

In fact, in many scenes from the commercial, ''Let the Games Begin,'' the child actors were not aware that the camera was rolling. Price noted that this documentary style of shooting helped capture honest moments and communicate the appeal of a product which has already made it into the homes of more than 3.5 million players since its introduction last July.

Based in Redmond, Nintendo of America Inc. sells personal, home and arcade video games in the United States. The company is the headquarters for marketing operations in North America and is the subsidiary of the world's largest manufacturer and marketer of video games, Nintendo Co. Ltd.

DENVER (AUG. 31) BUSINESS WIRE - The outstanding shares for Pierce International Inc., have been reduced by 35 million shares, a 25 percent reduction, in an agreement in which R. Clark Underwood resigned as an officer and director of Pierce International and its various subsidiaries in exchange for ownership of Underwood Financial Management Inc.

Underwood has undertaken all the liabilities both past and future for Underwood financial.

Underwood Financial was doing business under Pierce Financial Services which will now incorporate and continue to offer financial services to individuals and businesses. Underwood has also surrendered all his rights to the company's warrants and his equity interest in Pierce International Gold Inc., (800,000 shares). He retains 2.5 million shares of Pierce International. These shares are restricted from trading for at least 2 years.

In addition to acquiring ownership of Underwood Financial, Underwood was assigned a 20 percent override on royalties of the company's Silver Eagle investment, which in exchange for the assignment, Underwood will manage the investment.

Underwood resigned his posts as of April 1, but the terms of his termination were not finanized until Aug. 20.

Management feels very positive about the agreement because of the high overhead associated with operating Underwood Financial. Although Underwood Financial generated revenue, expenses far exceeded any benefit derived by the company. PI will continue to operate a financial service division in a more efficient manner; relying heavily on existing staff.

In addition the consulting contract with Richard C. Underwood has been terminated and he has decided to continue his rail car leasing business on his own. The association with Richard C. Underwood was very profitable to both him and the company and Pierce International thanks him for his efforts.

The company believes that with these reductions in equity interest that other shareholders will benefit. In addition, the reduction should be helpful when PIGI and PI apply for listing on an exchange. This applicaiton will be made after produciton has begun on the APAN joint venture property (gold and gravel).

MOUNTAIN VIEW, CA (AUG. 31) BUSINESS WIRE - Worldwide shipments of semiconductor production equipment grew 2 percent in the second quarter of this year, according to Semiconductor Equipment and Materials International.

The SEMI Market Statistics Program reported that second quarter equipment shipments were $2.04 billion, compared to $2.01 billion in the first quarter. Assembly and test equipment recorded the biggest increase, up 6 percent to $620 million. Front and equipment shipments were $1.4 billion, unchanged from the first quarter.

Shipments to North America jumped 4 percent to $780 million during the quarter, compared to $750 million in the previous three months. North American backlog continued to build as new orders exceeded shipments, resulting in a 1.1 book/bill ratio (net orders/shipments).

Second quarter shipments to Japan were $870 million, down 3 percent from $900 million.

Shipments to Europe and the rest of the world were up 8 percent to $390 million, compared with $360 million in the first quarter.

SEMI is an international trade association based in Mountain View, with offices in Brussels, London, Seoul, Tokyo and Washington.

DENVER (AUG. 31) BUSINESS WIRE - Chemex Pharmaceuticals Inc. has been informed by the NASD that effective immediately its common stock and warrants for the purchase of common stock will continue to be included for quotation in the National Association of Securities Dealer's Automated Quotations System (NASDAQ) via an exception from the capital and surplus requirements.

While Chemex Pharmaceuticals Inc. failed to meet this requirement as of June 30, 1990, the NASD, after an Aug. 28, 1990, hearing on the matter, has granted a temporary exception from this standard subject to Chemex Pharmaceuticals Inc. meeting certain conditions. While the company believes that it can meet these conditions, there can be no assurance that

it will do so.

If at some future date the company's securities should cease to be quoted on the NASDAQ System, they should continue to be quoted in the over-the-counter market.

For the duration of the exception, the company's NASDAQ symbols will be CHMXC for its common stock (previous symbol - CHMX), CHMMC for its Series 1989-1 warrants (previous symbol - CHMXM) and CHMLC for its 1994-2 warrants (previous symbol CHMXL).

TORONTO (AUG. 31) BUSINESS WIRE - Delrina Corp. (To:DC) Friday announced that its wholly owned Delrina Technology Inc. subsidiary has begun shipment of its PerFORM PRO Designer & Filler program.

PRO is the most advanced forms processing product available anywhere, designed from the ground up to take full advantage of the power Microsoft's new Windows interface delivers.

''This event marks two years to the day since Delrina first introduced its award-winning PerFORM 1.0 product under GEM,'' said Bert Amato, Delrina's Executive Vice-President. Three new versions of PerFORM have been released since that time and nearly 80,000 units have been shipped. ''We expect PerFORM PRO to fast become our flagship product.''

''Reaction from the Windows community and initial feedback from our beta testers suggest that PerFORM PRO will quickly become a mainstream application under Windows,'' said Mark Skapinker, Delrina's president. ''A tremendous effort has gone into ensuring its compatibility with Windows 3.0 and other Windows applications. Any serious Windows user will be very comfortable with PRO.''

''Every Windows user who fills in forms should be using PRO, and I don't know of any Windows user who doesn't fill in forms,'' said Dennis Bennie, Delrina's chief executive officer.

According to Microsoft sources, there are more than 30 million MS-DOS users who can quickly and easily add Windows 3.0 to their machines. Microsoft expects to sell nearly five million copies of Windows in the next 12 months.

PerFORM PRO Designer & Filler has been positioned as a high end product

and is recommended to corporate and government users. The program includes unique font definition and ''on the fly'' generation software licensed from Agfa Corp. of Wilmington, Mass., and private key encryption for signature locking licensed from RSA Data Security of Redwood City, Calif.

Three special HP printer drivers are included to ensure fast form printing using HP Laserjet printers.

PerFORM Filler and electronic forms created with PerFORM Designer can be shared and filled in by multiple users on local area networks. Users are able to write forms directly to dBASE formats and search on forms stored in the same format. Filler also includes an innovative fast mode feature allowing speedy form filling.

PerFORM PRO Designer & Filler is available immediately at the suggested list price of $495 (US), $595 (Cdn). All current PerFORM users are able to upgrade to PRO at a special reduced price.

The Windows 3.0 graphical environment has become a significant part of Delrina's product development strategy. The company has recently introduced two other Windows-based technologies. The list includes a range of innovative PC fax board drivers and applications, and a breakthrough form-trace product to automate the creation of PerFORM forms, using pattern recognition techniques.

Based in Toronto, Delrina Corp. develops, publishes and markets business, information and system management software products and services for the IBM PC, PS/2, IBM compatible and Hewlett-Packard computer markets.

COLUMBUS, OH (AUG. 31) BUSINESS WIRE - On Aug. 30, First AmeriCable Corp. and its wholly-owned subsidiaries completed the sale of substantially all of their assets to TCI Holdings Inc. for a final purchase price of approximately $40 million.

The terms of the sale included placing approximately $1.6 million into escrow for as long as 18 months to provide for certain post-closing obligations and to provide a fund for any breaches of contractual representations and warranties.

As explained in the proxy statement dated April 4, 1990, after payment of all outstanding liabilities and provision for federal and state taxes, the

company intends to distribute an amount equal to at least 15 cents per common share to all shareholders of record of the company as of the close of business on Sept. 11, after which date the books and records of the company will be closed and no further transfers of the stock will be recorded.

Distribution of the 15 cents per share amount will be in the form of a dividend check and will occur approximately Sept. 17. Payment of the balance of the sales proceeds in an amount up to 3 cents per share which are attributable to the net amount held in escrow will occur in approximately March, 1992.

The company will communicate with you at that time. The company will not require the shareholders to tender their stock certificates to the company prior to receiving their distribution.

SALT LAKE CITY (AUG. 31) BUSINESS WIRE - Prime Resources Corp. (NASDAQ:PLDS) Friday reported record earnings and revenues for the second quarter and six months of 1990.

For the quarter just ended, net income reached $137,425 or 3 cents per share on record revenues of $3.3 million compared to a net loss of $130,150 or 3 cents per share on revenues of $2.9 million for the same period a year ago. This represents a significant increase in net income and a 16 percent rise in revenues.

For the six-month period, net income reached $347,333 or 7 cents per share on record revenues of $6.8 million compared to a net loss of $211,560 or 5 cents per share on revenues of $5.6 million last year. This represents a significant increase in net income and a 20 percent rise in revenues.

Income from operations also reached an all-time high for the second quarter and six months of $196,581 and $440,979 respectively.

''We are pleased with the company's continuing growth and profitability,'' said Brad Brower, chairman of Prime Resources. ''Most of this growth stems from increased market penetration and the recent completion of a $300,000 switching facility in Salt Lake City. 1990 is shaping up to be a record year for Prime Resources.''

Prime Resources Corp., with its wholly owned subsidiary Prime Long Distance Service, is involved in the long-distance telecommunications

business, offering its 14,500 predominantly commercial customers international calling, coupled with data and fax transmission through its satellite and fiber optics network.

#90243b0108 08/31/1990 ~Business Wire

PROVO, UT (AUG. 31) BUSINESS WIRE - Larson Davis Inc. (NASDAQ:LDII) Friday released selected financial information related to the company's year-end results as of June 30.

Brian G. Larson, president, stated ''We are encouraged by recent trends and especially the last year's performance. Revenues increased by 29 percent and pre-tax income was up over 400 percent.''

Larson also pointed out that the mix of domestic and foreign sales in the Instrumentation Systems Group gives the company added flexibility. ''Our increased foreign sales provide us with a stable market in this uncertain economy. All sectors of our targeted industry have been increasing and we anticipate this to continue. In the event of adverse economic news we are poised to react quickly to either the foreign or domestic markets and maximize our ability for sustained growth and profitability.''

A portion of the Information Systems Group was reorganized during the past year. The manufacturing and marketing functions of Advantage Software Inc., a wholly-owned subsidiary, were transferred to a third party. The contract specified compensation through a cash purchase price and a royalty stream. The net effect will be reduced cost to the company and increase profitability.

Larson observed, ''If the change had been made in the Information Systems Group at the beginning of the fiscal year, revenues would still have increased 28 percent and cost savings would have almost doubled pre-tax income. Net revenues of $5,421,000 would have been $5,373,000 and pre-tax income would have increased from $255,000 to $488,000.''

The information presented is management's representation and subject to audit adjustments. It is suggested that this selected financial data be read in conjunction with the financial statements and notes included with quarterly reports and the company's audited financial statements dated June 30, 1990.

#90243b0122 08/31/1990 ~Business Wire

CHARLESTON, SC (AUG. 31) BUSINESS WIRE - Home Federal Savings Bank and Cooper River Federal Savings Bank of North Charleston (NASDAQ:HFSB) Friday jointly announced the signing of a non-binding letter of intent to merge their organizations, creating the second largest financial institution based in Charleston County, S.C.

The combined companies will have assets of approximately $430 million. The merger of Cooper River and Home Federal will create a 10-branch network serving the tri-county area from Moncks Corner and Summerville to the peninsula of Charleston, West Ashley and Mt. Pleasant.

Deposits of the merged companies will exceed $350 million, which is approximately 10 percent of total deposits in the Trident area. The combined capital base of the merged institutions is expected to exceed all regulatory requirements for net worth.

Commenting on the proposed merger, John M. Settle, chairman of Home Federal, said, ''We are looking forward to joining forces with one of the oldest and most respected financial institutions in the Trident area. Our organizations have complementary operations with little overlap of

branches, personnel and data processing.

This will allow us to merge our collective strengths into a new organization that will result in better customer service and enhanced product offerings. We expect stockholders to benefit from an increase in equity and increased float in the stock.''

''Cooper River and Home Federal are both committed to serving the tri-county area,'' noted George R. Rogers, President of Cooper River Federal. ''The proposed merger with Home Federal will allow us to enlarge our market area while retaining our existing staff and branch network. Since Cooper River is currently a mutual association, the proposed merger will allow our depositors to become stockholders of the merged institution and participate in our future growth.''

The proposed merger is subject to regulatory approvals, the signing of a definitive agreement, and the approval of Home Federal's stockholders and Cooper River Federal's members. The process is expected to take from six to ten months to complete.

ARLINGTON, VA (AUG. 31) BUSINESS WIRE - Oracle Complex Systems Corp. (OCSC), the systems integration subsidiary of Oracle Corp., announced that it has been awarded a prime contract worth approximately $4 million by the Society of Manufacturing Engineers (SME) to provide a sophisticated database system to support the association's information and administrative requirements for financial, membership, and exposition management.

Through its education, publications, conferences and exhibitions, SME serves the professional needs of more than 80,000 practitioners worldwide that make up the manufacturing community.

Under terms of the five-year contract, OCSC will provide state-of-the-art hardware, software, network, training and maintenance to replace the association's entire MIS with a new Integrated Information System (IIS).

The Oracle-based system includes a full function database management system with the latest technology - single point of data capture, high-level security, data integrity and a common repository of data which can be shared by users.

Application systems in the IIS will function as building blocks for SME to

grow and control its environment through the use of personal workstations, ad hoc query capabilities and report generation.

"After a thorough evaluation which included extensive live performance testing, we selected OCSC as our systems integrator," said SME selection committee chairman and SME president-elect Jim Barcus. "OCSC's project management experience, along with its strong technical solution tailored to our needs, will provide SME with the flexibility and expandability to serve our membership.

The new IIS wil be more than just an information system/administrative infrastructure project for SME; it will be the memory bank and nerve center of our organization - and the principal delivery vehicle for timely and responsive service for our members."

The IIS will include: application software, written entirely in Oracle's fourth generation language SQL Forms, from Orange Systems, a leader in association management business systems; a full range of database tools and office automation products and relational database from Oracle; and from Sun Microsystems high performance LAN based servers on an integrated Ethernet with fiber optic bridges linking SME's three facilities.

WASHINGTON (AUG. 31) BUSINESS WIRE - To kick off the Labor Day weekend, U.S. Sprint is offering its first long distance Labor Day sale. From 5 p.m. to 11 p.m. Friday night, U.S. Sprint customers, and subscribers to other long distance companies as well, can make interstate calls anywhere in the United States at a special low rate of ten cents per minute.

"With gas prices on the rise and world events as they are, Americans may not be traveling as much this weekend as they usually do on Labor Day. This discounted rate, on top of our already reduced evening rates, provides a special opportunity to talk to friends and family this Labor Day weekend," said Jorge Rodriguez, vice president of marketing and advertising for U.S. Sprint.

U.S. Sprint's special rate is available for all of its basic one-plus dialing customers and U.S. Sprint's discount calling plan, Sprint Plus. Casual callers, or non-U.S. Sprint customers, can also receive the special discounted rates by dialing 10333 + 1 to access the U.S. Sprint network. Callers then can simply dial the area code and number.

"You don't have to be a Sprint customer to enjoy the benefits of discounted

rates on the holiday," Rodriguez said. "We invite all long distance consumers to try Sprint's fiber-optic network and enjoy this special sale." U.S. Sprint customers will receive U.S. Sprint's traditional weekend rates throughout the weekend and holiday rates on Labor Day.

U.S. Sprint is a unit of United Telecommunications Inc., a diversified international telecommunications company based in Westwood, Kan.

#90243b0143 08/31/1990 ~Business Wire

BASEL, SWITZERLAND (AUG. 31) BUSINESS WIRE - Roche Holding Ltd. and Genentech Inc. jointly announced that they will complete their pending merger transaction on or about Sept. 7, after both companies entered into a consent decree earlier Friday with the Federal Trade Commission.

The provisions of the consent decree, formally known as an agreement containing consent order, will require that Genentech divest its interest in a partnership formed to develop a recombinant process to produce ascorbic acid and that Roche divest its technology with respect to human growth hormone releasing factor.

The decree also requires Roche to grant non-exclusive licenses under its U.S. patent rights with respect to Roche's CD4. Genentech stockholders of record on the date that the merger becomes effective will receive, for each two shares they own, $36 in cash and one share of a new redeemable commn stock. The redeemable common stock has been approved for listing on the New York Stock Exchange.

During the next five years, Roche has the right to redeem the outstanding 43 million shares, or 40 percent, at escalating prices ranging from $38 per share for the remainder of this year to $60 per share in 1995.

Unless redeemed, the remaining shares will be traded on the New York Stock Exchange (NYSE: GNE). Roche has a right to purchase additional shares on the open market at any time to raise its equity holding to up to 75 percent.

Roche has designated two of its executives, Dr. Armin M. Kessler, Roche chief operating officer and a member of the Roche board of directors and Professor Jurgen Drews, head of corporate research and member of Roche's Executive Committee, to take seats on the Genentech board of directors.

The agreement was first announced on Feb. 2 and was subsequently approved

on June 8 by 97 percent of the Genentech stockholders who voted on the transaction. The companies entered into the consent decree in order to resolve concerns over competition that the FTC said it had regarding the transaction.

As required by law, the terms of the consent decree will appear in the U.S. Federal Register and be subject to public comment for 60 days, after which the FTC commissioners will decide whether to make it final. The public comment period does not prevent the companies from completing the transaction, which they plan to do on or about Sept. 7.

One of the provisions of the agreement between the two companies is that either company may withdraw from it if the transaction is not completed by Sept. 1. Roche and Genentech each have agreed not to exercise its termination right prior to Sept. 15.

INDIANAPOLIS (AUG. 31) BUSINESS WIRE - Anton H. ''Tony'' George was elected today to the board of directors of both Indiana Energy Inc., parent company of Indiana Gas Co. Inc., and Indiana Gas Co.

George, president of the Indianapolis Motor Speedway, was elected to fill new seats created as a part of Indiana Energy's recent acquisition of Terre Haute Gas Corp. and Richmond Gas Corp.

The Hulman-family interests, including George, who is the grandson of Tony Hulman, are substantial shareholders of Indiana Energy as the result of the recent acquisitions. The Hulmans have also been long-time shareholders of Indiana Gas and Indiana Energy.

The 30 year-old George has a bachelor of science degree in business administration from Indiana State University. He serves on the board of directors of Terre Haute First National Bank, Indiana State University Foundation, the United States Auto Club, the Indianapolis Motor Speedway and Hulman and Co.

WASHINGTON (AUG. 31) BUSINESS WIRE - The U.S. Department of Justice Friday announced that Martin Marietta Corp. has paid an additional $2,565,377 to settle allegations that one of the company's subsidiaries overcharged the government for the costs of computer facilities.

The company has already paid $898,000 to settle a portion of this case.

The subsidiary, Martin Marietta Electronics and Missiles Group (MMEMG), Orlando, Fla., disclosed in Sept. 1986 that it had overcharged the government for the use of computer facilities at MMEMG's Technical Computation Center.

''We encourage all government contractors to come forward with any information regarding billing irregularities as soon as it is discovered '' said Stuart M. Gerson, assistant attorney general in the Civil Division.

An investigation by the Defense Criminal Investigative Service (DCIS) determined that by providing inflated cost data, MMEMG received more money than it was entitled to had the true costs been revealed.

As a result of the company's cooperation, the False Claims Act allows for the reduction of civil damages from three to two times the government's loss in cases where the company reports the problem and cooperates during the investigation.

KANSAS CITY, MO (AUG. 31) BUSINESS WIRE - SAZTEC International of Kansas City, a world leader in information technology, announced Friday the results for the fiscal year 1990.

For the 12 months ended June 30, 1990, SAZTEC reports revenue of $16,289,308 which was a decrease in revenue from $19,030,090 for the year ended June 30, 1989. The net loss was $598,518, which compares to income of $1,028,045 for the previous year. Earnings per share decreased to a 17 cents loss vs. income of 30 cents for the same period last year.

The primary factors contributing to the year-end downturn in profitability include a loss on a 1986 investment in a leveraged lease of $414,400, resulting in a loss from continuing operations of $336,200; and a loss from the company's discontinued hardware division of $262,400.

Other factors associated with the year-end downturn include a delay in

revenue from telephone utility contracts and a continued investment in the Information Conversion Express (ICE) network.

''Last year was a transitional year for SAZTEC International. The company discontinued its hardware division and focused on product development and expansion through acquisition. SAZTEC is starting fiscal 1991 with a clean state.

''We are already seeing a significant increase in revenue, primarily from the telephone industry, in the first quarter of fiscal year 1991,'' said Thomas L. Reed, chairman and chief executive officer of SAZTEC.

''When a company is in a growth stage such as SAZTEC is in, quarter-to-quarter volatility is expected. Though SAZTEC experienced short term losses in both the third and fourth quarters of FY 1990, the company will see long-term gains in profitability resulting from the actions taken this past fiscal year,'' said Reed.

SAZTEC, an international leader in the use of computer technology, provides comprehensive services to convert information for use on computer systems.

SAN FRANCISCO (AUG. 31) BUSINESS WIRE - The U.S. Department of Justice Friday announced that a federal grand jury in the Northern District of California has returned a five-count indictment against Harris Corp.'s Digital Telephone Systems Division (DTS) and two of its officers for their role in a scheme to bribe officials.

The indictment charges Harris Corp.; John D. Iacobucci of Novato, Calif., DTS vice president and general manager; and Ronald L. Schultz of Novato, Calif., DTS director of human relations, with one count of conspiring to violate the antibribery and accounting provisions of the Foreign Corrupt Practices Act (FCPA); three counts of violating the antibribery provisions of the FCPA; and one count of violating the accounting provisions of the FCPA.

Theodore S. Greenberg, deputy chief of the Fraud Section of the Criminal Division, said, ''The department continues to view violations of the Foreign Corrupt Practices Act as serious matters and will pursue them accordingly.''

Harris Corp. is ranked 57th among Department of Defense contractors in

terms of total dollar volume of contracts awarded. The DTS Division manufactures telephone switching systems.

The indictment charges that from January through June 1989, Iacobucci retained New York consultant, Robert D. O'Hara, who represented that he had connections with officials of the Colombian government.

Iacobucci agreed to pay money through O'Hara and a local company, to a member of the Camara de Representantes, the national legislature of Colombia, in return for the members' influence in obtaining government telecommunications contracts for Harris Corp.

In addition, Iacobucci and Schultz paid O'Hara $22,835, a portion of which was to be used to pay other officials of the Colombian government in return for their influence in obtaining contracts.

The indictment further charges that Iacobucci and Schultz prepared and directed the preparation of false invoices, check request forms, and other internal documents so that Harris Corp.'s accounts would not accurately reflect the fact that a portion of the money paid to O'Hara was to be used to bribe various Colombian government officials.

If convicted on all charges, Harris Corp. faces a maximum fine of $9 million. Iacobucci and Schultz each face a maximum period of 30 years imprisonment and fines of $1.55 million.

The matter is being handled by Judith B. Wish and Scott W. MacKay of the Fraud Section's Defense Procurement Fraud Unit and the Federal Bureau of Investigation.

LOS ANGELES (AUG. 31) BUSINESS WIRE - Medco Research Inc. (the Company)(NASDAQ/BoSE:MEDR/MRE.B) announced Friday that the company and William C. Govier, M.D., Ph.D., the Company's former director of research and medical affairs, have been named as defendants in a lawsuit recently filed by a former shareholder of the company.

Also named as defendants in this lawsuit are: Manfred Mosk, Ph.D., and Sanford J. Hillsberg, Esq., who are officers and directors of the Company.

The lawsuit alleges that sales of the company's securities by Dr. Govier in March 1990 violated the federal securities laws in that Dr. Govier allegedly possessed at the time of his sales certain materially adverse information not disclosed to the public concerning the status of the

potential sale of the Company and that Dr. Govier failed to disclose his sales at that time.

The lawsuit also alleges that the Company and the individual defendants violated the federal securities laws by not disclosing certain information in the company's April 9, 1990, press release and Form 10-Q for the period ended Feb. 28, 1990, concerning the potential sale of the company that caused those reports to be materially misleading.

The plaintiff is seeking to maintain his lawsuit as a class action and is asking for unspecified monetary damages from the defendants.

The company and its officers and directors named as defendants in the lawsuit believe that they have not engaged in any wrongdoing and intend to vigorously defend themselves in connection with this matter.

SCOTTS VALLEY, Calif. (AUG. 31) BUSINESS WIRE - Borland International Inc. (NASDAQ:BORL) Friday announced that the action it had filed in San Francisco Federal Court against Lotus Development Corp. was dismissed, thereby allowing the Boston Federal Court to decide where the case between the parties should be decided.

In late June and early July, Borland and Lotus filed lawsuits in San Francisco and Boston both seeking to determine whether Quattro and Quattro Pro spreadsheet software products infringe any Lotus copyrights.

''This decision does not address copyright infringement, but merely where the case may be heard,'' said Dick O'Donnell, director of corporate communications. ''Quattro and Quattro Pro are original programs and do not infringe on Lotus 1-2-3 and we will contine to seek court confirmation to that effect.''

Borland International Inc. is a leading developer of high-performance software products. Borland offers some of the most widely used software products including Paradox, Quattro Pro, Sidekick, Turbo Pascal, Turbo C, Turbo C+ and Turbo Debugger & Tools.

MILPITAS, CALIF. (AUG. 31) BUSINESS WIRE - Quantum Corp. (NASDAQ:QNTM), a leading supplier of high-performance hard disk drives for personal computers and workstations, has announced the appointment of two new vice presidents: Michael A. Brown, vice president of marketing, and Ken Lee, vice president of engineering.

Brown, 31, is responsible for directing all marketing activities for the company's OEM (original equipment manufacturer) business. Since joining Quantum in 1984, he has served in a variety of marketing positions including product marketing manager and director of product marketing, and was instrumental in developing the company's business plans for its entry in the 3-1/2-inch hard drive market.

Brown previously served two years as a research associate at Braxton

Associates, a strategic planning consulting firm. He holds a degree in economics from Harvard University and a master's of business administration from Stanford.

Brown fills a vacancy created by the appointment of Mark D. Wilson to the newly created position of vice president of portable storage products business.

Wilson, who joined the company as vice president of marketing in 1988, now has overall responsibility for development and marketing of disk drive products designed for the laptop, notebook, portable, and low-end desktop computer markets.

Since its founding in 1980, Quantum has emerged as a leading independent manufacturer of reliable, high-performance, mass storage systems for business, engineering, and scientific computing. The publicly held company is recognized for setting new standards of performance, quality and reliability in disk drives destined for demanding desktop workstation and PC applications.

Quantum markets its drives to OEMs and distributors worldwide. Plus Development Corp., a Quantum subsidiary established in 1983, designs and markets personal computer storage enhancement products for end users which are marketed through 2,500 dealers worldwide.

NASHVILLE, TN (AUG. 31) BUSINESS WIRE - Fidelity Bancshares Inc. (NASDAQ/NMS:FFTN) Thursday announced that its board of directors has approved an additional stock repurchase program to acquire up to 200,000 shares of the corporation's common stock, which represents approximately 6% of the current outstanding common shares.

The corporation has completed its previously announced plan of July 18, 1990, to acquire up to 5 percent of the outstanding common shares. The timing of the purchases and the exact number of shares to be repurchased will be dependent on future market conditions.

Stanley D. Overton, chairman of the board, president, and chief executive officer of the corporation, stated, ''The board of directors continues to believe that the current price of the company's common stock does not reflect the true value of the company.

''This decision to, again, repurchase outstanding common shares is based

on the fact that the stock is currently selling for less than 50 percent of our tangible book value per share. Fidelity Bancshares has a ratio of stockholders' equity to assets of 10.9 percent, and our earnings have continued to be strong.

''Therefore, the Board of Directors believes that repurchasing our own stock is an extremely attractive investment that will enhance the value of the remaining outstanding shares.''

Fidelity Bancshares Inc. is the parent company of Fidelity Federal Bank, FSB, and its common stock is traded on the NASDAQ National Market System under the symbol FFTN.

WESTFORD, MA (AUG. 31) BUSINESS WIRE - Concurrent Computer Corporation and Pentek, Inc. today announced the availability of the Pentek System 4080 Digital Signal Co-Processor on Concurrent's 5000 and 6000 real-time UNIX systems. The Pentek co-processor will be sold through Pentek's sales organization.

Pentek's System 4080 Digital Signal Co-Processor will be used in conjunction with Concurrent's Laboratory Workbench (LWB) software product. The combination of these products provides greater continuous input sampling above the normal LWB throughput rate. This is accomplished by offloading some of the processing tasks to Pentek's dedicated processor, thereby increasing system throughput rates. The user will also be able to link programs written in either C or FORTRAN programming languages via a user-function graphical icon.

''Concurrent is pleased to have Pentek join our third party vendor program. When integrated with our LWB software product, the Pentek co-processor allows for a user-friendly and highly productive workstation '' said Pam LaBove, third party marketing manager at Concurrent Computer Corporation.

Pentek manufactures a complete line of high-performance digital signal processing and data acquisition products for VMEbus in Multibus I and II computer environments.

Concurrent Computer Corporation is the leading supplier of high-performance, real-time computer systems worldwide. The company's products, marketed through the Commerical Products, Simulation/Training and Real-Time Technical Systems Groups, provide real-time solutions to the commerical, communications, public sector, technical, aerospace and simulation markets. Its common stock (CCUR) is traded on the NASDAQ National Market System.

LOS ANGELES (AUG. 31) BUSINESS WIRE - Utilitech Inc. (NASDAQ: UTLLE, UTLLWE) common stock will continue to be included for quotation in the National Association of Securities Dealer's Automated Quotation System (NASDAQ) via an exception from the filing requirement.

While Utilitech failed to meet this requirement as of July 16, 1990, the NASD has granted a temporary exception from this standard, subject to Utilitech meeting certain conditions. While the company believes that it can meet these conditions, there can be no assurance that it will do so.

For the duration of the exception, the company's NASDAQ Symbol will be UTLLE. If at some future date the company's securities should cease to be quoted on the NASDAQ System, they should continue to be quoted in the over-the-counter market.

Nathan Hevrony, Utilitech chairman and chief executive officer said the delays in filing the company's year-end and first quarter financials are the result of the integration into the company of two major acquisitions, Yorkville Industries Inc. in December 1989 and Decora Manufacturing in April 1990, as well as the discontinuation of certain other operations.

The above steps add substantially to the company's asset base and are expected to raise revenues from an estimated $8 million for the fiscal-year ended March 31, 1990 to more than $60 million in the current fiscal year and to result in a significant profit in the current year, the first profit in the company's history.

The company, therefore, does not anticipate any problem with meeting NASDAQ maintenance requirements, once its 10K and 10Q have been filed.

#90243b0654 08/31/1990 ~Business Wire

PARAMUS, N.J. (AUG. 31) BUSINESS WIRE - TSS Ltd. (NASDAQ: TSSL), a development stage company, Friday reported results for the fourth quarter and fiscal year ended May 31.

The company also announced the signing of a letter of intent with an investment banking firm to obtain additional financing.

Revenues for the fourth quarter and fiscal year ended May 31, 1990 were $229,518 and $469,405, respectively, compared to $48,296 and $68,574, respectively, for the fourth quarter ended May 31, 1989 and the period from May 31, 1988 to May 31, 1989.

The increases in revenues for the fiscal 1990 periods over the year ago periods were due primarily to coupon distribution revenue from the company's The Savings Spot in-store promotional program, which commenced commercial operations in late May 1989, and $154,677 of interest income derived from investment of the net proceeds from the company's initial public offering commenced in November 1989.

The company posted net losses for the fourth quarter and fiscal year ended May, 1990 of $1,570,874, (or 18 cents per share) and $4,985,429 (or 77 cents per share), respectively, compared to $767,988 (or 19 cents per share) and $2,110,501 (or 52 cents per share), respectively, for the fourth quarter ended May 31, 1989, and the period from May 31, 1988 to May 31, 1989, based upon the weighted average number of shares outstanding for each period.

The increased losses in the fiscal 1990 periods, compared to the year ago periods, reflected substantial increases in costs due to expanded operations which were not offset by corresponding increases in revenues.

TSS Ltd. is a publicly traded company. Its common shares, warrants and units are listed on NASDAQ under the symbols TSSL, TSSLW and TSSLU, respectively.

Extraordinary loss on settlement of escrow		(90,822)		(90,822)

Net income	$ 513,041	$ 309,140	$ 1,357,986	$ 1,031,182
Per share: Income before extraordinary item	$ .046	$ .038	$ .123	$ .103
Extraordinary loss		(.008)		(.008)
Net income	$ .046	$ .030	$ .123	$ .095

Sales for the fourth quarter were the highest in the company's history, surpassing the $4 million level. Expansion of the company's product line, growth in the direct-mail area, along with private label sales from the company's manufacturing operations contributed to this growth.

Operating income was also the highest in the company's history, representing a 56.2 percent increase over the comparable period of 1989. Maintenance of gross margins, along with continual review of controllable expenses were the major factors contributing to these results.

Income before extraordinary item reached record levels surpassing the comparable period of 1989 by 28 percent. The increase in income before extraordinary item is less than the increase for operating income due to a continued decline in funds available for investment.

Available funds have declined in 1990 primarily due to the recent acquisition and financing of manufacturing operations and purchases of the company's treasury shares.

Consolidated sales exceeded the $14 million level in fiscal 1990 and represented another record amount for the company. This sales growth, as noted above, is related to expansion of the company's product line, growth in the direct mail area and the acquisition of manufacturing operations.

Fiscal 1990 operating income increased 50.2 percent over the prior year and reached record levels. Income before extraordinary item for fiscal 1990 reached its second highest level in the company's history and represented a 21 percent increase over fiscal 1989. Sales increases, as discussed above, and cost containment measures were responsible for the strong growth in earnings.

NEW YORK (AUG. 31) BUSINESS WIRE - Shorewood Packaging Corp. (NASDAQ:SHOR)

Friday announced that it has entered into an agreement to acquire substantially all of the operating assets of Toronto Carton Ltd. for an undisclosed amount of cash.

Toronto Carton Ltd. is a major manufacturer of folding cartons used in both the Canadian and United States markets.

It's contemplated that this transaction will be consumated on or about Oct. 1.

''We look forward to the addition of Toronto Carton Limited to the Shorewood group of companies,'' stated Paul B. Shore, chairman of the board, president and chief executive officer. ''This acquisition will add a new dimension for Shorewood both in Canadian and United States markets and will increase our capabilities to expand our operations in the general consumer packaging area.''

Shorewood Packaging Corp. and its subsidiaries print and manufacture high quality paperboard packaging for such industries as music, home video, food, tobacco, film, cosmetics and toiletries.

The company is based in New York City, with key operations in Farmingdale, New York; LaGrange, Georgia; Andalusia, Alabama; Virginia, Canada and England.

#90243b0713 08/31/1990 ~Business Wire

GUERNSEY, Channel Islands (AUG. 31) BUSINESS WIRE - Insituform Group Limited (''IGL'') 1/8NASDAQ National Market: IGLSF (shares) and IGLWF (warrants)3/8 Friday announced results for the three and six months ended June 30, 1990. In Pounds Sterling Under U.K. GAAP

The following results are given in Pounds Sterling under U.K. GAAP. The corresponding results expressed in U.S. Dollars under U.S. GAAP are shown in the accompanying tables. The translation is solely for convenience and should not be construed as a representation that the Pounds Sterling amounts actually represent or could be converted into U.S. Dollars at the rate indicated.

Total revenues for the second quarter ended June 30, 1990 were 6,120,257 pounds ($11,095,784), up 36% from 4,492,139 pounds ($6,656,868) in the second quarter of 1989. However, operating profit before income taxes, other income, and exceptional items was 41,923 pounds down from 112,302 pounds in the corresponding quarter in 1989. The decline is due to currency exchange variances as Sterling has strengthened especially against the Dollar, a weak quarter in the United Kingdom, lower margins in IGL Canada Ltd., and the consolidation of the operations of Action Products Marketing (Permaform).

In U.S. GAAP Dollar terms, operating profit was $174,684, up from $54,913 in 1989. The difference between the Dollar and Sterling results is due to translation in a period of overall weakening in other foreign currencies against the Pound as compared to second quarter 1989, a period of overall strengthening in other foreign currencies versus the Pound.

For the second quarter, the Company reported a net loss of 137,110 pounds ($150,027) against a profit of 129,615 pounds ($103,658) in the same period last year. The strong Pound Sterling coupled with high interest rates in Canada contributed to approximately half of this variance.

Revenue growth was primarily attributable to a 46% increase in net sales, representing a 44% increase in installation sales and a 74% increase in product sales. The installation sales increase reflects a full quarter's consolidation of IGL Canada, the addition of Neptune Coring Limited and

Action Products Marketing (Permaline), and higher general contracting activity in IGL Canada, offset by lower Insituform contract activity in the United Kingdom as a continued consequence of the uncertainty following the recent water and sewer privatization.

The increase in product sales reflects a more normal level of production activity in Insituform Linings in 1990 compared to an unusually weak quarter in 1989 with higher net contract values in Germany and France.

Royalty income was 760,238 pounds down 7% from 818,396 pounds in 1989. However, Insituform contract volume is up approximately 3% in local currency. The strong Pound Sterling against the U.S. Dollar, Canadian Dollar, Australian Dollar and Japanese yen led to an overall negative exchange impact of 10%. Contract volume is up in the U.S.A., Germany and France, offset by a decline in Holland and Japan. Total costs and expenses increased 39% in the first quarter reflecting the 49% increased cost of sales for the full quarter's consolidation of IGL Canada, Neptune Coring and Action Products Marketing (Permaform), plus the increase installation activity in IGL Canada and higher output in Insituform Linings, offset by the lower activity at the Company's U.K. subsidiary, Insituform Permaline.

Operating expenses increased 22% reflecting the consolidation of IGL Canada, and Neptune Coring and Action Products Marketing (Permaform), offset by lower overall expenses due to cost control measures necessitated by lower royalty revenues caused by exchange variances, lower U.K. revenues and higher interest rates in Canada. Other income decreased due to higher interest rates, higher goodwill write-offs, losses in associates in Canada and start-up costs in Germany.

Exceptional items reflect on-going close-out costs in Belgium, Germany and Spain coupled with 30,000 pounds in employee termination expenses.

The higher effective tax rate in the period ended June 30, 1990 is due to an unfavorable mix between loss making operations and profitable operations wherein the profitable operations cannot deduct the losses incurred in the unprofitable ones.

Commenting, Michael A. Chapman, Managing Director and Chief Executive Officer stated, ''As stated in our first quarter release, the first half of 1990 is naturally disappointing and below our expectations, especially due to the exceptional reserve required for remedial work and to the poor performance in the U.K. At this point in time we feel that the reserve provided is adequate to complete the necessary corrective work. Also while the U.K. water and sewer companies held back on their budgeted infrastructure expenditure during the first half of the year as previously reported, we are now seeing sure signs that these funds are being released and the U.K. performance level will be improved in the second half.''

''Higher interest rates, coupled with the strong Pound Sterling which devalues our U.S. Dollar and other local currency denominated revenues, has put additional pressure on our margin expectations. We are however, managing our costs and cash to offset a lot of this impact.''

Chapman concluded, ''Lastly, the turmoil in the Middle East has had an impact on the Company. Recently we were the successful low bidder on a large multi-year contract in Kuwait and were bidding with one of our European licensees on a sizable contract in Iraq, both for 1991 and beyond. These programs, along with any future extensions, are obviously on hold. In the long term, continued high interest rates, strong Sterling and uncertainty in the Middle East will continue to have a dampening effect on our potential.

''However, in spite of the first half, our current expectation overall, barring the unforeseen, is one of recovery to achieve at the very least the same level of performance as last year.''

Insituform Group Limited, through its wholly-owned subsidiaries, owns the world-wide rights to a system of pipeline and conduit rehabilitation known as the Insituform Process. With more than 18,000 successfully completed contracts in over 40 countries, Insituform retains market lead, having renovated in excess of 4,000 km of pipeline to date.

By eliminating the need for disruptive excavation, the Insituform Process provides a cost-effective solution to the problem of deteriorating pipe systems. A flexible non-woven fiber tube (Insitutube), impregnated with a liquid resin, is inverted by water pressure through the damaged pipe and is forced firmly against the inside of the pipe. The resin is then cured, either by hot water or high frequency light, creating a durable new structural pipe within the old.

NEW YORK (AUG. 31) BUSINESS WIRE - American Internationl Group Inc. (AIG) and International Lease Finance Corp. (ILFC) announced Friday that the merger of ILFC and a wholly-owned subsidiary of AIG was consummated today shortly after the approval of the merger by ILFC's shareholders.

Under the terms of the merger, each share of common stock of ILFC (other than those shares held by shareholders who previously made a Stock Election and shares held by AIG) has been converted into the right to receive $32.50 in cash, without interest.

Holders of 19,798,842 shares of ILFC common stock who made Stock Elections prior to the election deadline have had each share converted into the right to receive 50 cents in cash plus .3829 shares of common stock of AIG.

M.R. Greenberg, chairman and chief executive officer, AIG, said: ''We are obviously very pleased to consummate this merger. ILFC's highly succuessful management team and their premier aircraft leasing operation will strongly compliment our financial services division and provide a growing source of earnings to AIG.''

Leslie L. Gonda, chairman, ILFC said, ''We are extremely pleased that this merger has been consummated. AIG will be justly proud of its small, but profitable subsidiary.''

Manufacturers Hanover Trust Co., acting as Exchange Agent, is mailing to each ILFC shareholder, other than those who made a stock election, a letter of transmittal containing instructions for sending ILFC stock certificates to Manufacturers Hanover Trust Co. for payment of the cash merger consideration.

A total of 7,580,976 shares of AIG common stock will be issued in the merger. AIG expects to pay approximately $486 million in cash for the ILFC common stock, and, immediately prior to the consummation of the merger, purchased all of the outstanding ILFC preferred stock from the sole holder for approximately $58 million in cash.

AIG is the leading international insurance organization and the largest underwriter of commercial and industrial insurance in the United States. Its member companies write insurance in more than 130 countries and jurisdictions, and are increasingly engaged in a range of other financial services. American International Group, Inc.'s common stock is listed on the New York Stock Exchange as well as the stock exchanges in London, Paris and Tokyo.

BRIDGEPORT, CT (AUG. 31) BUSINESS WIRE - The Connecticut Energy Corp. announced Friday that it had sold back its 2.4 percent interest in the Iroquois Gas Transmission System to the Iroquois partnership.

The Iroquois Gas Transmission System is a partnership of U.S. and Canadian energy companies proposing to construct a 370-mile underground natural gas pipeline from the Canadian border to Long Island. When completed it will deliver 575.9 million cubic feet of natural gas a day to New England, New York and New Jersey.

Partners increasing their ownership percentage in the project are affiliates of Brooklyn Union Gas Co., Yankee Energy Systems Inc., J. Makowski Co., New Jersey Resources Corp. and the New York Power Authority. Subject to regulatory approval Long Island Lighting Co. (LILCO) will assume a one percent share in the project.

Connecticut Energy Corp. is a holding company primarily engaged in the retail distribution of natural gas for residential, commercial and industrial use through its principal subsidiary, The Southern Connecticut Gas Co. Southern delivers natural gas energy to more than 150,000 customers in 22 communities in Fairfield, New Haven and Middlesex counties.

UNION, NJ (AUG. 31) BUSINESS WIRE - TRANSNET CORPORATION (NASDAQ:TRNT), a leading dealer of personal computers, peripheral and related equipment, service and supplies, Friday announced results for the fourth quarter and fiscal year ended June 30, 1990.

For the fourth quarter, revenues increased 197 percent resulting in record quarterly revenues of $6,749,568 compared to $2,272,764 for the same period in 1989. This revenue increase is primarily attributable to the acquisition of Round Valley Computer Center Inc. in March 1990. The corporation reported a loss before provision for income taxes of $1,783,881, which includes approximately $1.5 million of non-recurring charges and charges associated with the acquisition of Round Valley, a substantial decline from the loss of $2,198,585 a year ago. The net loss of $1,783,881 or $0.37 cents per share compares to a loss of $1,356,403 or $0.33 cents per share in the same quarter of fiscal 1989.

For the fiscal year ended June 30, 1990, revenues increased 16 percent to $15,340,736 from $13,260,472 last year. The 1990 loss before provision for income taxes was $2,463,592 which includes the charges referenced above, compared to the $3,738,271 loss in 1989. The net loss of $2,463,592 or $0.51 cents per share compares to a loss of $2,276,089 or $0.47 cents per share last year.

Steven J. Wilk, president of TRANSNET CORPORATION, stated, ''Actions taken by management in the 1990 fiscal year have transformed TRANSNET into a larger, effective competitor to meet the challenges of the 1990s. The acquisition of Round Valley enhanced our product line of leading brands, expanded our customer base and improved our market penetration. Our expertise in the computer industry will continue to benefit our customers with a broad range of technical support and services.

''The strengthening demand for our products and services is evidenced by fourth quarter revenues increasing 197 percent over the prior year's fourth quarter revenues and is a result of the synergy of the acquisition. This trend continues giving us every confidence that fiscal 1991 will be an excellent year for TRANSNET,'' Wilk concluded.

CHICAGO (AUG. 31) BUSINESS WIRE - AM International Inc. Friday reported that its lenders have extended the waiver on certain requirements of the company's Revolving Credit Agreement while the parties continue negotiations on an amended agreement.

The waiver runs through Sept. 28.

AM International, with world headquarters in Chicago, sells and services a wide range of design, display, reproduction and finishing products and supplies to the worldwide graphics industry. The company conducts its business through three divisions, 17 subsidiaries and a dealer organization located in over 100 countries.

AM International's annual revenues are about $900 million. AM International's common and preferred shares are traded on the New York, Pacific and Midwest Stock Exchanges under the ticker symbol ''AM.'' The company's warrants are traded on the American Stock Exchange under the ticker symbol ''AML.WS.''

#90243b0742 08/31/1990 ~Business Wire
CONCORD, MA (AUG. 31) BUSINESS WIRE - GenRad Inc. today announced its acquisition of a logic synthesis technology.

This acquisition is a key part of the company's strategy of providing the industry's most complete design analysis tool set for the design of Application Specific Integrated Circuits (ASICs). The logic synthesis technology was initially acquired from Aptor S.A., Grenoble, France, a subsidiary of Cap Gemini Sogeti (CGS).

''With this acquisition of technology and engineering talent, GenRad intends to bring to market a logic synthesis product that is fully integrated with System HILO, creating an environment that supports top-down design,'' said Robert E. Anderson, GenRad president and chief executive officer. ''This synthesis package will support both the GenRad Hardware Description Language (GHDL) and the VHSIC Hardware Description language (VHDL).''

''We believe that tightly integrating a logic synthesis package into System HILO Tools, with all its existing capabilities, will provide

designers with the best tool set to meet the challenge of designing increasingly complex high-density, high-speed ASICs and printed circuit boards.''

GenRad will announce its plans for the new logic synthesis software later in the year. The core synthesis product has been used for more than 100 designs of ASICs and full custom integrated circuits at MATRA (MATRA MDS, Santa Clara, Calif. and MATRA MHS, France); and CNET, Centre Nationale des Telecommunication, France. The company is now marketing its logic synthesis package to leading ASIC designers on a pre-introduction basis.

Logic synthesis provides the designer with two very important functions. The first is translation. Logic synthesis allows the designer to model and debug designs at a high level (e.g. Register Transfer Level (RTL)), then use a synthesis tool to translate the high level design into a logic level implementation (i.e. gate level).

By allowing the designer to describe a circuit at a high level, a designer can focus on the function and performance of the design and be assured that what is implemented matches the initial design specification.

The second function provided by logic synthesis is circuit optimization. This function maps a logic level (i.e. gate level) design into an ASIC or full custom library and optimizes the circuit for speed and space. Benchmarks have shown that logic synthesis can improve circuit speed by an average of 33 percent and reduce chip area by an average of 24 percent compared to circuits created by experienced ASIC designers using traditional methods.

To date, the major interest in logic synthesis has been driven by its ability to optimize circuit design.

GenRad Inc. is a leading worldwide supplier of integrated software systems and automatic test equipment, to manufacturers and users of electronic and mechanical equipment, for design verification, product testing, and process quality management. The company's stock is traded on the New York Stock Exchange; its trading symbol is GEN.

#90243b0755 08/31/1990 ~Business Wire
LA BELLE, FL (AUG. 31) BUSINESS WIRE - Mr. Ben Hill Griffin III, president and chairman of the board of Alico Inc. (NASDAQ:ALCO) announced Friday that negotiations are underway regarding a contract extension with Properties & Lands of Florida Inc. for the prospective sale of Alico's 11,000 acres in Lee County, Fla.

Properties & Lands of Florida's previous contract with Alico required either a closing of the contract for $110 million cash on Aug. 31, or the payment of a $500,000 non-refundable deposit for the privilege of extending the contract an additional 90 days. To date, neither of these events has occurred.

The 11,000 acres covered by the contract are located in the Fort Myers area of Lee County, Fla. The property is just south of the Southwest Florida Regional Airport and the property's western border adjoins I-75.

CONTACT: Alico Inc., La Belle

#90243c0011 08/31/1990 ~Comtex

WASHINGTON (AUG. 31) COMTEX - The 8-K report filed at the SEC shows the board of directors of Larry's Ice Cream (TICKER: LARY) and the chief executive officer, Roger Kumar, are seeking outside investors to take control of Larry's Ice Cream.

The decision to seek outside investors was made due to the inability of management to obtain a firm delivery date for the manufacture of Larry's Ice Cream's yogurt machines and continued operating losses incurred by Larry's Ice Cream.

Larry's Ice Cream has been served with a suit brought by the landlord of Larry's Ice Cream plant and corporate offices, seeking to have Larry's Ice Cream evicted within five days.

Larry's Ice Cream plans to defend this action.

#90243c0017 08/31/1990 ~Comtex
WASHINGTON (AUG. 31) COMTEX - The 8-K report filed at the SEC shows that on July 10, 1990, three alleged holders of General Homes Corp.'s (TICKER: GHO) outstanding publicly traded subordinated notes filed an involuntary bankruptcy petition against General Homes in the U.S. Bankruptcy Court for the Southern District of Texas, Case No. 90-04810-H3-11 (the Phelps case).

Plaintiffs S.N. Phelps and Company Inc., Eleanor M. Crosby and Howard E. Leppla requested that the company be adjudged to be a debtor in possession under Chapter 11 of the U.S. Bankruptcy Code.

On July 30, 1990, General Homes filed a motion to dismiss the petition and a hearing on the motion and the involuntary petition was set for Aug. 21, 1990.

On Aug. 13, 1990, General Homes Corp. filed a consent to the entry for an order for relief in the Phelps case without waiving any claims against the Phelps group and on condition of the entry of a relief order reserving all rights of General Homes Corp.

On Aug. 14, the bankruptcy request was granted and General Homes was adjudged a debtor and a debtor in possession.

WASHINGTON (AUG. 31) COMTEX - The 8-K report filed at the SEC shows P-I-E Nationwide entered into a sales agreement through First Coast Corp., a unit of Olympia Holding Corp., with Mack Trucks Inc.(TICKER: MACK), in which Mack agreed to supply P-I-E with all its requirements for medium and heavy-duty truck chassis and truck tractors for a 10-year period.

The agreement, which is subject to First Coast obtaining irrevocable financing commitments for the initial purchase, provides for an initial purchase of 3,400 truck chassis and tractors, including 2,500 Mack Midliners manufactured in France by Renault Vehicules Industriels (a wholly-owned subsidiary of Renault).

The agreement states that financing must be reasonably satisfactory to Mack and be obtained by Oct. 15, 1990.

The agreement obligates Olympia to require any newly purchased or acquired companies to purchase from Mack the first 6,500 truck chassis and/or truck tractors during the 10-year period.

Mack Truck Inc.'s executive office is located at 2050 Kings Road, Jacksonville, FL 32209, and its telephone number is (904) 798-2000.

#90243c0030 08/31/1990 ~Comtex

WASHINGTON (AUG. 31) COMTEX - The 8-K report filed at the SEC shows Telco Communications Inc. filed suit Aug. 9, 1990, against Premier Bank National Association and certain officers, employees and insurance underwriters in the 19th Judicial District Court, Parish of East Baton Rouge, in Louisiana.

In the suit, Telco alleges that Premier Bank N.A. and the aforementioned officers and employees were negligent in its duties and responsibilities as the transfer agent, registrar and dividend disbursing agent for Telco.

On Aug. 10, 1990, Premier Bank filed a countersuit against Telco in the same district.

Pursuant to the suit, the bank obtained a Writ of Sequestration to sequester and take into custody all right, title, interest and claim of Telco, Herbert A. Howard and Stephen Nunnery for all collateral described in all commercial security agreements, all collateral chattel mortgages, all collateral assignments and pledges of accounts receivable and notes and any other collateral in any security agreement attached to the suit.

Although Telco stated its belief that it has substantial defenses to the suit, both parties have been in negotiations and a settlement has been tentatively reached.

#90243c0057 08/31/1990 ~Comtex

WASHINGTON (SEPT. 4) COMTEX - The 8-K report filed at the SEC shows Flair Communications Inc. has expanded its corporate operations into television promotion, effective July 23, when Flair Communications Inc.'s first commercial aired, soliciting contestants for the 1991 Models World Magazine cover contest.

Flair Communications Inc.'s next scheduled promotion is the national airing of a 30-minute program, to feature an internally developed product called "Step One".

This product is an instructional course designed to teach individuals how to break into modeling.

Flair Communications Inc. has initiated discussions with a joint venture partner in London for the purpose of creating "Models World Europe."

Flair Communications Inc. has retained a certified public accountant to bring it into compliance with SEC regulations, including certification of

the last two years' financial statements.

Flair's executive office is located at One Beekman Street, New York, NY 10038, and its telephone number is (212) 240-0300.

#90243c0059 08/31/1990 ~Comtex

WASHINGTON (SEPT. 4) COMTEX - The 8-K report filed at the SEC shows DS Bancor Inc.(TICKER: DSBC), the holding company for Derby Savings Bank, has announced completion of the sale of a shopping center, resulting in an after-tax gain of approximately $750,000.

This amount reflects $0.39 per share, and the gain will be included in the earnings statement for the quarter ending September 30, 1990.

DS Bancor Inc. stated it plans to allocate about 80% of this gain to the allowance for loan losses.

-30- 640

#90243c0060 08/31/1990 ~Comtex

WASHINGTON (SEPT. 4) COMTEX - The 8-K report filed at the SEC shows First Executive Corp.,(TICKER: FEXC) effective Aug. 24, 1990, replaced its accountant, Deloitte & Touche, with Price Waterhouse as the accountant to audit First Executive Corp.'s financial statements.

First Executive Corp. stated Deloitte & Touche declined to stand for re-election as First Executive's independent accountant, as of July 30, 1990.

First Executive Corp. expects that Deloitte & Touche will continue to provide certain consulting services to First Executive.

#90243c0061 08/31/1990 ~Comtex

WASHINGTON (SEPT. 4) COMTEX - The 8-K report filed at the SEC shows Leak-X Corp.(TICKER: LEAK) signed a letter July 25, 1990, stating its intention to merge Gaservice Maintenance ("Gaservice") and Equipco Corp. ("Equipco"), with newly organized, wholly-owned subsidiaries of Leak-X Corp.

The sole and principal shareholders of Gaservice, in consideration of the merger, John S. Gelles and William H. Gelles Jr., directors and executive officers of the Leak-X, will receive 1.50 million common shares of Leak-X, of which 750,000 will be placed in escrow.

Leak-X Corp. has valued at $1.50 million the initial 750,000 shares to be issued in connection with the Gaservice merger.

If Leak-X Corp. achieves the earnings targets which will enable the release of the escrowed shares to John and William Gelles, the value of such shares is estimated to be around $3.00 million.

#90243c0062 08/31/1990 ~Comtex

WASHINGTON (SEPT. 4) COMTEX - The 8-K report filed at the SEC shows Princeton Electronics Products Inc.(TICKER: PELT), effective Aug. 20, 1990 accepted the firm of N. Tannenbaum & Co., certified public accountants, as the principal accountant to audit Princeton Electronics Products Inc.'s financial statements.

This change was a result of the merger of N. Tannenbaum & Co. with another accounting firm and the fact that Princeton Electronics Products Inc. was in arrears to N. Tannenbaum & Co. for services rendered for previous fiscal years.

The firm of Milgrom, Galuskin, Rosner & Co., certified public accountants, was retained as Princeton's principal accountant for the fiscal year ending May 31, 1990.

For the previous two fiscal years, audits performed by those former auditors contained no adverse opinion or disclaimer of opinion nor were they modified as to uncertainty, audit scope, or accounting principles.

Princeton's address is P.O. Box 101, North Brunswick, NJ 08902, and its telephone number is (201) 297-4448.

#90243c0188 08/31/1990 ~Comtex
SCHEDULE 13D

SEC - AMENDMENT NUMBER: 5

GROUP LED BY HANSON P L C OWNS 33,224,000 SHARES (49.15%) OF NEWMONT MINING CORPORATION (TICKER: NEM) OF DENVER, CO.

ANNOUNCEMENT:

On Aug. 30, 1990, Newmont Mining Corp. filed a registration statement on form S-3 relating to concurrent United States and United Kingdom international public offers of an aggregate of 3,600,000 shares of common stock and 6,000,000 warrants to purchase common stock by Newmont Mining Corp. and an aggregate of 8,400,000 shares of common stock by SPI. The underwriters will be granted 30-day over-allotment options to purchase up

to 540,000 additional shares of common stock and 900,000 additional warrants from Newmont Mining Corp. and up to 1,260,000 additional shares of common stock from SPI. Each warrant will entitle the holder to purchase from Newmont Mining Corp., for a period of two years, one share of common stock, subject to certain adjustment. Concurrently, with the consummation of the offerings, Newmont Mining Corp. and SPI will enter into a put and call agreement which will be secured by 6,000,000 shares pursuant to a pledge agreement to be entered into among SPI, Newmont Mining Corp. and Manufacturers Hanover Trust Co., as pledge agent. In a letter agreement dated Aug. 30, 1990, GFAC and SPI agreed to reimburse Newmont Mining Corp. for certain amounts and indemnify it against a portion of certain liabilities that may become payable or arise. On August 30, 1990, Newmont Mining Corp., Gold Fields and GFAC entered into an amendment to the agreement dated as of Nov. 1, 1983, with respect to shares owned by Gold Fields, GFAC and other affiliates, and which will become null and void if the CGF Group beneficially owns more than 37.5 percent of the common stock on the 90th days following the date of the rights agreement. The rights agreement sets forth the terms of the preferred share purchase rights declared as a dividend distribution by the company's board on Aug. 30, 1990.

PURPOSE:

Public offerings.

PURPOSE:

Investment.

-30- 513
#90243c0190 08/31/1990 ~Comtex
SCHEDULE 14D9

SEC - AMENDMENT NUMBER: 8

ANNOUNCEMENT:

In a press release dated Aug. 31, 1990, Kansas Gas and Electric Co. (TICKER: KGE) announced that its board has amended Kansas Gas & Electric by-laws concerning provisions of the Kansas Control Share Acquisitions to allow any company which makes a control share acquisition of KG&E stock vote shares, eliminating the added expense of a proxy solicitation and a special meeting of shareholders. KG&E belies the KCP&LC offer is inadequate with respect to common shareholders, is legally flawed, and has been put forward in an atmosphere of pressure designed to benefit KCP&LC.

-30- 789
#90243d1830 08/31/1990 ~French/German News Agency
NEW YORK (AUG 30) - Andre Agassi displayed a rarely-seen side of himself here Thursday when he was warned for obscenity during his four-set victory over Petr Korda in the second round of the U.S. Open.

Agassi, known more for his flashy attire and his custom of throwing pieces of his clothing into the crowd, became involved in an altercation with chair umpire Wayne McKewen during the second set of the match, which he won 7-5, 5-7, 6-0, 6-4.

The incident occurred in the 11th game, with Korda serving at deuce after having fought off a pair of break-points.

Agassi, who had had a couple of line calls go against him earlier in the match, became livid when his forehand shot was called wide, giving Korda an advantage.

Agassi pleaded his case to chair umpire Wayne McKewen and when the call was not reversed, he turned away and uttered and obscenity, receiving a warning.

After the game, McKewen confered with Grand Slam supervisor Ken Farrar and issued a point penalty for a "second sitation" on the side change, alleging that Agassi had spit on him.

Agassi, who apologized to McKewen for the outburst, immediately sought out

Farrar in the stadium tunnel and the penalty was subsequently rescinded.

"The umpire misread the situation," Farrar said.

Agassi acknowledged having used obscenity, but denied having meant it for McKewen or having spit at him.

"I got carried away with the bad calls," Agassi said. "I was mad that the umpire didn't see that ball. I couldn't believe he missed it at such a crucial time. I yelled out in anger and he interpreted it as abusive language."

JAKARTA (AUG 31) - Powerful women's groups have urged the government to raise Indonesia's maximum sentence for rapists to life in jail or death from the current 12-year prison term, the official Antara news agency said Friday.

The organizations, grouped under the Corps of Indonesian Women (KOWANI), said they were alarmed by the rising incidence of rape in the country, with statistics showing one rape every five hours last year, Antara said.

The groups, including the association of women law graduates (PERSAHI), had asked Justice Minister Ismail Saleh to review the current code of law on crime cases and raise the maximum sentence, Antara said.

"We propose life (in jail) or death sentence for rapists bearing in mind the trauma the victim has to face all her life," said Subekti, who represented the women's branch of organisation of retired civil servants.

"We feel the current sentence of between three months to several years (in jail) should be raised," she added. The present maximum sentence for rape is 12 years, but the sentences are usually reduced.

The death sentence is currently applied in cases of treason, drug smuggling and murder.

NEW YORK (AUG 31) - West Germany's Steffi Graf, world number one in women's tennis, moved easily into the third round of the U.S. Open championships Thursday with a 6-1, 6-3 victory over Australian Rachel McQuillan.

The rising U.S. talent Jennifer Capriati, at 14, seven years younger than

Graf, defeated Patricia Hy, born in Cambodia and living in Canada, by 6-3, 6-1.

If both Graf and Capriati win again, they could meet in the next round. Seeded 13th at the U.S. Open, Capriati was defeated by Graf in three sets last Sunday in Mahwah, New Jersey.

Third-seeded Monica Seles, 16, of Yugoslavia easily won against Ros Fairbank-Nideffer, 6-2, 6-2. Zina Garrison advanced by winning win against Angelica Gavaldon, 6-4, 6-0.

In the men's singles, West Germany's Boris Becker, number two on the world list, won against Yannick Noah of France, 6-4, 6-2, 7-6 (7-2).

First seeded Stefan Edberg had been ousted in the first round.

The American players Brad Gilbert, Aaron Krickstein and Michael Chang all advanced into the third round.

Seoul (AUG. 31) - A meeting between the heads of government of the two Korean states will take place as planned September 4-7 in Seoul, the South Korean government disclosed Friday, following talks between the chief delegates from both sides.

The first official meeting of the two premiers from Seoul and Pyongyang is intended to pave the way for a summit meeting between the heads of state.

Two rounds of talks are scheduled in Seoul next Wednesday and Thursday between North Korean Premier Yon Hyong Muk heading a seven-member government delegation and his South Korean opposite number Kang Young Hoin with six ministers.

The North Korean delegation, accompanied by 50 newsmen, will travel to Seoul by land and will stay at the capital's ''safest hotel'', Intercontinental, the South Korean government said.

Major topics of the talks will be disarmament on the Korean peninsula, possibilities for family reunions, and questions relating to a joint membership of both Korean states in the United Nations.

The first high-level talks between the two Koreas required several years of preparation by negotiators from Seoul and Pyongyang. dpa ba 310850 aug 90

TOKYO (AUG. 31) - Japan's current account surplus in July dropped sharply to 2.01 billion dollars from 5.49 billion dollars for the corresponding month last year, the finance ministry announced Friday.

Trade surplus also declined to 5.41 billion dollars from 7.02 dollars a year before. July exports edged up only 1.3 percent from a year before to 23.33 billion dollars while imports grew 12 percent to 17.91 billion dollars.

The long-term capital account registered a net outflow of 7.89 billion dollars compared with a deficit of 7.18 billion dollars.

#90243d2320 08/31/1990 ~French/German News Agency
TOKYO (AUG 31) - Chief Cabinet Secretary Misoji Sakamoto used the word ''hostages'' in answering questions on Iraq Friday at a cabinet committee session of the diet or parliament.

Sakamoto was quoted as condemning that Iraqi authorities were holding some 140 Japanese men at their strategic military facilities.

''The Japanese detainees are hostages. Such an act cannot be forgiven under international laws and is very irresponsible,'' Sakamoto was quoted as saying.

The Japanese Transport Ministry plans to send a special chartered airplane of Japan Air Lines (Jal) with doctors and nurses aboard to Amman Saturday to carry back 68 Japanese women and children in Baghdad, according to government sources.

Iraqi authorities have announced all foreign women and children will be released on the order of President Saddam Hussein.

#90243d2360 08/31/1990 ~French/German News Agency
MUNICH, WEST GERMANY (AUG 31) - A resident of Munich was startled when he saw his locked, driverless car suddenly spring to life, sideswipe two cars plough through a metal gate and crunch into a wall.

Tiny bite-marks on the starter wires pointed to the culprit, who had fled: the marten, a tiny, weasel-like creature that has been making a comeback in West German cities and showing an immoderate -- and inexplicable -- appetite for car electric circuitry, hoses and brakes.

A recent investigation in Stuttgart showed that one car in three examined

in the city center bore scars of the marten's appetite.

Complaints of marten mayhem have been heard all over the country, and although it is vigorously hunted and trapped, the little carnivore seems to be thriving in West Germany's metropolises.

MANILA (AUG 31) - At least 133 people have been killed in large-scale mudslides caused by monsoon rains in the northern Philippines since Sunday, the Red Cross said Friday in Manila, adding that the actual number of victims could be far greater.

A spokesman said several mountain villages in the northern provinces were still cut off from the outside world and the fate of their inhabitants was unknown. Due to continuing rain, rescue teams had problems reaching them, he said.

The monsoon rains which set in Sunday triggered a series of mudslides which destroyed dozens of dwellings in the provinces Nueva Ecija, Nueva Vizcaya and Benguet, where at least 48 gold miners were buried in a mining camp.

#90243d2520 08/31/1990 ~French/German News Agency

AMMAN (AUG. 31) - Several Filipino, Indian and Sri-Lankan nationals, including the wife of Colombo's ambassador to Kuwait, arrived here Friday aboard an Iraqi Airways plane from Baghdad.

No Westerners were on the flight.

Hopes for the early departure of 237 foreign women and children from Iraq were dashed late Thursday, as Iraqi ambassador to the United States Mohammad al-Mashat said the operation had been postponed for administrative reasons.

The Foreign Office also announced late Thursday that Iraqi authorities had completed formalities to issue exit visas to 132 British women and children who would be flown directly to London from Baghdad aboard an Iraqi Airways plane.

But no American, Briton or other European was on board Friday's flight from Baghdad.

The Sri Lankan, Filipino and Indian nationals getting off the plane are not affected by Iraq's decision to detain foreign nationals from "hostile" countries in Iraq and Kuwait.

Iraq, after invading Kuwait August 2, has been holding mostly Westerners as "human shields" to deter a feared attack by a multinational force deployed in the Gulf in the aftermath of the invasion.

#90243d2550 08/31/1990 ~French/German News Agency

ADDIS ABABA (AUG. 31) - Ethiopian government forces have killed 74 rebels of the Tigre People's Liberation Front (TPLF) in clashes in the northern province of Gondar, the official Ethiopian News Agency reported.

The TPLF controls all of Tigre province, in northern Ethiopia, and parts of Gondar. Fighting between government troops and guerrillas of a TPLF-led alliance has been reported only 160 kilometres (100 miles) from the capital, Addis Ababa.

The Ethiopian News Agency said in a dispatch Thursday that some of the rebels killed were senior commanders of the TPLF, fighting to overthrow the government of President Haile Mengistu.

On Wednesday the government admitted for the first time that rebels of the secessionist Eritrean People's Liberation Front (EPLF) were shelling the provincial capital of Asmara. They said 88 civilians had been killed in shelling in the past few months.

The EPLF, which has fought a 30-year war for independence for the Red Sea province of Eritrea, captured the Red Sea port of Massawa in February.

The EPLF this week claimed to have killed 200 government troops in recent fighting near Asmara.

SINGAPORE (AUG. 31) - Singapore granted a 50 percent increase on Friday in the approved circulation here of the Hong Kong-based magazine Asiaweek

to 7,500 copies per issue.

The measure, announced by the ministry of communications and information,

came a day after parliament clamped down tighter on foreign newspapers and magazines, requiring yearly permits to distribute publications in Singapore.

Asiaweek's approved circulation was restricted to 500 copies in 1987 but the limit was raised to 5,000 a year later after the newsweekly's editor-in-chief,
Michael O'Neill, accepted Singapore's position on the foreign press.

Singapore has steadfastly maintained that the foreign press should not interfere in its domestic affairs by reporting as if it was writing for a Singaporean audience.

Asiaweek's circulation here was an estimated 10,000 copies until October 1987 when it was cited under the Newspaper and Printing Presses Act as a publication engaging in the domestic politics of Singapore.

The magazine was sanctioned for failing to publish, in full and unedited, letters from government spokesmen responding to a cover story it had carried on the arrest of 22 people allegedly involved in a clandestine Marxist network.

Asiaweek was the third international news publication to have its local circulation restricted in Singapore, after Time magazine and the Asian Wall Street Journal. The Far Eastern Economic Review followed in December 1987, all under the amended press law.

Time's circulation, which was cut from 18,000 copies in October 1986 to 2,000 copies, has since been restored.

But circulation curbs are still in effect for the Asian Wall Street Journal, down to 400 copies a day from an estimated 5,000 copies in February 1987, and the Review, from 9,000 copies in 1987 to 500 copies.

Both the Journal and the Review have also been denied permission to base a correspondent here.

BAALBECK, Lebanon (AUG. 31) - Overnight fighting between rival Shiite militias left at least seven dead and nine injured in this city in Syrian-controlled eastern Lebanon, spokesmen for the militias said Friday.

The fighting, which lasted four hours, pitted fighters from Hezbollah, which is backed by Iran, against those of Amal, who are armed by Syria.

It ended with the intervention of Syrian troops based in Baalbeck, the largest Shiite city in the Bekaa Valley.

A Hezbollah spokesman told AFP that five of its members, including a senior leader, Sheikh Abbas Hecchi, were "summarily executed in their homes" by Amal's men.

Amal's spokesman said two of its men, including a military commander, Ali Jaafar, was killed in fighting with Hezbollah militiamen, who went on to take over the center of Baalbek and seize two Amal offices.

Civilians left the city center to the two militias as the Syrian army, which maintains a low-profile presence in the the town proper, appeared to reinforce its military forces from positions around Baalbeck.

The fighting between the two Shiite militias has been going on for two years and has left 1,000 dead and 4,000 injured. It has reached war-like proportions in the Iqlim at-Touffah district in southern Lebanon but is only sporadic in mostly Moslem west Beirut.

It was the first time the fighting had flared in Baalbeck, observers here said.

Also Friday, Amal called a one-day general strike to mark the 12th anniversary of the disappearance in Libya of the leader of the Lebanese Shiite community, Imam Moussa Sadr.

First reports indicated the strike was widely followed in southern Lebanon, around Baalbeck and in west Beirut.

#90243d2830 08/31/1990 ~French/German News Agency

LONDON (AUG. 31) - The British Government said Friday it was referring Credit Lyonnais' acquisition of a 45 percent stake in Anglo-Irish leasing group Woodchester investment to the monopolies commission because the French bank was state-controlled.

Trade and Industry Minister Peter Lilley took the decision to refer the deal to the Monopolies and Mergers Commission against the advice of Sir Gordon Borrie, the director-general of Fair Trading, Mr. Lilley's office said.

"The implications of Woodchester coming under the influence or control of a bank which is itself state-controlled and the fact that the French

Government controls or influences other financial institutions operating in the UK raised issues of public interest which warranted investigation," an official statement said.

Mr. Lilley's decision was in line with a warning he gave on taking office last month that he would take into account whether a foreign company was state-controlled or privately owned before giving the green light to its acquiring a stake in a British company.

He had stressed that nationalised companies did not suffer the same competitive and financial constraints as private enterprise and could therefore benefit from unfair advantages, and pledged not to allow "nationalisation by the back door."

Britain's Conservative Government has since coming to power in 1979 carried out a policy of privatising state-owned industry.

Credit Lyonnais had acquired a 29.8 percent stake in Woodchester in December and had announced in June that it planned to boost this to 45 percent.

The Monopolies and Mergers Commission is due to deliver its report on December 28.

#90243d2940 08/31/1990 ~French/German News Agency

PARIS (AUG. 31) - The governing committee of the International Energy Agency (IEA) met here Friday to discuss possible responses by industrialised countries to oil supply problems due to the Gulf crisis.

It was "very unlikely" that the 21 IEA member countries would opt for emergency measures to compensate for Iraqi and Kuwaiti supplies lost to the market because of a U.N. embargo on their oil following Iraq's invasion of Kuwait on August 2, a source close to the Agency said.

Such measures could include releasing government-held oil stocks to offset the loss of some four million barrels of oil a day from Kuwait and Iraq.

Supplies seemed assured for September and October thanks to a decision by the Organisation of Petroleum Exporting Countries on Wednesday to boost production and the release of stocks held by oil companies, the source close to the IEA said.

Problems were unlikely to emerge until the beginning of winter, the source added, stressing that the IEA could decide to meet again at any time if necessary.

Oil stocks in IEA member countries totalled 139.1 million tonnes as of August 1, or 31 days's supply, the bulk of it in the United States with 79.5 million tonnes, Japan with 28.2 million tonnes and West Germany with 26 million tonnes.

The IEA had in 1974 introduced a system whereby available supplies would be apportioned out to member states in the case of a seven per cent or more fall in supplies to one or several members.

Other possible measures to cope with supply disruption include coordinated use of strategic stocks, measures aimed at reducing crude oil consumption, the substitution of other fuels for oil in such installations as power plants and increased production.

OPEC President Sadek Boussena said Thursday that "the ball was in the IEA's court" after OPEC's decision to allow members to boost production to compensate for production from Iraq and Kuwait, both OPEC members.

IEA executive director Helga Steeg had welcomed the OPEC decision, and said the IEA had already asked oil companies to make abnormally large purchases on the free market and to use their stocks.

The IEA has estimated that OPEC output in August totalled 19.7 barrels per day, down from 23.2 million in July.

Saudi Arabian production totalled 5.7 million barrels a day, against an OPEC quota of 5.38 million, and that of Iran was 3.3 million barrels a day against a quota of 3.14 million.

Iraqi output fell to 0.9 million barrels against a quota of 3.14 million while Kuwait did not produce a single barrel.

Worldwide, excluding planned economies, the amount of oil on offer fell to 49.5 million barrels a day in August from 53.2 million in July.

France and the European Economic Community were attending Friday's IEA meeting as observers.

The IEA groups all members of the 24-member Organization of Economic Cooperation and Development (OECD) except France, Iceland and Finland.

Paris had refused to join the organisation in 1974 because it considered it a "war machine" against OPEC but is reconsidering its position as the IEA has lost much of its political significance, informed sources in the French capital said.

TOKYO (AUG. 31) - Japanese buying of foreign securities jumped from 6.3 billion dollars in June to 10.1 billion dollars in July, mainly reflecting sharply higher purchases of foreign bonds, the Finance Ministry said Friday.

The ministry said that net purchases of foreign bonds doubled from 3.8 billion dollars to 7.6 billion dollars.

Net purchases of foreign stocks rose modestly - from 1.58 billion dollars to 1.64 billion dollars - while purchases of yen-dominated foreign bonds issued in Japan fell from 895 million dollars to 840 million dollars.

Foreign buying of Japanese securities meanwhile jumped from 2.2 billion dollars in June to 6.5 billion dollars in July, the ministry said.

Net purchases of Japanese bonds leapt from 1.8 billion dollars to 2.9 billion dollars while purchases of Japanese bonds issued abroad jumped from 804 million dollars to 2.7 billion dollars.

Foreign transactions in stocks swung from net sales of 380 million dollars to purchases of 937 million dollars.

The overall deficit in the long-term capital account - combining securities transactions with direct investment, certain trade credits and loans - rose from 7.82 billion dollars in June to 7.89 billion dollars in July.

#90243d3140 08/31/1990 ~French/German News Agency

TOKYO (AUG. 31) - Japan's Finance Ministry has suspended trading by four brokers including Citicorp Scrimgeour Vickers International Ltd. and Daiwa Securities Co. Ltd. for manipulating stock prices, a ministry official said.

The official said that trading by the Tokyo branches of Citicorp, Daiwa, and National Securities Co. Ltd as well as the Yokohama branch of Ace Securities Co. Ltd. would be temporarily halted for either one or two days next week.

The four securities firms had already been charged with manipulating the price of stocks in Fujita Tourist Enterprises Co. Ltd. in April although the Tokyo District Court later dropped the charges.

The price of Fujita stocks jumped sharply from 3,900 yen (26.90 dollars) to 4,400 (30.35 dollars) on April 20 before hitting a peak of 5,070 yen (34.97 dollars) on April 24. Average daily turnover jumped from around 10,000 shares to 300,000 shares a day in the same period, hitting 533,000 on

April 23.

Japanese police later arrested Mitsuhiro Kotani, the 57-year-old president of Koshin Co. Ltd., for allegedly manipulating the stocks' price in an attempt to raise cash to repay debts owed to aerial surveillance firm Kokusai Kogyo Co.

KAMPALA (AUG. 31) - Eighteen people have died of meningitis in Uganda's eastern and western districts of Mbale and Bushenyi, the New Vision newspaper reported Friday.

The paper said 13 people died in western Uganda's Busiu sub-county, seven of them were pupils of Bumasikye primary school, while 20 others were in critical condition at home.

The paper quoted the Mbale district medical officer, Dr. Joseph Kusolo saying there was no vaccine in the district at the moment, but arrangements were being made to collect it from health ministry headquarters in Entebbe.

In Bushenyi at least five people had died of the disease, the district medical officer Dr. Aggrey Kagwisagye said, adding that only 1,500 people had been vaccinated against the disease which broke out early this month.

ROME (AUG. 31) - Nineteen Italian women and children left Iraq Friday and were expected later in the day in Amman, the Italian foreign ministry said.

Officials said they were optimistic that the remaining 75 Italian women and children held in Iraq would be able to leave soon.

The group of 19, who had been in Kuwait at the time of the invasion and been transferred to Baghdad, crossed into Jordan by road and were expected to arrive here Saturday on a plane sent by the Italian president's office.

Of the total 94 women and children, 51 were in Iraq and 43 in Kuwait.

#90243d3330 08/31/1990 ~French/German News Agency

BONN (AUG. 31) - The West German government will spend 1.5 billion marks (about 1 billion dollars) by 1994 to expand biotechnology research, Research Minister Heinz Riesenhuber said Friday.

Riesenhuber, who presented the government's new promotional programme ''Biotechnology 2000'' following its approval by the West German cabinet, said it would play a key role in the fight against hunger and disease. He also urged industry to involve itself more in this field.

Aside from solidifying knowledge in the basic sciences, the programme aims to further research in the areas of environmental protection, health, nutrition and the procurement of energy and raw materials. Gene technology is to receive special emphasis.

Regarding West Germany's international standing in science, Riesenhuber said, ''We're in the running in all significant areas.'' He said increased government funding for biotechnology had moved West Germany ''into the forefront of the industrial countries''.

#90243d3530 08/31/1990 ~French/German News Agency

JOHANNESBURG (AUG. 31) - South Africa's giant Iron and Steel Corporation (ISCOR) recorded a 14 percent growth in profits to 929 million rand (362 million dollars) in the year to June, according to figures released here.

The growth in earnings from 43.9 cents (17.1 U.S. cents) a share to 50.1

cents (19.5 U.S. cents) a share is below the 20 percent rise forecast when ISCOR was listed on the Johannesburg Stock Exchange last November.

But it is above some of the market forecasts that followed ISCOR's warning at the interim stage that earnings in the second half were likely to decline.

The final dividend of 12.2 cents (4.75 U.S. cents) a share brings the total for the year to the 17.6 cents (6.86 U.S. cents) a share promised in the prospectus when ISCOR was privatised last year.

ISCOR managing director Willem van Wyk said ISCOR's growth was limited by the change in world steel prices and unforeseen production losses at Vanderbijlpark, an ISCOR plant south of Johannesburg.

Turnover grew by 16.2 percent to 6.9 billion rand (2.69 billion dollars) with exports reaching 2.4 billion rand (936 million dollars) and local sales meeting forecasts at 3.434-million tons.

The breakdown in one of six blast furnaces at Vanderbijlpark cost ISCOR 250,000 tons of export sales, leaving it with under-recovery of fixed costs and unbudgeted repair bills.

#90243d3570 08/31/1990 ~French/German News Agency

SINGAPORE (AUG. 31) - Singapore's total trade rose by 15.8 percent in June compared to the same period last year with the trade deficit growing nearly seven-fold from a year ago, the Trade Development Board said Friday.

The statistics showed that the republic's total trade amounted to 18.6 billion dollars (10.6 billion U.S.) compared to 16.1 billion dollars (9.1 billion U.S.) in June 1989.

Imports surged by almost 21 percent compared to a year ago to 9.78 billion dollars (5.56 billon U.S.), while total exports rose 10.7 percent over the same month of the previous year to 8.82 billion dollars (5.01 billion U.S.).

The trade deficit in June of 960 million dollars (545 million U.S.) was nearly seven times the 140 million dollars (79.5 million U.S.) registered in June 1989.

It was also nearly double the May deficit of 564 million dollars (320.5 million U.S.).

The board said that the increase in imports was largely due to the purchase of an oil rig and an aircraft from the United States and crude petroleum

from the United Arab Emirates.

Other contributors to the import figure were telecommunications equipment,

parts of data processing machines, wrist watches and integrated circuits.

Domestic exports, excludeing re-exports, rose 12.9 percent over June 1989 to 6.3 billion dollars (3.6 billion U.S.), still dominated by products such as disk drives, tape drives, printers and peripheral units.

Non-oil domestic exports to the United States and European Economic Community (EEC) improved due to the rise in shipments of data-processing machines and parts.

Such exports to Malaysia were on the decline because of weaker demand for electronic valves and electrical apparatus.

Domestic exports to Japan declined by 9.3 percent following the fall in shipments of petroleum products and radios.

WELLINGTON (AUG. 31) - Dozens of dead fur seals are washing up on the west coast of New Zealand's South Island, baffling marine scientists.

Department of Conservation spokewoman Angela Davidson said Friday that autopsies performed on the dead mammals have been inconclusive.

Until now, conservation organisations blamed fishing ships, but Ms. Davidson said only two of 16 dead seals found last week had net injuries.

"No one will comment on what killed the others, because nobody knows," she said in an interview.

The mystery follows the unexplained deaths of numerous crested penguins on the South Island coast.

The Greymouth Evening Star, a west coast newspaper, interviewed fishermen about the seal deaths and learned that 30 years ago the same thing happened under equally mysterious circumstances.

"There would have been about 200 dead seals on a two, two-and-a-half mile long stretch of beach. They were young ones, just lying there. We couldn't even guide them back to the sea," said veteran whitebaiter Edward Black, who worked on the mouth of the Grey River in the 1950s.

"There was a yellow scum on the sea, and thousands of little fish like

sardines washed ashore."

In Wellington, the Conservation Department's marine mammal scientist Martin Cawthorn said Mr. Black described some kind of toxic algae in the food chain.

"The fish feed on the surface plankton, it accumulates in their system, and the mammals eat lethal doses," he said.

Asked whether this could be happening again he replied "possibly but not probably. The deaths would be more widespread, not just fur seals."

Mr. Cawthorn said the fur seals could be dying from natural causes.

"People seem loath to ascribe the deaths to a natural mortality rate. We have only been studying the mammals for the last couple of years. Seals have a naturally high death rate," he said.

He said bad weather, exhaustion, or a high population growth rate could be the culprits.

The fur seal population on the west coast is not known, but fishermen said their observations indicate the population is at very high levels.

#90243d3690 08/31/1990 ~French/German News Agency

BONN (AUG. 31) - West German Chancellor Helmut Kohl Friday ordered Bonn ministries to examine what ''material and technical assistance'' could to be raised in response to Washington's request to help it share the burden of its troop deployment in the Gulf.

Bonn government spokesman Dieter Vogel told reporters the order was given after U.S. President George Bush telephoned the chancellor late Thursday. No sums had been mentioned, nor had Bonn named any figures about West German financial assistance, Vogel added.

Bush had told Kohl he understood that the request came at a time when Bonn was already saddled with the costly process of German unification, Vogel added.

He said Bush had also asked Bonn to assist countries affected by the trade embargo against Iraq, among them Jordan whose economy is heavily dependent on trade with Iraq.

U.S. Secretary of State James Baker and Treasury Secretary Nicholas Brady will travel to West Germany, Saudi Arabia, the United Arab Emirates, Japan, South Korea to consult with Washington's allies on a plan on sharing the

burden.

The Washington Post reported that a total of 10 billion dollars will be sought. The Post said Bonn is requested to give 600 million dollars to a fund to help nations hit by the Gulf crisis.

In addition, it is asked to contribute 500 million dollars to help shoulder costs for U.S. military deployments in the Gulf.

TOKYO (AUG. 31) - Iraq moved hundreds of Japanese and Western hostages from the hotel where they were being held in Baghdad to strategic locations around the country last weekend, the Japanese Foreign Ministry said Friday.

A ministry official said that the number of Japanese hostages transferred from the Mansour Melia Hotel on Saturday amounted to 196 men, women and children, revising a weekend statement that only 20 men had been moved.

Japan's Ambassador to Iraq, Kunio Katakura, was quoted as saying that those transferred were among 18 groups of both Japanese and Western hostages taken to various locations including airports and military installations.

Fifty-three Japanese women and children were allowed to return to Baghdad Wednesday following an announcement by Iraqi President Saddam Hussein that women and children could leave the country. The foreign ministry says they are expected to leave "very soon" -- either Friday or Saturday.

Kiyoko Ikeda, one of the women allowed to return to Baghdad, was quoted by the Yomiuri Shimbun as saying that she had been taken to what looked like a military facility about 40 kilometres (25 miles) east of the capital.

Mrs. Ikeda, apparently the same woman who appeared with her two children in a televised meeting between the Iraqi president and about 20 hostages earlier this week, said she was accompanied by 21 people including six families.

Another Japanese woman, Yuko Takeda, was quoted as saying that she was taken to a non-military facility in a steel-producing area in northern Iraq.

In related developments, Japan's Chief Cabinet Secretary Misoji Sakamoto used the term "hostages" for the first time Friday. Foreign Minister Taro Nakayama meanwhile asked U.N. Secretary General Javier Perez de Cuellar to "secure the safety of Japanese in Iraq," a foreign ministry official said.

Indications that the number of Japanese transferred to strategic locations

was much higher than initially reported surfaced late Thursday in a report from the Iraqi capital by Japan Broadcasting Corp. (NHK).

The NHK correspondent in Baghdad, allowed to enter the Mansour Melia Hotel, reported that there were fewer Japanese inside than previously thought.

The foreign ministry had said that 213 Japanese, all evacuated from Kuwait, were held in the hotel before the weekend transfers. Iraqi authorities, however, had prevented embassy staff from making contact with the hostages.

The Asahi Shimbun reported that the women allowed to return to Baghdad were highly critical of the Japanese government's handling of the crisis including measures announced this week by Prime Minister Toshiki Kaifu.

"The Japanese government and embassy are not thinking about us," one woman was quoted as saying. "All the steps they take are too late. The embassy says it supplied provisions but that was after we had been moved separately to military installations. We want the government to think about our lives."

Mrs. Ikeda was quoted as saying that the Japanese in the hotel had access to a short-wave radio and were aware of the government's measures which include one billion dollars for the multinational forces in the Gulf.

"The government should have been more careful, taking the standpoint of the hostages into account," she was quoted as saying.

The official Iraqi News Agency strongly criticised the Japanese package Thursday as "an affront to the dignity of the Japanese people and a betrayal of the martyrs of American crimes in Hiroshima and Nagasaki.

"What interest do the Japanese people have in seeing their government finance aggression against Iraq ... which is threatening to unleash a war in a region that is Japan's principal energy supplier?" it asked.

"We were expecting a wiser position from the Japanese government," it said, adding that it had sacrificed "its future interests in the Gulf region."

LEIPZIG (AUG. 31) - The annual Leipzig Industrial Fair opens its doors Saturday, two months after the introduction of the deutschmark in East Germany and just over a month away from German unification.

For the first time, West German firms make up the largest single group among the 6,000 participants from 52 countries displaying their wares through September 8.

Some 1,500 West German companies occupy 73,000 square metres of floor space at the fair, which under the ousted Communist leadership functioned as a prestige show for East German manufacturing.

With the East German economy in crisis due to the transition to capitalism, the number of East German companies participating declined to 1,000 this year from 1,800 in 1989.

#90243d3810 08/31/1990 ~French/German News Agency

MANILA (AUG. 31) - The Philippines, citing the U.N.-imposed embargo against Iraq, has rejected an offer from Baghdad to trade Philippine sugar for Iraqi oil, officials said here Friday.

Foreign Affairs Undersecretary Pablo Suarez said that the offer, which was made public by local newspapers, would violate the embargo imposed on Iraq after that country invaded Kuwait on August 2.

"Under that resolution, we cannot import the oil," Mr. Suarez said.

Earlier this year, the Philippines signed a trade protocol with Iraq expanding trade between the two countries including a provision for countertrade agreements. However, the Gulf crisis broke out before the agreement could be finalized.

In the first half of this year, the Philippines imported 3.8 million barrels of oil from Iraq, amounting to 9.1 percent of its oil imports.

#90243d3830 08/31/1990 ~French/German News Agency

COPENHAGEN (AUG. 31) - The Danish Foreign Ministry was assured by Iraqi authorities Friday that women and children would be allowed to leave Iraq, but visas for the 13 Danish women and four children have not yet been provided.

"Our diplomats in Baghdad are doing everything to obtain the visas in question," a Danish Foreign Ministry spokesman said. He denied that Iraq had imposed any conditions for the release of the women and children.

A Scandinavian Airlines (SAS) plane is on standby to go to Turkey or Jordan to pick up the Danish citizens. Another 22 Danes, 11 women and 11 children, were reported to have decided to stay with their husbands and fathers.

#90243d3880 08/31/1990 ~French/German News Agency

MANILA (AUG. 31) - Philippine agricultural production declined by 3.6 percent in the first half of this year compared to the same period last year, spokesmen for the Department of Agriculture said Friday.

The Department attributed the decline to a drought that struck the country from November to April, adding that most of the decline was due to a fall in crop production.

The fall in agricultural production is expected to contribute to projected economic growth of only 3.8 percent this year compared to the average six per cent growth in the last three years.

Total agricultural production in the first half of 1990 was only 91.96 billion pesos (4.08 billion dollars) against 95.4 billion pesos (4.4 billion dollars) in the first half of 1989, the spokesmen said.

Total crop production fell by more than 12 percent to 49.005 billion pesos (2.18 billion dollars) from 55.7 billion (2.56 billion dollars).

Unmilled rice suffered a 12 percent drop, while corn production fell 9.4 percent with sugar, coffee and banana falling 9.3 percent, 7.8 percent and 1.1 percent.

In contrast, production of coconuts and pineapples, two major Philippines exports, rose 1.3 percent and two percent.

The non-crop sectors however posted sharp growth with livestock production rising by 11.6 percent, poultry by 10.9 percent and fisheries by 5.3 per cent, the Agriculture Department said.

#90243d4010 08/31/1990 ~French/German News Agency

JERUSALEM (AUG. 31) - Israel's Supreme Court authorised the partial publication on Friday of trancripts from the espionage and treason trial of Mordechai Vanunu, a former nuclear technician serving an 18-year jail term.

The Supreme Court had earlier forbidden the publication of transcripts of decisions taken behind closed doors in the 1988 trial.

The court has still forbidden the release of 30 pages of transcripts on the arrest of Mr. Vanunu, who worked at the Dimona nuclear power plant in the Negev desert.

In the released transcripts, the Supreme Court said the revelations made by Mr. Vanunu about Dimona and Israel's military nuclear program caused "long term losses for Israel." The court did not specify what those losses were.

The Vanunu affair broke in September 1986 when the Sunday Times published an article accompanied by photos and detailed plans of the Dimona plant where the article claimed Israel had produced dozens of nuclear bombs.

Following publication of the article, Mr. Vanunu disappeared mysteriously from London. On November 9, 1986, the Israeli government announced that Mr. Vanunu was being held in Israel on the orders of a tribunal.

Mr. Vanunu, held in complete isolation, was in the news again in December 1986 when he managed to get a message to the press while being taken to a hearing in Jerusalem. The message said he had been kidnapped September 30 in Rome and flown to Israel.

While publication of the transcripts dealing with Mr. Vanunu's arrest was vetoed, the authorised transcripts said he had acted "for financial reasons that he tried to disguise in a hopeless and calculated way" as inspired by ideological motives.

Mr. Vanunu's lawyer justified the leak by his client as stemming from his wish to inform the world of the danger that Israel's military nuclear program posed for world peace.

Last May, the Supreme Court rejected Mr. Vanunu's appeal of his 18-year sentence for espionage and treason.

#90243d4070 08/31/1990 ~French/German News Agency

HANOI (AUG. 31) - Vietnam and Phnom Penh have little choice but to accept the final pact on Cambodia forged by the diverse interests among the five permanent members of the U.N. Security Council, some analysts say.

The two governments cannot escape the fact that China, the main resistance backer, agreed to the peace plan and that cash-strapped Hanoi can no longer count on the unconditional support of its top ally the Soviet Union, which also signed and has more pressing problems at home.

The peace blueprint forged in New York on Tuesday by Britain, France, China, the Soviet Union and the United States calls for setting up a Supreme National Council (SNC) grouping the three resistance parties and the Phnom Penh government installed by Vietnam in 1979.

The SNC composition should be decided by the four parties, who are expected to meet in Jakarta next week, but no one side should dominate it.

The SNC should take over the U.N. seat held by the resistance and once a comprehensive settlement is reached should delegate powers to a U.N.

transitional body that would organise free and fair elections and conduct "relevant aspects of the administration," the permanent members said.

The resistance factions have accepted the pact and Phnom Penh has welcomed it but demanded guarantees including U.N. impartiality and disarmament of the Khmer Rouge that lost power in 1979.

Vietnam said Friday that it also welcomed the pact but stressed that Cambodia's internal problems should be settled by the Cambodians themselves.

But an analyst wondered "what other choice" Hanoi and Phnom Penh had other than to accept the accord, if with guarantees, and noted that it was highly significant that the powerful, diverse members -- above all China -- were able to "come to some kind of agreement" after several meetings.

Vietnam will now no longer be justified in saying that China has rejected all proposals put forward by its fellow security council permanent members who are highly unlikely to change their peace plan.

#90243d4100 08/31/1990 ~French/German News Agency

ABIDJAN (AUG. 31) - Rebels have killed about 200 West Africans living in Liberia, apparently in response to a sub-regional peacekeeping force sent to Monrovia a week ago to enforce a ceasefire in the country's civil war, the Ghana News Agency (GNA) reported Friday.

Quoting witnesses in a dispatch received here, a GNA correspondent in Monrovia said rebels of Charles Taylor's National Patriotic Front of Liberia (NPFL) had also killed an unspecified number of Ghanaians living near the port.

Ghanaian teacher Kwesi Kwateny, 36, told reporters that the rebels attacked a community of 2,500 Ghanaians living in the Barnesville Estate, about six kilometers (four miles) from the Monrovia port where the peacekeeping troops landed last Friday.

#90243d4160 08/31/1990 ~French/German News Agency

PRAGUE (AUG. 31) - Czechoslovakia is to severely cut its uranium exports to the Soviet Union and is aiming to sell almost half its production to the West instead next year, the Economic News daily said Friday.

Some 13 percent of this year's production is going to the West, and this will rise to about 45 percent next year, with the main customers being Germany and the United States, the newspaper, which is close to the

government, quoted the director general of the national uranium enterprise CSUP as sayng.

Most of the rest will be sent to the Soviet Union to be converted into fuel for Czechoslovakia's nuclear power plants, the newspaper said.

The CSUP is holding talks with several West German and U.S. concerns on exporting uranium to them, and is expecting to sign a first contract for 1991 soon with West German firm Gemeinschaftskraftwerk Neckar.

Czechoslovakia's uranium has been exclusively exported to the Soviet Union since the 1950's and under a plan adopted by the Prague authorities in November, only 6.5 percent of production was due to go to the West this year.

The decision to boost exports at a faster rate to countries able to pay in hard currency is linked to the country's deteriorating financial situation, observers here say.

#90243d4180 08/31/1990 ~French/German News Agency

MOSCOW (AUG. 31) - Two men were arrested Thursday after separate attempts to hijack Aeroflot planes over central Russia, Tass news agency reported Friday quoting interior ministry officials.

In the first incident, a drunken passenger wielding a knife and a toy pistol on an Aeroflot flight from Voronezh to Oryol, entered the crew cabin and asked to return to Voronezh.

The would-be hijacker, a 22-year-old worker who later said he wanted to go to Afghanistan, was overpowered by the crew and passengers and turned over to police.

In the other incident, aboard an Aeroflot flight between Moscow and Voronezh, a passenger stopped an air hostess as the plane was preparing to land, saying he wanted to fly to West Germany.

The 20-year-old unemployed man was arrested five minutes after the plane landed in Voronezh. No weapons were found on him.

#90243d4200 08/31/1990 ~French/German News Agency

GENEVA (AUG. 31) - This week's agricultural talks in the Uruguay Round of multilateral trade negotiations made no progress, a source close to the General Agreement on Tariffs and Trade (GATT) said here Friday.

The participants failed to reach agreement on the format of the documents on individual countries' agricultural policies which each country is due to put forward by October 15 under a timetable adopted in July.

The timetable was aimed at enabling negotiators to complete the Uruguay Round of talks by December when it is due to be completed.

The various countries will now be putting forward documents in differing formats, a GATT source said. The documents are to serve as a basis for negotiations in substance in the agriculture sector in the final phase of the Uruguay Round.

This week's agriculture talks in Geneva also discussed how to carry out reductions of domestic support to agriculture, but there was no sign of a rapprochement of conflicting positions.

Participants including the European Economic Community want a code to regulate such a reduction while others including Australia want to see it done on the basis of reciprocal pledges.

The negotiating group on agriculture, one of the most controversial issues in the Uruguay Round, will meet again in early October, although its next meeting had initially been scheduled for September 24.

The Uruguay Round, which began in 1986, is officially due to end with a ministerial conference in Brussels in December.

#90243d4220 08/31/1990 ~French/German News Agency
PARIS (AUG. 31) - French Agriculture Minister Henri Nallet announced a state aid package Friday worth almost 1.2 billion francs (226 million dollars) for farmers who have staged violent demonstrations and blocked meat imports to protest falling prices and drought effects.

"Nobody will be able to claim that the government is ignoring the difficulties of breeders," the minister said as he detailed the 1.193 billion franc package.

But the main farmers' union, the FNSEA, reacted with scepticism to the plan and the president of the French young farmers' grouping, Philippe Mangin, said the measures were "insufficient".

According to the minister, the breeders would have total potential benefits of 3.1 billion francs (500 million dollars) at their disposal as a result of the state package.

The measures notably provide for a postponement of social welfare

contributions, costing the state a total 14 million francs (2.6 million dollars).

Breeders would also be able to buy more than a million tonnes of cheap fodder, to be subsidized by the state with some 670 million francs (127 million dollars).

The government would set aside a budget for special loans to breeders and other measures to ease their financial burden caused by the drop in lamb and beef prices.

Mr. Nallet's package meets the breeders' main demands, but some had also been calling for a ban on meat imports which the minister did not mention on Friday. They charged that French prices had become depressed as a result of Britain and East Germany dumping low-priced beef and lamb on the market here.

FNSEA president Raymond Lacombe said the measures announced Friday "did not reflect the scope of the crisis".

While the measures concerning drought relief were a step in the right direction, "the basic problem on the lamb and beef crisis remains untouched, as the organisation of markets on a national and (European Economic) Community level should be reviewed", Mr. Lacombe said.

Mr. Nallet's announcement came two days after 200,000 farmers blocked roads,
 sprayed meat consignments with diesel fuel and dumped manure outside administrative buildings in a national day of protest on Wednesday.

On Friday, the protests continued, as a group of farmers in the French Alps at Serre intercepted a British truck and destroyed 65 lamb carcasses, local police said.

Some 300 farmers in Tonnerre, south of Paris, where Mr. Nallet is mayor, set a dozen bulls free in the streets.

The French minister for European affairs, Edith Cresson, warned on Thursday that the breeders' protests violated European Economic Community principles.

#90243d4270 08/31/1990 ~French/German News Agency
KATHMANDU (AUG. 31) - Extreme left-wing factions within the Nepal Communist Party held a protest rally here Friday which observers said attracted surprisingly high support.

The demonstration called for ''action against those supressing the people's movement of February to April'' - a reference to widespread protests which prompted constitutional reform.

The party's Mashal and Fourth Convention factions, plus their affiliated labour unions, had been considered extremists with little popular support.

Observers said Friday's rally came as an eye-opener, with several thousand people taking part despite a widespread fear that there would be violence.

Observers said the Nepali Congress and the National Democratic Party of the former Panchayat leaders will take the support as a warning in the run-up to a general election due within nine months.

A main reason for the protest was to call for abrogation of the 1950 Nepal-India treaty on which India says its relations with Nepal are based, and which most Nepalese consider unequal.

Even Prime Minister Krishna Prasad Bhattarai, known for his pro-Indian stance, spoke soon after taking assuming office in April in favour of ''revision of the treaty which is now 40 years old''.

However, soon after his return from India in June, Bhattarai said the treaty was ''working well''.

Astrologers were meanwhile working out an auspicious hour, in accordance with Hindu tradition, for presenting the newly-drafted constitution to King Birendra sometime this weekend.

There was widespread speculation that the commission drafting the constitution would remove Nepal's status as a Hindu state, prohibit all forced conversions, but still declare the cow national animal which cannot be slaughtered.

Observers say the communists have accepted retaining the monarchy by agreeing to join the interim government and send representatives to the constitutional commission formed by King Birendra.

#90243d4400 08/31/1990 ~French/German News Agency

LONDON (AUG. 31) - The British Government said Friday it was referring Credit Lyonnais' acquisition of a 45 percent stake in Anglo-Irish leasing group Woodchester investment to the monopolies commission because the French bank was state-controlled.

"The implications of Woodchester coming under the influence or control of a bank which is itself state-controlled and the fact that the French

Government controls or influences other financial institutions operating in the UK raised issues of public interest which warranted investigation," an official statement said.

News of the move sent Woodchester stock plunging 10 percent on the London stock exchange, to 135 pence from 150 at Thursday's close.

Trade and Industry Minister Peter Lilley's decision to refer the deal to the Monopolies and Mergers Commission was in line with a warning he gave on taking office last month that he would take into account whether a foreign company was state-controlled before giving the green light to its acquiring a stake in a British company.

He had stressed that nationalised companies did not suffer the same competitive and financial constraints as private enterprise and could therefore benefit from unfair advantages, and pledged not to allow "nationalisation by the back door."

Britain's Conservative Government has since coming to power in 1979 carried out a policy of privatising state-owned industry.

Credit Lyonnais had acquired a 29.8 percent stake in Woodchester in December and had announced in June that it planned to boost this to 45 percent.

Friday's decision aroused concern among French businessmen here. The move was shocking because of "the mixture of surprise, the way the decision was presented and the sector chosen," one said.

Woodchester Investments is officially an Irish company, although it has several British subsidiaries, and Credit Lyonnais' 45 percent stake would give it only between one and 1.5 percent of the British leasing market, said Jean-Claude Goubet, the French bank's director general in London.

Mr. Lilley's decision was also seen as surprising as on the same day he gave the green light for another French state-owned concern, Thomson-CSF, to acquire British group Link Miles.

The move to refer the Woodchester deal to the Commission was also against the advice of the director-general of Fair Trading, Sir Gordon Borrie, who had recommended it be given the green light.

The Monopolies and Mergers Commission is due to deliver its report on December 28.

French state-owned companies have heavily boosted their presence in Britain in recent years, with a total of eight acquisitions worth a total 1.52 billion European Currency Units (ECU's, 1.97 billion dollars) last year

alone.

Rhone-Poulence has acquired RTZ Chemicals while insurance giant GAN took over insurance concern General Portfolio, while Usinor Sacilor is in the process of taking a 20 percent stake in steel group USD.

The British authorities have also shown concern over the level of French investment in Britain's privatised water industry, and Compagnie Generale des Eaux has recently been ordered to cut its stake in one regional water concern.

#90243d4690 08/31/1990 ~French/German News Agency
OSLO (AUG. 31) - Norway has decided to buy Mistral air defence missiles for its navy from French concern Matra under a 400 million kroner (66 million dollar) contract, the Norwegian defence ministry announced Friday.

Matra is to buy Norwegian industrial goods for 75 percent of the amount, mainly from companies Raufoss, Norwegian Defence Technology and Auto Display.

Deliveries of light air defence missiles and launchers for use on naval vessels will begin in 1994 and continue throughout 1996.

France and Norway committed themselves in an agreement in 1987 to closer cooperation in the fields of industry and defence technology.

The Mistral deal is the first major defence contract after France decided to buy substantial amounts of Norwegian gas. The Norwegian army and air force have chosen the Swedish air defence system Robot-70.

France has repeatedly expressed concern that Norway did not fulfil its obligations as agreed in the 1987 accord.

The Norwegian navy stressed that Mistral was chosen for purely professional reasons and would not comment on the political aspects of the contract. The navy ranked Mistral ahead of Robot-70 and the U.S. Stinger missile.

-30- 1373
#90243d4700 08/31/1990 ~French/German News Agency
EINDHOVEN, Netherlands (AUG. 31) - Dutch electronics giant Philips is to pull out of the European "Jessi" project to develop a new generation of microchips, the evening newspaper NRC Handelsblad said Friday.

Philips spokesman Jacques Reemers refused to comment on the report, saying "I can only refer you back to our previous statements, that details of the

(group's) restructuring plan will not be made public until September."

Philips president Jan Timmer had outlined in early July a major restructuring plan aimed at turning around loss-making computer operations and said this would have "consequences" for the firm's participation in some European projects.

NRC Handelsblad said that as part of the restructuring plan Philips would be abandoning development and production of the new generation of microchips which would considerably boost computers' capacity.

Philips would be pulling out of the Joint European Submicron Silicon (Jessi) project to develop the chips, part of the wider Eureka programme.

The Dutch group along with Siemens of West Germany and Franco-Italian concern SGS-Thomson are financing 50 percent of Jessi, whose total cost over seven years is estimated at some four billion dollars.

Philips will also be pulling out of another microchip project, Megaproject, which it began with Siemens in 1984 and in which it has invested 1.6 billion guilder (almost one billion dollars), NRC Handelsblad said.

The project involved Siemens developing a four-megabit dynamic random access memory (DRAM) chip while Philips developed a one-megabit Static random access memory (SRAM) chip.

Philips had begun small-scale production of SRAM's at Eindhoven last year as planned, but the short-term need of the electronics industry for such chips proved much less than had been forecast.

A new plant built by Philips at Nimegue in the east of the country for mass production of the new generation of microchips, at an investment of 600 million guilder (352 million dollars) has only been used to produce microchips of the current generation, and plans to build a second plant in Hamburg have never been carried out.

#90243d4910 08/31/1990 ~French/German News Agency

MOSCOW (AUG. 31) - Thousands of protesters Friday took to the streets of the Soviet city of Ufa to demand the closing of the Khimpron chemical complex where an accident last week injured at least 110 people.

Speakers at the anti-goverment protest, who said the accident was an environmental disaster, said the government of Bashkir autonomous republic (in southern Russia) was incapable of standing up to Moscow.

"We have no confidence in the Bashkir government" which is "led around by

the nose" by central government ministers, TASS news agency quoted one demonstrator as saying.

Ufa is the capital of the Bashkir autonomous republicwouthern Russia.

Another speaker said if the ecological problems were not solved in the immediate future, "we are going to solve them ourselves, right now."

A blast last week in one part of the complex that produces synthetic alcohol started a fire that spread for five hours throughout the chemical plant in Ufa.

The Tass news agency said an "extremely dangerous toxic cloud" containing dioxin formed above the city after the accident and spillage into the Ofimka River had threatened the city's water supply.

The Khimprom chemical complex has in the past manufactured Agent Orange, the defoliant used notably by the U.S. military during the Vietnam War. Dioxin is used to produce Agent Orange.

BUCHAREST (AUG. 31) - One person has died and 183 have fallen sick in a cholera outbreak in Romania's Danube delta region since July 19, the Romanian ministry of health said here Friday.

In a communique published by the daily Romania Libera, the ministry said a large number of the cases were recorded in the region of Sulina, where water-treatment works were 100 years old and the population had to drink "untreated Danube water".

Romania's gas shortage had also contributed to the disease's outbreak, as inhabitants were unable to boil water for drinking, the ministry said.

The official news agency Rompres reported that health ministry experts from Romania and Bulgaria had met in the Bulgarian town of Tolbuhin, 100 kilometres (62 miles) from the border with Romania, to study ways to tackle the problem.

Following the meeting, Romanian tourists were required to show a medical certificate before crossing into Bulgaria, Rompres said.

Meanwhile the Romanian health ministry was asked to provide Bulgaria with a weekly report on the outbreak, the news agency said.

#90243d4960 08/31/1990 ~French/German News Agency

LONDON (AUG. 31) - Sterling slumped alarmingly on world foreign exchange markets Friday, losing more than three cents against the dollar and 2.5 pfennigs against the Deutsche mark.

At 4 p.m. (1500 GMT) the pound had recovered some of its composure agaist the West German currency, quoting at 2.98 marks against 3.0086 at the close on Thursday, having dropped below 2.97 at its lowest point.

Against the dollar sterling stood at 1.89, down from 1.9210 Thursday, while against the yen it fell to 271.60 from 277.

The slide began Thursday and accelerated early Friday in Far East markets, where large sterlingyen positions were reported being dumped following a 0.75 per cent increase in Japan's discount rate to six per cent on Thursday.

European markets later took up the cudgel, with dealers citing factors ranging from weaker oil prices to rumours that sterling was to enter the European Monetary System's Exchange Rate Mechanism at 2.95 marks possibly during the coming weekend - with entry accompanied by a one per cent base rate cut.

But, "to put it crudely, traders who are long of sterling may well be starting these rumours", cautioned Giles Keating of Credit Suisse First Boston.

Analysts said that the factors which took the British currency to such heights last week all now look decidedly shaky, but that much of the fall could be attributed to profit-taking from overbought positions ahead of the weekend.

The Gulf crisis turned sterling into a "buy" because of Britain's oil self-sufficiency and because of its status as a high interest-yielding currency.

The pound's attractiveness was heightened by the dollar's fall from favour as a safe haven in turbulent times. The recession-threatened U.S. economy and the likely crippling costs of President Bush's military operation in the Gulf have weakened the mighty greenback.

But the Japanese interest rate hike is now expected to be followed by a West German rate hike, and pressure is seen building for higher world interest rates.

"Sterling is now just about the only world currency not earmarked for an interest rate hike" observed George Hodgson of Warburg Securities. "On that basis alone it looks vulnerable."

-30- 2394
#90243d5080 08/31/1990 ~French/German News Agency
LONDON (AUG. 31) - Natural rubber prices drifted back this week from highs registered the previous week.

Traders said that the climb last week had been speculative, based largely on concern about a shortage of latex grades, and that lack of consumer interest at higher levels made the gains unsustainable.

The price for Ribbed Smoked Sheet No. 1 was 537.50 pounds per tonne at this week's close, against 545 the previous week.

Sterling's sharp downturn on foreign exchange markets has made rubber more expensive for consumers here, traders added, and weaker oil prices, which improved perceived prospects for certain metals in the auto industry during the week, did nothing to support tyre-grade rubber prices.

-30- 906
#90243d5110 08/31/1990 ~French/German News Agency
PARIS (AUG. 31) - Gaz de France, the French natural gas company, will exercise its option for delivery of an extra two billion cubic meters of Norwegian natural gas a year starting in the year 2000, Industry Minister Roger Fauroux announced here on Friday.

He made the announcement during an interview on the consequences of the Gulf crisis for the French economy, and particularly in connection with France's need to diversify energy sources.

But sources at Gaz de France (GdF) said the exercise of the option, taken in 1986 at the time of signature of a contract for delivery of six billion cubic meters of Norwegian North Sea natural gas a year starting in 1993, had been decided before the current Gulf crisis.

They added that it is still too early to try to determine the impact on French gas supplies of the Gulf conflict. Efforts to cut oil consumption might lead to a rise in natural gas consumption, but a general reduction of energy consumption would affect gas as well as oil products, they noted.

For the time being, GdF expects French natural gas consumption to grow by about four per cent a year, from about 30 billion cubic meters a year now to 40 billion in the year 2000.

KINSHASA (AUG. 31) - Thirty-eight political opposition parties issued a joint manifesto here Friday which severely criticised the Zaire government's economic and social policies and demanded the immediate holding of a national conference on how to make the country properly democratic.

They accused President Mobutu Sese Seko of "raising corruption into a system of government" since his decision last April to open Zaire up to political pluralism -- about 70 parties have been formed -- and said they would boycott primary polls scheduled for next year.

The manifesto was presented at a press conference by Ileo Nsongo Amba, head of the Democrat and Christian Social Party. Prominent among other party chiefs present were two former Mobutu ministers, Nguza Karl-i-Bond who heads a four-party Union of Independent Republicans, and Mungul Diaka, leader of the Democratic Movement for the Republic.

The parties asked for access to radio and TV and said the present parliament should be dissolved because it was too dominated by the old ruling party. They also wanted a committee formed to draft a new constitution and a new interim government which would be neutral and representative of all Zaire's political hues.

MOSCOW (AUG. 31) - With only a week to go before parliament is to debate economic reform, the Soviet leadership still has no single plan for transition to a market economy, President Mikhail Gorbachev said here Friday.

Mr. Gorbachev told a pressconference that more time is needed to reach agreement on a single set of proposals, and he underlined the need to prepare the country before embarking on radical economic reform.

"One shouldn't just move over to a market economy without having solved the problem of economic stabilisation," he said.

"It is necessary to preserve economic links by way of administrative measures", he said, speaking of the state's role in preventing utter dislocation of the existing economic system before a new one is created.

A committee has been given a week to hammer out a single approach to reform from those offered by various economic commissions, Mr. Gorbachev said following two days of talks with advisors within the Presidential Council and the Council of the Federation.

LILLE, France (AUG. 31) - Ferry company P and O said here Friday it was to invest more than two billion francs (377 million dollars) in building four new super-ferries for cross-Channel services to Dover in England.

The new ferries, which will be able to carry 120 trucks and 200 passengers, will be built at the Schichau Seebeckwerft shipyard at Bremerhaven in West Germany and will be delivered from 1991.

They will be 120 metres (396 feet) long and have a top speed of 21 knots.

P and O, which carried 11 million passengers and 1.8 million vehicles last year, has ordered the new ferries to cope with a 10 per cent increase in freight traffice this year on routes out of Dover, the statement said.

BAGHDAD (AUG. 31) - Iraq is waiting for authorization from Britain and France for Iraqi civilian planes to land in London and Paris for the evacuation of foreign women and children detained here, an Iraqi official said Friday.

Naji al-Hadithi, director of the information ministry, said Iraq had also demanded that the aircraft should be refuelled in the two Western capitals and should fly back to Baghdad with Iraqis trapped there.

(In London, the British Foreign Office dismissed Baghdad's claim that any Iraqi nationals were stranded in Britain as "absolutely absurd" and "ludicrous."

("If Iraq wants to bring Iraqis back that's perfectly fine," a spokesman said. "They are absolutely free to leave."

(Asked earlier if refuelling Iraqi airliners here that were transporting British hostages back to Britain would technically amount to a breach of sanctions, another spokesman said London would regard the operation as "humanitarian" but gave no further details.

("Our primary concern is to ensure that our nationals who are able to leave Baghdad be allowed to do so as soon as possible," he said, adding that the situation in Baghdad remained "very confused.")

KATHMANDU (AUG. 31) - More than 10,000 people joined a protest march in

Kathmandu Friday, shouting anti-government and anti-India slogans, as several hundred Nepalese riot police stood by.

Nepalese Communist Party activists, workers, peasants and college students took part in the march round the city, shouting slogans like "hang the facist Panchayat leaders" and "let sovereignty be transferred to the public."

Helmeted riot police were seen lining the route of the march leading to the Royal Palace and other public buildings, but they did not interfere in the demonstration.

The protestors also demanded the cancellation of a joint declaration made in New Delhi on June 10 by the prime ministers of Nepal and India normalizing ties between the two countries. Protestors said the accord violated Nepal's economic and political interests.

Later the demonstrators held a public meeting in the centre of Kathmandu under the chairmanship of Nara Bahadur Karmacharya, one of the leaders of the Nepalese Communist Party.

Together with other communist leaders, he strongly criticised Nepal's interim government for its failure to control runaway inflation and for agreeing to the joint declaration.

The interim government took power in April amid massive protests after three decades of rule under the partyless Panchayat system.

The speakers warned of serious consequences if sovereignty was not transferred from the king to the people.

The protest march came just 48 hours before the planned submission of a new draft constitution to King Birenda by the chairman of the Constitution Recommendation Commission, Biswo Nath Upadhyay.

Political observers here believe the demonstration was meant to serve as a warning to the panel and the king that the new constitution must fulfill the aspirations of the people.

#90243d5610 08/31/1990 ~French/German News Agency

BANGKOK (AUG. 31) - In a challenge to Thailand's ruling coalition government, former defense minister Chaowalit Yongchaiyuth announced here Friday that he would form a new political party.

Mr. Chaowalit, who despite holding no official post is considered one of the most powerful figures in the country, delivered a scathing attack on

the elected government, which has been shaken by allegations of corruption.

He pledged that his new party would set an example during what he said was a time of uncertainty following a major cabinet reshuffle by Premier Chatichai Choonhavan to clean up the image of his government in the face of allegations of corruption.

#90243d5730 08/31/1990 ~French/German News Agency

BAGHDAD (AUG. 31) - Iraq has mounted an ambitious self-sufficiency project aimed at cultivating every inch of arable land in a bid to defeat the international embargo.

Officials here said Friday that because of Iraq's wealth in water resources, land and infrastructure it could double agricultural production over the coming winter and even become an exporter of foodstuffs.

Agriculture Minister Abdel Wahab Mahmoud, quoted by Ath-Thawra newspaper, said the project would focus on basics such as corn, maize and barley. Ministry experts have been sent to the countryside to supervise the projects.

Iraq could cultivate as much as 48 million dunums (around 1.2 billion square metres or 1.4 billion square yards) of land, compared to the 13 million dunums being cultivated at present, according to official statistics.

It was not clear if the statistics included Kuwait, which Iraq has now claimed as its 19th province.

The agriculture ministry issued directives two weeks ago for investors and farmers to make full use of the land they have been allocated or risk having it taken away.

In early August, the government decided to increase the price it pays for agricultural products by up to 50 per cent, as part of its campaign to encourage growth in production.

Agricultural experts said Iraq was not suffering from a severe shortage of fruit or vegetables, but corn was scarce. It could achieve self-sufficiency if extra land is cultivated, with new harvests taking between five and six months.

Large tracts of land in the north could be watered by rainfall alone, according to Iraqi officials.

Iraq has over the last decade built several dams and other irrigation

works, reportedly enough to water all the fertile land of the north, centre and south of the country.

Iraqi authorities will from Saturday ration basic foodstuffs because of the international trade embargo after the August 2 military intervention in Kuwait.

#90243d5760 08/31/1990 ~French/German News Agency

NEW YORK (AUG. 31) - Romanian Prime Minister Petre Roman, whose government has been repeatedly criticized by Washington for its treatment of opposition demonstrators, said he wants to visit the U.S. capital to defend himself.

"I want to go because I want to be questioned by the congressmen and senators," he said in an interview published Friday in The New York Times.

"I want to be really there to answer every question and every criticism directly in the pure American style," he said.

The administration of President George Bush sharply criticized Mr. Roman's government for incidents in June when pro-government miners, called into the capital by authorities during anti-government demonstrations, beat up scores of protesters.

It was not immediately clear if the Bush adminstration was prepared to back a visit by the Romanian leader.

#90243d5800 08/31/1990 ~French/German News Agency

CAIRO (AUG. 31) - Egypt lowered its oil prices by five dollars a barrel on Friday, following OPEC's decision to boost production, the Egypt Petroleum Office announced.

Here are the new Egyptian prices:

- Gulf Crude 25.80 dollars - Suez Crude 25.50 dollars - Balaim 24.50 dollars - Ras Badran 23.50 dollars - Ras Ghareb 23.20 dollars

Egypt is not a member of the Organisation of Petroleum Exporting Countries and sets its prices depending on market developments, although it follows OPEC directives.

OPEC oil ministers agreed Wednesday in Vienna on a temporary increase in output. Since the agreement, market prices have fallen from highs of more than 30 barrels per barrel.

#90243d5910 08/31/1990 ~French/German News Agency
LONDON (AUG. 31) - Two British detectives were returning to Kenya Monday to make further inquiries into the murder of a British woman, Julie Ward, who was killed in a safari park two years, Scotland Yard said here Friday.

A spokesman said Detective Superintendent Graham Searle and Detective Inspector David Shipperlee of Scotland Yard's international and organized crime branch would remain in Kenya "for as long as it takes" to complete their inquiries.

The two detectives spent a month in Kenya in March after an inquiry ruled that Miss Ward, 28, had been murdered and not eaten by wild animals as originally stated by Kenyan police.

The two also prepared a report on the killing for Kenya's attorney general, Matthew Muli, but it was apparently insufficient for Kenyan police to take action on.

Miss Ward's charred remains were found in September 1988 at the Masai Mara game reserve near Nairobi a week after she disappeared. Two game park rangers were detained for questioning but later released without charge.

The report prepared by the detectives recommends prosecution of two Kenyan game park rangers for Miss Ward's kidnap and murder but there were no further details available on its contents.

Miss Ward's mother, Janet, welcomed the news that British detectives were returning to Kenya for further investigations.

"Naturally we are very pleased they are going back. We hope something concrete comes of it," Mrs. Ward said.

ROME (AUG. 31) - A total of 173 foreign women and children who had been trapped in Iraq left Baghdad Friday en route for the Jordanian capital Amman and London, the Italian Foreign Ministry said Friday.

A spokesman for the ministry said that most of those who left Iraq were British.

-30- 477
#90243d6340 08/31/1990 ~French/German News Agency
DHAHRAN, Saudi Arabia (AUG. 31) - The commander of U.S. forces in Saudi Arabia warned here Friday that the Iraqi general command, whom he described as "thugs," would pay a heavy price if they attacked.

"If the Iraqis are dumb enough to attack, they are going to pay a terrible price," General Norman Schwartzkopf said, addressing his first press conference since the start of the U.S. military deployment in the kingdom on August 7.

"Each and every day, we are less threatened because we are stronger," said the general, adding that he was "extremely confident in the weapons we have."

Gen. Schwartzkopf reasserted that the United States would not strike first. "There won't be a war if they don't attack," he said, referring to the Iraqi army's general command as "thugs."

The Saudi and U.S. military commands were separate, but they "work very closely ... and meet several times a day," the general said. "Each of us knows exactly what to do in the event an (Iraqi) attack occurs."

Asked about the thousands of foreigners detained in IrN7 as "humtU shields " he said, "As the military commander in this theatre, what I have to do is to plan the military campaign ... and not concern myself with the hostages."

Gen. Schwartzkopf defended the U.S. military intervention and its deployment of an estimated 60,000 troops in Saudi Arabia, condemning the Iraqi invasion of Kuwait on August 2 as "not only a mugging but a rape."

He said threats of chemical warfare from Iraq were "our principal concern",

but added that chemical weapons were less effective in desert conditions and that U.S. troops had the best equipment in the world to protect themselves.

#90243d6630 08/31/1990 ~French/German News Agency

MOSCOW (AUG. 31) - Soviet President Mikhail Gorbachev said here Friday that the U.S. military presence in Saudi Arabia was in accordance with the U.N. charter, and that Iraqi President Saddam Hussein was mainly responsible for the Gulf crisis.

Fielding questions at a press conference, he said that the growing U.S. military presence in the Gulf was "loaded with unpredictable consequences" and warned all parties involved to be "responsible", so as not to trigger war.

But Mr. Gorbachev was quick to explain that, far from expressing opposition with Washington, the Soviet attitude was one of collaboration with the United States.

He spoke of the permanent contact between Washington and Moscow, and said the U.S. intervention in the Gulf was "in accordance with the charter of the United Nations."

Mr. Gorbachev appeared to be moderating earlier Soviet criticism of the U.S. military buildup in the Gulf, notably from the Soviet deputy foreign minister, Alexander Belonogov, and the military chief of the Warsaw Pact, Soviet General Vladimir Lobov.

In an interview this week with the Soviet news agency Tass, Gen. Lobov said the U.S. deployment in the Gulf threatened the strategic balance on the southern flank of the Soviet Union.

Mr. Belonogov told the foreign relations committee of the Soviet parliament Thursday that the U.S. presence in the Gulf was "explosive".

Moscow could not support the U.S. presence because it was "explosive" in the short term, and in the long term Moscow could not be sure that the U.S. would withdraw from Saudi Arabia "after the crisis".

-30- 1807

#90243d6730 08/31/1990 ~French/German News Agency

HONG KONG (AUG. 31) - Soviet Foreign Minister Eduard Shevardnadze arrived in Harbin, China, late Friday for talks with his Chinese counterpart, Qian Qichen, on the Gulf crisis and Cambodia, New China News Agency said.

In a report monitored here, NCNA said Mr. Shevardnadze and his delegation were greeted at the airport of the northeastern Chinese city by Mr. Qian and other top officials.

The two ministers are expected to hold two hours of talks Saturday.

The Soviet Embassy in Beijing said last week that Mr. Shevardnadze's "working visit" would be devoted to "urgent" international questions.

Bilateral relations -- especially trade increases and the demilitarisation of the Sino-Soviet frontier -- were also be given priority at the talks.

Until 30 years ago, Harbin boasted the largest expatriate Russian community. Its population comprised mainly white Russians who fled the 1917 Russian revolution.

The Saturday talks were to focus on the peace initiative in Cambodia following the acceptance of the U.N. Security Council's peace proposal by the Chinese-backed opposition in Cambodia, and indications from the pro-Vietnamese Phnom Penh regime that it would also accept it.

The United States, the Soviet Union, China, France and Britain make up the five permanent members of the council.

Mr. Shevardnadze planned to take a boat trip Saturday afternoon on the Soungari, a tributary of the river Amur which marks the Sino-Soviet border and to visit Stalin Park before flying to North Korea on Sunday morning.

Saturday's meeting is being presented by both sides as an example of the new dialogue between Moscow and Beijing created by the normalisation of bilateral relations in May 1989.

-30- 1919

#90243d6920 08/31/1990 ~French/German News Agency

AMMAN (AUG 31) - Iraqi Foreign Minister Tarek Aziz said here Friday that foreigners would be allowed to leave Iraq if U.N. Secretary General Javier Perez de Cuellar could guarantee that Iraq would not be attacked.

Speaking at a press conference following two meetings with Mr. Perez de Cuellar, he said he had asked the U.N. Secretary-General "to seek guarantees" that countries with troops in the Gulf would not start a war with Iraq.

"If such guarantees are obtained, the situation of foreign nationals in Iraq will be resolved," he said.

Mr. Aziz repeated previous assurances from Iraqi President Saddam Hussein

that women and children being held in Iraq were free to leave.

Mr. Perez de Cuellar spoke at the press conference of a "step forward" in the "humanitarian aspects" of the hostage situation.

He added that the release of all foreigners held in Iraq would help to ease tensions, but would not eleborate.

Sources close to the U.N. and Iraqi delegations said the two sides would hold a last session of talks Saturday, after which they were expected to hold separate press conferences.

Mr. Perez de Cuellar and Mr. Aziz met initially for two hours behind closed doors, then were joined by their delegations for another two-and-a-half hours of discussions.

The U.N. chief, emerging from the first session, said the talks were "very useful," while Mr. Aziz said there was much to discuss in the meetings, which took place at an administrative building in the grounds of the royal palace.

Mr. Perez de Cuellar has stressed his mission was not to negotiate but to discuss ways of securing an Iraqi commitment to withdraw from Kuwait and release foreigners, as stipulated in U.N. Security Council resolutions.

The talks in the Jordanian capital have been billed as a last chance to avert war in the Gulf. But Baghdad has shown no sign of easing its hold on Kuwait, which it annexed August 8 and then proclaimed as its 19th province.

The Moslem Brothers, an Islamic fundamentalist group whose members make up a quarter of Jordan's 80-seat parliament, organized a rally Friday in central Amman to condemn "American-Zionist aggression against the Arab world."

Thousands of people took part in the demonstration, during which speakers called for Moslems to "confront the growing menace."

-30- 2546

#90243d7200 08/31/1990 ~French/German News Agency

WASHINGTON (AUG. 31) - The skyrocketing cost and the long-term goal of the U.S. military buildup in the Gulf will come under intense scrutiny when Congress reconvenes next week after a month-long recess.

The shock waves from the August 2 Iraqi invasion of Kuwait have pushed aside what until then had been the Number One issue on the nation's agenda: efforts to curb the nation's astronomical budget deficit.

Before the Iraqi invasion, U.S. administration officials estimated the deficit for fiscal 1991 -- which starts October 1 -- would reach 168.8 billion dollars, 68.8 billion dollars more than their previous estimate six months earlier.

These figures will no doubt have to be revised upwards as a result of the massive U.S. military commitment to defend Saudi Arabia and roll back the invasion of Kuwait.

Defense Secretary Dick Cheney said in a television interview that the cost of Operation Desert Shield in support of the Saudi kingdom would cost around one billion dollars a month once all the forces -- estimated at 200,000 -- had been deployed to Saudi Arabia and the Gulf region.

Representative William Gray, a leading Democrat in the House of Representatives, said the cost of deployment could range between 10 billion dollars and 15 billion dollars for this year. He called on Congress and the president to reassess the need for such costly strategic weapons programs such as the B-2 bomber.

Despite bipartisan support in Congress for President George Bush's military moves, there is clear unease among many lawmakers not only about the cost of the operation but also about its long-term objectives and possible high U.S. casualties if war breaks out.

Appearing on the ABC television network Friday, Senator Larry Pressler noted that Western Europe and Japan were much more dependent on Middle East oil than the United States. He warned that unless these countries contributed substantial financial aid or more ground troops to the multinational effort,

there would be a rapid erosion of public support for the U.S. commitment in this country.

-30- 2301

#90243d7290 08/31/1990 ~French/German News Agency

BEIJING (AUG. 31) - China has called for energy savings and a switch to energy sources other than oil in response to rising oil prices caused by the Gulf crisis, the China Daily said Friday.

The China National Chemicals Import and Export Corporation (Sinochem), which monopolises the country's oil imports and exports, has advocated a nationwide campaign on energy saving, the English-language newspaper said.

Crude oil prices jumped to more than 30 dollars a barrel on the international market last week, compared to around 21 dollars before Iraq's August 2 invasion of Kuwait.

"Oil prices may ride high over a period of time," the daily quoted Jiang Yunlong, deputy general manager of Sinochem International Oil Co Ltd, as saying.

China might reduce imports if prices remained at the present level, Mr. Jiang said.

China produced 137 million tonnes of oil in 1989, according to the official statistics of the Chinese Ministry of Energy Resources.

In the first seven months of this year China imported 2.3 million tonnes of crude oil and in the same period exported 12.3 million tonnes of crude oil and 2.7 million tonnes of petroleum products.

KENNEBUNKPORT, Maine (AUG. 31) - A superpower summit between President George Bush and Soviet leader Mikhail Gorbachev to discuss the Gulf crisis "would be useful," a senior U.S. official said Friday.

He added that he could not exclude such a summit in the near future.

"We want to make sure that the U.N. strategy stays in place ... that we have ultimate coordination," the official told Agence France-Presse at the summer White House here.

Although the official said he was not predicting such a superpower summit, when asked if he excluded the possibility, he said, "No."

#90243d7460 08/31/1990 ~French/German News Agency

TOKYO (SEPT 1) - A Japanese aircraft left here Saturday for Amman to pick up 68 Japanese women and children who were expected to be flown to the Jordanian capital by a special Iraqi plane from Baghdad, airport officials said.

The Japan Air Lines (JAL) DC-10 jet with 239 seats will arrive at Amman via New Delhi at 1315 GMT, the officials said.

There are 84 women and children in Baghdad and 68 of them, excluding 12 related to Japanese embassy staff, are expected to be given permission to leave the country, according to foreign ministry officials.

If the Iraqi plane lands at Amman airport before the JAL DC-10 arrives, it is scheduled to leave Amman at 1535 GMT.

The foreign ministry officials said that the JAL plane may carry some other foreign nationals who were released by Iraq.

The 68 women and children all flew to Baghdad from Kuwait together with the rest of their families on Wednesday and Thursday last week.

After their arrival, they had immediately been detained in a Baghdad hotel by Iraqi authorities and were later taken to military and other facilities.

Only women and children were taken back to the Baghdad hotel Thursday, while a total 143 men were still detained at unknown strategic locations, according to the foreign ministry officials.

#90243d7530 08/31/1990 ~French/German News Agency

NICOSIA (SEPT 1) - Two envoys from Tunisian President Zine el-Abidine Ben Ali arrived Friday in Baghdad with a message for Iraqi President Saddam Hussein, the INA news agency reported, monitored here.

Tunisian Justice Minister Chedli Naffati was accompanied by the general secretary of the opposition Socialist Democrat Movement, the agency said.

Mr. Naffati was later to go on to Saudi Arabia with a message from Mr. Ben Ali for King Fahd, INA added.

The Tunisian government on Wednesday announced that representatives of the legal opposition would be among envoys despatched to several countries, including Iraq, Saudi Arabia and Yemen, in a bid to promote a peaceful settlement of the Gulf crisis.

Tunisia has condemned Iraq's August 2 invasion of Kuwait, but abstained from a vote at the subsequent Arab summit in Cairo which ended with a majority of the attending countries supporting the deployment of Arab, other Islamic, and Western military forces to the Gulf.

#90243e0002 08/31/1990 ~Latin America New Agency

Madrid (AUG. 31 EFE - Three bank accounts belonging to a deceased leader of Colombia's notorious Medellin cocaine trafficking cartel have been frozen in Spanish banks, according to a report Friday in the daily El Pais.

El Pais said the accounts, which belonged to suspected Medellin cartel number two Gustavo Gaviria, were discovered in banks in Madrid and the northern town of Gijon and contained dlrs 1.1 million.

Gaviria, cousin of fugitive Medellin kingpin Pablo Escobar, was killed earlier this month in a shootout with Colombian anti-narcotics security forces.

Police found documents at Gaviria's home which showed he carried out financial transactions under the assumed name of Jesus Rivero Garcia.

Colombian authorities sent the information to Spanish police, who discovered that the drug trafficker's assumed name figured on a list of suspected drug kingpins who had opened bank accounts in Spain.

The Medellin cartel is Colombia's largest and richest narcotics gang.

#90243e0011 08/31/1990 ~Latin America New Agency

BRUSSELS (AUG 31) EFE - The European Community Friday decided to provide some dlrs 1.7 million to help bring home tens of thousands of Egyptian refugees trapped in Jordan after fleeing Iraq and Kuwait, EC officials said.

The EC aid will provide ferry transport for some 6,000 Egyptians and 1,000 vehicles daily from the Jordanian port of Aqaba to Egypt for ten days.

Since the mass exodus of Egyptians from Iraq and Kuwait began this month, the EC has financed bus journeys from the Iraqi border with Jordan to Amman and Aqaba from where the refugees were then flown to Cairo.

Total EC humanitarian aid to Persian Gulf nations bearing the brunt of the August 6 United Nations trade embargo on Iraq and Kuwait has reached about dlrs 7.3 million.

Individual members of the 12-nation group have also sent financial aid.

The EC decision for more aid comes a day after British Prime Minister Margaret Thatcher slammed European nations for not pulling their weight militarily to help the United States pressure Iraq into withdrawing its troops from Kuwait.

#90243e0016 08/31/1990 ~Latin America New Agency

LISBON (AUG 31) EFE - A third round of peace talks between the Angolan government and U.S.-backed UNITA rebels ended in failure Friday, Portuguese officials said.

Portuguese Foreign Affairs Secretary of State Jose Manuel Durao Barroso said the process to ending Angola's 15-year civil war was "long and

complex" and that it was natural to have both advances and set backs.

But negotiators agreed to convene for a fourth round of meetings in September at an unspecified location.

Barroso said the refusal of the ruling leftist Popular Movement for the Liberation of Angola (MPLA) to recognize the National Union for the Total Independence of Angola was the main stumbling block to a ceasefire accord.

The closure of the meetings, which opened Monday 10 km outside Lisbon, coincided with the release of a statement by UNITA accusing government troops of launching air attacks on rebel headquarters in southern Angola.

UNITA charged that four Soviet-made Mig-23 fighter planes staged the attack near Mucusso, on Angola's border with Namibia.

#90243e0018 08/31/1990 ~Latin America New Agency

FREETOWN (AUG 31) EFE - Liberia's National Patriotic Front (NPF) rebels kidpnapped the Guinean ambassador to Monrovia and 40 others Friday, diplomatic officials in neighboring Sierra Leone reported.

NPF leader Charles Taylor had threatened on a number of occasions to take the ambassador captive in retaliation for the Guinean government supposedly supplying arms to Liberian President Samuel Doe.

Taylor has waged an eight-month civil war to oust Doe.

The kidnapping took place hours after Guinean Foreign Minister Jean Traore denied that his government supplied weapons to the beleaguered president.

A West African peace-keeping force was Friday to begin evacuating some 7,000 African foreigners stranded in the country.

Sources in the Economic Community of West African States' (ECOWAS) peace-keeping force said they would continue to supervise a cease-fire and help install a provisional government charged with calling free elections within the next 12 months.

In protest at the intervention, Taylor ordered the detention of thousands of nationals from ECOWAS countries living in Liberia.

But Taylor said Friday that the 2,000 citizens of Gambia, Ghana, Nigeria and Sierra Leone were not hostages but would serve to prevent an attack on the NPF. He also denied earlier reports that he would begin executing them.

The ECOWAS' 3,000-strong force, helped by rebels led by Taylor's rival

Prince Johnson, have launched an offensive on NPF forces and consolidated positions in the center of Monrovia.

Taylor has called the ECOWAS troops an "occupation force" which wants to prevent his victory over Doe.

#90243e0020 08/31/1990 ~Latin America New Agency

BUENOS AIRES (AUG 31) EFE - Former Argentine president Raul Alfonsin dubbed the current administration "callous and inhuman" in anticipation of its new economic austerity plan, Buenos Aires press reported Friday.

Alfonsin, leader of the opposition Radical Civic Union and president from 1983 to 1989, charged that "perhaps there had never been" an government in Argentina "so callous and inhuman" as the present one.

President Carlos Menem's government is to announce later Friday an economic austerity plan which includes massive lay-offs of state workers to reduce the size of the public sector to what it was 25 years ago and other measures aimed at slashing the budget deficit.

Alfonsin criticized Menem's inability to apply social policies to soften the effects of his economic changes which make those who have less money pay more.

The former president said Thursday, "I have travelled the country and seen schools not working, no relief or nourishment and desperation everywhere provoked by this economic plan."

Menem has ignored warnings of uprisings and riots similar to those sparked more than a year ago due to shortages and soaring inflation.

Argentina's accumulated inflation rate for the first seven months of the year rose to 802 percent, but the government aims to bring monthly inflation rates down to below 10 percent.

The government will also be seeking to refinance its public debt of some dlrs 15 billion, as well as reduce subsidies on manufactured exports.

MOSCOW (AUG 31) EFE - Soviet President Mikhail Gorbachev pressed for urgent economic reform Friday and said his perestroika restructuring policy was facing some of its most serious challenges to date.

Speaking at a press conference in Moscow, Gorbachev stressed that the

economic situation in the Soviet Union was "really serious" and that a speedy transformation to a market economy was essential.

He said that his perestroika reforms had entered in a "phase of serious trials."

Gorbachev has met over the last two days with his Presidential Council and the Council of the Federation, made up of representatives of the 15 Soviet republics, to discuss economic reform.

The Soviet president said he was satisfied with the discussions, but that the debates at times were "dramatic."

Some 50 differing plans regarding the economy changeover were being studied, Gorbachev said.

Moscow has said a reform plan will be put before the parliaments of each of the republics within the next week.

The Soviet president also cautioned world leaders to act with diplomacy to find a peaceful resolution to the Gulf crisis.

"We have to do everything possible to avoid any political mistakes and chances for provocation," he said.

Gorbachev urged "intense consultations" with Arab allies to end tensions resulting from Iraq's invasion of Kuwait August 2 and the subsequent build-up of U.S.-led forces in the region.

He also said his Presidential Council was discussing increasing oil exports.

"We need convertible currency and that means we will work on increasing our oil exports," he said.

#90243e0028 08/31/1990 ~Latin America New Agency

PARIS (AUG 31) EFE - Albania's monarch-in-waiting, King Leka, has claimed security forces executed and buried hundreds of people in a crackdown on anti-government protests in the Albanian capital last month, French press reported Friday.

King Leka told journalists at a press conference late Thursday that some 380 anti-government protesters were rounded up during a July 2 demonstration in Tirana and taken outside the capital to be executed and their bodies thrown into mass graves.

Following the July protests, hundreds of Albanians sought refuge in foreign missions in Tirana and were later allowed to leave the country by the Communist government of President Ramiz Alia.

The Albanian monarch also claimed the Alia government infiltrated members of the Albania's secret police force into the groups of Albanians granted asylum by several European countries.

Former Communist leader Enver Hoxha ousted Albania's last monarch, King Zog, in 1946 and declared the country a republic. But King Leka has not renounced his claims to the throne.

HONG KONG (AUG. 31) XINHUA - HONG KONG TELEPHONE, A HONG KONG TELECOMMUNICATION COMPANY, WILL EXPAND ITS INTERNATIONAL DIRECT DIALLING (IDD) SERVICE TO 179 MORE CITIES ON THE CHINESE MAINLAND AS OF SEPTEMBER 1.

THIS BRINGS THE TOTAL NUMBER OF CHINESE CITIES REACHED BY HONG KONG'S IDD SERVICE TO 443.

THE 179 NEWLY REACHED IDD SERVICE CITIES ARE IN 23 PROVINCES AND AUTONOMOUS REGIONS.

LEE G. LAM, INTERNATIONAL MARKETING MANAGER OF THE COMPANY'S INTERNATIONAL TELEPHONE SERVICES, SAID THAT CHINA'S INCREASING BUSINESS RELATIONSHIP WITH OTHER COUNTRIES MAKES THE MAINLAND-HONG KONG COMMUNICATION LINK MORE VITAL.

"WE EXPECT TO SEE MANY MORE NEW IDD DESTINATIONS IN CHINA IN THE NEXT FEW YEARS," HE ADDED.

TO PROVIDE MORE CONVENIENCE TO CUSTOMERS, LAM SAID, HONG KONG TELEPHONE WILL SOON PUBLISH A COMPREHENSIVE CALLING GUIDE LISTING ALL AREA CODES OF IDD DESTINATIONS ON THE CHINESE MAINLAND WITH OTHER USEFUL CALLING INFORMATION.

MEANWHILE, HONG KONG'S DIRECT DIALLING TO ALBANIA WILL ALSO BE AVAILABLE STARTING TOMORROW.

NEW DELHI (AUG. 31) XINHUA - THE INDIAN GOVERNMENT HAS APPROVED A PROPOSAL TO CONSTRUCT A 1,330 KILOMETER-LONG PETROLEUM PRODUCT PIPELINE IN THE NORTHWEST REGION OF THE COUNTRY.

THE PETROLEUM MINISTER, M.S. GURUPADASWAMY, SAID ON THURSDAY THE PROPOSED PIPELINE FROM KANDLA (IN GUJARAT) TO BHATINDA (IN PUNJAB) WILL ENABLE UNINTERRUPTED SUPPLY OF PETROLEUM PRODUCTS TO THE NORTHWEST REGION OF THE COUNTRY.

THE PROJECT AT AN ESTIMATED COST OF 9,175.5 MILLION RUPEES (540 MILLION U.S. DOLLARS), INCLUDING A FOREIGN EXCHANGE COMPONENT OF 2,045.5 MILLION RUPEES (120 MILLION U.S. DOLLARS), WILL BE COMPLETED BY MAY 1993, THE MINISTER SAID.

THIS PROJECT WOULD BENEFIT THE WHOLE NORTHWEST AREA OF THE COUNTRY. THE MINISTER ALSO DISCLOSED SEVERAL OTHER IMPORTANT PROJECTS, INCLUDING THE

DEVELOPMENT OF MUKTA FIELD IN THE WESTERN OFFSHORE, THE KAKINADA-TATIPIKA (IN ANDHRA PRADESH) GAS PIPELINE, AND THE PROJECT OF DISTRIBUTION OF NATURAL GAS TO GREATER BOMBAY.

#90243h0058 08/31/1990 ~Chinese News Agency

COLOMBO (AUG. 31) XINHUA - A LARGE REFUGEE CAMP NOW BEING SET UP BY THE GOVERNMENT AT VAVUNIYA IN NORTHERN PROVINCE OF SRI LANKA WILL TAKE IN REFUGEES FROM TODAY, ACCORDING TO THE EVENING NEWSPAPER "DAILY OBSERVER" TODAY.

A TOTAL OF 5,000 REFUGEES WILL BE TAKEN IN TO THIS CAMP INITIALLY, ESSENTIAL SERVICE COMMISSIONER GENERAL C.RATWATTE SAID.

THIS CAMP AT VAVUNIYA IS BEING SET UP AFTER THE FAILURE TO PUT UP A SIMILAR CAMP AT MANNAR IN THE SAME PROVINCE. IT WILL ACCEPT PEOPLE FROM ANYWHERE IN THE ISLAND.

HE NOTED THAT AS BY AUGUST 27 A TOTAL OF 934,501 PEOPLE WERE BEING LOOKED AFTER IN WELFARE CAMPS WITHIN 10 WEEKS OF CLASHES BETWEEN THE LIBERATION TIGERS OF TAMIL EELAM (LTTE) AND THE GOVERNMENT TROOPS SINCE THE MOST POWERFUL TAMIL MILITANT GROUP IN THE COUNTRY BEGAN A FRESH OFFENSIVE AGAINST GOVERNMENT TROOPS IN JUNE THIS YEAR.

THESE PEOPLE WERE HOUSED IN 694 CAMPS MAINLY IN THE NORTH, EAST, ANURADHAPURA (NORTHERN CENTRAL PROVINCE), POLONNARUWA AND COLOMBO.

IT WAS LEARNT THAT THE GOVERNMENT SPENT A TOTAL OF 30 MILLION RUPEES (0.75 MILLION U.S. DOLLARS) A DAY TO LOOK AFTER INMATES AND PROVIDE THEIR NEEDS AT THESE CENTERS.

#90243h0060 08/31/1990 ~Chinese News Agency

WELLINGTON (AUG. 31) XINHUA - SKILLED PEOPLE AND BUSINESSMEN WITH CAPITAL TO INVEST ARE TO BE THE TWO BROAD ENCOURAGED CATEGORIES OF IMMIGRANTS TO NEW ZEALAND, ACCORDING TO THE OPPOSITION NATIONAL PARTY'S IMMIGRATION POLICY.

TOUGH RULES TO ENSURE BUSINESS IMMIGRANTS WITH MONEY WILL BE PUT INTO PLACE IF THE NATIONAL PARTY WINS THE OCTOBER ELECTION, SAID OPPOSITION'S IMMIGRATION SPOKESMAN BILL BIRCH IN LAUNCHING THE PARTY'S ELECTION CAMPAIGN POLICY TODAY.

A NATIONAL GOVERNMENT WOULD MOVE AWAY FROM THE OCCUPATIONAL PRIORITY LIST AND INSTEAD ENCOURAGE PEOPLE WITH SKILLS FROM ALL ROUND THE WORLD TO COME TO NEW ZEALAND, BIRCH SAID.

CAPITAL WOULD HAVE TO BE INVESTED FOR A MINIMUM PERIOD BEFORE THE IMMIGRANT WOULD BE ELIGIBLE FOR PERMANENT RESIDENCE. AND UNDER THE BUSINESS IMMIGRANT CATEGORY, "SUBSTANTIAL CAPITAL" WOULD HAVE TO BE INVESTED IN SECURE INVESTMENTS IN GOVERNMENT, LOCAL BODY STOCK OR WITHIN THE BANKING SYSTEM OF NEW ZEALAND, THE POLICY SAYS.

TOUGHER CRITERIA AND REQUIREMENTS FOR CAPITAL INVESTMENT SIMILAR TO THOSE USED IN AUSTRALIA AND CANADA WILL BE INTRODUCED. MONITORING PROGRAMS WILL ALSO BE INTRODUCED TO ENSURE MIGRANTS HONOR COMMITMENTS MADE AT THE TIME OF THEIR APPLICATIONS. AT THE MOMENT, BUSINESS IMMIGRANTS DO NOT HAVE TO TRANSFER FUNDS TO NEW ZEALAND BEFORE VISAS ARE ISSUED AND THERE IS LITTLE MONITORING, THE POLICY NOTES.

"WE WANT TO MAKE SURE NEW ZEALAND GETS THE BENEFITS FROM THOSE IMMIGRANTS. TOUGHER REGULATIONS WILL MAKE SURE THAT BOTH SIDES HONOR THE CONTRACTS MADE," BIRCH SAID.

-30- 1717

#90243h0064 08/31/1990 ~Chinese News Agency

ACCRA (AUG. 31) XINHUA - GHANA'S EXPORT OF TIMBER PRO- DUCTS FOR THE FIRST HALF OF THIS YEAR REACHED 183,831 CUBIC METERS AMOUNTING TO 58 MILLION U.S. DOLLARS.

ACCORDING TO A PRESS RELEASE ISSUED RECENTLY BY THE GHANA INVESTIGATION CONMITTEE, GHANA PLANS TO EXPORT 370,000 CUBIC METERS OF WOOD PRODUCTS BY THE END OF THIS YEAR, WHICH WILL YIELD 116.9 MILLION U.S. DOLLARS FOR THE COUNTRY.

THE COUNTRY EXPORTED 536,213 CUBIC METERS OF TIMBER PRODUCTS IN 1988, EARNING 98.8 MILLION U.S. DOLLARS.

THE PRESS RELEASE SAID THAT IN ACCORDANCE WITH THE GOVERNMENT POLICY OF PROMOTING THE EXPORT OF MORE PROCESSED WOOD INSTEAD OF RAW MATERIALS, MORE PROCESSED WOOD HAS BEEN EXPORTED IN RECENT YEARS.

IN 1988 AND 1989, ROUND LOGS REACHED 63.2 PERCENT AND 53.4 PERCENT RESPECTIVELY OF THE EXPORT VOLUME, WHILE IT REPRESENTS 38.5 PERCENT OF THE TOTAL EXPORT VOLUME FOR THE FIRST HALF OF 1990.

WHILE OTHER NEIGHBORING COUNTRIES ARE DELIBERATELY UNDER- SELLING THEIR PRODUCTS DESPITE EVIDENCE OF OVER-CUTTING THEIR FORESTS IN A BID TO FORCE PRICES DOWN FOR THE INDUSTRIAL IMPORTERS IN THE NORTH, THE PRESS RELEASE SAID, GHANA BOLDLY TAKES STEPS TO OBTAIN MORE REALISTIC RETURNS.

THE COUNTRY'S TIMBER EXPORT TRADE ONCE RECORDED ITS HIGHEST RETURNS IN 1973 OF 138.2 MILLION U.S. DOLLARS FOR THE EXPORT OF 1.2 MILLION CUBIC

METERS OF TIMBER PRODUCTS IN THAT YEAR.

THE PROJECTED EXPORT VOLUME OF 1990 REPRESENTS ONLY 30 PERCENT OF THE 1973 FIGURE, SIGNIFYING A TREND FOR TROPICAL HARDWOODS TO REACH REALISTIC LEVELS FOLLOWING YEARS OF BEING UNDER-VALUED.

-30- 1741

#90243h0069 08/31/1990 ~Chinese News Agency

ACCRA (AUG. 31) XINHUA - PRINCE JOHNSON, LEADER OF A BREAKAWAY FACTION FROM CHARLES TAYLOR'S NATIONAL PATRIOTIC FRONT OF LIBERIA (NPFL), SUGGESTED THAT THE INTERIM GOVERNMENT IN THE WAR-TORN WEST AFRICAN COUNTRY SHOULD BE MADE UP OF CHIEFS AND ELDERS, THE "GHANAIAN TIMES" REPORTED TODAY.

JOHNSON TOLD REPORTERS IN HIS WELL-FORTIFIED BASE, SOME KI- LOMETRES FROM THE MONROVIA FREE PORT, THAT THE PROPOSED COUNCIL OF CHIEFS AND ELDERS WOULD PROMOTE NATIONAL UNITY BEFORE ELEC- TIONS, SAID THE PAPER QUOTING REPORTS FROM THE LIBERIAN CAPITAL MONROVIA.

HE SAID THAT NO CANDIDATE OF THE EXISTING POLITICAL PARTIES SHOULD BE ALLOWED TO STAND ELECTIONS BECAUSE "THEY ARE CRIMINALS."

"ALL FORMER POLITICAL PARTIES SHOULD BE PROSCRIBED AND NEW ONES FORMED NOT ON ETHNIC LINES, BUT ON PRE-DETERMINED PRIN- CIPLES," HE ADDED.

JOHNSON SAID HE FOUNDED HIS "REVOLUTION" ON THE PRINCIPLES OF EQUALITY AND JUSTICE AND WOULD NOT MIND TAKING CHARGE OF THE ARMY IN THE COUNTRY.

ACCORDING TO ANOTHER REPORT FROM MONROVIA, GENERAL ARNOLD QUAINOO, COMMANDER OF WEST AFRICAN PEACE-KEEPING FORCE IN LIBERIA, SAID THAT HIS FORCES ARE PREPARING TO EVACUATE THOU- SANDS OF WEST AFRICAN NATIONALS BY SEA FROM WAR-TORN LIBERIA.

HE SAID THAT MORE THAN 7,000 PEOPLE, MOSTLY FROM GHANA, NIGERIA AND GUINEA HAVE SO FAR REGISTERED FOR EVACUATION.

QUAINOO SAID THE GHANAIAN VESSEL "TANO RIVER" WHICH CARRIED MORE THAN HALF OF THE 4,000-STRONG PEACE-KEEPING FORCE TO MON- ROVIA LAST FRIDAY, WILL PROBABLY SAIL FOR GHANA TOAY WITH MORE THAN 6,000 GHANAIANS AND NIGERIANS ON BOARD.

#90243k0060 08/31/1990 ~Japanese News Agency

TOKYO (AUG. 31) KYODO - HOUSING STARTS INCREASED 6.3 PERCENT TO 158,367 UNITS IN JULY FOR THE FOURTH CONSECUTIVE YEAR-ON-YEAR RISE, THE CONSTRUCTION MINISTRY ANNOUNCED FRIDAY.

OFFICIALS SAID THE INCREASE RESULTED FROM CONSTRUCTION COMPANIES' EXPANDING HOUSING STARTS TO OFFSET POSSIBLE HIKES IN INTEREST RATES FOR HOUSING LOANS FOLLOWING AN ANTICIPATED RISE IN THE OFFICIAL DISCOUNT RATE.

THE BANK OF JAPAN ON THURSDAY OFFICIALLY RAISED THE DISCOUNT RATE BY 0.75

PERCENTAGE POINT TO 6.0 PERCENT. INTEREST RATES ON HOME MORTGAGES ARE EXPECTED TO FOLLOW SUIT.

THE OFFICIALS ALSO SAID THAT THE DISCOUNT RATE HIKE AND THE POSSIBLE RISE IN INTEREST RATES ON HOUSING LOANS COULD BRING ABOUT A DECLINE IN HOUSING STARTS IN SEPTEMBER.

STARTS ON SINGLE-UNIT HOUSES FELL 2.9 PERCENT TO 46,757 UNITS, WHILE RENTALS ROSE 5.2 PERCENT TO REACH 75,104 UNITS, THEY SAID.

CONDOMINIUM STARTS ROSE 25.8 PERCENT TO A RECORD HIGH 33,069.

#90243k0077 08/31/1990 ~Japanese News Agency

TOKYO (AUG. 31) KYODO - MITSUBISHI METAL CORP. ANNOUNCED FRIDAY THAT IT WILL START CONSTRUCTION LATE THIS YEAR ON A COPPER SMELTER-CONVERTER IN TEXAS, MUCH LATER THAN PLANNED.

THE DELAY HAS BECOME UNAVOIDABLE AS THE COMPANY HAS NOT YET WON U.S. GOVERNMENT APPROVAL FOR THE CONSTRUCTION OF THE SMELTER-CONVERTER, COMPANY OFFICIALS SAID.

THE OFFICIALS SAID THAT UNDER PRESENT CIRCUMSTANCES, THE SMELTER-CONVERTER WILL PROBABLY GO INTO PRODUCTION AT THE END OF 1993, ABOUT TWO YEARS BEHIND THE INITIAL SCHEDULE.

PLANS CALL FOR THE CONSTRUCTION OF THE SMELTER ON A 6.6 MILLION SQUARE-METER LOT IN TEXAS CITY, TEXAS, AT AN ESTIMATED COST OF 25 BILLION YEN.

THE SMELTER-CONVERTER WILL HAVE AN ANNUAL BLISTER COPPER PRODUCTION CAPACITY OF 150,000 TONS.

THE BLISTER COPPER WILL BE SOLD ON THE U.S. MARKET, THE OFFICIALS SAID.

#90243k0091 08/31/1990 ~Japanese News Agency

OSAKA (AUG. 31) KYODO - MIZUNO CORP. ANNOUNCED FRIDAY IT PLANS TO BUILD A GOLF CLUB PLANT SOON IN SCOTLAND.

IN CONNECTION WITH THIS, THE COMPANY IS INAUGURATING A SALES SUBSIDIARY IN THE SUBURBS OF PARIS ON SATURDAY, THE ANNOUNCEMENT ALSO SAID.

THE SCOTLAND PLANT WILL BE CONSTRUCTED IN CUMBERNAULD, IN THE SUBURBS OF GLASGOW, AND WILL GO INTO OPERATION DECEMBER 1.

THE 600,000 POUND FACTORY, WHICH WILL HAVE 30 WORKERS, WILL PRODUCE 240,000 GOLF CLUBS IN THE INITIAL YEAR.

MIZUNO HAS SO FAR SOLD ABOUT 400,000 GOLF CLUBS, PRODUCED IN TAIWAN AND SOUTH KOREA, YEARLY IN EUROPE. THE PROJECTED SCOTLAND PLANT WILL INCREASE ITS PRODUCTION CAPACITY IN THE FUTURE SO THAT ALL MIZUNO CLUBS TO BE SOLD IN EUROPE WILL BE PRODUCED BY THE PLANT, COMPANY OFFICIALS SAID.

THE FRENCH SALES FIRM'S INITIAL-YEAR SALES ARE ESTIMATED AT 13.4 MILLION FRANCS.

MIZUNO PLANS TO PRODUCE GOLF GOODS, SPORTS SHOES, TENNIS WEAR, AND OTHER SPORTING GOODS IN EUROPE IN THE FUTURE FOR SALE THERE.

THE MIZUNO GROUP EXPECTS 12 BILLION YEN SALES IN EUROPE IN 1995, OR FOUR TIMES THE PRESENT LEVEL.

#90243k0092 08/31/1990 ~Japanese News Agency

TOKYO (AUG. 31) KYODO - JAPANESE ENERGY INDUSTRIES DISAGREED OVER HOW TO TREAT A FINAL REPORT FROM THE INTERGOVERNMENTAL PANEL ON CLIMATE CHANGE (IPCC) RELEASED FRIDAY, WITH ELECTRIC UTILITIES APPROVING WHILE OIL COMPANIES DEMURRED.

AN OFFICIAL AT TOKYO ELECTRIC POWER CO. SAID POWER COMPANIES SHOULD BE PREPARED FOR A LONG-TERM COMMITMENT TO SOLVING THE PROBLEM OF GLOBAL WARMING.

''IN THIS REGARD, IT IS ESPECIALLY IMPORTANT FOR INDUSTRIAL COUNTRIES TO HELP DEVELOPING COUNTRIES, AND THAT WOULD BE IN OUR BEST INTERESTS TOO,'' HE SAID.

BUT THE OFFICIAL DISPLAYED SOME SKEPTICISM OVER THE TAXES OR SURCHARGES

IMPOSED ON CARBON DIOXIDE EMISSIONS PROPOSED BY SOME COUNTRIES.

''SUCH PROPOSALS SHOULD BE CONSIDERED VERY CAUTIOUSLY,'' HE SAID. ON THE OTHER HAND, OIL COMPANIES MADE IT CLEAR THAT THEY REFUSE TO REGARD THE REPORT AS THE FINAL VERDICT.

A SPOKESMAN OF NIPPON OIL CO. SAID, ''MORE SCIENTIFIC RESEARCH IS NECCESSARY BEFORE WE ARE CONVINCED THAT CARBON DIOXIDE IS REALLY THE CAUSE OF THE GLOBAL WARMING.''

''ANY RASH DECISION ON THE MATTER SHOULD BE AVOIDED,'' HE ADDED.

#90243k0095 08/31/1990 ~Japanese News Agency

TOKYO (AUG. 31) KYODO - THE UNITED ARAB EMIRATES (UAE) STATE-RUN OIL CONCERN ABU DHABI NATIONAL OIL CO. HAS TOLD JAPAN'S OIL INDUSTRY THAT IT WILL BE UNABLE TO INCREASE THE SEPTEMBER DELIVERY AS REQUESTED, THE MINISTRY OF INTERNATIONAL TRADE AND INDUSTRY SAID FRIDAY.

THIS, HOWEVER, IS NOT LIKELY TO HAVE A SIGNIFICANT IMPACT ON THE ECONOMY DUE TO APPROPRIATE ARRANGEMENTS BY THE JAPANESE PRIVATE OIL COMPANIES TO SECURE THEIR NECESSARY QUOTAS IN THE SEPTEMBER DELIVERY CONTRACTS, ACCORDING TO OFFICIALS AT THE MINISTRY'S AGENCY OF NATURAL RESOURCES AND ENERGY.

THE OFFICIALS SAID THEY HAVE YET TO CONFIRM DETAILS OF THE NOTIFICATION AND REASONS FOR THE UAE'S INABILITY TO SUPPLY ADDITIONAL OIL IN SEPTEMBER.

THE UAE HAD EARLIER SOUNDED OUT HOW MUCH THE JAPANESE OIL FIRMS WANTED ON TOP OF THE AGREED SEPTEMBER DELIVERY FOLLOWING AN ACCORD REACHED RECENTLY BY THE ORGANIZATION OF PETROLEUM EXPORTING COUNTRIES (OPEC), ACCORDING TO INDUSTRY SOURCES.

UNDER THE PACT AGREED IN PRINCIPLE ON WEDNESDAY BY A MAJORITY OF THE OPEC MEMBER STATES ON A TEMPORARY HIKE IN OIL OUTPUT QUOTAS, THE UAE IS EXPECTED TO INCREASE ITS OIL PRODUCTION TO SOME 2 MILLION BARRELS PER DAY (BPD) FROM THE PRESENT CEILING OF 1.5 MILLION BPD.

IN A STATEMENT ISSUED AT THE END OF THE OPEC'S RECENT MEETING, THE ORGANIZATION'S MAJOR MEMBERS EXPRESSED THEIR READINESS TO DEFEND THE DEVELOPING COUNTRIES' INTERESTS.

THE THIRD WORLD COUNTRIES ARE CONSIDERED TO BE HARDEST HIT BY SKYROCKETING OIL PRICES AND SUPPLY SHORTFALLS AS A RESULT OF THE LOSSES OF OIL FROM IRAQ AND IRAQI-OCCUPIED KUWAIT.

THE INDUSTRY SOURCES SAID THE UAE'S INABILITY TO INCREASE SUPPLIES TO

JAPAN MAY BE BECAUSE DUE TO PRIORITY IT HAS DECIDED TO GIVE DEVELOPING NATIONS.

THE SOURCES ALSO CITED A CAPACITY SHORTAGE OF LOADING FACILITIES IN THE UAE'S MAJOR SEA PORTS AS ANOTHER REASON.

THERE IS A VIEW, HOWEVER, THAT THE UAE IS LIKELY TO RESPOND TO JAPAN'S REQUEST FOR MORE OIL ONCE THIS SHORTFALL IS OVERCOME, ACCORDING TO THE SOURCES.

#90243k0096 08/31/1990 ~Japanese News Agency

MANILA (AUG. 31) KYODO - INFLOW OF INVESTMENT TO THE PHILIPPINES SLOWED IN THE JANUARY-JULY PERIOD THIS YEAR WHILE THE NUMBER OF INVESTMENT PROJECTS INCREASED SLIGHTLY COMPARED WITH THE SAME PERIOD LAST YEAR, THE PHILIPPINE BOARD OF INVESTMENTS SAID FRIDAY.

THE BOARD SAID EQUITY CONTRIBUTION OF BOTH LOCAL AND FOREIGN INVESTMENT DURING THE SEVEN-MONTH PERIOD TOTALED 27.95 BILLION PESOS (1.12 BILLION U.S. DOLLARS), OR 1.5 PERCENT HIGHER THAN THE 27.53 BILLION PESOS RECORDED A YEAR BEFORE.

INVESTMENT PROJECTS NUMBERED 1,685 IN THE PERIOD, UP FROM 1,397 PROJECTS IN JANUARY-JULY 1989. THE PROJECTS ARE BELIEVED TO HAVE GENERATED 77,339 JOBS.

OF THE TOTAL EQUITY INVESTMENT OF 27.95 BILLION PESOS, FILIPINO-OWNED OR CONTROLLED CORPORATIONS ACCOUNTED FOR 13.74 BILLION PESOS, DOWN 12.73 PERCENT FROM 15.74 BILLION PESOS THE YEAR BEFORE.

EQUITY IN FOREIGN-OWNED OR CONTROLLED PROJECTS INCREASED 20.53 PERCENT TO 14.2 BILLION PESOS.

DURING THE FIRST SEVEN MONTHS OF THIS YEAR, JAPANESE INVESTORS RETAINED THE TOP SLOT, ACCOUNTING FOR NEARLY 5.2 BILLION PESOS, UP 150.4 PERCENT FROM THE SAME PERIOD OF LAST YEAR, THE BOARD SAID.

TAIWAN WAS SECOND WITH 3.2 BILLION PESOS, FOLLOWED BY CANADA WITH 1.06 BILLION PESOS, THE UNITED STATES WITH 905 MILLION PESOS, AND HONG KONG WITH 783.5 MILLION PESOS.

MANILA (AUG. 31) KYODO - THE PHILIPPINE FOREIGN DEBT STOOD AT 26.975 BILLION U.S. DOLLARS AS OF THE END OF MAY, UP FROM 26.14 BILLION DOLLARS A MONTH BEFORE BUT DOWN FROM 27.616 BILLION DOLLARS AT THE END OF 1989, THE

CENTRAL BANK SAID FRIDAY.

ABOUT 22.538 BILLION DOLLARS, OR 83.55 PERCENT, OF THE COUNTRY'S OUTSTANDING DEBT WAS IN MEDIUM- AND LONG-TERM LOANS, WHILE ONLY 4.437 BILLION DOLLARS, OR 16.45 PERCENT, WAS IN SHORT-TERM DEBTS.

THE PUBLIC SECTOR, COMPOSED OF THE NATIONAL GOVERNMENT AND PUBLIC FINANCIAL AND CORPORATE SECTORS, ACCOUNTED FOR 16.062 BILLION DOLLARS, 59.55 PERCENT OF THE TOTAL FOREIGN DEBT.

THE PRIVATE SECTOR HAD DEBTS OF 5.652 BILLION DOLLARS WHILE THE CENTRAL BANK OWED 5.261 BILLION DOLLARS.

THE CENTRAL BANK SAID THE COUNTRY'S BIGGEST CREDITORS WERE PRIVATE COMMERCIAL BANKS WITH A TOTAL EXPOSURE OF 12.017 BILLION DOLLARS.

#90243k0103 08/31/1990 ~Japanese News Agency

TOKYO (AUG. 31) KYODO - DELAYS IN SOVIET PAYMENTS FOR IMPORTS FROM JAPAN, WHICH TENDED TO TAPER OFF FOR A TIME, ARE WORSENING AGAIN, TRADE SOURCES SAID FRIDAY.

THE JAPAN ASSOCIATION FOR TRADE WITH THE SOVIET UNION AND SOCIALIST COUNTRIES IN EUROPE SAID DELAYS IN SOVIET PAYMENTS FOR IMPORTS FROM JAPAN TOTALED 518 MILLION U.S. DOLLARS AS OF THE END OF JULY, UP 16.1 PERCENT FROM 446 MILLION DOLLARS THE MONTH BEFORE.

JAPANESE TRADING GIANTS, WHICH ACCOUNT FOR THE MAJORITY OF THE DELAYED PAYMENTS, WISH TO REFRAIN FROM TRADING WITH THE SOVIET UNION FOR FEAR THAT SUCH DELAYED PAYMENTS MIGHT INCREASE FURTHER, THE SOURCES SAID.

THE TRADING FIRMS, HOWEVER, FEAR THAT THE GOODWILL THEY HAVE ESTABLISHED IN TRADE WITH THE SOVIET UNION MAY BE EATEN AWAY BY OTHER TRADING FIRMS, IF THEY HOLD BACK FROM DEALING WITH SOVIET TRADING PARTNERS, THE SOURCES SAID.

THE ASSOCIATION SAID V/O PROMRYIOIMPORT, THE SOVIET INDUSTRIAL RAW MATERIALS EXPORT AND IMPORT CORP., LED IN IMPORT PAYMENTS DELAYS WITH 207 MILLION DOLLARS AS OF JULY 31, COMPARED WITH 169 MILLION DOLLARS THE MONTH BEFORE.

THE SOVIET CHEMICALS EXPORT AND IMPORT CORP. WAS SECOND WITH 153 MILLION DOLLARS, UP SLIGHTLY FROM 15L MILLION DOLLARS THE MONTH BEFORE.

DELAYS IN SOVIET PAYMENTS FOR IMPORTS HAD BUILT UP SINCE THEY SURFACED LAST YEAREND. HOWEVER, SHORTLY AFTER WEST GERMANY'S EXTENSION OF A 5 BILLION MARK EMERGENCY LOAN TO THE SOVIET UNION, THE OFFICE OF THE SOVIET

TRADE REPRESENTATIVE IN JAPAN SAID A SUBSTANTIAL PORTION OF THE DELAYED PAYMENTS WOULD BE PAID BY THE END OF JULY.

JAPANESE TRADING FIRMS THUS BELIEVED THAT THE PROBLEM OF PAYMENTS DELAYS WOULD BE SETTLED SOON.

WHEN THE SOVIET DIVISION CHIEF OF A MAJOR JAPANESE TRADING COMPANY ASKED SOVIET GOVERNMENT OFFICIALS ABOUT THE PAYMENTS IN MID-AUGUST IN MOSCOW, HOWEVER, THE OFFICIALS REPLIED ONLY THAT EVERY EFFORT WOULD BE MADE TO SOLVE THE PROBLEM BY THE END OF THE YEAR, THE SOURCES SAID.

#90243m0002 08/31/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (AUG 31) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

The dollar's drop is "like going to the dentist: It hurts now but it's good for us in the long run," says CARL WEINBERG, chief economist at HIGH FREQUENCY ECONOMICS. The cheap dollar gives U.S. exporters a competitive edge over some of their foreign rivals. Explaining the dollar's drop, Weinberg says, "High-yielding currencies gain and low-yielding currencies lose," as investors bail out of stocks and look for a place to put their cash. ("USA Today", 8/31)

"People in the foreign exchange market digested the 0.75 [percentage point rise in Japan's discount rate] almost completely" before the move, says KATSUMI ASAKO, chief corporate dealer at STANDARD CHARTERED BANK in Tokyo. ROBERT BRUSCA, chief economist at NIKKO SECURITIES, insisted that the yen fared well yesterday considering the rate rise was "very heavily discounted in the market." (WSJ, 8/31)

Despite recent growth in the money supply, the Fed has not yet turned on the money spigot, says DAVID JONES, chief economist for AUBREY G. LANSTON. "The Fed's in a corner - if they ease too aggressively now, long term rates could actually go up. ... The Fed has never controlled long term rates well and its even more difficult in the current circumstances." Jones says Alan Greenspan will be closely watching next week's purchasing managers survey and employment numbers. If the purchasing agents survey is below fifty and the July jobs data look weak, Jones believes the Fed will start easing sometime in September. (CNN "Business Day", 8/31)

"If oil prices stabilize at around the current levels, I think that would provide an opportunity for the Fed to move," says RUDOLF THUNBERG, an economist at RIED THUNBERG & COMPANY, an investment advisory firm in

Westport, Conn. (NYT, 8/31)

"I think people had hoped that the Fed could ease here into the face of a weak economy, but high rates available overseas really preclude them from doing that at least over the near term," says KATHLEEN MILLARD of CHASE MANHATTAN BANK explaining the financial markets reaction to the Japanese rate hike Thursday. She adds, "We need a Fed easing to make [bond yields] more attractive." (FNN's "Marketwrap", 8/30)

"We look for the Fed to ease policy sometime next week," says MMS INTERNATIONAL in their daily market commentary. "The best window of opportunity would be after the purchasing managers' report and before the employment data." (NYT, 8/31)

"The rumors continue to fly that the Fed will have to ease in the next few days," says SUNG WON SOHN, economist at NORWEST CORP., a bank holding company in Minneapolis. (WSJ, 8/31)

MICHAEL MORAN, the chief economist at DAIWA SECURITIES AMERICA INC., does not expect the Fed to move quickly to lower interest rates. "I think the Fed will wait and look at the employment report, and if that provides any new evidence that the economy is even weaker than previously, then they will ease. I think the Fed won't move until it has a clear case to adjust interest rates." (NYT, 8/31)

"Some of the trading was a bit strange in the global bond market," says WILLIAM SULLIVAN, director of money-market research at DEAN WITTER REYNOLDS INC. "I would have thought that higher [Japanese] interest rates would weaken the dollar and weaken the Japanese financial markets. Instead, the dollar firmed and Japanese bonds firmed and that is puzzling." (WSJ, 8/31)

The bond market is looking ahead to next week's U.S. employment data which could prompt an easing by the Fed. "The [U.S.] economy is seen as soft, soft, soft, and it [the data] may well be the trigger. But recent economic data has been irrelevant," says one trader in London. (Reuters, 8/31)

"We went real far real fast Wednesday," says ROBERTA OLSON, fixed- income portfolio manager at BANC ONE ASSET MANAGEMENT, in Columbus Ohio, "and then with oil bouncing back, bonds had to come back some." (WSJ, 8/31)

THE ECONOMY:

"Slumpflation" is how economist DAVID JONES at AUBREY G. LANSTON describes his outlook for the U.S. economy. While he believes the economy is growing "ever so slightly" in the third quarter, Jones looks for a recession to start in the fourth quarter and last at least through the first half of 1991. "Most importantly ... every one of the consumer

confidence measures is down," says Jones, who thinks strength in the export sector could keep the recession from being too severe. (CNN "Business Day", 8/31)

Each time we have seen negative growth in the real money supply [M3] a recession followed "and I think again the odds favor that," says JAMES WELSH of the "Financial Commentator." "That was one of the reasons I turned nagative back in May." He continues, "M3 leads the economy by six to nine months, so what we are witnessing here is the ground work for the economy to remain weak for the next six to nine months." (FNN "Marketwrap", 8/30)

Bucking the doom-and-gloom predictions of most economists regarding the near future of the U.S. economy, some say that the recent oil shock will not necessarily be as debilitating as is commonly held, and that the economy may pick up speed if tensions flare up to a shooting war. "There's really been a tendency to be quick on the trigger and overreact to the jump in oil prices," says R.H. WRIGHTSON & ASSOCIATES INC. economist JOHN MCAULEY. "I suspect it's not going to derail things." (Reuters, 8/30)

Factory orders rose 1.6% in July. "It confirms that before the situation in the Middle East, things were sluggish but growing," says THOMAS RUNIEWICZ, an economist with the WEFA GROUP in Bala-Cynwyd, Pa. But now with the Middle East problem and energy prices higher, he expects to see factory orders down in August and "especially this fall." (NYT, 8/31)

"We don't have a recession. We still don't have a recession" despite "the largest drop [in consumer confidence] of all," says DELOS SMITH of the CONFERENCE BOARD commenting on their most recent report. "I think the term [oil] shock is well used because there are little inconsistencies [in the report] on the buying plans." He says questions that asked about buying plans and inflation were not down as significantly as the rest of the report might indicate. Since the surveys take place at the first of the month, Mr. Smith believes "it was just the shock of all of this," and it will be the September report before "we can really see what is happening with the consumer." He adds that consumer confidence "could rebound very sharply" depending on events in the Middle East. (FNN "Marketwrap", 8/30)

#90243p0411 08/31/1990 ~PR Newswire

PORTLAND, ORE. (AUG. 31) PR NEWSWIRE - Fabricland Inc. (NASDAQ: FBRC) reported fourth quarter net sales of $19,199,000 for the three months ended June 30, 1990, compared with net sales of $18,676,000 for the same period in fiscal 1989. This represented a 2.8 percent increase. Net earnings for the fourth quarter of fiscal 1990 were $431,000 or $.13 per share, compared with earnings of $680,000, or $.21 per share for the same period in fiscal 1989. This represented a 36.6 percent decrease.

Net sales for the 12 months ended June 30, 1990, amounted to $81,045,000 compared to $74,537,000 in fiscal 1989, and represented an 8.7 percent increase. Net earnings for the fiscal year amounted to $2,800,000 or $.87 per share, in 1990, compared with earnings of $3,100,000, or $.96 per share, in 1989. This represented a 9.7 percent decrease.

Tony J. Bosboom, president, said that earnings are down in comparison to fiscal 1989, primarily due to the adverse impact that the change to everyday low pricing had on store-for-store net sales during the last half of fiscal 1990. In mid January 1990, the company changed from its traditional sales promotion concept to an everyday low pricing strategy.

Bosboom also indicated that recent changes have been made to improve sales results in fiscal 1991. These changes, among others, include the return to a modified sales promotion program which will offer customers an attractive selection of discounted merchandise for a limited period of time. The type and variety of merchandise will vary from sale to sale. Merchandise subject to the everyday low pricing strategy will be limited. Bosboom further stated that the recent experience has indicated that customers prefer the sales promotion strategy. With the return to this strategy, along with the combined strength of the company's attractive stores, wide selection of high quality brand name merchandise, and customer service, management believes that the company will be favorably positioned for the second quarter of the fiscal year, which historically is the busiest sales season.

Bosboom also said that in the fourth quarter the company had 77 stores this year compared with 72 stores in the fourth quarter last year. In fiscal 1990, the company has remodeled 23 stores, relocated two stores, opened six stores, and closed one store at the end of the lease term. Subsequent to the end of the fiscal year, the company has opened one new store, signed two additional leases and is currently negotiating for several additional locations.

SAN FRANCISCO (AUG. 31) PR NEWSWIRE - The Pacific Stock Exchange (PSE) today announced the commencement of options trading on the common stock of Checkpoint Systems Inc. and NICOR Inc. Checkpoint's shares are traded over-the-counter, while NICOR's are listed on the PSE. Since NICOR's common stock is listed on the PSE, the addition of listed options gives investors the unique opportunity of trading both instruments on the same exchange, providing a benefit for risk management transactions.

Founded in 1969 and based in Thorofare, N.J., Checkpoint is a worldwide supplier of Electronic Signatures, electronic identifiers that can be built into products. Checkpoint's leading application is Electronic

Article Surveillance (EAS) devices for electronic detection systems, used by retailers and libraries to control theft.

Based in Northern Illinois, NICOR Inc. is a holding company with subsidiaries engaged in gas distribution, oil and gas exploration and production, gas gathering and marketing, and containerized shipping.

TAMPA, FLA. (AUG. 31) PR NEWSWIRE - Nutmeg Industries, Inc., (NASDAQ: NUTM) today reported a return to profitability in the second quarter ended July 28, 1990, following losses in the two prior quarters.

Net income was $783,000 or 12 cents per share on net sales of $20.65 million. In the comparable quarter last year the company reported net income of $1,566,000 or 25 cents per share on net sales of $17.55 million.

For the six months ended July 28, 1990, Nutmeg reported net income of $491,000 or seven cents per share on sales of $29.86 million. A year ago the company reported six-month net income of $1,997,000 or 34 cents per share on net sales of $26.48 million.

Richard E. Jacobson, Nutmeg chairman and chief executive officer, said he is encouraged with the company's significant progress. "The operational controls put into place are taking effect," Jacobson said. "We continue to gain efficiencies from our strengthened management organization and a new computer-based management information system. Further benefits are expected in the coming months from the people and systems we have in place."

The second quarter results reflected positive contributions from both McBriar Sportswear, Inc., a sweater manufacturer acquired on May 31, 1990, and Nutmeg's Saturday's Hero joint venture. Jacobson added, "Although the early sales of Saturday's Hero have not met our initial expectations, this market segment and the new business opportunities now available to us through McBriar hold substantial promise."

The company's balance sheet and liquidity remain strong, Jacobson said. "Despite the acquisition of McBriar and the start-up of the Saturday's Hero joint venture, our inventories are only moderately ahead of those a year ago as a result of continued progress in Nutmeg Mills inventory reduction efforts." Jacobson said that despite recessionary fears and continued retail sluggishness, the demand for the company's licensed-sports products remains strong as evidenced by Nutmeg's consolidated order backlog of $26 million, up substantially over the $16 million of a year ago.

IRVINE, CALIF., (AUG. 31) PR NEWSWIRE - Gradco Systems, Inc. (NASDAQ: GRCO) announced today that its board of directors has determined to adjourn the company's annual meeting of shareholders, which was scheduled

to occur at 10:00 a.m. this morning in New York, until 10:00 a.m., local time, on Oct. 12, 1990 in Irvine. Gradco stated that the determination to adjourn the meeting was made in order to ensure that Gradco's shareholders receive all available information regarding recent events involving the company, which include the filing by Martin Tash of Plenum Publishing Corporation on Aug. 24, 1990 of a shareholder derivative suit and the recent public announcement by Tash that he intends to nominate one or more directors for election to the company's board of directors and to solicit a limited number of shareholders.

Keith B. Stewart, chairman and chief executive officer of Gradco, said that the board had concerns over Tash's solicitation for unnamed nominees with unknown qualifications, as well as concerns over the legality of the Tash solicitation. Stewart said he thought it was in the best interest of shareholders to have fair and complete disclosure available to all shareholders, not just a select group. Stewart further stated that he has tried to contact Tash in an effort to discuss company events and Tash's goals, but that Tash has refused to talk. Stewart said that additional proxy materials will be distributed shortly which discuss these matters,.

Stewart emphasized that the board hoped to put all material information before shareholders in order to promote full corporate democracy. Stewart specifically said that the company was endeavoring to add additional outside directors. In this vein, Stewart noted that the company is in the final stages of selecting a new outside director with industry knowledge and experience and that he anticipated announcing such nominee shortly for election at the adjourned meeting.

CLEVELAND (AUG. 31) PR NEWSWIRE - BP America announced today the appointment of two new members to its advisory board. Edwina Moss of Shaker Heights, Ohio and John C. Sawhill of Arlington, Va., were named as outside members of the advisory board, which is composed of senior BP executives and prominent professional and civic leaders. The advisory board was formed in 1987 to provide information and counsel on a broad range of issues that impact the future of the company.

Moss has been an active participant in civic, business, and government affairs in the Cleveland area since moving here in 1975. Her community activity includes serving on the boards of the Urban League and the Cleveland Music Settlement. Moss is a former director of the Higbee Company and currently serves as a member of the board of the Gateway Commission.

Sawhill, a native of Cleveland, is a former president of New York University and served as Deputy Secretary of the Department of Energy during the Carter administration. He is currently president of the Nature Conservancy, an international organization dedicated to environmental preservation.

"We are delighted to have such distinguished persons as Edwina Moss and John Sawhill join the BP America Advisory Board," said James H. Ross, president of BP America. "Their experience will be a valuable ingredient in our discussion of some of the key issues facing our company in the 1990's and beyond."

Other outside members of the Advisory Board include: David M. Abshire, president, Center for Strategic International Studies (Washington, D.C.); Douglas D. Danforth, chairman and CEO (retired), Westinghouse Electric Corporation, and Joseph T. Gorman, chairman, president and CEO, TRW Inc.

MINNEAPOLIS (AUG. 31) PR NEWSWIRE - Spearhead Industries, Inc. (NASDAQ: SPHR) today reported financial results for its fiscal year ended May 31, 1990. Sales were $25,643,000, with a net loss of $1,292,000 or $.27 per share. This compares with sales in the prior year of $28,808,000, with a net loss of $1,095,000 or $.23 per share.

For the fourth quarter ended May 31, 1990, Spearhead had a net loss of $1,349,000 or $.28 per share. This compares with a net loss of

$1,894,000 or $.39 per share in the fourth quarter last year. In the fourth quarter, Spearhead wrote off approximately $500,000 of a total of $625,000 in receivables from a major retail customer which filed for bankruptcy. The write off was charged to administrative expense.

Spearhead also announced that it has completed a private placement of subordinated debt, with associated stock warrants, raising $1.6 million to improve its working capital position.

Wesley J. Laseski, chairman and CEO, commented: "We have had a tough transitional year during which we made important strategic changes that will benefit the business in fiscal 1991. We enter the new year with a lower cost structure and a positive sales outlook for all our seasonal and year-round products. We are particularly pleased with the strong market acceptance of our new Lite-Stik product family."

Spearhead Industries, Inc. designs and markets seasonal and year- round consumer toy products through mass merchandise distributors. The company's line includes items for Halloween, Easter and the snow season, as well as a line of toys sold throughout the year.

FORT WORTH, TEXAS (AUG. 31) PR NEWSWIRE - The Public Utility Commission of Texas (PUCT) has found to be final its 1987 order granting Texas-New Mexico Power Company's application for certification of a lignite-fueled electric generating station currently nearing completion in Robertson County, Texas (TNP One), the company announced. Texas-New Mexico Power Company is the Fort Worth-based, wholly owned subsidiary of TNP Enterprises, Inc. (NYSE: TNP).

The PUCT's original Aug. 17, 1987 order, in which the company was granted a Certificate of Convenience and Necessity (CCN), was found to be final based on the company's having fulfilled the conditions set forth in the 1987 order and having limited its request to two units. The company expects to receive a written order within the next several days, which is subject to normal rehearing and appellate procedures.

Company officials said they are pleased with the PUCT's decision and feel it is a positive development for the company, its employees and its customers.

The company has consistently maintained that it has possessed a valid CCN

based on the original 1987 order issued by the PUCT. However, an appeals court affirmed a state district court ruling that the PUCT's 1987 order was not final due to certain conditions contained in the original order.

"Our goals from the outset have been to provide our customers with long-term, dependable electric service with diversification of resources," said D. R. Barnard, sector vice president and chief financial officer for the company.

TNP One, located in Robertson County, Texas, is a state-of-the-art, two-unit, 300 megawatt electric generating station capable of burning natural gas and western coal in addition to its primary fuel, Texas lignite. Unit 1 is currently nearing commercial operation and Unit 2 is scheduled to reach commercial operation in mid-1991.

Texas-New Mexico Power Company, an electric utility serving 90 towns and cities with 200,000 customers in Texas and New Mexico, is the principal, wholly owned subsidiary of Fort Worth-based TNP Enterprises, Inc.

CHARLOTTE, N.C. (AUG. 31) PR NEWSWIRE - NCNB National Bank said today that U.S. military personnel eligible for reduced interest rates on their loans with NCNB may initiate application simply by calling the bank.

NCNB's normal customer service telephone numbers will accommodate these calls. Several telephone lines have been dedicated to this project.

The majority of those taking advantage of the telephone service are expected to be reservists activated in conjunction with the U.S. military operations in the Mideast.

Under federal law, U.S. military personnel may be eligible for reduced interest rates on debts incurred prior to joining the military or, in the case of reservists, prior to being called to active duty.

The reduced rates will apply if military service substantially affects the borrower's income. Military personnel receive information regarding the law as part of their normal processing.

"We want to make this service as readily available as possible," said Bill Middlemas, president of Southeastern Banking for NCNB. "We have streamlined the process and alerted NCNB personnel that these calls will be coming.

"Obviously our military personnel are providing a vital service to our country," Middlemas continued.

"Reservists already have had their lives and livelihoods disrupted by the call to duty. We felt we could do our part by making this process quick and convenient."

If possible, military customers of NCNB -- or their representatives -- calling to request the reduced rates should have account numbers for eligible loans ready when they call. The telephone number for initiating the application is 1-800-477-6262.

NCNB personnel will take the necessary information by phone, then mail the appropriate paperwork to the customer for verification.

CLEVELAND (AUG. 31) PR NEWSWIRE - The Standard Products Co. (NYSE: SPD) today announced it has purchased, through its Holm Industries subsidiary, substantially all of the assets of the Plastic/Magnetic Products Division of Pantasote Inc, Greenwich, Connecticut. Details of the acquisition were not announced.

The Plastic/Magnetic Products Division manufactures extruded and molded plastic and magnetic components, principally for the home appliance industry. It has plants in Seymour, Indiana; Hartselle, Alabama; New Ulm Minnesota; and San Diego, California. The division had sales of $24 million in 1989.

James S. Reid, Jr., Standard Products chairman, said the acquisition would complement the operations of the Company's Holm Industries subsidiary. Holm, acquired in April 1989, is a major supplier of extruded plastic and magnetic door seals for use in home appliances and residential exterior steel doors.

Standard Products' primary business is the manufacture of molded and extruded rubber and plastic parts for the automotive original equipment industry, rubberized track for military vehicles, and plastic and magnetic door seals for home appliances. Its Oliver Rubber subsidiary is a leading producer and marketer of tread rubber for truck tire retreading.

AGEN, FRANCE (AUG. 31) PR NEWSWIRE - Dr. Nicole Bru, president, chief executive officer, and controlling shareholder of the UPSA Group, and Richard L. Gelb, chairman and chief executive officer of Bristol-Myers Squibb Company (NYSE: BMY), today announced agreements under which, subject to approval by French government authorities, Bristol-Myers Squibb would develop UPSA's effervescent nonprescription pharmaceutical business on a worldwide basis and would acquire for an undisclosed amount of cash a significant minority interest in the UPSA Group.

Bru, who was for any years director of research of the UPSA Group, became president and chief executive officer following the death of Dr. Jean Bru, who pioneered development of the effervescent technology through which UPSA has become the leading producer of analgesics in France.

Bru would continue as president and chief executive officer of UPSA. Under terms of the agreement, Bristol-Myers Squibb also would have the opportunity to acquire the remaining shares of UPSA in the longer term, subject to approval of the appropriate French government authorities.

UPSA is the largest privately held nonprescription drug company in Europe - with a broad range of ethical and nonprescription pharmaceuticals, including analgesic, cough/cold, vitamin, anti-inflammatory, cardiovascular, and other products - and is a world leader in effervescent technology.

It is ranked second in the overall European market for nonprescription analgesics, is the market leader in France and has strong positions in Belgium and Spain, as well as a growing presence in Italy.

Bristol-Myers Squibb is a diversified pharmaceutical company whose principal products are pharmaceuticals, consumer products, medical devices and nutritionals.

CONTACT: Jerry Parrott of Bristol-Myers Squibb, (212) 546-4333, or Guy Bourdin of UPSA Group, 011-33-1-47-49-05-00.

THOMASTON, GA (AUG. 31) PR NEWSWIRE - Thomaston Mills Inc. (NASDAQ: TMSTA TMSTB) today reported net income of $6,003,889, equal to $1.87 per share, on sales of $199,829,805 for the fiscal year ended June 30, compared with income of $3,652,645, or $1.14 per share, on sales of $184,657,659 for the fiscal year ended July 1, 1989.

Fourth quarter earnings in 1990 were $1,788,159, or $.56 per share, on sales of $50,003,679, compared with earnings of $2,621,859, or $.82 per share, on sales of $53,212,650 for the fourth quarter of 1989.

Neil Hightower, president and CEO, stated that the 91st year of operations for the company was a year of growth that set many new records including record sales, which increased 8.2 percent. As planned, most of the growth in sales for the year occurred in the sales yarn and consumer products area.

In commenting on the company's outlook for the future, Hightower also stated: "Economic conditions have softened, and this has been particularly true in the textile industry. This softness began to surface in the company's fourth quarter as reflected by the sales decrease in that quarter. This slowness will no doubt continue into the early part of the new fiscal year. Management is taking a long term view of the business and plans are to continue a very aggressive capital expenditure program. These expenditures will be used to both expand the capacity of the company and make further improvements in quality and cost. The 2,356 employees of Thomaston Mills are committed to the future success of the company, and we will do our best to make Thomaston Mills Inc. a rewarding investment for our shareholders."

#90243p0448 08/31/1990 ~PR Newswire

ALLENTOWN, PA. (AUG. 31) PR NEWSWIRE - For the first time, dogs will now be able to enjoy tender, tasty food all the way to the bottom of the bag, while their owners save on wasted food and spills.

The Jim Dandy Co. is bringing a piece of modern technology to dog food packaging -- the Fresh-Lock resealable bag.

The Fresh-Lock seal is featured on 20-pound bags of Jim Dandy Tender Meaty Chunx, a mixed kibble premium dry dog food. It will help to keep the bags tightly sealed between servings, maintaining product freshness.

"This is a first for dog food," said John Stroud, Jim Dandy marketing manager. "It'll make dogs happy by keeping the product fresh and the semi-moist kibble chewy. It will also be more convenient and easier to handle for owners. One of the most favorable results is that it helps prevent the dog food from spilling."

The company tested the new Fresh-Lock resealable packaging against several alternatives, including a fold-over top commonly used on cookie bags. Dog food purchasers, especially those who buy semi-moist food, preferred the Fresh-Lock bag by a margin of two to n?e.

The new packaging is included as part of a reformulation that incorporates two types of dry and semi-moist kibble in one product. "Palatability tests showed that dogs prefer the taste of multi-kibble products," said Stroud. "The new Tender Meaty Chunx offers two tastes and textures in one formulation."

Jim Dandy is one of the largest regional producers of dog food in the Southeast. The company manufactures 17 different dry and canned pet food products. Headquartered in Atlanta, Jim Dandy has production facilities in Decatur, Ala., and a research kennel in Wetumpka, Ala. The company is a wholly owned subsidiary of ALPO Petfoods, Allentown.

WAYNE, PA. (AUG. 31) PR NEWSWIRE - Orthopedic Services, Inc. (NASDAQ: OSII), has purchased Canoga Orthopedics, Inc., a Canoga Park, Calif. orthotics and prosthetics company.

With the purchase of 15-year old Canoga Orthopedics, OSI's Western region now has 22 locations, including 17 in the Southern California area.

By combing the capabilities and talents of Canoga Orthopedics with the company's already existing operations headquartered in Brea, Calif., Orthopedic Services, is furthering its long-term commitment to the

Southern California healthcare community.

Richard Johnson, former owner of Canoga Orthopedics, will continue with Orthopedic Services. "Joining OSI, which is nationally recognized for its excellence in providing progressive leadership, further enhances the benefits we will be able to provide to our patients in the San Fernando Valley area," said Johnson.

The company will continue conducting business at its offices at 7138 Shoup Avenue, Canoga Park.

OSI is the largest provider of patient care services in the orthotic and prosthetic rehabilitation segment of the healthcare services industry. OSI currently provides services through 54 patient care centers in 12 states.

WICHITA, KAN. (AUG. 31) PR NEWSWIRE - Kansas Gas and Electric Company (NYSE: KGE) reported today that its board of directors has amended the company's by-laws to "opt out" of provisions of the Kansas Control Share Acquisitions Act (Kansas Statutes Annotated Section 17- 1286 et seq.). As a result, provisions of the act will not apply to any control share acquisition of KG&E stock within the meaning of the Kansas statute.

KG&E Board Chairman and President Wilson K. Cadman said, "In a nutshell, this simply means that any company which makes a controlled share acquisition of KG&E stock can vote its shares. This eliminates the added expense of a proxy solicitation and a special meeting of shareholders."

"We believe the Kansas City Power & Light Company offer is inadequate, as to the common shareholders, is legally flawed, and has been put forward in an atmosphere of pressure designed to benefit primarily Kansas City Power & Light Company. Our board is committed to fully and professionally investigate all of the options available to us to protect and enhance the value of our shareholders' investment. We are pursuing that objective aggressively," Cadman concluded.

JACKSON, MI (AUG. 31) PR NEWSWIRE - Customers of Consumers Power Company are receiving a rich harvest of information about September tourist and family activities across Michigan in their utility bills.

In some two million bills being sent to customers, the utility has inserted a brochure listing some of the entertaining events taking place around the state this month.

The mailing, said John W. Clark, senior vice president for Consumers Power, is part of an ongoing program by the company to assist the Michigan Travel Bureau and communities throughout both peninsulas in promoting tourism.

The attractions listed in the brochure begin with the St. Ignace Indian Powwow Sept. 1-2, marking the heritage of the Chippewa Indians. Those who visit the powwow should stay around for the 33rd annual Labor Day Bridge Walk. Thousands of hikers are expected to join Michigan's Gov. James J. Blanchard for the five-mile trek from St. Ignace across the Mackinac Bridge to Mackinaw City. Later in the week, the Michigan Wine and Harvest Festival takes place in Paw Paw and Kalamazoo Sept. 6-9.

Next weekend will also see the Posen Potato Festival (Sept. 7-9) featuring two breakfasts, five dinners and a potato pancake smorgasbord. It will also be the start of Fall Weekends at Crossroads Village near Flint.

Beginning Sept. 8-9, each Saturday and Sunday during September, visitors can walk the streets of this restored 19th century village or ride the Huckleberry Railroad, Michigan's only authentic steam-powered, narrow-gauge train. Port Huron will host an Antique and Classic Boat Show Sept. 15, with more than 100 classic craft tied up along the Black River.

Detroit's Festival of the Arts will be held Sept. 21-23, with more than 500 performers and 125 artists showing their talents in the University Cultural Center area. What better way to mark the fall season than an apple fest. Niles will be the site of the Four Flags Area Apple Festival Sept. 21-23.

The brochure also promotes the Great Lakes Circle Tour for those interested in seeing the fall colors in many dimensions. There are three tours, Circle Michigan, Circle Lake Superior and Circle Lake Michigan that can easily be taken by following the road signs. Among the sites along the Michigan route are nearly 100 lighthouses and beacons, 80 harbors and almost 1,000 miles of public beach or lakefront.

CHICAGO (AUG. 31) PR NEWSWIRE - "A new, reduced national corporate rate of $175 will be offered at the Fairmont Hotel-Chicago Sept. 4 to 30, 1990, making Fairmont luxury and service in Chicago more affordable," today announced Richard L. Swig, president and CEO, Fairmont Hotel Management Co. "The new rate offers the business traveler superior value, through better pricing, convenient location and exceptional service. The $175 rate is $10 below Fairmont's current corporate rate, and is also less than Marriott's and Hyatt's downtown hotels' corporate rates," continued Swig.

Additionally, the rate allows President's Club members to take advantage of all the exclusive benefits of the club program, including guaranteed rooms, upgrades to a luxury suite at check-in (if available), special in-room welcome amenities and more. President's Club membership is free. Unlike other hotel "frequent guest" programs, President's Club members receive these benefits each time they stay at any Fairmont Hotel, as long as they pay the published national corporate or regular weekday rates. Guests can enroll instantly in the President's Club via Fairmont's toll-free reservation number, 800-527-4727.

Plus, for a limited time, each President's Club member will receive complimentary admission to, as well as special benefits at, The Sporting Club, Chicago's most remarkable and luxurious health, athletic and spa facility. Connected to the Fairmont, The Sporting Club also provides President's Club members with upgraded locker room accommodations and discounts at the BIOASIS spa. Only the Fairmont offers this added convenience and value.

To make reservations at the Fairmont Hotel-Chicago or any other Fairmont Hotel, contact a travel agent or call toll free, 800-527-4727.

LYNNWOOD, WASH. (AUG. 31) PR NEWSWIRE - Area Profile, a full-color magazine containing community information about the Greater University area, will make its debut in the next issue of the University To Northgate GTE Neighborhood Everything Pages telephone directory. The magazine, which will be bound into the front of the directory, also introduces to businesses a new form of advertising.

"From a marketing perspective, the University Area Profile offers local businesses, as well as regional and national brand manufacturers, a unique and long-lasting advertising opportunity," said Greg Ness, marketing administrator for GTE Directories, publisher of the directory. "Now businesses can promote themselves in a full-color magazine that has the

staying power of a telephone directory."

The magazine, a joint effort between GTE Directories and the Greater University Chamber of Commerce, will be distributed to more than 84,000 residences and businesses in February. It will aslo be made available at the University Bookstore and to visitors staying at many of the area's hotels and motels, including the Meany Tower and University Travelodge.

"Area Profile will contain in-depth stories and colorful photos of the area that will help people make the most of a wonderful community," said Ness. "It should be an excellent promotional tool for the Chamber, and an attractive advertising option for a wide variety of businesses."

GTE Directories Corp. has been a leading telephone directory publishing company for more than 50 years. With headquarters in Dallas/Fort Worth, the company employs 6,000 people and annually markets, produces and distributes more than 1,100 different directories, including The Everything Pages(R). The company is a unit of Tampa-based GTE Information Services Inc., an operating group of GTE Corp. (NYSE: GTE), Stamford, Conn.

ERIE, PA (AUG. 31) PR NEWSWIRE - Erie Forge and Steel Inc., an employee-owned corporation, announced today that it has completed the acquisition of the assets of National Forge Co.'s Erie, Pa., plant.

The buyout of the facility successfully concludes nearly two years of cooperative effort by labor and management to assure the continued operation of one of the most advanced steel melting and forging operations in the world.

Erie Forge and Steel Inc. will operate as an employee-owned company with the majority stock position vested with an ESOP Trust and management staff. Minority positions are held by American Capital Strategies Ltd. and

National Forge Co.

The new corporation currently employs 270 people with an annual payroll of approximately $11 million. The addition of 80 new jobs is anticipated during the next three years.

The acquisition has been made possible, in large part, because of the enthusiasm and cooperation of the highly skilled and dedicated production employee-owners who are members of the United Steelworkers of America.

The company has chosen to rename itself Erie Forge and Steel Inc., which was its identity prior to a 1969 acquisition by National Forge Co.

Erie Forge and Steel Inc. commences operations as an industry leader with a strong and secure market share in complex, large-scale open-die steel forgings. Order backlog at the end of July was $34 million; first-year sales are projected to be $38 million.

Plant production also includes a broad array of rough and finish-machined large-scale components for electrical power generation and other capital equipment industries. The company is the single-largest producer of hollow-board ship propulsion shafts in the United States. It is a sole-source supplier of many marine components including shaft assemblies for U.S. Navy Trident submarine and Aegis-class surface vessels. Additionally, high-quality carbon and alloy ingots, forged billets and machined bars are produced in a wide range of custom sizes and compositions.

A recent $13 million investment in equipment and facilities provides Erie Forge and Steel Inc. with state-of-the-art melt-to-machining production and quality control capabilities.

Erie Forge and Steel Inc. holds the unique position of being one of the few domestic producers with integrated capabilities of melting, forging, heat treating and finish machining of large forgings all within one facility.

TORRANCE, CA (AUG. 31) PR NEWSWIRE - Prices of 1991 Lexus models will increase an average of 3.3 percent or about $1,150 after adjusting for additional standard equipment on the LS 400, the luxury division of Toyota Motor Sales U.S.A. Inc., announced today. There are no changes in option pricing.

The Lexus LS 400 and ES 250 were introduced one year ago on Sept. 1, 1989. The increase in the price of '91 models reflects the continuing growth of Lexus' operations and ongoing product development costs.

Additional standard equipment for the 1991 LS 400 includes remote entry (formerly an option), key-off accessory power, and a 50-state emissions package.

"The changes for 1991 models are a direct result of consumer feedback," said Dave Illingworth, Lexus vice president and general manager. "It's an example of Lexus' commitment to customer satisfaction that these changes were made in less than a year."

The 1991 LS 400 will have a base price of $38,000. The ES 250 will have a base price of $21,300. The 1991 ES 250 will go on sale immediately while the '91 LS 400 will reach dealer showrooms in mid- September.

WAYNE, PA (AUG. 31) PR NEWSWIRE - SEI Corp. (NASDAQ: SEIC), through its chairman and chief executive officer, Alfred P. West Jr., announced today that Henry H. Greer has been elected president and chief operating officer of the company.

Greer has been a director of SEI for 12 years and most recently served as executive vice president in charge of the Benefit Services unit, as well as the Information Services Division, the largest single operating entity of the corporation.

Greer is a graduate of Dartmouth and spent eight years with IBM, finishing his tenure there as a Washington branch manager. He spent two years as vice president of marketing for GTE, followed by a position at AuTex where he managed a major turnaround for this provider of financial and technology services to the brokerage and institutional communities.

For the 11 years prior to assuming managerial duties at SEI, he was an investor in small privately held companies, which he directed and managed as owner.

"Hank Greer brings maturity, wisdom and solid experience to this key position and I am confident he will exceed even our most optimistic expectations," said West.

ROME (AUG. 31) PR NEWSWIRE - General Dynamics Commercial Launch Services Inc. (CLS) today signed a contract with Agenzia Spaciale Italiana (ASI) to provide Atlas launch services for the x-ray astronomy satellite in 1994.

Participating in a contract signing ceremony here today were Alan M. Lovelace, president of General Dynamics Commercial Launch Services, Professor Luciano Guerriero, president of ASI, the Italian space agency, and Professor Carlo Buongiorno, director general of ASI.

"We are pleased to establish this relationship with the Italian space agency and proud that our Atlas launch vehicle will play a key role in boosting this important scientific satellite for the Italian government," Lovelace said.

An Atlas I launch vehicle built by General Dynamics Space Systems Division will launch the 1,300 kilogram- (2,868 lbs.) satellite from Launch Complex 36B at Cape Canaveral Air Force Station, Fla.

The x-ray astronomy satellite is a major scientific effort of the Italian space agency and The Netherlands Agency for Space Programs. The satellite, which will be manufactured by Aeritalia, will study x-ray emissions. The satellite will perform between 2,000 and 3,000 separate observations during its lifetime.

General Dynamics has committed to building 60 Atlas launch vehicles for commercial and military markets. CLS has orders for 23 commercial launches and space systems division is under contract for 10 launches for the U.S. Air Force.

Atlas Commercial Launch Services are marketed by Commercial Launch Services Inc., a wholly owned subsidiary of General Dynamics, and the launch vehicles are produced by the Space Systems Division.

BURLINGTON, NJ (AUG. 31) PR NEWSWIRE - FMS Financial Corp. (NASDAQ-NMS: FMCO) and Fidelity Mutual Savings and Loan Association today jointly announced the termination of the proposed combination of the two corporations.

The proposed combination was publicly announced following the execution of a letter of intent in September 1989. FMS Financial is the holding company for Farmers' & Mechanics' Savings Bank.

The proposed transaction involved the conversion of Fidelity Mutual from a mutual savings institution to a stock savings institution and the acquisition by FMS Financial of all of the shares issued by Fidelity Mutual in the conversion.

As reasons for the discontinuation of their attempt at this time to accomplish the combination, Michael Bisceglie, president and chief executive officer of FMS Financial, cited the more negative economic climate that now exists as compared to when talks were initiated in September 1989.

Further, he cited the internal situation that has recently occurred at Fidelity Mutual, that being embezzlement by one of its former officers. Bisceglie further stated that given justification, the two thrifts might consider reviving the merger/acquisition at some future date.

ERIE, PA. (AUG. 31) PR NEWSWIRE - The management and employees of the Erie forging plant of National Forge Co. today purchased their facility in a transaction which required $19 million in financing.

The new company, Erie Forge and Steel, Inc., is majority-owned by its 270 employees. The transaction shows the continuing viability of employee buyouts despite the difficult economic climate.

Erie Forge is a leading high quality manufacturer of large scale, technically complex open die steel forgings and the nation's largest manufacturer of large ship propeller shafting. It also produces high quality carbon and alloy ingots.

"We are extremely proud to have negotiated a complex transaction which serves the interests of our employees and the community," said Allan

Concoby, the new president of Erie Forge. "We will repay this support by maintaining a high level of employment for years to come."

"This endeavor would not have been possible without the support and cooperation of the Erie Community, our government officials, National Forge Company and, most importantly, all the employees of the Erie plant," said Thomas Phillips, president of Local 1573 of the United Steelworkers of America.

Minority ownership stakes in Erie Forge are held by American Capital Strategies Ltd., a Bethesda, Md.-based investment bank which specializes in employee buyouts, and by National Forge Company. Financing was provided by the employees, ITT Capital, National Canada Finance Corporation, the Erie County Economic Development Agency, the Pennsylvania Industrial Development Authority, the Pennsylvania Machinery and Equipment Loan Fund and American Capital Strategies, Ltd.

The transaction proceeded with the full support of Erie's employees, said Concoby. "This is the conclusion of a two-year effort. All of us will be taking sacrifices in wages and benefits for several years to come. Without the support of the United Steelworkers of America, and of our salaried and management employees, this transaction would not have been possible."

Concoby expressed high hopes for the company's future. "Our workforce is skilled, experienced, and dedicated. We have a healthy $35 million order backlog. We have recently completed a $13 million capital improvement program, which has given us a world class melt to machining production capacity. This will allow us to expand aggressively into new markets, as well as build on our existing $40 million sales base."

Although there have been many employee buyouts in the steel industry in recent years, the Erie transaction is especially significant because it demonstrates the viability of such buyouts at a time of uncertain financial markets.

#90243p0535 08/31/1990 ~PR Newswire

CHICAGO (AUG. 31) PR NEWSWIRE - Selfix, Inc. (NASDAQ: SLFX) today reported that net earnings rose eight percent in fiscal 1990. For the year ended May

31, 1990, net earnings were $2.24 million, compared with $2.07 million for the same period last year. Earnings per share were $.64 in fiscal 1990 (based on 3,521,303 shares) compared to $.66 per share a year ago (based on 3,139,762 shares).

Selfix net sales for the fiscal year were $31.71 million, a 12.4 percent increase over the previous year sales of $28.21 million. The increase was the result of higher unit sales of existing products and the roll out of new products introduced during the year.

Chairman of the board Meyer J. Ragir said he expects continued sales and earnings growth in the next fiscal year: "1990 was a landmark year for Selfix, Inc. On June 22, 1990, we completed our second acquisition, Independent Products Company of West Point, Pa. I.P.C. is a leading marketer of quality products for home and closet storage. This acquisition reinforces our commitment to home organization, one of the fastest growing categories in consumer home products.

"We also completed a comprehensive expansion project at our Shutters, Inc. facility in Hebron, Ill., allowing us to increase profitability due to production efficiencies.

"Through sound capital expenditures such as these and strategic acquisitions like I.P.C., Selfix is taking steps to insure long-term growth in a highly competitive environment."

SELFIX, INC.

Fiscal year ending May 31:	1990	1989

DETROIT (AUG. 31) PR NEWSWIRE - GM International Export Sales (IES) Executive-in-Charge Dale R. Hermiller has announced the appointment of Ruth A. Dutton as director, organization and employee development for IES

effective Sept. 1, 1990.

Dutton's responsibilities in her new position will be to continue developing the human resources and organizational support required for the team operating concept which was initiated last fall when IES was reorganized.

Dutton began her GM career in November 1962 in the personnel department of Pontiac Division. In December 1977, she was promoted to manager, divisional Quality of Work Life activities, and became general supervisor, salaried personnel administration in October 1982. She was promoted to personnel director for Pontiac Division in January 1985. In January 1989 she joined the GM Personnel Staff as manager, personnel planning.

Born in Bay City, Mich., Dutton is a 1981 graduate of Oakland University. She received a masters of business administration degree from Michigan State University in 1986.

#90243p0541 08/31/1990 ~PR Newswire

LATHAM, N.Y. (AUG. 31) PR NEWSWIRE - Mitel, Inc. and Coradian Corporation (NASDAQ: CDIN) today announced Mitel's acquisition by means of a cash merger of Coradian, one of the leading independent interconnect companies in the United States. The merger was approved Aug. 30, 1990, at a special meeting of Coradian shareholders in Albany, N.Y., and became effective on Aug. 31, 1990.

Under the terms of the previously announced Agreement and Plan of Merger dated June 5, 1990, it is anticipated that former holders of Coradian securities will receive between $7,500,000 (U.S.) and $8,500,000 (U.S.) in the aggregate for their shares. The final amount will be determined after all adjustments to the purchase price are calculated.

The purchase of Coradian is the next logical step in Mitel's U.S. distribution strategy -- the Mitel Integrated Distribution Network (IDN). "Coradian is an integral part of our overall distribution plan, a plan we have been formulating for the last two years," said Mitel, Inc. President John W. Combs.

"This action was pursued because Coradian complements our existing distribution channels," Combs added. "With this acquisition, Mitel further strengthens our growing dealer network by adding a new dimension. As our Integrated Distribution Network unfolds, people will understand how this important move benefits both our business partners and end-users.

"Mitel dealers have been very successful in serving our end-users' needs in the small-to-medium-sized markets," Combs explained. "Coradian strengthens the company's position in the large line-size/multiple location market, where customers often require direct manufacturer contact."

Coradian President and CEO George Benson noted, "Coradian historically has been one of Mitel's leading distributors for large, complex applications. Coupled now with Mitel, we expect to significantly increase our position in the large line-size market."

It is presently anticipated that Coradian will remain a separate corporate entity and will report to Mitel's U.S. business region.

Headquartered in Latham, Coradian reported over $27 million in sales in 1989.

Mitel is a subsidiary of Mitel Corporation, an international manufacturer of sophisticated, reliable business telecommunications systems, public switching systems, and semiconductor devices, with annual revenues of over $400 million (CDN).

Mitel Corporation has sold more PBX systems worldwide than any other manufacturer. Over 150,000 Mitel telecommunications systems have been sold in over 100 countries. Mitel Corporation's common shares are traded on the Toronto, Montreal, New York and London stock exchanges under the symbol MLT.

FOUNTAIN VALLEY, CALIF. (AUG. 31) PR NEWSWIRE - Hyundai Motor America

today announced that it has increased the manufacturer's suggested retail price of its vehicles an average of 2.3 percent on an equipment-adjusted basis.

The manufacturer's suggested retail price for the Excel 3-door hatchback four speed manual transmissions has been increased from $5,899 to $6,275. The Excel 4-door four speed manual transmission has been adjusted from $6,999 to $7,410.

The manufacturer's suggested retail price of the roomy, comfortable Sonata 2.4 liter five-speed manual transmission is up from $9,999 to $10,700. The 3.0 liter V-6 four-speed automatic is $12,170 compared to last year's price of $11,389.

"The price increases are slight considering the substantial product upgrades the Excel and Sonata have received for 1991," said Rod Hayden, executive vice president and chief operating officer.

The following major standard equipment was added for the 1991 model year:

Excel
--Bodycolor bumpers with black rubstrips
--Bodyside molding
--Passenger side outside mirror
--full wheelcovers
Excel GL
--Full bodycolor bumpers
--Bodycolor bodyside molding
--Bodycolor door handles
--3-spoke steering wheel
--black rocker panel molding
Excel GS
--Bodycolor door handles
Excel GLS
--Bodycolor door handles
--power steering
Sonata
--AM/FM cassette stereo with 6-speakers
--Delay-out interior lamps
--dual drink holder
--seat height adjuster
--deluxe radiator grille
--new interior
Sonata GLS
--Deluxe AM/FM ETR Cassette
--Air conditioning

Hyundai Motor America will set a milestone sales record in 1990 when its

1,000,000th vehicle will be sold in less than five years since it sold its first unit in 1986. There are currently 358 Hyundai dealers nationwide which sell the subcompact Excel and midsize Sonata in addition to its newest member, Scoupe, debuting Sept. 17 for $8,395.

HOUSTON (AUG. 31) PR NEWSWIRE - Continental Express, a wholly owned subsidiary of Continental Airlines, (AMEX: CTA) announced today non-stop service from Islip to Newark International Airport effective on Nov. 1. The regional airline will initiate service with six daily departures, totaling more than 1,500 available seats per week.

Tom Barber, president of the Eastern Region of Continental Express, said, "Our customers can travel in comfort on our 40-minute flight to Newark, and conveniently connect with more than 290 Continental and Continental Express departures. Continental, Continental Express and our SAS partners offer service to worldwide destinations providing our customers access to more than 100 cities, including nearly 20 international."

Continental Express will operate service between Islip and Newark with the state-of-the-art 46-passenger Aerospatile/Aeritalia ATR-42, one of the newest aircraft in its fleet. The ATR-42 is equipped with an EFIS (Electronic Flight Instrument System) cockpit similar to modern commercial jet airliners. This system is commonly referred to as a "glass cockpit" due to the replacement of some gauges and dials with computerized display screens. The aircraft cabin features overhead storage, reclining seats, inflight service, and fold down work tables for passenger comfort and convenience.

Continental Express provides advanced seat selection, one-time customer check-in and baggage handling, and OnePass frequent flyer mileage credit. The airline's pricing schedule from Islip is designed to provide customers connecting to Continental Airlines flights in Newark with money saving thru fares.

Customers departing from Islip can make quick connections to Continental Airline departures from Newark's premier terminal C. This accessible, user-friendly terminal features moving sidewalks, color flight monitors, reasonably priced food and beverages, and clean spacious waiting areas.

Systemwide, Continental Express operates to 95 cities, including four in Micronesia, has more than 820 daily departures, and is projected to enplane approximately 3.5 million customers during 1990. With an average fleet age of approximately two years, Continental Express utilizes more

than 100 modern aircraft and employs approximately 2,100 airline professionals. Continental Express maintains hub operations in Newark, Cleveland, Denver, Guam and Houston.

ROCHESTER, N.Y. (AUG. 31) PR NEWSWIRE - Eastman Kodak Company (NYSE: EK) is offering film and processing for accredited photojournalists covering the 96th International Olympic Committee (IOC) session.

When they visit the company's press center located in the Prince Takanawa Hotel complex in Tokyo, each photojournalist will receive 25 rolls of Kodak Ektapress Gold films or Ektachrome professional films. Kodak will also process the Kodak color negative film within two hours and the Ektrachrome professional film within 24 hours.

"This service underscores our commitment to the professional photojournalist on a worldwide basis, as well as our dedication to the spirit of the Olympic Games," said Raymond H. DeMoulin, Kodak vice president and general manager of the Professional Photography Division.

"On-site processing facilities reinforce the standard of excellence that photographers worldwide have come to expect from Eastman Kodak Company," he added.

In addition, Kodak is providing 2,000 rolls of Kodacolor Gold film to the IOC delegates in attendance. "We want to ensure that the delegates can capture their memories as well," said Peter M. Palermo, Kodak vice president and general manager of the Consumer Imaging Division.

All delegates will also be wearing official identification badges featuring images produced on Kodak thermal printers. At recent Olympic Games, Kodak has supplied these badges to the athletes, officials, and all members of the Olympic family.

These activities extend a tradition of sponsorship that began 94 years ago in Athens, when Kodak products were first advertised in the official results book of the first modern Olympiad in 1896. Since then, Kodak has provided a wide array of support materials including cameras, film, and processing, in-kind support such as on-site diagnostic X-ray facilities, as well as financial consideration.

Kodak will serve as the official photographic consultant to the 1992 Olympic Games.

ATLANTA (AUG. 31) PR NEWSWIRE - The Nuclear Regulatory Commission staff has proposed a $62,500 civil penalty against Carolina Power & Light Co. for alleged violation of NRC requirements at the Brunswick nuclear power plant, located near Southport, N.C., about 30 miles south of Wilmington.

The NRC notified CP&L in a letter dated Aug. 30 that the fine was being proposed because of an event at the plant on July 5 during which two individuals received unplanned radiation exposures during work activities associated with the installation of new core reactivity detectors and cables in Unit 1 of the two-unit facility.

The agency said three Instrumentation and Control technicians entered a contamination control tent in the reactor building to complete modifications to the system and, during calibration of one of the probes, an activated detector and cable were removed directly out of the core into the technicians' work area. CP&L subsequently determined that no overexposure occurred, but the NRC said the event presented a potential for overexposure of personnel as the result of failure to establish adequate work procedures with necessary instructions and controls and assignment of a technician who was not provided adequate training for the job.

The NRC said the base civil penalty for this type of violation was $50,000 but that it was increased in this case because the company has received prior notice of similar events associated with work on similar systems at other plants. The NRC acknowledged that CP&L promptly notified the NRC resident inspector and took prompt and extensive corrective actions.

CP&L has 30 days from receipt of the notification to either pay the civil penalty or to protest it, in whole or in part.

NEW YORK (AUG. 31) PR NEWSWIRE - Alexander & Alexander Services Inc. (NYSE: AAL) said today that a Baltimore court granted the company's motion to reduce the previously reported May 2 jury verdict in a case brought by a competitor against A&A's U.S. insurance broking subsidiary.

A Circuit Court judge in Baltimore City entered a judgment of $12.5 million against its subsidiary, Alexander & Alexander Inc. The judgment is $27.5 million below the $40 million in punitive damages granted by the jury in May to B. Dixon Evander, a Baltimore insurance broker.

Alexander & Alexander Inc. trial counsel William W. Cahill Jr., of the Baltimore law firm Weinberg & Green, noted, "We are heartened by the trial court's recognition of the problems with the original verdict. "However, we believe that any award of punitive damages in this case is unwarranted. This judgment will be appealed," Cahill added.

The litigation arose out of a breach of contract dispute which involved the question of entitlement to approximately $250,000 of commissions. A&A said it does not believe that the final outcome of this litigation will have a material adverse impact on its financial condition.

A&A Services Inc. is a global insurance brokerage, risk management and human resource management consulting company serving clients from offices in more than 70 countries.

GREENVILLE, SC (AUG. 31) PR NEWSWIRE - Carolina First Corporation (NASDAQ: CAFC) announced today the completion of its merger with First Federal Savings and Loan of Georgetown. This historic event is the first of its type in the history of South Carolina financial institutions.

First Federal will be a wholly-owned subsidiary of Carolina First Corporation and will continue to operate as a savings and loan under its current name. Under the terms of the agreement First Federal stockholders will receive 1.25 shares of Carolina First for each First Federal share. Almost 827,000 shares of Carolina First stock will be issued to over 500 First Federal stockholders.

Mack I. Whittle, Jr., President of Carolina First said, "This is the first merger in South Carolina between a bank holding company and a healthy thrift. First Federal's almost $12 million dollars in capital and $120 million in assets make it one of the strongest savings and loans in the state and allows us to continue to expand in a market in which we already have a presence.

"We are quite optimistic about the future of Georgetown County. After the merger the combined companies will have over $330 million in assets and $30 million in capital and have offices in Greenville and Georgetown counties which are two of the fastest growing areas in the state.

"In addition, this merger will create a financial institution which will operate a well capitalized and profitable commercial bank and savings and loan thus opening new opportunities for Carolina First to expand into other growth markets throughout the state."

According to Joseph E. Johnston, President of First Federal, "The merger with Carolina First means that First Federal will have the ability to offer new services to the residents of Georgetown County. In addition, First Federal will be able to offer a wide range of commercial banking products to our area businesses including commercial loans, trust services and cash management services.

But no matter what new products we offer, the basic philosophy of service to our customers will not change. We have operated as a local financial institution servicing the needs of our community and that will not be changing - just improving."

Carolina First Corporation is the parent of Carolina First Bank, a state-chartered bank, headquartered in Greenville and of First Federal Savings and Loan of Georgetown. Both are full-service, community-oriented financial institutions offering a broad range of commerical and consumer banking services emphasizing personalized attention to customers.

The company operates, through its subsidiaries, four offices in Greenville County and five in Georgetown County. The company was organized in 1986 following an October initial public offering of stock. Through this offering, $15 million in capital was raised, earning Carolina First the distinction of being the largest bank holding company created in South Carolina.

#90243p0575 08/31/1990 ~PR Newswire

LOS ANGELES (AUG. 31) PR NEWSWIRE - First Interstate Bank of California today revised its military leave policy to provide the following added benefits to employee-reservists who are called to active military duty:

- Supplemental Military Pay - An employee who is a reservist called to active duty will receive supplemental income for up to three months if military wages are less. First Interstate will reimburse the difference between an employee's military salary and their regular First Interstate base salary, subject to withholding taxes. Previously, no pay supplement was provided.

- Military Leave of Absence - The corporation said that it will now place active duty reservists on a military leave of absence and will provide them with continued access to most employee benefits without interruption.

- Vacation, Sick Leave, Vesting - Employee-reservists will continue to accrue vacation and sick leave while on active duty and being paid by First Interstate. In addition, they will continue to accumulate time for vesting in the First Interstate Retirement Plan and Savings Plan.

"It is important to us that our employee not have the added burden of financial stress while serving their country," said First Interstate Bank of California Chairman and Chief Executive Officer William E.B. Siart. "This program insures that their personal, as well as family needs are met while they are on active duty."

Siart said that the new policy will go into effect immediately and will also cover any employee already called to active duty due to the current Middle East crisis.

The new First Interstate Bank of California Military Leave policy follows the recent announcement by the bank that it would defer payments on consumer loans held by reservists while they are on active duty. Loans covered under the program include home mortgages, auto loans, student loans, credit cards and lines of credit.

First Interstate Bank of California is the principal subsidiary of First Interstate Bancorp, (NYSE: I) the nation's largest retail and business banking organization with 25 wholly owned banks in 14 states and more than 1,100 offices. First Interstate Bank of California serves customers statewide through 330 branches.

CLEVELAND (AUG. 31) PR NEWSWIRE - Bearings, Inc. (NYSE: BER) today reported lower net income for the year and fourth quarter ended June 30, 1990.

Chairman of the board and chief executive officer George L. LaMore reported that for the year ended June 30, 1990, net income was $12,201,000, or $1.70 per share on sales of $651,271,000. Net income for the prior fiscal year was $18,313,000 or $2.45 per share on sales of $630,281,000.

A restructuring charge of $3.9 million associated with the acquisition of King Bearing, Inc. reduced fourth quarter earnings per share by $.33. Additionally, sales and operations were negatively affected during the quarter by the implementation of the company's new computer system.

LaMore reported that net income was $807,000, or $.11 per share, on sales of $164,823,000 for the fourth quarter ended June 30, 1990. Net income in the same quarter last year was $5,840,000 or $.79 per share on sales of $168,157,000.

Had the company not incurred the restructuring charge and the additional cost of computer implementation, earnings for the quarter would have closely approximated last year's fourth quarter earnings of $.79 and analysts' estimates for the fiscal year.

Commenting on the future, LaMore stated, "Our acquisition of King Bearing, Inc. on June 29, 1990 will strengthen the company's market position in the western and southwestern United States. With the basic functions necessary for day-to-day operations currently in place, we expect the new computer system to enhance our operational efficiency and ability to provide high quality customer service."

During the year, the company acquired 281,000 shares of its common stock pursuant to a September 1988 board authorization. The company currently has board authorization to acquire up to 252,000 additional shares of its common stock in open market and negotiated transactions, from time to time depending on market conditions.

Bearings, Inc. is the nation's leading independent distributor of bearings and power transmission components with over 350 branches in 37 states.

CONTACT: Raymond E. Smiley, vice president, treasurer and chief financial officer of Bearings, Inc., (216) 881-2838, ext. 253.

#90243p0589 08/31/1990 ~PR Newswire

PERTH, WESTERN AUSTRALIA (AUG. 31) PR NEWSWIRE - Bond Brewing Holdings Limited (BBH) today announced that its wholly owned subsidiary, Dimola Pty.

Ltd., has amended its offer to purchase outstanding 12-5/8 percent extendible subordinated debentures of BBH and extended the offer until midnight, New York time, on Friday, Sept. 14, 1990.

The offer, as amended, provides for the purchase by Dimola of up to 90 percent of the principal amount of debentures outstanding, for an increased purchase price, subject to, among other things, a minimum tender condition of 75 percent of the principal amount of debentures outstanding.

Pursuant to the amended offer, tendering debentureholders will receive U.S.$700 per U.S.$1,000 principal amount, consisting of payment of approximately U.S.$566 with respect to principal amount, and approximately U.S.$134 accrued interest (including interest on interest through the payment date) for the six month periods ended Nov. 30, 1989 and May 31, 1990.

Such accrued interest will be paid to both tendering and non-tendering debentureholders upon consummation of the offer. Debentures tendered pursuant to the offer may be withdrawn at any time prior to the expiration of the offer and, if not sooner purchased by Dimola pursuant to the offer, at any time after midnight, New York time, on the third business day following the expiration date.

The depositary has advised BBH and Dimola that, as of 5:00 p.m., New York time, on Thursday, Aug. 30, 1990, approximately 3.6 percent of the outstanding principal amount of debentures had been tendered to the depositary pursuant to the tender offer.

Dimola has received a formal offer of financing for the tender offer from Manchar Holdings Pty. Limited (Manchar). Pursuant to a contract entered into May 29, 1989 between Manchar and Bond Corporation Holdings Limited (BCH), the owner of 100 percent of the capital stock of BBH, Manchar will purchase, following consummation of the tender offer, in excess of 98 percent of the capital stock of BBH.

Manchar and its parent corporation, Bell Resources Ltd. (BRL), have entered into a joint venture agreement with Lion Nathan Limited (Lion Nathan) pursuant to which Manchar and Lion Nathan will each own 50 percent of the BBH stock to be acquired by Manchar from BCH, and will operate BBH's brewing businesses.

The joint venture agreement provides, among other things, for each of BRL and Lion Nathan to provide funds to Manchar to be lent by Manchar to Dimola to finance Dimola's tender offer. Each of the joint venture agreement and the offer of financing to Dimola are subject to a number of conditions precedent.

CONTACT: James Rawlings of Bond Brewing Holdings, (212) 223-4202.

#90243p0590 08/31/1990 ~PR Newswire

RALEIGH, NC (AUG. 31) PR NEWSWIRE - Carolina Power & Light Company (NYSE: CPL) has donated $60,000 to the North Carolina Nature Conservancy to preserve the largest known population of an endangered plant in North Carolina. The company's grant is the first major corporate donation made to the North Carolina Nature Conservancy's $1.275 million capital fundraising initiative.

The $60,000 gift will fund the purchase of Turkey Creek, a 35-acre site near Middlesex in Nash County. This site harbors the largest known population of the Carolina least trillium, a state endangered species.

"CP&L has been a supporter of the North Carolina Nature Conservancy for almost a decade. This latest donation once again demonstrates the company's strong commitment to the environment and to the North Carolina Nature Conservancy. We commend CP&L for making this important contribution towards the protection of North Carolina's natural areas," commented Frederick Annand, Associate Director of the NC Nature Conservancy.

The diminutive least trillium ranges in height from three to six inches. The least trillium's showy white flowers appear in the early spring and turn pale pink as they mature.

The plant is known to populate just six sites in North Carolina, and is threatened with extinction throughout its range. Most species of trillium are found in the western edge of the Piedmont and throughout the mountains. However, this particular species favors the wetlands of the coastal plain.

"We support efforts to protect and preserve the environment," said Sherwood H. Smith Jr., chairman and president of CP&L. "We are pleased to be a part of the Turkey Creek project and appreciate the important work that The Nature Conservancy does in North Carolina."

Carolina Power & Light Company has a long history of support for the NC Nature Conservancy. The utility previously donated $25,000 to the Carolina Bays Preserve, located in Robeson, Hoke, and Scotland Counties.

The company's commitment to natural resources' protection was also demonstrated in a $20,000 donation made in March to the NC Natural Heritage Program. The grant will be used to support development of a computer-based inventory of environmental information throughout the state.

Funds from the NC Nature Conservancy's capital campaign will be applied to acquisition, protection, and stewardship of many natural areas, including Bluff Mountain in Ashe County; Devil's Gut on the Roanoke River in

Alexander County; Angola Creek Savanna in Pender County; Joe Mountain in Alexander County; and the Scuppernong River in Washington and Tyrrell Counties. In March 1990, an anonymous benefactor pledged to match all capital funds raised by the NC Nature Conservancy through June 30, 1991, on a dollar for dollar basis, up to $500,000.

DETROIT (AUG. 31) PR NEWSWIRE - Meadowdale Foods, Inc., The Kroger Co., (NYSE: KR) and Foodland Distributors said today they have concluded the sale of Meadowdale's retail food stores to Kroger and its wholesale operations to Foodland.

Twenty-five of Meadowdale's Great Scott! supermarkets in the Detroit metropolitan area, plus four markets under construction, will operate under the name Kroger Food Stores. The transition will begin immediately and is expected to be completed in the next several weeks. Kroger said it expects to operate the acquired stores using current Great Scott! employees.

Foodland Distributors is purchasing certain assets of Meadowdale's Abner Wolf Distributors wholesale operations, as well as four Great Scott! stores. Foodland, which currently supplies Kroger's Michigan division, plus more than 50 chain and independent retail stores in the state, will supply the newly acquired Kroger Food Stores.

HARRISBURG, PA. (AUG. 31) PR NEWSWIRE - Deputy Insurance Commissioner Ronald Chronister announced today that Keystone Medical Services Inc. in Westmoreland County has been declared insolvent and ordered liquidated by Commonwealth Court.

Coverage under all Keystone contracts was ended May 31. Keystone Medical Services Inc. was an unlicensed entity which sold health insurance to less than 2,000 policyholders. The company has been prohibited from writing new business since April 1989.

Commonwealth Court's Aug. 20 order was in response to a request by the Insurance Department. Under the court order, the department will take possession of the company's assets and the commissioner will supervise the liquidation process.

On Oct. 23, 1989, the Insurance Department filed a petition in Commonwealth Court for liquidation of Keystone Medical Services Inc.

On Oct. 31, 1989, Keystone and the Insurance Department requested that Commonwealth Court stay the liquidation order. The purpose of the request

was to provide Keystone with an opportunity to raise the funds necessary to repay its liabilities and meet new Insurance Department licensing requirements.

When Keystone was unable to meet the specified requirements of the stay, the Insurance Department asked Commonwealth Court to lift the stay.

All persons having claims against Keystone Medical Services Inc. must file proof of those claims with the Pennsylvania Insurance Department's Bureau of Liquidations and Rehabilitations by Aug. 20, 1991.

All known policyholders and claimants will be mailed proof-of-claim forms, instructions for filing claims and a question-and-answer sheet explaining the liquidation process. Those with claims should complete the forms and return them immediately to the Insurance Department, Bureau of Liquidations and Rehabilitations, Strawberry Square, Harrisburg, Pa. 17120.

PROVIDENCE, R.I. (AUG. 31) PR NEWSWIRE - Nestor, Inc. (NASDAQ: NEST) today announced that Sligos, SA, a financial services firm headquartered in France, has purchased an equity interest in Nestor, and has also signed a letter of intent for a commercial agreement to finance the development and licensing of certain of the company's financial products and services in Europe, using Nestor's neural network technology.

Sligos has purchased 352,064 shares of the company's Series A preferred stock, convertible into an equal number of shares of the company's common stock, representing just under 5 percent of the common stock outstanding, for $704,128, and, if a satisfactory commercial agreement can be reached, is committed to provide additional funds toward the development of new financial products and services to be marketed in Europe.

If a satisfactory commercial agreement is not reached by the parties, Sligos may require Nestor to repurchase the preferred stock, at cost, at a later date. Dr. David Fox, president and chief executive officer of Nestor, stated that he is optimistic that a commercial agreement acceptable to both sides will be concluded within the next sixty days.

ZANESVILLE, OH (AUG. 31) PR NEWSWIRE - William T. McConnell, president and chief executive officer of Park National Corporation (NASDAQ: PARK) of Newark, Ohio, and William A. Phillips, chairman and chief executive officer of Mutual Federal Savings Bank (NASDAQ: MFBZ) A Stock Corporation, of Zanesville, Ohio, have announced the completion of their merger. The merger was finalized on Aug. 31.

Shareholders of Park National Bank and Mutual Federal Savings Bank approved the merger earlier in the week. As a result of the merger, Mutual Federal shareholders will receive an aggregate of 180,000 shares of Park stock or .2086 of a Park share for each share of Mutual Federal common stock. Park National's stock is now listed on NASDAQ: under the symbol "PARK."

Phillips said, "Mutual Federal will continue to operate under its present name with its present board of directors and management as a subsidiary of Park. We will now be able to expand the products and services we offer to our customers in all the communities we serve."

McConnell said of the transaction, "We are pleased to complete our merger with Mutual Federal. The merger with Mutual Federal is a natural extension of Park's present market into six new counties in Southeastern Ohio. Mutual Federal is a profitable and well-managed institution." The two organizations have been working on the merger for over ten months.

Park National Corporation is a multi-bank holding company with assets totaling $808 million on June 30, 1990. Park's subsidiary banks are headquartered in Licking, Fairfield and Richland counties in Ohio. Mutual Federal, with assets of $296 million on June 30, 1990, is headquartered in Muskingum County and operates 10 branches in a six-county area.

#90243p0618 08/31/1990 ~PR Newswire

TROY, MI (AUG. 31) PR NEWSWIRE - Richard A. Smith, president and chief executive officer of Newcor, Inc. (AMEX: NEW), announced the following results for the third quarter and nine months ended July 31, 1990:

SALES AND EARNINGS

	Third Quarter		Nine Months	
	1990	1989	1990	1989
Sales	$19,234,000	$28,307,000	$51,133,000	$71,892,000
Net income (loss)	742,000	1,595,000	(693,000)	2,346,000
Income (loss				

per share)	$.23	$.49	($.21)	$.72

Results for the third quarter of 1990 are in line with internal projections. Earnings per share were substantially below the all-time record earnings posted in the same period in 1989 when major assembly systems were then being completed. Third-quarter sales and earnings represent a continuation of the improved results in the second quarter ended April 30, 1990 (sales of $20.4 million and $.29 earnings per share).

The 1990 nine-month loss includes a charge of $.39 per share in the first quarter for costs to be incurred for the closedown of Newcor Canada Limited. This charge was in addition to an operating loss in the company's first quarter due to low sales of $11.5 million.

Year-to-date sales are below 1989 due to the low order backlog in Newcor's machinery segment at the start of the year. Since then, new orders and backlog have increased sharply.

The company's backlog of incomplete orders was $81.4 million at July 31, 1990, compared with $39.6 million at the start of the year and $45 million a year earlier. Incoming orders for the nine months ended July 31, 1990 increased to $92.9 million as against $54.7 million the year before due principally to machinery orders. Year-to-date orders represent a new nine-month record for the company and already exceed the level of orders normally obtained in a full year.

Record sales and earnings are anticipated in fiscal 1991 when these orders are delivered to customers.

Newcor, headquartered in Troy, designs and manufactures custom machines and manufacturing systems as well as special precision machined parts. Newcor is listed on the American Stock Exchange.

GRAND RAPIDS, MICH. (AUG. 31) PR NEWSWIRE - Gantos, Inc. (NASDAQ: GTOS) today announced its expansion plans for fiscal 1991. The company plans to open five new stores next year and will remodel five of its existing stores as well.

The 1991 plans represent a departure from Gantos' practice of the past several years in which over 30 stores per year were opened. By the end of 1990 Gantos will be operating approximately 170 stores in 25 states.

Commenting on the scaled back plans for 1991, Gantos President L. Douglas

Gantos said, "We have grown very fast over the last few years. Now, we need to pause and fine tune our existing operation before continuing with our long-range plan. Our management resources can be best used during 1991 to more fully develop the Gantos concept at our existing stores and position ourselves for further growth."

Gantos, Inc., based in Grand Rapids, is a leading retailer of quality women's apparel. Gantos currently operates 158 stores in 23 states.

#90243p0624 08/31/1990 ~PR Newswire

CLEVELAND (AUG. 31) PR NEWSWIRE - An agreement between the Playhouse Square Foundation and the Dallas-based Wyndham Hotels & Resorts to develop the proposed $27 million, 205-room luxury hotel at Playhouse Square was announced today by representatives of the Foundation, Wyndham and the City of Cleveland.

Lawrence J. Wilker, president of Playhouse Square Foundation, and Jospeh A. Marinucci, Cleveland's director of Economic Development, applauded the entry of Wyndham, which develops, owns and manages four- star luxury hotels nationwide and in the Caribbean. Wyndham, established in 1982, owns or operates 36 hotels with 10,000 rooms, representing assets in excess of $500 million.

Stephen K. Miller, a former Clevelander and Wyndham's vice-president for development and acquisitions and its lead negotiator, said that his company had been aware of the project for several years and he welcomes the opportunity to be involved with Playhouse Square. He said that he and other Wyndham representatives had been in Cleveland for four days to evaluate the economic feasibility of the project. During that time, they met with Mayor Michael R. White, City Council members, the Playhouse Square Foundation, construction and design companies, representatives of the lending community and local hospitality consultants.

Wyndham representatives also made a site and design review of the project and determined that the exterior of the hotel will remain virtually identical to the original plans, but that there will be some interior changes.

Miller added that his company is particularly interested in the Playhouse Square project because of its successful involvement with a similar project in downtown Milwaukee. The 221-room Wyndham Milwaukee Center, which opened in mid-1988, is the cornerstone of a $100 million development located within the downtown theater district.

A contingency for Playhouse Square and Wyndham in building the Cleveland theater-district hotel, Marinucci said, will be obtaining the federal monies that had been earmarked for the project. The city today formally requested of the U.S. Department of Housing and Urban Development a six-month extension on a $5.5 million Urban Development Action Grant (UDAG) awarded to the city to develop the triangular property at East 13th Street and Euclid Avenue.

In addition to the UDAG funds, Playhouse Square and Wyndham will seek the use of a Tax Increment Financing (TIF) package for public improvements at the site. Marinucci said that a contractual agreement must still be executed with the Wolstein/Ferro Group, owner of the Renaissance Office Tower, before the TIF financing can be finalized.

Once Playhouse Square and Wyndham have concluded its negotiations with the city, the development package will be reviewed by the Tax Abatement Commission and Cleveland City Council.

HIGHLAND PARK, MI (AUG. 31) PR NEWSWIRE - Chrysler Corporation (NYSE: C) today announced it will offer a choice of cash rebates or low rate financing on a wide range of new 1991 model cars and trucks during the month of September.

The cash incentives are $500 on most models, and $1,000 on two truck models. The optional low annual percentage financing rates through Chrysler Credit are: 7.9 percent from one to 48 months and 10.9 percent from 49 to 60 months. The program covers most domestically-produced vehicles except minivans, convertibles, standard-size vans and wagons, and some import models.

The $500 incentives cover: Chrysler Imperial, New Yorker Fifth Avenue and Salon, LeBaron coupe and sedan; Plymouth Acclaim, Sundance (not America model), Laser, Colt (not Vista); Dodge Daytona, Dynasty, Monaco, Spirit, Shadow (not America model), Colt (not Vista), standard-size Ram pickup, Dakota pickup; Eagle Premier and Talon; Jeep Comanche, Cherokee and Wrangler.

The $1,000 incentives apply to Dodge Ramcharger and Jeep Grand Wagoneer. All domestically-produced '91 models except minivans, convertibles, standard-size vans and wagons, Eagle Summit and the Shadow/Sundance Americas are also eligible for special lease rates under Chrysler Credit's

Gold Key Lease Program.

CHARLOTTE, NC (AUG. 31) PR NEWSWIRE - First Union Corporation (NYSE: FTU) has announced a sale-leaseback agreement involving 100 First Union bank offices in North Carolina, Georgia, and Florida.

First Union will sell the branches to an affiliate of Pitney Bowes Credit Corporation for approximately $116 million and then lease the branches back under a long-term lease agreement. This sale represents a redeployment of assets into the core banking business of First Union and will not effect the delivery of service to its markets.

The sale is expected to generate an after-tax gain of approximately $40 million, which will be recognized by First Union over the initial 20-year lease term. The gain recognized in 1991 is expected to result in net income of approximately two cents per common share.

As of June 30, 1990, First Union Corporation operated 779 bank offices in North Carolina, South Carolina, Georgia, Florida and Tennessee and had assets of $38.4 billion.

CALGARY, ALBERTA (AUG. 31) PR NEWSWIRE - Construction of the $825-million Caroline gas project will begin as soon as possible, Shell Canada Vice President Ray Woods said today.

His announcement followed release of the decision report by the Alberta Energy Resources Conservation Board approving Shell's project design.

"We're very pleased with the decision and its promptness, considering the volume of information the ERCB had to examine," said Woods, Shell's vice president of resources development.

Shell (MONT, TRNT, VANC: SHC) has secured all its municipal development approvals, conditional on ERCB approval, and hopes to have workers and equipment in the field in October, Woods said. Timing is dependent upon receiving necessary permits from Alberta Environment and completion of agreements with working interest owners.

"We're looking forward to working with the community and the working interest owners to proceed in the most timely fashion possible," he said.

The project will employ an average workforce of some 755 people over 30 months, peaking at 1,620. Development costs are expected to reach $1 billion in as-spent dollars and the plant and field will employ about 190 people when commissioned in early 1993.

Caroline revenues of some $10 billion will generate federal and provincial taxes of $3 billion over the 30-year life of the project and provincial royalties of $2 billion.

"This is good news for Shell and for the Caroline region, but it's also good news for Alberta because 80 percent of total spending will be here and spin-off economic impact is predicted to reach $1.8 billion over the life of the construction project," Woods said.

"No project has faced a more exhaustive review process," he said. "Shell supports that process and we're very pleased with the results."

"We've been working with area residents for more than two years and we intend to continue working with them through the construction period and over the life of the project," Woods said.

Caroline is about 140 km northwest of Calgary. The project will include a new gas processing plant 14 km south of Caroline. An underground, liquid-sulfur pipeline will carry sulfur from the plant to new forming facilities on the existing Canadian Pacific rail line, 44 km south of the plant site.

MINNEAPOLIS (AUG. 31) PR NEWSWIRE - Dean L. Hahn, president of Hawkins Chemical, Inc. announced today sales and earnings for the three- month and nine-month periods ended June 30, 1990. Sales for the quarter ended June 30, 1990 were $18,972,336, up $5,862,103 from the comparable period last year. Net income for the quarter was $948,131, a decrease of $31,604 for the comparable period one year ago. Nine-month results show a 39 percent increase in sales and a 7 percent increase in earnings. The major reason for the sales increase is the inclusion of Tessman Seed, Inc. acquired by the company as of Oct. 1, 1989. Income per share was $.30 compared to $.29 for the comparable nine-month period a year ago.

LUMBERTON, NC (AUG. 31) PR NEWSWIRE - Southern National Corporation (NASDAQ-NMS: SNAT) announced today it has completed its acquisition of Western Carolina Savings and Loan of Valdese and Mutual Federal Savings and Loan of Elkin (NASDAQ-NMS: MUTU), two strong savings and loan companies that give the $3.1 billion bank-holding company entry into new markets in western North Carolina.

Merger of the two S&Ls were consummated Aug. 31 following the approval of the company's shareholders two weeks ago. Western Carolina and Mutual Federal will retain their identities and continue to operate under their own boards. There will be no interruption of service or inconvenience to customers.

"Their customers will notice very little difference," said Southern National Chairman Hector MacLean. "Both S&Ls will continue to operate as they always have. We are planning, however, to expand their offering with the introduction of some of Southern National's more compatible products and services."

Western Carolina, with offices in Morganton and Hildebran, has

approximately $90 million in assets. Mutual Federal joins Southern National with approximately $130 million in assets with branches in Yadkinville and Dobson.

WASHINGTON, DC (AUG. 31) PR NEWSWIRE - Delta Air Lines (NYSE: DAL) said today it should be awarded a new route between Atlanta and Manchester, England, because of its ability to provide online service to large numbers of travelers, and because an award to the Southeast would provide balance to the service pattern to this important market.

Delta's comments were part of written testimony filed with the U.S. Department of Transportation in the United States - United Kingdom Regional Airport Service Proceeding. The U.S. is allowed to designate two additional carriers to Manchester under a bilateral agreement signed with the United Kingdom earlier this year.

In his testimony Delta's Executive Vice President - Marketing and Stations Whit Hawkins said, "Our Atlanta hub is one of the largest in the world and will afford the greatest number of online passengers the travel flexibility that can be achieved only by concentrating U. K service at the same large hub.

"Delta's route network greatly enhances its ability to operate successfully in development of international routes, such as the Manchester route," Hawkins added.

"We believe that the convenience of a routing between this rapidly developing area of the U.K. and Delta's network through its primary (Atlanta) hub, together with Delta's marketing, service quality, and well-established reputation, will assure the route's success."

In its testimony, Delta outlined plans to operate daily service to Manchester using Boeing 767-332ER equipment on the flight. The 218-passenger plane features coach, business, and first class seating and currently is the newest plane in Delta's fleet of 435-plus jets. A wide range of fares and travel packages would be available for travelers in this market.

A major world airline, Delta operates more than 2,400 flights each day with service to eight cities in Europe and four in Asia. In addition, Delta has applications pending for new service to an additional eight European cities from its Atlanta hub, as well as applications pending for improved service across the Pacific.

DALLAS (AUG. 31) PR NEWSWIRE - Harry J. Gray, chairman and chief executive officer of American Medical Holdings Inc. (AMEX: AMI) announced today that James F. Lyons, president of American Medical International Inc., a wholly-owned subsidiary of American Medical Holdings Inc., has also been appointed chief operating officer. John J. Silver Jr. has resigned as American Medical International's executive vice president and

chief operating officer to pursue other business opportunities.

Gray also announced the election of two new executive vice presidents of American Medical International, including W. Randolph Smith, formerly senior vice president - chief administrative officer, and David Finkel, formerly senior vice president - operations. R. Jeffrey Taylor will continue as executive vice president, with expanded responsibilities, Gray stated. "Together, these executives have more than 40 years experience in all phases of the hospital management field."

According to Gray, each of the new appointments will have the responsibility of overseeing distinct groups of American Medical Holdings' domestic acute care hospitals. Taylor will be responsible for the company's hospitals in Alabama, California, Colorado and Nebraska; Smith for the hospitals in Arkansas, Indiana, Louisiana, Missouri and Texas; and Finkel the hospitals in Georgia, Florida, North Carolina and South Carolina. Each of the new appointments will operate out of the company's Dallas Service Center.

American Medical Holdings Inc. and its affiliates, which founded the investor-owned hospital industry in 1960, currently operates 50 hospitals in the United States including 46 acute care hospitals and four psychiatric hospitals.

KANSAS CITY, MO (AUG. 31) PR NEWSWIRE - Saztec International (NASDAQ: SAZZ) of Kansas City, a world leader in information technology, announced

today the results for the fiscal year 1990.

For the 12 months ended June 30, 1990, Saztec reports revenue of $16,289,308 which was a decrease in revenue from $19,030,090 for the year ended June 30, 1989. The net loss was $598,518, which compares to income of $1,028,045 for the previous year. Earnings per share decreased to a 17 cent loss versus income of 30 cents for the like period last year.

The primary factors contributing to the year-end downturn in profitability include a loss on a 1986 investment in a leveraged lease of $414,400, resulting in a loss from continuing operations of $336,200; and a loss from the company's discontinued hardware division of $262,400.

Other factors associated with the year-end downturn include a delay in revenue from telephone utility contracts and a continued investment in the Information Conversion Express (ICE)(SM) network.

"Last year was a transitional year for Saztec International. The company discontinued its hardware division and focused on product development and expansion through acquisition. Saztec is starting Fiscal 1991 with a clean slate. We are already seeing a significant increase in revenue, primarily from the telephone industry, in the first quarter of fiscal year 1991," said Thomas L. Reed, chairman and chief executive officer.

"When a company is in a growth stage such as Saztec is in, quarter-to-quarter volatility is expected. Though Saztec experienced short term losses in both the third and fourth quarters of fiscal year 1990, the company will see long-term gains in profitability resulting from the actions taken this past fiscal year," said Reed.

Saztec, an international leader in the use of computer technology, provides comprehensive services to convert information for use on computer systems.

LOS ANGELES (AUG. 31) PR NEWSWIRE - With the landing of Lufthansa's cargo flight 4450 on Sept. 1, Lufthansa will have transferred its Alaska operations from Anchorage to Fairbanks International Airport.

The German national airline will operate 12 weekly cargo services between Germany and the Far East with the Fairbanks stopover. All services are provided with Boeing 747 freighters, which have a special meaning to Lufthansa - it was the 'launch' customer of the aircraft back in 1972.

Lufthansa has been serving the State of Alaska since 1964. In 1989 passenger service was dropped after the airline received permission for overflights over the USSR on its route between Germany and the Far East coinciding with the introduction of the Boeing 747-400 series of aircraft.

Lufthansa officials working in cooperation with the Fairbanks Industrial Development Corp. decided that a Fairbanks stopover enroute Europe and Asia would reduce flying time and therefore permit more cargo to be carried on the route since fuel consumption would be reduced. The Fairbanks operations of Lufthansa will be headed by Wilhelm Hinrichs, who has been a Lufthansa employee since 1958.

Lufthansa is currently the largest international air cargo carrier. The airliner employs nearly 60,000 people and provides passenger and cargo service to 85 nations around the world.

#90243p0698 08/31/1990 ~PR Newswire

FAIRMONT, WV (AUG. 31) PR NEWSWIRE - Electronic Control Systems Inc. ("ECS") announced today that Control Techniques ("CT") of the United Kingdom has agreed that by Sept. 5, 1990, it will make a merger proposal for ECS.

The proposal would be at a per share price of $2.43 subject to a downward adjustment for expenses not to exceed five cents per share. The merger proposal would be subject, among other conditions, to satisfactory completion by CT of due diligence inquiries and an environmental audit of ECS. The merger proposal, if accepted by the board of ECS, would require approval by the shareholders of ECS.

Certain shareholders (and related interests) who are directors and officers of ECS have entered into option agreements with CT giving CT the right to purchase their shares (which represent apprpoximately 49.0 percent of outstanding shares of ECS) for $2.43 per share.

The options expire on Sept. 5, 1990. However, if CT makes a merger proposal to ECS by Sept. 5, 1990, the options will be extended until Sept. 28, 1990, to enable due diligence inquiries to be completed and a merger agreement to be executed.

In the event that CT and ECS sign a merger agreement by Sept. 28, 1990, the options will be automatically extended until March 31, 1991 (unless the merger agreement is terminated earlier).

The failure of the parties to negotiate or execute a definitive merger

agreement providing for the purchase of all of the company's shares will not affect CT's right to purchase the shares subject to the option agreements.

Michael Basile, president, said that CT required these shareholders to enter into the option agreements as a precondition of CT's willingness to consider an overall merger proposal for ECS.

CT has said that "the acquisition of ECS would be our first move into the U.S.A. market for Control Techniques' process control division. The geographical and product fit is excellent and provides exciting future prospects. It would be our intention to continue to operate the company from its Fairmont location, and to expand the business."

CT has also agreed that in the event that it exercises its option or acquires ECS in a merger, it will enter into a one-year consulting agreement with Basile and Leo F. Modi, secretary/treasurer of ECS, two founders of ECS. The consulting agreements provide for such individuals to give advice in connection with the management of ECS.

Basile said that he felt a merger with CT was in the interests of all of the shareholders and that having CT involved in the business of ECS would be in the best interest of the company and its employees because of the size and business operations of CT.

CT is a manufacturer of motion control, process control and automation products, having subsidiary companies in the United States, Europe and the Far East.

ARLINGTON HEIGHTS, IL (AUG. 31) PR NEWSWIRE - Bank Building and Equipment Corp. of America, St. Louis, has announced the sale of certain of the company's assets to First Financial Building Corp., Arlington Heights, Ill. The purchased price was not disclosed.

Bank Building is a nationwide service organization engaged in consulting, planning, design and construction services for custom single-purpose facilities for the financial and medical markets through its Financial Facilities and Financial Research Associates divisions, and its Modular Buildings, Inc. (MBI) subsidiary.

First Financial Building Corp., a newly formed, privately held Illinois corporation, will purchase the contracts and businesses of the consulting, architectural design and construction activities of the Financial Facilities and Financial Research Associates divisions and MBI subsidiary. The sale is subject to court approval, according to the announcement.

The company also announced that John T. Golitz had resigned as Bank Building's president and chief executive officer to form the new corporation. Golitz, an entrepreneur, has over 33 years of management experience in the manufacturing and distribution of products for the construction industry. He has been president and chief executive officer of his own, privately held company since 1973. Golitz joined Bank Building in December 1989.

Golitz said that the corporate offices for the new company will be located in Arlington Heights, Ill., a suburb of Chicago. "The management, consulting, design, construction and marketing t eams will remain intact at the new company," he said. "We will begin with a team of 88 professionals and support people at our four regional offices in St. Louis

Mo.; Hartford, Conn.; Atlanta; and Clearwater, Fla."

He added that the company anticipates opening a western divisional office in California in the near future.

SAN FRANCISCO (AUG. 31) PR NEWSWIRE - Bechtel announced today that its Houston office has been awarded a contract to expand a $140 million petroleum coke/sulfur recovery facility for Conoco Inc.

Bechtel will provide engineering, procurement and construction services for the refinery project, located in Billings, Mont.

The assignment involves installing a new delayed coker unit to produce petroleum coke, a coal-like substance that's used as a fuel. The job also includes the revamp of several other units, including wastewater treatment and sulfur removal facilities. The addition will reduce the refinery's sulfur dioxide and nitrogen oxide emissions.

Project engineering and procurement employment in Bechtel's Houston office will reach 200 during the course of the assignment. Peak construction workforce at the jobsite in Billings will exceed 500.

Conoco, a subsidiary of DuPont, is headquartered in Houston. Bechtel Corp. and Bechtel Construction Co., both entities of Bechtel Group Inc. have major offices in Houston.

#90243p0710 08/31/1990 ~PR Newswire
WAUKEGAN, ILL. (AUG. 31) PR NEWSWIRE - In response to the industry-wide slump in marine products sales that has continued through the summer months, Outboard Marine Corp. (OMC) (NYSE: OM) today announced additional restructuring plans designed to achieve cost savings.

OMC said the restructuring of its operating units undertaken in the 1990 fiscal year could reduce future costs by as much as $43 million annuallly.
The company also said charges resulting from those restructuring actions plus other one-time charges, will total approximately $47.5 million for the company's 1990 fiscal year, which ends Sept. 30. OMC said approximately $33 million of the charges would be taken in the comany's fourth quarter.

"We are committed to making the structural changes in our operations that are necessary to return OMC to profitability," said OMC President and Chief Executive Officer James C. Chapman. "Earlier this year, we began to implement a program to reduce costs and enhance the efficiency of our operations," Chapman said. "The actions we have initiated so far this

quarter continue that program of structural change."

Chapman said that OMC is initiating a series of fourth quarter facility closings and transfers of manufacturing operations, including the closing of OMC's three Top of the Dock retail shoping mall outlets. In addition, he said, OMC was beginning the process of closing three U.S. boat manufacturing plants and an office facility, as well as the company's Australian outboard motor assembly plant.

According to Chapman, OMC will continue to sell the line of nautical fashion apparel that was carried in the Top of the Dock stores through OMC's Four Winns boat dealerships and a catalog sales operation. The boat manufacturing operations conducted in the plants scheduled to be closed will be consolidated into other OMC boat plants, he said. Chapman also said OMC will supply its Australian dealers with outboards produced in the U.S. and other countries. He added that OMC would maintain its Australian marketing, administrative and boat building operations.

Chapman said the fourth quarter charges for these restructuring actions would total approximately $17.0 million. Earlier in the year, OMC incurred charges of $5.3 million to close one of its U.S. outboard motor assembly plants, restructure other manufacturing operations and provide for severance benefits resulting from a staff reduction program. OMC has reduced its salaried work force by approximately 16 percent, or 600 jobs, since the start of the company's fiscal year last Oct. 1.

Outboard Marine Corp. is a leading international marketer of marine engines, boats, accessories and services.

#90243p0711 08/31/1990 ~PR Newswire

CAMAS, WASH. (AUG. 31) PR NEWSWIRE - The Washington State Department of Ecology has fined the James River Corp., Camas, $25,000 for wastewater discharge violations stemming from sulfuric acid and sodium hydroxide spills during May and June 1990.

The company was penalized for allowing the pH in Blue Creek, a body of water that flows in a tunnel under the mill, to drop below and exceed the limits contained in the facility's wastewater discharge permit. pH measures the degree of acidity or alkalinity of a solution (pH values from 0 to 7 indicate acidity, and from 7 to 14 indicate aklalinity).

According to Ecology's enforcemet action, the pH of Blue Creek, dropped below 4.0 for 55 minutes to a minimum pH of 3.3 on May 4. The problem was caused by a sulfuric acid spill in a sump pump.

During June sodium hydroxide leaked from a cracked concrete trench and sump pump pipe connections resulting in increased pH levels:

- On June 9, the pH was above 8.5 for 24 hours to a maximum of 10.0.
- On June 12, the pH exceeded 8.5 for six hours.
- On June 13, the pH exceeded 8.5 for two hours.

The company corrected the problem causing the spills on June 8. Although water that is above or below the pH limits set by Ecology can be harmful to fish and other aquatic organisms, no environmental damage resulted from the spills.

The penalty was issued Aug. 17. The company may appeal the fine to Ecology and/or the state Pollution Control Hearings Board.

Ecology is currently in the process of reissuing a new five-year wastewater discharge permit for the mill. A public meeting and hearing regarding the new permit will be held on Oct. 11 at the Clark County PUD, 89 "C" Street, Washougal, Wash., beginning at 6:30 p.m.

#90243p0722 08/31/1990 ~PR Newswire

WASHINGTON (AUG. 31) PR NEWSWIRE - The Office of Thrift Supervision (OTS) today placed Atlanta Federal Savings & Loan Association, Atlanta, Texas in receivership and chartered a new federal mutual institution to take its place.

The new institution, Atlanta Federal Savings Association, will assume certain assets and liabilities of the old thrift, and will operate in conservatorship under the management of the Resolution Trust Corp.

The takeover did not result in any interruption of Atlanta Federal's day-to-day operations. The institution and its one branch in Hughes Springs will remain open for business as usual. Holders of insured accounts are not affected by the action, which was taken by OTS to protect insured depositors and the interests of the thrift insurance fund. Deposits remain insured to the $100,000 legal limit.

OTS initiated the action because Atlanta Federal was operating in an unsafe and unsound condition, including having insufficient capital, with no prospect of replenishment without federal assistance.

Atlanta Federal's condition is due primarily to poor asset quality. Assets classified as substandard, doubtful or loss grew from $3.99 million as of Dec. 31, 1987, to $16.19 million by Dec. 31, 1989, including $8.4 million in repossessed land and income property. There was also inadequate managerial oversight of loan underwriting policies and procedures, with no written collection policies. Delinquencies were not seriously pursued.

Atlanta Federal is insolvent in that it has negative tangible capital. As of June 30, 1990, Atlanta Federal reported assets of $89.4 million, liabilities of $90.5 million and tangible capital of negative $1.13 million, for a tangible capital-to-asset ratio of negative 1.26

DENVER (AUG. 31) PR NEWSWIRE - AMDURA Corp. (NYSE: ADU) today announced that it had received a bid for certain operating assets of its AMDURA National Distribution Co. (ANDCO) from United Hardware Distributing Co. The bid has been qualified and will be submitted to the Bankruptcy Court next week. The all-cash bid is subject to various closing conditions and Bankruptcy Court approval.

Under the terms of the bid, United Hardware would acquire ANDCO's inventory and its distribution center in Milbank, S.D.

The bid was submitted under procedures established by the Bankruptcy Court in response to a proposed sale of the ANDCO assets to OUR OWN Hardware. The motion for sale to OUR OWN was filed with the Court in early August. The bidding process provided that other interested parties could submit "higher or better" bids.

A Bankruptcy Court hearing on the sale is scheduled for Sept. 7, 1990. At that time, all qualified bidders may submit "higher or better bids" as provided for by the bidding process. The sale requires Court approval.

AMDURA Corp. and AMDURA National Distribution Co. filed for protection under Chapter 11 of the Bankruptcy Code on April 2, 1990. AMDURA announced that it would solicit bids for its distribution businesses on April 16, 1990.

United Hardware Distributing Co. and OUR OWN Hardware are both Minneapolis Minnesota-based, dealer-owned hardware cooperatives.

MOSCOW (AUG. 31) TASS - THE SOVIET UNION HAS GREAT POTENTIAL FOR EXPORTING VINTAGE WINES, DEPUTY DIRECTOR OF THE UNION MAGARACH RESEARCH INSTITUTE OF VITICULTURE PROFESSOR GERMAN VALUIKO TOLD TASS IN CONNECTION WITH THE 70TH GENERAL ASSEMBLY OF THE INTERNATIONAL WINE AND VINE OFFICE THAT OPENS ON SEPTEMBER 2 IN YALTA.

THE PROBLEM IS THAT WESTERNERS KNOW VERY LITTLE ABOUT SOVIET WINES. FOREIGN CUSTOMERS HAVE ACTUALLY TASTED ONLY SOVIET SPARKLING WINE AND TWO OR THREE KINDS OF MOLDAVIAN AND GEORGIAN TABLE WINES, THE PROFESSOR SAID.

HE REFERRED TO THE LONDON SOTHEBY'S AUCTION IN APRIL, 1990 AS THE FIRST MAJOR SALE OF WINES FROM THE FAMOUS MASSANDRA WINE REGION. OVER ONE BILLION U.S. DOLLARS WAS MADE AT THE AUCTION. WESTERN PARTNERS BECAME INTERESTED IN THE MASSANDRA AGED WINES THAT HAVE EARNED 148 GOLD AND SILVER MEDALS AND TWO GRAND PRIZES AT EXHIBITIONS AND FAIRS OVER 50 YEARS.

PROFESSOR VALUIKO RECALLED THE HYGIENIC, NUTRITIONAL AND HEALTH GIVING QUALITIES OF GRAPE WINES.

SOVIET WINE-MAKERS NOW FACE THE NEED TO ENTER THE INTERNATIONAL MARKET. IT WOULD BE NECESSARY TO DEVISE ABORIGINAL NAMES FOR MADEIRA, PORT AND SHERRY WINES PRODUCED IN THE SOVIET UNION AFTER THE AGREEMENT ON INTELLECTUAL PROPERTY IS SIGNED BY THE USSR.

SOME NEW WINES HAVE BEEN DEVELOPED. MOLDAVIAN ROSHU DE PURKAR AND ROMANESHTY, CRIMEAN CABERNET ABRAU DURSO, RIZLING ALKADAIR AND WHITE ZOLOTAYA BALKA ARE AMONG THESE.

"WE HOPE," VALUIKO SAID, "THAT THE BALTIC REPUBLICS, THE UKRAINE AND BYELORUSSIA WILL RESTORE THE PRODUCTION OF REMARKABLE FRUIT WINES, INCLUDING APPLE, RASPBERRY AND BLACKBERRY WINES."

MOSCOW (AUG. 31) TASS - THE SCALE OF ILLEGAL AMBER MINING IN THE SOVIET UNION HAS GROWN DRAMATICALLY THIS YEAR AFTER BLACK- MARKET PRICES INCREASED BY ALMOST 20 TIMES, THE TRADE UNION DAILY TRUD REPORTS TODAY.

IT IDENTIFIES A POORLY GUARDED QUARRY OUTSIDE THE VILLAGE OF YANTARNY NEAR KALINGRAD, ON THE BALTIC COAST, AS THE FOCAL POINT OF THE TROUBLE.

MORE THAN 300 THIEVES HAVE BEEN DETAINED THIS YEAR IN THE AREA, CALLED AN "AMBER KLONDIKE" BY THE NEWSPAPER, BUT, TRUD SAYS, THIS IS JUST FIVE OR TEN PER CENT OF THE OVERALL NUMBER OF ILLICIT AMBER MINERS OPERATING THERE.

THEIR SHADOWY TRADE IS SO PROFITABLE THAT SOME LOCAL PEOPLE HAVE GIVEN UP THEIR REGULAR JOBS IN FAVOUR OF IT, THE NEWSPAPER REPORTS. IT EXPLAINS THAT THE BLACK-MARKET PRICE OF A KILOGRAM OF AMBER WENT UP TO 2,000 ROUBLES FROM 300 ROUBLES LAST SPRING AND IS NOW NEARING 5,000 ROUBLES.

TRUD ADDS THAT FIVE ILLICIT MINERS DIED THIS YEAR AFTER CAVE- INS IN THE TUNNELS THEY HAD DUG. THE EXTORTION RACKET TARGETTING SUCH MINERS IS ALSO GROWING, AND POLICE HAVE ALREADY APPREHENDED SEVERAL CRIMINAL GANGS SPECIALISING IN IT.

IT SAYS THAT THE SIZE OF ILLEGAL AMBER PRODUCTION IS HARD TO ESTIMATE, BUT AT LEAST 12 MILLION DOLLARS WORTH OF AMBER ARE CURRENTLY SMUGGLED OUT OF THE COUNTRY EVERY YEAR.

(AUG. 31) UPI - President Bush says he wants the other nations of the world to produce some cash to back up their support of the U-S-led effort to force Iraq to withdraw from Kuwait. On Thursday, Bush announced that he is sending Secretary of State Baker and Treasury Secretary Brady on a multi-nation trip to drum up contributions to defray the costs of the operation. The Pentagon estimates that Operation Desert Shield will cost 46-Million dollars a day through the end of September.

NASA says it will be at least Wednesday before the shuttle Columbia gets off the ground. A mysterious glitch in one of the ship's four telescopes forced space agency officials Thursday night to postpone Saturday's scheduled launch while engineers fix the problem. Columbia and its 10-day astronomy mission already is three months behind schedule because of a hydrogen fuel leak.

A key roadblock to a German unification pact was removed Thursday night. The Bonn government and the main opposition party agreed that for the next two years, abortion will remain legal in East Germany and illegal in West Germany. The two German governments are to initial the treaty Friday morning in Bonn, before signing it later in the day in East Berlin. The document must still be ratified by both parliaments. Unification is set to take place October 3rd.

Some Mohawk negotiators blame Thursday night's sudden collapse of talks with the Quebec government on a clash between tribal factions. And they fear an assault by Canadian troops at barricades around two reserves. Earlier, talks between the Indians and government appeared promising... with negotiators apparently settled on a framework agreement during a marathon session that ended early Thursday. The dispute arose several months ago over a proposed expansion of a golf course on land the Mohawks

claim is an ancient burial ground.

(AUG. 31) UPI - Imperial County, California, was jolted Thursday night by a small earthquake and a light aftershock. Officials report NO injuries or damage. The quake registered three-point-six on the Richter scale. The aftershock 18 minutes later measured three-point-oh. Both were centered 41 miles northwest of El Centro, 160 miles from Los Angeles.

The National Safe Workplace Institute says many U-S companies evade laws protecting workers from on-the-job hazards by exporting work to Mexico. The Institute's annual Labor Day report on workplace hazards says there is little regulation of working conditions in Mexico... where many U-S-owned assembly plants sprung up in the 1980's. The report suggested that the problem could be solved by legislation requiring all goods sold ''

#90243u0194 08/31/1990 ~United Press International
(AUG. 31) UPI - United Nations Secretary General Javier Perez de Cuellar faces his toughest mission yet when he meets Friday in Amman, Jordan, with Iraq's foreign minister. Perez de Cuellar says he's ''hopeful'' a peaceful outcome to the Persian Gulf crisis can be reached, but denies bringing any blueprint to solve it. The 70-year-old Peruvian diplomat has a reputation as a low-keyed, but successful peacemaker.

Documents show that pro-Israeli political action committees pour hundreds of thousands of dollars into congressional campaigns... practically driving pro-Arab PACs out of the influence game. In the current election cycle beginning January 1st, 1989, and going to the end of July, PACs promoting Israeli issues contributed nearly two-and-one- half-Million dollars to candidates for election in both the House and Senate. During the same period, PACs supporting Arab or Moslem concerns gave just 29-hundred-50 dollars. The figures come from reports filed by the PACs and compiled by the Federal Election Commission.

Official sources in Lebanon say the pro-Syrian government of President Elias Hrawi have given rebel army commander General Michel Aoun a 10-day ultimatum. The sources say Aoun has until September 9th to end his rebellion and join the legitimate government... or Hrawi will use military force. The Christian general has refused to relinquish power to Hrawi and leave the presidential palace five miles southeast of Beirut.

Representatives from Costa Rica, El Salvador, Guatemala, Honduras and Nicaragua are meeting Thursday and Friday in Managua. They are hoping to extend the regional co-operation agreements that have recently worked at

forging peace and economic accords to the issue of drug trafficking. Officials at the meeting agree that the region is beginning to fight its reputation as a bridge between South American drug producers and U-S consumers.

#90243u0377 08/31/1990 ~United Press International

(AUG. 31) UPI - Talks between the government of Quebec and Mohawk Indians collapsed suddenly yesterday. Quebec Premier Robert Bourassa says the Indians withdrew their delegates. An Indian negotiator says the Mohawks are NOT making unreasonable demands. The suspension raises fears that Canada might use force against the Indians.

.

The dispute centers on a planned golf course expansion on land the Indians say is an ancient burial ground.

Diplomatic sources say an interim government has been selected in an attempt to end Liberia's civil war. The provisional government is to rule until elections can be held in one year. The sources say negotiators believe a peacekeeping force in Liberia will soon be in full control of the country.

Former New York State Senator Vander Beatty was shot and killed yesterday in Brooklyn. Beatty was once convicted of forgery and election fraud. The gunman fled from the scene of the shooting. In the Bronx, assistant District Attorney Sean Healy was shot and killed in a grocery. A man turned himself in to police last night in the Bronx shooting.

A federal appeals court has thrown out singer Wayne Newton's five-Million-dollar libel judgment against N-B-C. The court said the evidence failed to show any malice toward Newton. The case involved two N-B-C news stories that suggested mob figures had hidden interests in Newton's purchase of a Las Vegas hotel.

Three corporations have withdrawn sponsorship of a governors' golf match at an all-white country club in Natchez, Mississippi. The event will be cancelled. The match was planned as part of the Southern Governors' Association meeting next month. The club says it has NO black members, but does NOT discriminate.

#90243u0477 08/31/1990 ~United Press International

CAPE CANAVERAL, Fla. (AUG. 31) UPI - Engineers backed out of the hard-luck shuttle Columbia's interrupted countdown Friday with launch

delayed from Saturday to the middle of next week or later because of trouble with an on-board telescope.

With Columbia already running three months late because of a fuel leak, NASA managers did not know when the veteran spaceplane's seven-man crew might be cleared for another launch attempt, saying only that the mission was on hold for ''several days.''

But space agency officials said liquid oxygen and explosive hydrogen would have to be drained from on-board fuel tanks and that it would take until Saturday at the earliest to even begin repairs.

Assuming engineers can easily fix the trouble with Columbia's Broad Band X-ray Telescope, or BBXRT, the hydrogen and oxygen would have to be reloaded during another countdown next week.

''We're scrubbed to no earlier than Wednesday,'' said NASA spokesman Bruce Buckingham.

Officials said the midweek target data depended on a relatively quick fix and that if more extensive repairs were needed, Columbia could be grounded until next weekend.

In the meantime, the shuttle Discovery will be hauled to nearby launch pad 39B Sunday for work to ready the orbiter for blastoff Oct. 5 on a high-priority flight to carry the Ulysses solar probe into space.

The launch delay undoubtedly was a major disappointment to Columbia's astronauts, who came within six hours of blastoff May 29 only to be grounded by a fuel leak, and to the hundreds of engineers and technicians who were working around the clock to resume shuttle flights after a four-month hiatus.

But NASA managers, who have endured a summer of harsh criticism over problems with the Hubble Space Telescope and the shuttle program, opted to play it safe and to launch Columbia with a fully operational $150 million cargo of four high-tech telescopes.

At the same time, they ordered engineers to replace a faulty gauge in the shuttle's crew module, used to measure the ship's acceleration, that likely would have delayed launch a day or so regardless of the telescope problem.

Commander Vance Brand, 59, co-pilot Guy Gardner, 42, John ''Mike'' Lounge, 44, Jeffrey Hoffman, 45, Robert Parker, 53, and civilian astronomers Ronald Parise, 39, and Samuel Durrance, 46, presumably took news of the delay in stride, but their reaction was not immediately available.

Columbia had been on track for blastoff at 1:17 a.m. EDT Saturday, the first shuttle mission since April after a disappointing summer of fuel leaks that grounded the shuttle fleet.

But overnight Wednesday, engineers at launch pad 39A ran into problems with the Broad Band X-ray Telescope, one of four astronomical instruments mounted in Columbia's payload bay.

Data from the high-tech telescope was interrupted and then lost when Columbia's left-hand payload bay door was closed for launch Wednesday, prompting speculation a cable had somehow been damaged.

But tests to make sure the telescope's data transmission system would work properly in space were not successful. Buckingham said engineers later traced the trouble to an electronic ''black box'' in the shuttle's payload bay.

Reviewing test data, NASA managers decided to put the 36th shuttle flight on hold when it became clear repairs would take until the middle of next week to complete.

Because of a requirement for three weeks between shuttle missions, Columbia must be off the launch pad by around Sept. 14 or the flight likely will be delayed until after the Ulysses flight.

Columbia's launch originally was planned for May 30, but the flight was delayed the night before by a hydrogen leak in the ship's 17-inch- wide ''disconnect'' fitting, a massive connector that allows the shuttle's external tank to be jettisoned in space.

Columbia's disconnect was replaced with one taken from the new shuttle Endeavour and, after Atlantis was grounded by a similar leak in July, Brand and his colleagues were cleared for another launch try this week.

After extensive tests, engineers blamed Columbia's leak on tiny glass beads that somehow got inside the disconnect fitting and scratched critical seals. Whether a similar problem crippled Atlantis remains to be seen, but engineers said they were confident Columbia is leak-free.

#90243u0581 08/31/1990 ~United Press International
TOKYO (AUG. 31) UPI - Soviet Foreign Minister Eduard Shevardnadze said in an interview published Friday the U.N. peace-keeping forces may be required to restore peace in the gulf region and urged Iraqi President Saddam Hussein to immediately withdraw his forces from Kuwait.

Shevardnadze added he is ready to visit Baghdad, if necessary, to negotiate with Iraqi leaders for settlement of the gulf crisis.

The national daily Asahi Shimbun said Shevardnadze made the remark in an exclusive interview in Moscow Wednesday. Contents of the interview were published Friday.

Shevardnadze is scheduled to arrive in Tokyo Wednesday for a four- day visit to attend the regular Soviet-Japanese foreign ministers' consultations.

He said a scheduled visit to Japan by Soviet leader Mikhail Gorbachev will

be discussed at his meeting with Japanese Foreign Minister Taro Nakayama in Tokyo.

''At one stage, the United Nations forces may be necessary to guarantee peace in the region,'' Shevardnadze was quoted as saying, adding, ''I do not rule out a possibility of my visit to the Middle East if it is necessary to improve the situation in the region.''

He added: ''Soviet officials are in daily contact with Iraqi representatives at all levels and taking political and diplomatic opportunities in order to bring about an early settlement of the ''ties in

Shevardnadze called the U.N. initiative to impose sanctions against Iraq as ''a most appropriate response of the international community'' and urged Saddam Hussein to withdraw Iraqi forces from Kuwait as soon as possible.

''(The Iraqi withdrawal from Kuwait) conforms to Iraq's own national interests,'' he said.

Shevardnadze expressed hope that Hussein will seek a compromised settlement of the crisis.

On his visits to China and North Korea this week, Shevardnadze said he will discuss with Chinese officials mutual reduction of troops deployed along the Sino-Soviet border and measures to build mutual trust between the two nations.

He said negotiations on the troop reduction will start soon.

He said he will negotiate with North Korean leaders on ways to promote an easing of military confrontation on the Korean Peninsula. The situation on the peninsula involves interests of Japan and the Soviet Union as well as the whole of the region, he added.

#90243u0628 08/31/1990 ~United Press International

POTOSI, Mo. (AUG. 31) UPI - George Gilmore, the leader of a band of thugs who terrorized the elderly and handicapped for several years, was executed Friday by injection for the murder of an 83-year-old woman.

Gilmore, 44, who did not believe the execution would be carried out and did not request a special last meal, was given the injection in the death chamber at Potosi Correctional Center at 12:05 a.m. and was pronounced dead at 12:10 a.m.

The Supreme Court twice denied a stay of execution for Gilmore, convicted of murdering an 83-year-old woman in a crime spree that targeted elderly and handicapped people.

The court issued a brief order Thursday noting that Justice Thurgood Marshall, who opposes the death penalty, dissented from the first decision and that Justice Antonin Scalia took no part in the case. The court issued a similar order less than an hour before the scheduled execution.

The orders were the third and fourth times that the nation's highest court had rejected appeals by Gilmore during his 10-year legal fight to avoid the death penalty.

Gilmore was the 136th person executed in the United States since the Supreme Court lifted its ban on capital punishment in 1976. He was the fourth inmate executed in Missouri in 1990.

Prison officials said Gilmore was given the first of three shots at 12:05 a.m. He lost consciousness at 12:06 a.m.

Gilmore was taken to the execution chamber strapped on a gurney after 11:30 p.m. Thursday. The state had 14 witnesses for the execution while Gilmore had three.

Gilmore was on the gurney and covered up to his chin with a heavy white cloth when the curtain was lifted for the witnesses at the prison.

Before the shot was administered, Gilmore arched his head back to see his financee, his niece and another man who were weeping.

The man appeared to mouth the words, ''I love you,'' to Gilmore and Gilmore spoke twice back to them.

State witnesses said he appeared to be saying, ''I love you.''

After the administration of the first dose, Gilmore's head fell to the right and he never spoke again. He did not raise his head again.

He began breathing heavily and then stopped. His eyes and mouth never closed.

Dick Moore, director of the Missouri Department of Corrections, spoke to the state's witnesses before they were taken to the execution chamber.

''What you are particpating in is justice being carried out,'' Moore said. ''It's a far cry from the terror and horror of the victims of George Gilmore and what he put them through.''

Governor John Ashcroft said in a statement read to the witnesses after the execution was completed: ''Justice has been served. This regrettable event is necessary to reaffirm the value the state of Missouri places on innocent human life. I extend my sympathy to Mr. Gilmore's family. At the same time ... we must never forget the families of the victims of heinous crimes.

Gilmore's last meal was regular prison fare because he thought he would be granted a stay of execution. Gilmore ate pork chops, mashed potatoes, green beans and bread. He did request and was given a two- liter bottle of Pepsi.

Gilmore last week divorced first wife and wanted on Thursday to marry his financee but prison officials denied the request because his divorce had not been final for 30 days.

Riley said Gilmore refused all interviews but he told prison officials he wanted ''everybody to know he was innocent.''

In their appeals, defense attorneys argued the jury that convicted Gilmore

of first-degree murder should have been told to consider his impoverished childhood and his level of education before recommending the death penalty.

The nation's highest court rejected two previous appeals by Gilmore during his 10-year legal fight to avoid the death penalty.

Leonard Laws, one of Gilmore's partners in the rampage of murder and robbery, was executed May 17 for his role in one of the crimes. Laws, was executed by injection at Potosi for the 1980 shotgun slayings of an elderly couple.

Gilmore was the leader of a band of thugs who terrorized elderly and handicapped people for several years in east-central Missouri, committing robberies and murders.

His death warrant stemmed from the 1979 murder of Mary Watters, 83, who lived alone in Robertsville. She was shot twice with a revolver during a robbery.

As Gilmore and his accomplices were breaking into Watters' home, the terrified victim fired at Gilmore with a shotgun but missed him. The only loot taken from her home was the shotgun and a small radio. The articles were sold for $20 each. Watters had no money.

Gilmore, who was convicted of five murders that produced four death sentences and a life sentence, said he expected his convictions to be overturned.

(AUG. 31) UPI - SPORTS TRANSACTIONS

BASEBALL

Cincinnati - Activated pitcher Danny Jackson from disabled list; optioned pitcher Rosario Rodriguez to Chattanooga of the Southern League (AA).

Pittsburgh - Acquired first baseman-outfielder Carmelo Martinez from Philadelphia for outfielders Wes Chamberlain and Julio Peguero and a player to be named.

BASKETBALL

Milwaukee - Signed guard Steve Henson to a one-year contract.

New Jersey - Waived forward Charles Shackleford.

COLLEGE

Marist - Named Dan Sullivan director of sports media relations and promotions.

FOOTBALL

Atlanta - Signed nose tackle Shawn Lee and safety George Streeter.

Cleveland - Agreed to terms with linebacker Clay Matthews.

Miami - Signed tackle Jeff Dellenbach to a 2-year contract.

NY Giants - Waived nose tackle Winfred Bryant; claimed defensive tackle Kent Wells off waivers.

Philadelphia - Waived center Dave Rimington; claimed free agent James Gray off waivers.

San Diego - Waived wide receiver Elliott Searcy.

HOCKEY

American Hockey League - Named Macgregor Kilpatrick vice president/league general counsel.

Boston - Signed goaltender Matt Delguidice.

NY Rangers - Named Colin Campbell assistant coach; announced retirement of center Davis Archibald.

SOCCER

Cleveland (MSL) - Signed forward Ali Kazemaini to a 1-year contract.

Dallas (MSL) - Signed defender Wes McLeod.

Tacoma (MSL) - Signed defender Nikola (Nikki) Ristic.

YACHTING

Isler Sailing International - Withdrew from 1992 America's Cup.

TOKYO (AUG. 31) UPI - Share prices continued to rise Friday, as buying enthusiasm withstood a tide of profit-taking following an upsurge the day

before.

The key 225-issue Nikkei average, which gained 775.17 points Thursday, advanced another 308.41 points, or 1.2 percent. The Nikkei ended at 25,978.37.

The broader Tokyo Stock Price Index capped its 44.60-point performance Thursday with a 17.95-point gain. TOPIX, a measure of all shares traded on the exchange's first section, closed at 1,973.97.

Volume was the heaviest seen in weeks, leading some brokers to believe the market may truly have bottomed out after a month and a half of dizzying losses.

An estimated 600 million shares changed hands, compared with 576.34 million Thursday.

A tide of profit-taking at the outset drove the Nikkei down 100 points.

Reports that Iraq was setting conditions for the release of women and children dampened the mood, brokers said.

But the market turned around as individual investors were encouraged by signs of confidence in the London warrant market, they said.

Upward revisions in profit reports spurred buying of selected stocks, they said.

Blue chips were sold, while smaller-capital issues, especially those with good profit outlooks, were bought.

One such issue, Godo Steel, jumped 15 percent on news of improved profits.

Institutional investors and securities firms jumped on the bandwagon, brokers said.

Overall, advances led declines by more than 2:1.

Some brokers said the market's performance demonstrated investors' renewed confidence.

''There was good volume, especially considering it was Friday with a long weekend coming up in New York,'' said Brad Bauer, a broker with Barclay's de Zoete Wedd in Tokyo. ''It conveys the feeling that we're seeing the kind of damage repair that has to take place if this market is going to sustain a rally.

But other brokers expressed disappointment that the Nikkei had not

finished above the psychologically important 26,000-point line.

They noted that Nikkei-based stock futures declined in the afternoon, and that the spot market was hit by late profit-taking.

The market will continue to be volatile as long as the Middle East crisis persists, said a Japanese broker, who declined to be named.

#90243u0668 08/31/1990 ~United Press International

(AUG. 31) UPI - After Oakland spent Wednesday trading for two heavy hitters, it was light-hitting Mike Gallego that helped lead the Athletics to victory Thursday night.

Gallego's one-out single lifted the American League West leaders to a 6-5 win over the Kansas City Royals, who extended their lead over the Chicago White Sox to 6 1-2 games.

The day before, the Athletics acquired two accomplished veterans for the pennant drive - designated hitter Harold Baines from the Texas Rangers and outfielder Willie McGee from the St. Louis Cardinals.

Both players have playoff experience, espically McGee, a former National League MVP who led St. Louis to three World Series appearances and one championship in the 1980s.

But it was Gallego - a career .235 hitter - who performed the heroics, although he could have almost been the goat.

After Willie Randolph singled, Gallego was given the hit-and-run sign while at the plate. The four-year veteran missed the next pitch but fortunately Randolph, who went 4 for 5, was able to make it safely to second.

Gallego then hit the next pitch for a RBI-single and make a winner of reliever Dennis Eckersley, 3-2.

''That was a hit and run and I messed up,'' Gallego said. ''I didn't put the ball in play but luckily Willie had enough speed to steal the base. If you look back you'll see that when our seven, eight and nine hitters are hitting we're unbeatable.''

Eckersley also messed up but Gallego's hit saved him.

The right-handed veteran, who has 39 saves this year, blew only his second save opportunity of the year when he gave up a homer to Bo Jackson in the eighth inning that allowed the Royals to tie it 5-5.

The missed save denied Oakland starter Dave Stewart from picking up his 18th victory. Stewart allowed four runs and six hits in seven innings.

Eckersley, however, wasn't annoyed about giving up the home run.

''It's nice to give up one like that,'' Eckersley said. ''I threw him a fastball and he rammed into it. Who wants to give up a teeny one. But we won, that's what it's all about.''

Jackson hit an 0-1 pitch into the second deck in left field for his 22nd homer. Jackson, who came off the disabled list Aug. 26, has hit six homers and driven in 14 runs in his last five games.

''Since I've come back from my injury I've been swinging the bat,'' Jackson said. ''I just got the fat part of the bat on it. I can't take anything away from Eck Man, he's at the top. I think that's only the second hit I have off him''.

Reliever Steve Crawford, 5-3, took the loss.

Oakland took a 2-0 lead in the first on Rickey Henderson's lead off home run, and Mark McGwire's bloop RBI single. It was Henderson's 23rd home run of the season and it marked the 45th time he has homered leading off a game, extending his own major-league record.

Henderson went 3 for 5 and drove in three runs.

Kansas City scored twice in the fourth on Danny Tartabull's home run, his 14th of the season and Kurt Stillwell's sacrifice fly.

The Athletics made it 5-2 in the sixth on Henderson's two-run single and Carney Lansford's RBI single.

The Royals drew to 5-4 in the seventh on Jim Eisenreich's two-run home run his fifth of the year.

Elsewhere in the American League, Chicago edged Minnesota 4-3, Boston clubbed Cleveland 9-2, Baltimore downed New York 6-1 and Detroit sank Seattle 3-2.

In the NL, it was: New York 12, San Francisco 2; Los Angeles 3, Philadelphia 2; St. Louis 5, Atlanta 3 in 12 innings and Cincinnati 6, Chicago 5.

-- AROUND THE AL --

White Sox 4, Twins 3

At Minneapolis, Ron Karkovice's liner to center turned into an inside-the-park grand slam when center fielder John Moses slipped on the warning track, helping Chicago snap its five-game losing streak. Jack McDowell, 11-6, won for the sixth time in his last seven decisions, scattering five hits over eight innings and Bobby Thigpen earned his league-leading 44th save.

Red Sox 9, Indians 2

At Cleveland, Dwight Evans ignited a seven-run ninth inning with a bases-loaded walk and Roger Clemens became baseball's second 20-game winner. Clemens, 20-5, struck out nine and Doug Jones, 4-4, took the loss by allowing seven runs, three hits and five walks in one inning of work.

Orioles 6, Yankees 1

At Baltimore, Pete Harnisch tossed a five-hitter and Cal Ripken drove in two runs with a fourth-inning double to help Baltimore snap a five-game losing streak. Harnisch, 10-9, struck out nine in throwing his third complete game. Dave LaPoint, 6-10, took the loss, allowing three runs in the fourth inning.

Tigers 3, Mariners 2

At Seattle, Lloyd Moseby drove home three runs, two coming on a tie-breaking double in the ninth inning, to lift Detroit to its eighth win in the past 11 games. Mike Henneman, 7-6, pitched the final two innings to pick up the victory. Reliever Mike Jackson, 5-6, took the loss.

#90243u0675 08/31/1990 ~United Press International

LOS ANGELES (AUG. 31) UPI - Officials have begun building a legal case against Iraqi President Saddam Hussein for possible use at a Nuremberg-style war crimes trial, a published report said Friday.

Administration sources told the Los Angeles Times they hoped the threat of a war crimes tribunal would deter Saddam from taking any further action against the thousands of foreign hostages he now holds, or against prisoners of war if fighting erupts.

The allegations could be used to justify any direct military action by the United States.

''Some (legal) action has to be taken, both because we have a right to bring him to justice and to deter him from further violations,'' said an administration official who asked not to be named.

The building of a legal case also appears to be part of a larger administration effort to justify its presence in the Arabian desert and to provide the basis for a war not just to protect Saudi Arabia and the Persian Gulf oil fields, but also to eliminate Saddam and his vast arsenal from the Middle East.

Officials said Saddam clearly has violated the most serious precept in international law by waging a war of aggression. That charge was the foundation of the war crimes trials of Nazi leaders in Nuremberg.

Saddam is also guilty of ''grave breaches'' of the Geneva Convention of 1949 by taking hostages, removing them from occupied territory and placing them at military installations as shields against attack, the officials said.

They further allege that the Iraqi army's treatment of civilians and its looting in Kuwait are violations of the Geneva Convention's international rules of warfare. In addition, Saddam's actions against embassies and diplomatic personnel have breached the 1973 New York Convention.

While rounding up Saddam and his advisers to stand trial could be problematic in a city as large and well-defended as Baghdad, one expert said just convening a war crimes trial could have a sobering effort on the Iraqi leader.

''They can try in absentia. He would be given every opportunity to come and represent himself if he likes,'' said John Norton Moore, a former State Department international law specialist.

''But there's no question that the (U.N.) Security Council has jurisdiction to hold an international war crimes tribunal as a measure to restore international peace and peace and security,'' Moore said.

-30- 2633

#90243u0676 08/31/1990 ~United Press International

(AUG. 31) UPI - Ron Oester dusted off his bat and Danny Jackson returned to the mound to remind everyone that they are still Cincinnati Reds.

Oester, who had gone nearly a month without starting, hit a two-run triple to highlight a six-run fifth inning Thursday night and Jackson won in his first start since July 12, boosting the Reds to a 6-5 victory over the Chicago Cubs.

Jackson, 5-2, sidelined with a partially torn rotator cuff earlier this season, was activated from his second stint on the disabled list prior to the game. He gave up eight hits over five innings, striking out four, and

also hit his first major-league triple.

''I'm just fine,'' said Jackson, reportedly bitter about his second DL term. ''I was positive from the beginning. I've been in the big leagues six years. I know what I have to do to pitch.''

Randy Myers entered with two out in the eighth to earn his 27th save.

Oester had not started since July 31 because of Mariano Duncan, who is batting .333 since the All-Star break.

''The guy (Duncan) who's out there has done a pretty good job,'' Oester said. ''This is the first game I've started in - well, it'll be a month tomorrow. You like to help the team out any way you can.''

Cincinnati took advantage of three triples, two doubles and two wild pitches in the fifth, opening a 6-1 lead. Chris Sabo and Jeff Reed each singled, and both scored on Oester's triple to right.

It was Oester's first triple since the 1987 season, and only his sixth at-bat this month.

''I made a bad pitch to him (Oester),'' Bielecki said. ''I tried to throw down and away and it stayed down the middle.''

Jackson and Barry Larkin also tripled in the six-run fifth. The trio of triples was one shy of the National League single inning record of four, achieved seven times, including 1926 by the Reds and twice by the Cubs in 1895 and 1899.

The victory helped the Reds maintain a 5 1-2 game lead over Los Angeles in the National League West.

''I'd feel better if we were 10 1-2 games up,'' Piniella said. ''All we need to do is play good, consistent baseball.''

Elsewhere in the National League, New York beat San Francisco 12-2; Los Angeles edged Philadelphia 3-2 and St. Louis defeated Atlanta 5-3.

In the AL, it was: Chicago 4, Minnesota 3; Oakland 6, Kansas City 5; Boston 9, Cleveland 2; Baltimore 6, New York 1; and Detroit 3, Seattle 2.

-- AROUND THE NL --

Mets 12, Giants 2

At New York, Gregg Jefferies hit a two-run homer, Howard Johnson stroked a three-run shot and Darryl Strawberry belted a grand slam to back Sid

Fernandez' 12-strikeout effort. Fernandez improved to 9-10 and Mike LaCoss fell to 4-3.

Dodgers 3, Phillies 2

At Philadelphia, Hubie Brooks doubled home Eddie Murray in the seventh inning to complete a three-game series sweep of the Phillies. Ramon Martinez, 16-6, who was winless in his three previous starts, helped Los Angeles win for the 12th time in their last 16 games. Dave Walsh pitched the final out for his first major-league save. Joe Boever dropped to 2-5.

Cardinals 5, Braves 3, 12 innings

At Atlanta, pinch-hitter Terry Pendleton's sacrifice fly with one out in the 12th inning scored Todd Zeile with the go-ahead run. Frank DiPino, 5-2 hurled a hitless 11th inning to earn the win and Tom Niedenfuer worked the 12th to earn his second save. Duane Henry evened his record at 2-2.

-30- 3595

#90243u0685 08/31/1990 ~United Press International

(AUG. 31) UPI - A reportedly weary U-N Secretary-General Perez de Cuellar is meeting with Iraq's foreign minister in Jordan. The U-N chief said earlier he has NO blueprint to resolve the Persian Gulf crisis. He said the meeting is an exchange of views.

.

Western nations with hostages in Iraq are pressing President Saddam Hussein on his promise to free foreign women and children in his custody. NO American women and children so far have left Iraq or occupied Kuwait.

.

In Washington, President Bush says he's sending Secretary of State Baker and Treasury Secretary Brady on a multi-nation trip to persuade other nations of the world to share the military and economic costs of facing down Iraq.

.

In Jerusalem, Israel vowed to defend itself forcefully against any Iraqi attack. Iraq yesterday said its air force would strike Israel with ''crushing blows'' if an armed conflict began in the Persian Gulf.

The shuttle Columbia has suffered another launch delay. Columbia originally was scheduled for launch tomorrow... but now it's been delayed until the middle of next week or later because of trouble with an on-board

telescope.

The state of Missouri executed 44-year-old George Gilmore shortly after midnight by injection. Gilmore was convicted of murdering an 83- year-old woman in a crime spree that targeted elderly and handicapped people.

#90243u0695 08/31/1990 ~United Press International

(AUG. 31) UPI - Police in New York are looking for the owner of a blue Oldsmobile believed used by a gunman who shot and killed ex-state senator Vander Beatty. Beatty was shot in the head yesterday afternoon in his campaign headquarters.

.

And the New York Times reports today that the police task force tracking the so-called Zodiac killer has been trimmed to 19 detectives from 50. The Zodiac killer has shot four people, killing one... all in the pre-dawn hours of Thursdays.

There's new danger of violence between the government of Quebec and Mohawk Indians. Talks between the two sides collapsed yesterday... raising fears of an assault by the armed forces on two native reserves south of Montreal.

The Caltech Seismology Lab says a series of earthquakes shook Imperial County last night. Officials say the largest measured four- point-four on the Richter scale. NO injuries or damage were reported in the deserted area.

The government says the 1989 infant mortality rate of nine-point- seven per one-thousand live births is the lowest ever recorded in the United States. The rates reflect deaths of children before their first birthday.

Five Central American countries have begun a push to shed their reputation as a bridge for drug traffic between South America and the United States. Envoys are in the middle of a two-day drug summit in Managua, Nicaragua.

Virginia Beach is preparing for thousands of young people expected during the Labor Day weekend. Civic leaders hope that by planning several events they will avoid the violence that erupted along the resort strip last year.

-30- 1775

#90243u0705 08/31/1990 ~United Press International

NEW YORK (AUG. 31) UPI - The trail of the Zodiac killer has cooled, and police are scaling back their investigation of the elusive gunman, a published report said Friday.

The New York Times said the Zodiac task forced was pared Wednesday to 19 detectives from 50, and may soon be cut further.

The task force had followed more than 2,000 leads, interviewed dozens of suspects and consulted astrologers to track down the gunman.

But with 12 children being shot, five fatally, since July 22, and 21 cab drivers killed this year, questions were raised about concentrating efforts on a man responsible for one death, the Times reported.

The so-called Zodiac has shot four people, sent letters to news agencies and left behind two letters at the scenes of his crimes. He had warned that he would shoot one victim for all 12 signs of the Zodiac, and struck in three-week intervals on Thursdays in the predawn hours.

Four widely publicized dragnets were put out - unsuccessfully - for the killer, the first on July 12, just three weeks after the gunman shot his fourth victim.

All Zodiac victims were defenseless men: two used canes, one was sleeping on a bench and police said another was drunk.

The first shooting occurred March 8. Joseph Proce, the third victim, was shot in the back in Woodhaven in Queens on May 31, and later died.

#90243u0724 08/31/1990 ~United Press International

LOS ANGELES (AUG. 31) UPI - An American citizen employed in Kuwait who escaped Iraqi occupying forces in a grueling and thirsty three-day drive across the desert through military checkpoints has been reunited with his family.

Abdullah Touny rejected the American ambassador to Kuwait's advice to remain in hiding and fled that country with the help of politically-connected friends, arriving in Los Angeles Thursday night for the tearful reunion.

As his Ontario, Calif., family worried for the past month about his welfare, Touny said he learned of Kuwaiti violence against the occupiers and the increasing danger he would be captured and held with other Westerners.

Egyptian-born Touny and his wife Abla lived in Kuwait for several years.

Abdullah Touny recounted for his family his tale of hiding in his Kuwait house on the advice of the American ambassador and hearing of resistance

by Kuwaiti citizens against Iraqi soldiers who have occupied the country since the invasion Aug. 2.

''There is a lot of resistance. With the little arms they have and few people, they are fighting every day and killing Iraqis every day.''

As time passed, he said, he realized he must attempt to escape the country by driving across the Kuwaiti desert.

''In the last week they were looking for Americans and I was with the American ambassador. We had meetings. He called us and told us we had to stay home, nobody gets out (because) it's very dangerous. I thought that I have to escape through Saudi Arabia or Jordan.

''I escaped through friends that have connections with the authorities,'' he said.

He was not specific about his escape route or the people who helped him, but said the journey was difficult.

''I have been through the desert for three days,'' Mr. Touny said. ''There were check lines and soldiers every few miles. It was horrible. No water and no facilities.''

He drove with others in a 4-wheel-drive American car, afraid at every stop that his American identity might be discovered.

''I had to hide everything, my drivers license, my passport.''

Now that he is safe he said, his thoughts are with ''American friends I left behind.''

-30- 2383

#90243u0732 08/31/1990 ~United Press International

(AUG. 31) UPI - Here is a roundup of top events Friday in the Persian Gulf crisis stemming from the Aug. 2 Iraqi invasion of the oil-rich emirate of Kuwait.

AMMAN, Jordan - U.N. Secretary General Javier Perez de Cuellar and Iraqi Foreign Minister Tariq Aziz met Friday for talks on the crisis in the Persian Gulf and both remained highly guarded about the chances of producing movement toward a diplomatic resolution. The session, characterized by Perez de Cuellar as ''an exchange of views'' and not negotiations, opened about noon at the palace of King Hussein, about 90 minutes after Aziz arrived from Baghdad at a tightly guarded airport in a

suburb of the Jordanian capital. Officials said that Aziz met first with Crown Prince Hassan, who is acting as regent while Hussein is on a mission to Europe in search of a negotiated settlement to the Gulf crisis.

WASHINGTON - President Bush announced an effort to persuade other nations to share the military and economic costs of the massive push to force Iraq from Kuwait. He told a White House news conference Thursday he was sending Secretary of State James Baker and Treasury Secretary Nicholas Brady overseas to coordinate contributions and donations to defray the costs of the operation.

TOKYO - Soviet Foreign Minister Eduard Shevardnadze said in an interview published Friday the U.N. peace-keeping forces may be required to restore peace in the gulf region and urged Iraqi President Saddam Hussein to immediately withdraw his forces from Kuwait. Shevardnadze added he is ready to visit Baghdad, if necessary, to negotiate with Iraqi leaders for settlement of the gulf crisis. The national daily Asahi Shimbun said Shevardnadze made the remark in an exclusive interview in Moscow Wednesday. Contents of the interview were published Friday.

WASHINGTON - The State Department accused Iraq of tying Western women and children in bureaucratic red tape and confusion, putting them on an ''emotional roller coaster'' that is inhumane and disgraceful. The assessment came more than two days after President Saddam Hussein announced that Western women and children would be free to leave Iraq and Kuwait, if they chose to go.

LOS ANGELES - Officials have begun building a legal case against Iraqi President Saddam Hussein for possible use at a Nuremberg-style war crimes trial. Administration sources told the Los Angeles Times they hoped the threat of a war crimes tribunal would deter Saddam from taking any further action against the thousands of foreign hostages he now holds, or against prisoners of war if fighting erupts. The allegations could be used to justify any direct military action by the United States.

MANILA, Philippines - Iraq has proposed swapping oil for Philippine sugar, but officials said they doubted the deal could go through because of the U.N.-imposed economic embargo on Iraq.

BAGHDAD - INA quoted Iraq's air force commander Thursday as saying that if an armed conflict erupted in the gulf, Iraq would destroy ''the nests of traitors'' in Saudi Arabia and provide ''crushing blows'' to Israel.

#90243u0768 08/31/1990 ~United Press International

DALLAS (AUG. 31) UPI - Nelson Bunker Hunt and his creditors apparently settled their dispute involving mineral rights on his ranch, possibly allowing the sale of the $70 million property, officials involved in the proceedings said.

''There has been a settlement and the mineral rights will stay with the ranches'' after they are sold, said R. Carter Pate of the Finley Group, which is in charge of selling Hunt's assets. ''This clears up any dispute as far as the mineral rights at the Circle T Ranch,'' Hunt's 2,000-acre spread in Westlake.

The deal was to be filed Friday in U.S. Bankruptcy Court, the Fort Worth Star-Telegram reported in its Friday editions.

The Star-Telegram said the agreement called for Hunt to relinquish claims on unexplored oil, gas and other natural resources on his former ranch and farm properties, but he will continue to receive a percentage of mineral leases on certain undeveloped properties.

''We are pleased with the agreement that will allow Mr. Hunt to develop the minerals on some of the properties,'' said Hunt's attorney, Russ Munsch.

Munsch declined to estimate how much money Hunt could earn in oil and gas claims on the properties where he will retain part of the mineral rights.

Prospective buyers for the Circle T Ranch have indicated their interest in purchasing the land hinged on the outcome of the mineral rights question.

Nelson Hunt and his brother, William Herbert Hunt, filed for Chapter 11 bankruptcy protection in 1988 after they were battered by their disasterous silver market speculation in 1979 and 1980 and the subsequent nosedive of oil prices.

The Hunts concluded their personal bankruptcy cases last December by agreeing to sell most of their assets to pay their creditors. But various disagreements between the men and their creditors have flared up since then concerning the interpretation of certain sections of the deal.

#90243u0812 08/31/1990 ~United Press International
TOKYO (AUG. 31) UPI - Tokyo's cost of living, already the world's highest, leaped 3 percent in August over a year ago for the sharpest year-on-year rise in more than five years, a preliminary government report said Friday.

The report said the jump was largely due to the unusually hot weather in early summer.

The Management and Coordination Agency said the consumer price index for the Tokyo metropolitan area, a bellwether of nationwide inflationary trends, stood at 108.2 against the 1985 base of 100, up 3 percent over the year-earlier period and 0.3 percent higher than July.

''The hot weather at the beginning of the summer caused vegetables to mature earlier than usual and their prices jumped in August,'' an agency official said.

The official, who declined to be named, said the rise also was attributable to higher labor and distribution costs. Sustained expansion of the Japanese economy, now in its 45th consecutive month of growth, has caused a serious labor shortage, resulting in higher labor costs.

A surge in oil prices caused by Iraq's invasion of Kuwait Aug. 2 and subsquent tension in the Middle East will bear an impact on commodity prices starting in September, the official said.

Officials said oil refiners and distributors may be allowed to raise prices of their products after higher-priced oil starts arriving in Japan in September.

The agency said the August rise in the cost of living was the highest since January 1985, when consumer prices jumped 3.2 percent over the year-ago period.

Consumer prices, however, posted a 3 percent year-on-year rise in March this year as a result of the 3 percent sales tax introduced in April last year, the agency said.

Excluding fresh vegetables, fruits and fish, the consumer price index for all of Japan stood at 108.0 in August, down 0.1 percent from July but up 2.5 percent over a year ago.

The Economic Planning Agency, meanwhile, said the central bank's decision to raise its official discount rate will help stabilize consumer prices.

The Bank of Japan raised the key interest rate charged on its loans to commercial institutions by 0.75 percentage points to 6.0 percent annually Thursday. The move was described as a preemptive measure to ease mounting inflationary pressure caused by rising oil prices.

The Management and Coordination Agency, meanwhile, said Japan's employment situation remained stable in July, reflecting the booming economy.

The agency said the seasonally adjusted unemployment rate for the month stood at 2.1 percent, down 0.1 percentage point from the previous month.

Japan's jobless rate has hovered in a 2.0 percent to 2.2 percent range since June 1989.

The agency said the number of unemployed totaled 1.26 million in July - 710,000 men and 550,000 women. The figure represented a decrease of 60,000

- or 4.5 percent - from a year ago.

Japan's work force, including the jobless, was 64.60 million, up 880,000 - or 1.4 percent - over a year ago, the agency said.

The number of workers in the agriculture-forestry sector decreased 1.2 percent to 4.77 million while the total in the wholesale-retail and food services declined 0.3 percent to 14.01 million, the agency said.

The number of workers in the construction industry totaled 5.92 million - up 2.1 percent - while the total in the manufacturing sector grew 1.7 percent to 15.26 million. The total in the service industry surged 2.9 percent to 14.04 million, the agency said.

The Labor Ministry said the ratio of job openings to job seekers stood at 1.45, down from 1.47 from June. The figure means there were 145 job openings for every 100 job seekers.

(AUG. 31) UPI - Reports from Florida say several suspects are being questioned in the slayings of five college students killed near the University of Florida campus at Gainesville. A published report says one suspect, an 18-year-old University of Florida student, recently lived in the Gatorwood Apartment complex in Gainesville where two of the killings occurred. He's being held on charges in a separate incident.

U-N Secretary-General Javier Perez de Cuellar held talks today in Jordan with Iraqi Foreign Minister Tariq Aziz on the Persian Gulf crisis. Before the session, both men were reserved about the chances of a diplomatic solution to world demands for an Iraqi withdrawal from Kuwait. Iraq invaded Kuwait on August 2nd in a dispute over oil production and territory.

.

Aziz also said in Jordan that several British women and children have been shifted to different locations in Baghdad prior to their imminent release. Iraq is holding thousands of Westerners captive in Iraq and Iraqi-occupied Kuwait as protection against attack by a U-S-led multinational force deployed in Saudi Arabia and the Persian Gulf.

NASA appears snake-bitten in its efforts to launch a shuttle before summer's end. The space agency today halted the countdown of the shuttle Columbia one day before its scheduled liftoff on an astronomy mission. NASA says Columbia itself is O-K... but there's trouble reported with an on-board telescope. The mission has been delayed to the middle of next

week or later.

#90243u0857 08/31/1990 ~United Press International
(AUG. 31) UPI - Forecasters say much of the nation is enjoying clear, cool weather at the start of the Labor Day weekend. Clear skies stretched throughout the Northeast today, with mild temperatures in the 80's. In the West, temperatures are slightly below normal7/8but are expected to return to the usual 80's and 90's inland and 60's and 70's along the coast for the holiday weekend.

The National Center for Health Statistics says Americans are living longer. According to 1989 data... life expectancy reached a record high of 75-point-two years and death rates for various diseases continued to decline. And infant mortality rates dropped two-tenths of one percent to a record nine-point-seven per one-thousand live births.

Articles published in two leading scientific journals say animal tests used by the government to determine whether chemicals pose a cancer risk to humans are virtually worthless for gauging low-level threats found in daily life. Scientists say the problem lies in the enormous levels of chemicals given the test animals... making the quantity, NOT the makeup, the determining factor.

A 90-year-old man faces court charges next week in Manistique, Michigan, for disturbing a weekly bingo session. Bob McEwan was angered when state officials ordered him to stop his weekly penny-ante poker games. In response, McEwan hauled a boom box to the senior citizens center and blared rock music to drown out the voice of the bingo caller. Said McEwan... ''If I CAN'T play penny-ante poker, then they CAN'T play bingo.''

#90243u0986 08/31/1990 ~United Press International
(AUG. 31) UPI - The ruling National Party in South Africa abandoned 42 years of white rule by announcing it is opening its membership to all races. President Frederik de Klerk made the announcement to an annual party congress today in Durban. De Klerk says the existing membership rules conflict with the party's- quote- ''declared point of view against racial discrimination.'' De Klerk launched a program of sweeping racial reform last February.

All eyes are on Jordan where U-N chief Javier Perez de Cuellar meets Iraqi foreign Minister Tariq Aziz. Speaking with reporters in Amman, the U-N chief and Aziz played down chances of a diplomatic resolution to the Persian Gulf crisis. Perez de Cuellar has characterized the sessions as an exchange of views. Aziz gave NO indication that Iraq is ready to agree to

U-N resolutions demanding Iraq pull out of Kuwait.

Much of the nation basked in clear, cool weather today, kicking off the Labor Day holiday... the last long weekend of the summer. Clear skies extended throughout the Northeast with mild temperatures in the 80's. In the West, patchy fog and low clouds dotted the California coast and temperatures were slightly below normal but expected to return to the usual 80's and 90's.

A glitch with an on-board telescope has grounded tomorrow's scheduled launch of the hard-luck space shuttle Columbia. The shuttle launch was already running three months behind schedule because of a fuel leak and the latest trouble has pushed the liftoff to the middle of next week or even later. The delay undoubtedly is a major disappointment to the seven Columbia astronauts, who came within six hours of blastoff on May 29th only to be grounded by the fuel leak.

#90243u1018 08/31/1990 ~United Press International

WASHINGTON (AUG. 31) UPI - Energy Secretary James Watkins says the Bush administration is responding to the Persian Gulf crisis with a ''short-term strategy'' for stabilizing oil markets by raising domestic production and encouraging conservation.

Watkins, in an interview published in The New York Times Friday, said the administration's strategy will not speed up a new national energy policy now under discussion.

He said the plan for a modest energy-policy response to the gulf crisis would involve a nationwide advertising campaign to promote conservation

and is based on what the Energy Department learned during public hearings around the nation.

''We are trying to keep it as simple as we can, move on those things that make sense and leave to the national energy strategy the complex milieu of issues that we have to address across the board,'' Watkins said.

The advertising campaign, Watkins said, will begin in the second week of September, urging Americans to conserve oil by doing things like inflating their tires to the maximum pressure, driving cars that yield higher gas mileage and observing speed limits.

''A lot of people think this is trivializing conservation by going to higher pressure tires,'' Watkins said, but the Energy Department estimates that inflating tires to the maximum recommended pressures would save 100,000 barrels of oil daily.

The energy chief also said the administration is considering a potentially controversial element - to allow production in an offshore oil field near Santa Barbara, Calif.

The administration would try to mediate a dispute between the state of California and Santa Barbara County and oil companies over how crude petroleum is to be transported to shore, an environmentally fragile area that is an important tourist attraction.

Of the 4 million barrels of oil a day that Iraq and Kuwait had exported before the U.N. embargo ordered in response to the Aug. 2 invasion of Kuwait by Iraq, some 700,000 came to the United States. That shortfall will be made up by December, Watkins said, by increasing production from Prudhoe Bay in Alaska. The Energy Department is also seeking an additional 30,000 barrels a day from Texas and 50,000 barrels more from companies that have developed oil reserves off the Santa Barbara coast.

Environmentalists and the oil companies have been battling over the threat to Santa Barbara's coastline from shipping oil by sea. Watkins said new production in the oil field could add 50,000 to 75,000 barrels a day to the nation's oil supply.

Watkins told the Times the Energy Department plans to become involved in the dispute over a coastal processing plant and the development of an oil field 50 miles west of Santa Barbara and 10 miles offshore. The field was developed and readied for production three years ago by the Chevron Corp. and 17 partners.

After the oil spill in Alaska's Prince William Sound, California revoked Chevron's license last summer to ship pil from the plant to its Los Angeles refinery in tankers.

Other aspects of the Energy Department's program, as outlined by Watkins, include:

-Promoting the use of gasoline that includes alcohol or methanol, to save 10,000 barrels of oil daily. Drivers of the department's more than 12,000 cars and trucks were directed Thursday to begin buying alcohol-blended fuels in an experiment to measure fuel savings.

-The department will try to make it easier for cities and industrial companies to gain permits to burn garbage as a fuel, to save thousands of barrels of oil a day.

-Utilities and other industrial oil users would be encouraged to change their boilers to burn natural gas. Watkins said his department could accelerate the process of issuing permits for natural gas pipeline rights of way.

-The Energy Department has a proposal before the White House to change tax laws to encourage independent oil producers to produce more oil from wells that contain heavy oil that is difficult to pump.

#90243u1028 08/31/1990 ~United Press International

WOODSTOCK, NY (AUG. 31) UPI - A daughter of a hostage held in Iraq claims her father is the American who died of a heart attack, a published report said Friday.

Maggie Neilson of Woodstock told the Kingston Daily Freeman her father, James L. Worthington, Jr., 53, also of Woodstock, died of a heart attack while being held in Iraq.

The Texas native was a bank consultant for the Alahai Bank of Kuwait, his daughter told the paper. He was in Basra, Iraq, when stricken.

Neilson went to the newspaper despite her mother's wishes to keep the matter private, the Freeman reported.

Neilson said she learned of her father's death Monday in a call from the State Department.

Worthington's wife, Katharine Worthington, could not be reached for comment.

#90243u1079 08/31/1990 ~United Press International

(AUG. 31) UPI - Stock prices on the Tokyo Stock Exchange scored new gains Friday with buy orders withstanding profit taking pressure.

The key 225-issue Nikkei average, which gained 775.17 points Thursday, advanced another 308.41 points - or 1.2 percent of its value. The Nikkei closed at 25,978.37.

The Tokyo Stock Price Index, or TOPIX, capped its 44.60-point performance Thursday with a 17.95-point gain. The broader index, a measure of all shares traded on the exchange's first section, closed at 1,973.97.

Volume was the heaviest in weeks, with an estimated 600 million shares changing hands, compared with 576.34 million Thursday. Brokers said the market may have found its holding level after a month and a half of sharp losses.

Advances led declines by more than 2 to 1.

Elsewhere in Asia, stocks gained ground in moderate trading on the Hong Kong Stock Exchange, riding a wave of European-based institutional buying.

The Hang Seng Index climbed 23.31 points to close at 3091.41. The gain followed a rise of 48.24 points Thursday and gave the market a gain of 169.49 for the week.

Volume was moderate at 978 million units, up from Thursday's 920 million.

Prices closed higher in light trading on the Singapore Stock Exchange fueled by the Tokyo rally and bargain hunting.

The Straits Times Industrial Index rose 18.24 to 1277.87.

The All Singapore Index rose 5.27 to 358.53.

The exchange recorded a turnover of 67.16 million units.

Prices closed almost unchanged on the Sydney Stock Exchange on conflicting indications from Wall Street and Tokyo, brokers said.

The All Ordinaries Index ended up a mere 3.7 points at 1507.6.

The All Industrials Index rose 5.3 to 2271.7 and the All Resources Index 2.4 to 915.6.

National turnover was 95.1 million shares.

(AUG. 31) UPI - The ink is drying on a German reunification treaty signed today in East Berlin. East and West Germany formally approved their plan to merge on October 3rd, ending more than four decades of division. The treaty is still subject to ratification by the two German Parliaments.

Connecticut authorities say two of Amtrak's Montrealer trains struck pedestrians early today in similar but separate accidents in the northeastern part of the state. The accidents left a 31-year-old man dead in Mansfield... and an unidentified man seriously injured near Franklin. Both men had been lying near the tracks.

Missouri prison officials executed George Gilmore by lethal injection today for the 1979 slaying of an elderly woman. The Supreme Court twice denied a stay of execution for Gilmore, who was convicted of slaying an 83-year-old in a crime spree by a gang that targeted elderly and handicapped victims.

Residents of Virginia Beach, Virginia, are ready for the thousands of young people expected to descend on the area for the Labor Day weekend. Officials began planning months in advance to avoid the unrest that erupted last year at a beach party for students of historically black colleges.

#90243u1199 08/31/1990 ~United Press International
WASHINGTON (AUG. 31) UPI - Animal tests used by the government to determine whether chemicals pose a cancer risk to humans are virtually worthless for gauging low-level threats found in daily life, scientists claimed.

However, other experts countered Thursday that, despite their weaknesses, traditional mouse and rat tests remain the best way to protect the public from chemicals with cancer-causing potential.

In articles published in two leading scientific journals, Bruce Ames and Lois Gold of the University of California-Berkeley spelled out their objections to the routine use of high-dose tests in rodents to determine if a chemical constitutes a serious cancer risk.

The major problem lies in the enormous levels of chemicals given the test animals, said Ames and Gold, noting recent evidence indicates it is likely the quantity - not the makeup - of a chemical that triggers tumor formation.

High doses of chemicals, both natural and man-made, frequently spur rapid cell division that leads to cancer, while such cell division does not occur at low doses, they said.

A computer study by the University of Nebraska Medical Center in Omaha, published in the journal Science along with Ames' commentary, also found that cell proliferation appears to be the primary way chemicals which do not damage genetic material cause cancer.

In papers published in Procedings of the National Academy of Sciences, Ames and Gold reiterate their past claims that man-made chemicals pose no greater cancer risk as a group than natural chemicals found in fruit, vegetables or spring water.

About half of the 77 natural chemicals tested in high-dose rodent tests caused cancer in the animals - about the same proportion as has been found for the 350 synthetic chemicals checked in that manner, they noted.

In addition, they estimated the average American's intake of natural carcinogens found in foods like coffee, cabbage and mushrooms is about 1500 milligrams per day - far greater than the average daily intake of .09 milligrams from man-made pesticide residues.

''We have to rethink our current testing system. What it does is focus attention on very minor things,'' Ames said. ''A lot of assumptions about what consistutes a cancer risk are turning out not to be true.''

The California researcher said high-dose rodent tests are probably only valuable for situations where people would be exposed to very high chemical concentrations, like in the workplace or when taking medication.

''These tests are not useful for telling anything about cancer risk at very low doses,'' Ames said.

However, he offered no alternative way of checking chemicals for cancer-causing potential at low levels like those found in pesticide-treated fruit or dioxin-contaminated soil.

Ellen Silbergeld, senior scientist with the Enviromental Defense Fund, said the track record of high-dose rodent tests has been pretty good. ''Overall, every human carcinogen causes cancers in animals. And as far as the other way, we do not know of any animal carcinogen that has been shown not to cause cancer in humans,'' she said.

Silbergeld emphasized high-dose tests only signal that a chemical has the power to cause cancer and are not intended to establish the dose at which the cancer threat occurs. However, results of such tests have been used to fuel public concerns over chemicals like Alar, which was withdrawn last year after the Natural Resources Defense Council released a report suggesting eating apples bearing traces of the growth-promoting chemical posed a cancer threat.

''High-dose tests are really just to answer 'yes' or 'no' to the question if a chemical could be a carcinogen,'' she said.

For intial screening, large doses are necessary because a chemical must be either to shown to cause or not cause tumors in a relatively small group of mice over a relatively short period of time, she said. Mimicking the low-level exposure that humans might experience over a lifetime would be too costly and time consuming to do for every chemical in rodents.

Other screening options being explored, such as a test-tube system developed by Ames that exposes bacteria to possible cancer-causing substances, have met with even stronger obejections from chemical makers, who feel the tests are unduly open to interpretation, she said.

''What do they propose we do to look at suspect chemicals - nothing? Should we let everybody get exposed and then 30 years later say 'We are sorry, you are sick or dying.' That's immoral,'' Silbergeld said. ''Are we going to repeat what we did with substances like lead and asbestos - wait until we have human data that a substance out there is dangerous?''

NEW YORK (AUG. 31) UPI - The New York Stock Exchange reported Friday these odd lot transactions by principal dealers through NYSE facilities for August 30: Purchases of 353,499 shares and sales of 576,656 shares including 127,848 shares sold short.

-30- 396

#90243u1217 08/31/1990 ~United Press International

RENO, Nev. (AUG. 31) UPI - A lawyer says he will appeal a judge's ruling that subliminal messages in the music of the rock group Judas Priest did not cause the death of two young men.

Vivian Lynch, representing the family of James Vance, said District Judge Jerry Whitehead will be asked to reconsider his ruling and, if that fails, the appeal will be carried to the Nevada Supreme Court.

Lynch said Thursday the judge was wrong when he ruled there was insufficient evidence to show hidden messages caused Vance and Raymond Belknap to shoot themselves after drinking beer, smoking marijuana and listening to hours of the Judas Priest record ''Stained Class''.

Whitehead ruled there was a subliminal message - ''do it'' - on the record caused unintentionally several times by the exhalation of the singer and a guitar sound but that there was no evidence to show these prompted the suicide pact.

Lynch also said the judge was wrong in his ruling on the message. She said the attorneys had only to prove the messages existed. There was no requirement, she said to prove they had been intentionally placed on the record.

Belknap, 18, and Vance, 20, shot themselves on Dec. 23, 1985. Belknap died instantly. Vance blew away the lower part of his face and died three years later of complications from the wound and from prescription drugs.

Suellen Fulstone, a lawyer for Judas Priest and CBS Records, said she was surprised by the announcement of an appeal. But she said she may file a cross-appeal on the judge's ruling that subliminal messages are not protected by the constitutional right of free speech.

The judge said the lyrics are protected by the First Amendment but not any messages or phrases that are hidden on the record.

The families had sought $6.2 million in damages.

-30- 1993

#90243u1252 08/31/1990 ~United Press International

WASHINGTON (AUG. 31) UPI - The National Association of Realtors said Friday its housing affordability index dipped to 102.3 in July from 102.9 in June as the median price of a home increased $900 to $97,500.

''Home buyers lost a marginal amount of purchasing power in July,'' the group said. But the ''decline was offset by a decrease in the interest rate used to calculate the index, and an increase in median family income.''

When the index stands at 100, the median family income equals the exact amount needed to qualify to purchase a median-price home with conventional financing and a 20 percent down payment.

''At 102.3, the index shows that a family earning the national median income of $34,358 for July had 102.3 percent of the income needed to qualify for conventional financing covering 80 percent of a home priced at $98,400, the median existing-home price for that month,'' the group said.

The mortgage rate used to calculate the index combines closing rates of both fixed-rate mortgages and adjustable-rate mortgages for existing homes as reported by the Federal Housing Finance Board.

In July:

-A family earning $20,000 annually would have had sufficient income to qualify for a $58,500 home using a $46,800 loan;

-A family earning $30,000 would have qualified for an $87,800 home with a $70,200 loan;

-A family earning $40,000 would have had enough income to qualify for a

$117,000 home with a $93,600 loan;

-A family with a $50,000 income would have qualified for a $146,300 home with a $117,000 loan.

In the months ahead, ''Home buyers in America will get hit by Iraq's invasion of Kuwait,'' said Norman Flynn, president of the 800,000-member industry group. ''First-time buyers will get hit ''roup. ''

''Unfortunately, entry-level buyers who might have just qualified to purchase a home in June or July may now find themselves priced out of the market,'' Flynn said.

#90243u1278 08/31/1990 ~United Press International

ST. LOUIS (AUG. 31) UPI - Apex Oil Co., which filed for Chapter 11 bankruptcy in late 1987, implemented a reorganization plan recently approved by a federal bankruptcy judge.

The plan's implementation Thursday followed completion of loan arrangements with Banque Paribas of New York and Banque Indosuez of Geneva and making disbursements required by the reorganization plan.

''We are out of bankruptcy,'' Apex Oil President Tony Novelly said. ''We always knew this would come and now that it's here, we can concentrate our full attention on making the most out of Apex Oil's bright future.''

The court-approved plan, filed in conjunction with 53 debtor affiliates, provides unsecured creditors with up to $60 million in cash and debt securities.

Under the plan, unsecured creditors would receive up to $20 million in cash, $20 million in seven-year notes secured by Apex assets to be sold over the next two years, and $20 million in 10-year notes guaranteed by Clark Oil Trading Co.

When Apex filed for protection from creditors Dec. 24, 1987, its primary bank lenders, Chase Manhattan Bank and Centerre Bank, began foreclosure proceedings.

After the filing, the banks sought liquidation of the company for payment of $550 million the banks claimed to be owed.

However, Apex claimed the company was viable and worth more than the amount owed the banks. The bankruptcy court agreed, and ruled against liquidation.

The secured claims of the bank lenders were satisfied in November 1988, when Apex sold the refining and retail marketing assets of Clark Oil and Refining Corp. for $1 billion.

Apex said Thursday it would concentrate on oil trading, oil terminal operations, and shipping.

''We are confident that our strength in these business areas ensures the success of Apex,'' Novelly said.

#90243u1298 08/31/1990 ~United Press International

GDANSK, POLAND (AUG. 31) UPI - Solidarity founder Lech Walesa vowed Friday to continue the revolution he began 10 years ago that resulted in the abolishment of communism in Poland.

On the 10th anniversary of the legalization of Solidarity, and speaking in the same Gdansk shipyard hall where the legalization agreement with the former communist government was signed, Walesa reviewed the ups and downs of a decade culminating in the formation of the Solidarity-led government now headed by his former aide, Tadeusz Mazowiecki.

''The revolution started here in 1980,'' said Walesa, wearing a gray suit, a Solidarity badge pinned to its lapel. ''The revolution is not yet over. We cannot leave the job we started, unfinished.''

Walesa said that many communists still hold managerial jobs and should be fired in the second stage of the revolution.

A disagreement over keeping former communists in government is one of the main issues splitting Walesa and Mazowiecki, whose administration is not yet a year old.

Walesa did not spare his former aide, who sat next to him in the conference hall, from criticism, saying Mazowiecki's government has been slow in implementing reforms.

''Many things have gone too slowly,'' Walesa said, to applause.

The Solidarity leader criticized communist President Wojciech Jaruzelski, who imposed martial law on Dec. 13, 1981, to crush the union after 16 months of operation.

''He and the others who did it will be judged by history and God,'' said Walesa, who has launched a campaign to replace Jaruzelski as president.

Mazowiecki and Walesa talked privately for an hour in the residence of

Bishop Tadeusz Goclowski in an effort to smooth out their differences.

Walesa advocates presidential elections this year, while Mazowiecki wants them next spring.

Acting like a presidential candidate, Walesa struck one of his main themes: that Solidarity should have many voices, and its members should not be forced only to support the administration.

''We should differ if we want to be normal,'' he said. ''We cannot allow the former inhuman socialist democracy to be replaced by democracy of Solidarity.''

Mazowiecki, looking pale and solemn following an acrimonious meeting Thursday with hostile shipyard workers, made a low-profile speech with references to God and religion. Some observers compared him to a priest talking to his parishioners.

''We can be opponents but will never be enemies,'' he said, in answer to Walesa's criticism of his performance.

Conceding that times are difficult and people are suffering under austerity measures, Mazowiecki paraphrased one of the Psalms from the Bible, asking God to feed the nation with patience and endurance.

''Lord will give strength to its nation to meet the challange of the historical moment,'' he said.

Several hundred Solidarity activists and 80 union representatives from across the world, including Lane Kirkland, the chairman of the American AFL-CIO labor federation, took part in the observance.

HOUSTON (AUG. 31) UPI - Compaq Computer Corp. is faced with a number of its notebook-sized laptop computers developing hairline cracks after a couple of months of use.

The cracks are developing along the sides of the LTE and the LTE 286 models, which were introduced in October 1989 and are the largest selling laptop computers in the notebook-sized category, company spokeswoman Debra Globe said Thursday.

The tiny fractures, developing along the outside of some cases, are the first widespread defect Compaq has experienced on a product shipped to the market, Globe said.

The Houston-based manufacturer is reimbursing dealers for replacement of the plastic cases on the laptop machines. Meanwhile, plastics experts at the plant are searching for the cause of the problem.

Until a cause is found, Compaq has extended the one-year warranty on the computers an extra year to cover the plastic case, Globe said.

''I think it's a pretty complex problem, and we've been looking at the type of plastics used, the process and all those factors and we really can't point to any one thing,'' Globe said.

''If and when we come up with a better material with the replacement plastics we would start shippping that to the field as soon as that is available.''

The market research firm of StoreBoard/Computer Intelligence said Compaq had sold 84,777 of the laptops through July. Globe said Compaq does not know how many machines have developed cracks.

The hairline fractures are considered to be cosmetic and will not affect the operation of the computer, she said.

#90243u1328 08/31/1990 ~United Press International

WASHINGTON (AUG. 31) UPI - An increase in the price of metals and minerals helped lift non-oil commodity prices on world markets in July, the World Bank said.

Yet at 90.3 with a basis of 100 for 1979-81, the multilateral organization's index for non-fuel commodities was 1.8 percent lower than a year earlier, meaning that commodity exporting countries get less money for their products.

Metal prices rose in July mostly in response to dwindling supplies and tight markets, despite a seasonal downturn in demand, the bank said Thursday.

Nickel prices surged 10.6 percent, partly because a strike at a smelter in New Caledonia raised concerns about supplies, prompting panic buying. Erratic supplies from the Soviet Union also contributed to the panic, the bank said.

News of a strike at a large U.S. mine and a decline in production in Chile led to a 7.2 percent price increase for copper. Threats of strikes in Peru continuing production problems in Zambia and Zaire, and strong demand in Europe and East Asia contributed to the price hike.

Lead prices rose 4.5 percent on news of strikes in Canada. The London Metals Exchange price of aluminum inched up 0.3 percent, while zinc prices tumbled 4.5 percent after a labor dispute at Canada's Trail Smelter was settled earlier than expected.

The bank said that food prices slid 0.3 percent in July. Increased production of palm kernel oil and large volumes of coconut-oil exports from the Philippines contributed to the lower prices.

The price of sugar dropped 7.7 percent in July after an 11.5 percent plunge in June because of expected record harvests in Cuba, India, and several European countries.

Expectations of good harvests in 1990 caused prices for wheat and corn to fall 7.8 percent and 5 percent, respectively.

While many food prices dropped in July, banana prices in the United States jumped 18 percent. A strike by 10,000 banana workers in Honduras, the world's second largest exporter of the fruit, disrupted supplies, leading to higher prices, the World Bank said.

#90243u1334 08/31/1990 ~United Press International

SEOUL (AUG. 31) UPI - South Korea's Ssangyong Oil Refinery Co. Friday said it has signed a one-year contract with Saudi Arabia for 60,000 barrels of crude oil a day to help offset imports lost by the U.N. embargo of Iraq and Kuwait.

A spokesman for the Seoul-based company said deliveries from Saudi Arabia's Aramco will begin next month.

South Korea has suffered a shortfall of 110,000 barrels a day in its crude supplies since imports from Iraq and Kuwait were cut off by the U.N. embargo imposed in the wake of Iraq's Aug. 2 invasion of Kuwait.

The shortfall amounted to 12 percent of the country's daily needs.

The deal is the first long-term contract for the import of Saudi crude since June 1988 though South Korea purchased 19 million barrels of Saudi products on world spot markets during the first half of this year, the spokesman said.

South Korea relied heavily on imports from Saudi Arabia until the late 1970s but the Saudi share has been steadily declining under a government policy to diversify crude supply sources.

Negotiations have been under way with Mexico, Iran, Malaysia and Yemen for

additional crude supplies, the spokesman said.

Government officials, said imports from Iran, thus far the main supplier for Ssangyong, will soon increase its supply by 25,000 barrels a day and another 25,000 barrels daily will be imported from Mexico starting in September.

TEL AVIV, ISRAEL (AUG. 31) UPI - Jordan has aided Iraq during the Persian gulf crisis by carrying out reconnaissance flights along the Saudi border and helping to circumvent the U.N. embargo against Iraq, Israeli military sources said Friday.

The military sources, who spoke on condition they not be identified, said it is possible war in the gulf can be avoided because Iraq's strategy at this time is to buy time and not provoke a military confrontation with the United States.

They said Iraqi President Saddam Hussein appears to hope that a lengthy standoff in the gulf will cause the U.S.-led international alliance against Iraq to fall apart, permitting a political solution giving Iraq some territorial gains.

However, the analysts predicted, Iraq will respond forcefully if attacked and could strike at Israel if its situation becomes desperate.

The sources said ties between Jordan and Iraq had strengthened during the gulf crisis and now included the sharing of military intelligence and training as well as the circumventing of the U.N. embargo against Iraq.

''In the last week, we have seen several instances of Jordan carrying out reconnaissance flights on the Saudi border and we believe those are in the service of Iraq,'' one source said.

The surveys were done by American-made F-5 jets and covered an area of several dozen kilometers into Saudi Arabia, they said.

The sources also said it ''quite likely'' Jordanian military experts were training Iraqi how to use Hawk anti-ballistic missiles captured in Kuwait.

The sources also accused Jordan of supporting the U.N. embargo against Iraq while helping break it.

Jordan has agreed to support the U.N. embargo but said food and medicine would be exempt and that normal trade between Iraq and Jordan would continue.

''They can import for themselves and by bilateral channels can send those goods to Iraq. Israel feels that's what they are doing now,'' one source said.

NEW YORK (AUG. 31) UPI - Latest metal market prices as quoted Friday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 81.50-82.50 c-lb.

Antimony, domestic, refined in alloy, $1.25-1.40 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 133.00-137.00 c-lb.

Lead, common, U.S. primary producers 50.00-58.00 c-lb.; U.S. non- primary (secondary) producers 54.00-58.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $250.00-$270.00 76-lb. flask.

Nickel, briquettes delivered to customers, merchant, N.Y., $4.50- 4.75 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $110.00-$115.00 per troy ounce.

Platinum, soft, 99.5 fine, producer - $480.00-$490.00; dealer- approx., $483.00-$488.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $114.00-$122.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $105.67 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 281.25 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $7.80-9.59 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.00-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 82.00-88.00 c-lb.

#90243u1369 08/31/1990 ~United Press International
PARIS (AUG. 31) UPI - Iraqi Foreign Minister Tariq Aziz hinted in an interview published Friday that his government would support international terrorist acts if the Western powers declare war against Baghdad.

In his first interview with a Western newspaper since the Iraqi invasion of Kuwait Aug. 2, Aziz also told the Paris daily Le Figaro that the U.S. military intervention in the Persian Gulf had prevented an Arab solution to the crisis. He insisted Iraq had no plans to invade Saudi Arabia.

Asked if he categorically rejected terrorism, Aziz said, ''That depends on the attitude of the Western world. If it declares war on us, our obligations toward it would end.

''Either we decide to behave in a civilized manner toward each other through the respect of international law and through peaceful coexistence, in which case we say that terrorist acts are outlawed, ... or the Arab people are threatened with genocide,'' he said.

''Then why should we worry about American interests in the region? Why should I be concerned about France's stability if Paris sends warships to bomb Iraq and kill Iraqis?'' the foreign minister asked.

''If you do not give us the chance (to live in peace), if you use imperialist methods, if you threaten Iraq with your ships and planes, then I am free from all moral engagements toward the French, American or British governments.''

Aziz, who met Friday with U.N. Secretary-General Javier Perez de Cuellar in Amman, Jordan, to discuss the gulf crisis, said he did not know what the United Nations chief had in mind when he asked for the meeting.

The foreign minister criticized Egyptian President Hosni Mubarak for having allegedly closed the door to an Arab solution of the conflict by supporting President Bush's decision to send ground forces to the region.

''Saudi Arabia called for these troops because she thought herself threatened by Iraq,'' Aziz said. ''We are ready to give her all the guarantees possible. But if the Saudis want to feel even more secure, they can ask for an Arab force to replace that of the United States.''

The foreign minister said, however, that there was no chance his country would evacuate Kuwait because the emirate had historically been part of Iraq.

''The French-German frontiers and the Turkish-Iranian frontiers have a historical and geographic significance,'' he said. Not those of ''e,'' he said. Not those of

''If Saudi Arabia claimed Qatar as part of its territory, I would support that claim. I tell you frankly, Qatar does not have a historical reality '' Azizis government has never said it will let them leave in exchange for a ransom payment.

Aziz said that the women and children Iraqi President Saddam Hussein has promised to release should receive their exit visas Friday, and confirmed that women and children under 18 years of age being held in Kuwait will also benefit from the decision to allow them to leave.

He said journalists and businessmen who arrived in Iraq after the Aug. 2 invasion would also be allowed to leave Iraq wihtout problem.

#90243u1397 08/31/1990 ~United Press International

CHICAGO (AUG. 31) UPI - Grain and soybean futures were mixed at midmorning on the Chicago Board of Trade.

Short-covering ahead of the Labor Day weekend provided most of the support. The market will be closed Monday.

Locals, commercials and commission houses dominated the early buying across the floor.

Nearby soybeans were firm as delivery notices for the September contract were lighter than expected.

There were no deliveries of corn, and notices for September wheat were at the low end of trade expectations.

Nearly ideal growing conditions continued to pressure both corn and soybeans with favorable weather predicted for the next 30 days.

The large world supply weighed on wheat prices, as did news that India will export 1 million tons of wheat during this marketing year.

Basis levels were steady to firm on the lack of farmer selling.

South Korea bought 50,000 tons of corn overnight, otherwise the export markets were quiet.

The midmorning prices:

Corn Sep 2.47 up 1 3/4; Dec 2.34 3/4 up 1 1/4; Mar 2.43 1/4 up 1.

Soybeans Sep 6.05 up 2 1/2; Nov 6.18 3/4 up 1 3/4; Jan 6.31 1/4 up 3/4; Mar 6.45 up 1 1/2.

Wheat Sep 2.67 up 1/4; Dec 2.82 3/4 off 1/4; Mar 2.93 1/2 off 1/2.

Oats Sep 1.04 1/4 up 3 1/4; Dec 1.17 up 2 3/4; Mar 1.28 3/4 up 2 3/4.

#90243u1497 08/31/1990 ~United Press International
(AUG. 31) UPI - U.N. Secretary-General Javier Perez de Cuellar, shifting the focus of the Persian Gulf crisis from military confrontation to diplomatic talks, met Friday with Iraq's foreign minister amid moves by

Baghdad to begin releasing Western women and children.

''The foreigners in Iraq have been have been assembled at the Melia Mansour Hotel to prepare for their departure,'' Foreign Minister Tariq Aziz told Jordanian television in an interview before meeting with Perez de Cuellar in Amman.

Amid signs Iraq was making good on President Saddam Hussein's promise Tuesday to release all foreign women and children from Iraq and occupied Kuwait, both Perez de Cuellar and Aziz played down chances of a diplomatic resolution to the crisis.

''The Arab nation will achieve all of its aims despite the international conspiracies and challenges we face,'' Aziz said. ''Our battle is an historic one and we must fight it with honor, and victory will be on our side.''

He gave no indication Iraq would agree to U.N. resolutions demanding it withdraw from Kuwait, which it invaded Aug. 2.

Aziz told reporters, ''I came hear to hear what de Cuellar has to say, and especially about the Security Council resolutions.''

In addition to demanding an Iraqi withdrawal from Kuwait, the U.N. Security Council has approved resolutions imposing economic sanctions on Iraq, authorizing the use of ''measures commensurate to the specific circumstances'' to enforce the boycott, and calling for the release of foreigners.

Saddam has declared his annexation of Kuwait is irreversible and called for withdrawal of the massive multinational force. He also has said ''arrangements'' could be made on the issue of Kuwait if Israel pulled out of occupied territories and Syria withdrew from Lebanon.

Iraqi authorities hold thousands of Westerners captive in Iraq and Iraqi-occupied Kuwait as protection against attack by a U.S.-led multinational force deployed in Saudi Arabia and the Persian Gulf.

President Bush, who has appealed to the world to share the cost of Operation Desert Shield, spoke by phone Friday with Saudi King Fahd, British Prime Minister Margaret Thatcher and French President Francois Mitterrand to discuss burden-sharing and the situation in the Gulf.

''All the leaders emphasized the need for continued cooperative effort to maintain the international community's steadfast stand against the Iraqi aggression in Kuwait,'' said White House press secretary Marlin Fitzwater.

British and Swedish jofficials said Iraq began issuing exit visas to some

women and children Friday.

In London, the Foreign Office said 139 British women and children have received exit visas from Iraq. A spokesman said it was told the first batch of foreigners would fly out of Baghdad Saturday on an Iraqi Airways jet.

The Swedish Foreign Ministry said only some of the Swedish women and children had been given visas.

''We are not sure why all our women and children have not received visas but the rest are expected to receive them tomorrow,'' Foreign Ministry spokeswoman Anita Matejonski said. There are about 90 Swedes in Iraq and Kuwait, according to Baghdad Radio.

Matejonski said Sweden's ambassador to Iraq informed his government that Swedes were ''likely'' to leave Baghdad Saturday.

The British Broadcasting Corp. also reported that 19 Italian women and children arrived in Amman from Baghdad.

Japan's Foreign Ministry said 311 Japanese were taken to Iraqi military and industrial sites between Aug. 25 and 26. The men were still there Friday but the 68 women and children in the group arrived in Baghdad for possible repatriation.

Japanese television stations interviewed some of the Japanese women, who said they were not sure where they had been taken. One said she had been in a steel plant in northern Iraq. The women said some Europeans were taken to the sites with them but their fate remained unclear.

Tokyo said it was ready to airlift about 500 Japanese citizens out of Baghdad on a chartered Japan Airlines jet but Iraqi authorities indicated they prefer to organize the departure of foreigners themselves.

The United States has accused Iraq of acting disgracefully and playing with people's emotions by plunging the departure procedure into a web of red tape.

Arab League foreign ministers meeting in Cairo to discuss the crisis worked on a communique that would condem Iraq's treatment of foreign diplomats in occupied Kuwait. Saddam ordered foreign missions in the emirate to close but many countries defied the order.

#90243u1514 08/31/1990 ~United Press International

VATICAN CITY (AUG. 31) UPI - Pope John Paul II starts his seventh visit to Africa Saturday to demonstrate his determination to bring world attention to some of the poorest countries of the continent.

For 11 days, John Paul will tour Tanzania and its small neighboring republics of Burundi and Rwanda, with a 21-hour visit to the Ivory Coast in West Africa on his homeward flight to bless a controversial new cathedral which is a copy of St. Peter's Basilica.

He is scheduled to leave Rome Saturday at Saturday for the Tanzanian capital of Dar-es-Salaam at 5 p.m. with a brief refuelling stop at Malta's Luqa airport on the way.

It is John Paul's 49th trip outside Italy since he was elected head of the Roman Catholic Church in October 1978.

Since 1980, the pope has visited African countries every year and his new tour is his second this year. In January he visited five countries of the drought-stricken Sahel region in West and Central Africa.

On each visit, his appeals to the rich industrial countries to come to the aid of poverty-ridden Africa have become more urgent and dramatic. In scores of speeches he has reflected his horrified despair at the abysmal level of hunger and despair he has witnessed.

At the same time, his African trips support the surge of the Roman Catholic church in Africa, where the Vatican says church membership has swelled by 24 million to 79 million since John Paul made his first visit to the continent in 1980.

In the East African republic of Tanzania, twice the size of California, the pope's visit comes at a particularly critical time.

The nation of 26 million is bankrupt following the failure of 23 years of former President Julius Nyerere' ''African Socialism'' - a mixture of Marxist economy and traditional techniques. Tanzania is almost entirely dependent on foreign aid.

Nyerere, a devout Catholic, handed over the presidency in 1965 to Ali Hassan Mwinyi, 65, a moderate Moslem. This month Nyerere handed over to Mwinyi the leadership of Tanzania's only political party - Chama Cha Mapinduzi, the party of the Revolution.

Presidential elections - only the second since Tanzania became independent in December 1961 - are scheduled for October and Mwinyi is considered certain to win.

One result of these changes is that the strength of the Moslem Fundamentalist movement has been growing steadily in the Dar-es-Salaam, which for centuries was a base for Arab slave traders.

Moslems form about half of the capital's 1.6 million population. But in the country as a whole they make up only 32 percent as against 44 percent Christians, of whom 22 percent are Catholics.

In Burundi and Rwanda, small landlocked states at the northwest corner of Tanzania which won independence from Belgium in 1962, some 60 percent of the population are Catholics.

Both republics have a long history of strife between the rival Tutsi and Hutu tribes, with hundreds of thousands killed since 1959. But in recent years they have achieved relative political stability.

However they remain among Africa's poorest and most densely populated

nations. In Rwanda, the population is growing at a rate of 3.7 percent a year and women on average have nine children each.

#90243u1521 08/31/1990 ~United Press International

BEIJING (AUG. 31) UPI - China Friday pleaded for international cooperation in next month's Asian Games in the government's first acknowledgment of a threat by 10 Middle East nations to boycott the event unless Iraq is barred from participating.

State television's evening news broadcast featured a lengthy statement by an unidentified Chinese Olympic Committee official calling on all countries participating in China's first international sports event to lay aside political issues.

''The International Olympic Committee does not stand for bringing political disputes into sports, and the Chinese Olympic Committee also hopes that no political dispute will be brought into the 11th Asian Games '' the official was quoted as saying.

While there was no mention of a threatened boycott, the announcement appeared to be aimed at reports some Middle East nations have proposed they will withdraw from the Asian Games if Iraq participates.

A senior official from the Olympic Council of Asia said Wednesday in Bangkok that 10 Arab countries recently agreed to urge the International Olympic Committee and the OCA to suspend Iraq from participating in international sports events or face a boycott

If the Olympic Council of Asia decided in favor of the proposal, China would presumably have the right to bar Iraq from the Asian Games but would be loath to take such a strong stand.

China has agreed to stop lucrative weapons sales to Iraqi leader Saddam Hussein's regime and cautiously aligned itself with the West by supporting an international embargo against Iraq following its Aug. 2 invasion of Kuwait.

But Beijing appears to be trying to keep a low profile towards the conflict for fear of weakening its strong Third World ties.

China has distanced itself from Western calls for the use of force in the region and quietly evacuated its embassy in Kuwait last weekend in capitulation to Iraq's demands that all foreign missions close in recognition of the conquest.

The OCA official, treasurer Santiparp Tejavanija, declined to name the 10

Arab nations planning to boycott but said Yemen and Jordan were not among them and discounted a Lebanese claim that it would participate.

Lebanese Ambassador to China Farid Samaha told United Press International this week that Lebanon was participating as planned.

Officials from the embassies of Qatar, Oman and Kuwait in Beijing made similar statements.

China Friday called on ''the Olympic committees of countries in regions in Asia'' to guarantee the success of next month's much- publicized event.

''The Olympic committees of the 38 countries and regions in Asia which have already sent their entries to the forthcoming Asian games are welcome to participate as scheduled in the Olympic spirit . . . and under the motto of the current Asian Games - 'unity, friendship and progress,''' the statement said.

China said Iraq's Aug. 2 invasion of oil-rich neighbor Kuwait has ''caused tension in the gulf region'' and Beijing expressed hopes the crisis would be resolved peacefully at an early date.

An Asian Games boycott would be a great blow to Beijing's efforts to restore its international image following the June 1989 crackdown on democracy advocates.

The capital is plastered with red and white banners extolling Asian unity and harmony in preparation for the quadrennial Games opening Sept. 22.

Official propaganda also lauds China's extreme measures to prevent any disruptions reminiscent of last year's nationwide democracy protests. The state media has announced hundreds of executions in what many reports have called a campaign to ''make China safe'' for the 16- day event in the capital.

MEXICO CITY (AUG. 31) UPI - Mexican President Carlos Salinas de Gortari has been compared to Soviet leader Mikhail Gorbachev, with the media eagerly dubbing his economic reforms as ''Salinastroika.''

His ruling Institutional Revolutionary Party, or PRI, this weekend holds its 14th National Assembly, and major reforms are in the offing - reforms that mean confrontation with organized labor.

''There are going to be big changes in the party,'' one cartoon character says to another in a recent Mexican newspaper. ''Youth is winning out over the 'dinosaurs' in the struggle to modernize.

''Gorbachev is all set to pass into history as the great reformer,'' he concludes - at which his friend walks away with a befuddled look.

In drawing a parallel with changes in the Soviet Union, the cartoon points to the need for a political counterpart to back up Salinas's economic reforms.

In its 60 years of uninterrupted rule, maintained by means fair and foul, the PRI has advocated varying degrees of mixed economy, but now Mexico is preparing for an international market system, opening up to foreign investment and goods and selling often inefficient state-owned industries as part of a modernization drive.

Salinas took office in December 1988 amid widespread skepticism after winning slightly more than 50 percent of the vote, much less than his predecessors. The government faced charges of electoral fraud from both left and right, and the PRI's share of seats in the Chamber of Deputies was down from 72 percent to 53 percent.

With congressional elections set for 1991, Salinas is aiming to reform the party with one obvious item on the agenda: to tackle the 3 million-member Mexican Workers Confederation, the CTM, the country's biggest labor organization and considered a bastion of Mexico's political ''dinosaurs.''

One of Salinas's main goals is to end the CTM's traditional role in picking a certain number of gubernatorial and congressional candidates, a practice that in the past has meant several million guaranteed votes for the ruling party.

As workers become more and more disillusioned with labor's performance on their behalf, the CTM is losing votes and its candidates need increasingly blatant fraud to win, according to Professor Ilan Bizberg, a labor specialist at the College of Mexico.

Such fraud is getting ''more and more difficult, and more and more costly'' politically, Bizberg added.

Party leaders say they are hopeful that democratically chosen candidates will be able to win clean elections.

''One thing is clear. We can't keep committing election fraud,'' said Juan Rodriguez Prats, a Federal Electricity Commission official and long-time PRI militant.

But there are also economic considerations in reining in organized labor.

''Salinas has a secret war, in a way, with the labor sector, because his economic project demands confronting labor,'' said Professor Leopoldo Gomez of the Autonomous Technological Institute of Mexico.

''The current policy is to weaken the unions in order to make business more efficient,'' Gomez said. Efficiency is a major concern for the Mexican economy, facing less government regulation and more international competition.

Spearheading the CTM's defense of its privileged position in the party is its 90-year-old leader, Fidel Velazquez, the dominant figure of the Mexican labor movement since 1941 and a long-time party faithful.

In early July, Velazquez fired off a letter to PRI Chairman Luis Donaldo Colosio demanding to know ''once and for all, your opinion on the future

of the sectors, and especially the labor sector'' in the party. He warned the labor rank-and-file might bolt to the left-wing Party of the Democratic Revolution, or PRD, if the party ignored them.

Following several days of talks, a smiling Velazquez told reporters he had won a confirmed percentage of seats at the 8,000-member assembly. Press reports estimated at least 15 percent.

Salinas and party leaders have staked plenty of credibility on their commitment to modernizing the party, but the results may fall something short of eliminating all the labor sector's traditional powers.

Fearing massive labor defections to the PRD and its leader Cuauhtemoc Cardenas - it was Cardenas's father, former President Lazaro Cardenas, who gave labor its official role in the PRI - party leaders may go halfway.

Bizberg suggested they may grant the CTM continued privileges in certain regions, while pressing for reform in crucial electoral battlegrounds such as Mexico City.

#90243u1607 08/31/1990 ~United Press International

DURBAN, South Africa (AUG. 31) UPI - President Frederik de Klerk announced Friday the ruling National Party will open its membership to all races, signalling an end to its 42 years of exclusively white rule.

His announcement to mix the membership for the first time since the party was formed in 1914 was immediately endorsed by the first of four annual provincial party congresses that must formally approve policy measures before they are implemented.

But it drew quick condemnation from the official opposition Conservative Party.

''It's the last straw. It's outrageous and white voters will not stand for it,'' said chief party spokesman Koos Van der Merwe. ''The NP of today bears the same resemblance to the NP of 10 years ago as an ostrich to an elephant.''

De Klerk told the Natal province congress in the Indian Ocean port city of Durban, ''The existing restrictions on membership of the NP are in conflict with the party's declared point of view against racial discrimination and constitute an obstacle to forming alliances.

''Therefore, Congress authorizes the head council, after consultation with the federal councils, to effect the necessary amendments to the constitution and standing rules, in order to make membership of the NP

accessible to all South Africans.''

The move will take effect after all four congresses have met in the next three months.

The delegates from 20 regions of Natal greeted de Klerk's announcement with sustained applause. ''This is a big step, a far- reaching step, we are starting to take today, but I can assure you it is a well-considered step,'' he said.

He said the ''new South Africa demands that those who belong together through inner conviction should come together.''

He acknowledged there will be ''an inevitable realignment in the party political sphere in the new South Africa,'' adding that the NP ''believes that the bases for future cooperation should be laid now, otherwise valuable opportunities will be lost.''

He warned the party to ''expect a storm from the right.''

Conservative spokesman Van der Merwe said, ''They can expect a lot more than just anger. People are not going to tolerate this government at the ballot box any longer.''

De Klerk launched his program of sweeping racial reform in February, legalizing the African National Congress and other black opposition parties, releasing ANC leader Nelson Mandela, promising to scrap discriminatory laws introduced since the National Party came to power in 1948 and undertaking to move toward power-sharing with the black majority.

''Power-sharing of necessity implies joint decision-making on matters of common interest in joint constitutional structures,'' De Klerk told the congress. ''Among all population groups there is a growing realization that this policy (of power sharing) offers the only workable framework for a stable new South Africa.''

''I am more than ever convinced we will succeed in negotiating a fair, just and decent constitution,'' he told delegates. ''The people of South Africa must find a way to live together in peace because we cannot run away from each other.''

MANSFIELD, CT (AUG. 31) UPI - Amtrak Montrealer trains struck and fatally injured two men early Friday in similar but separate accidents in Connecticut, authorities said.

In the first accident, Amtrak train No. 60, the Montrealer bound for Montreal with the next stop Amherst, Mass., struck and killed Christopher Bowley, 25, of Storrs, in Mansfield at 12:40 a.m., said state police and Amtrak officials.

The second accident occurred about 12 miles south in Franklin about 4:20 a.m. when Amtrak train No. 61, the southbound Montrealer, struck an unidentified man sleeping on the grade between the rails, said Howard Robertson, an Amtrak spokesman in Washington, D.C.

In Mansfield, Bowley was lying near the tracks, rose when the northbound train approached and suddenly ran into its path, state police said. He was thrown about 100 feet north along the tracks and killed.

Bowley apparently was trying to run across the tracks at a grade crossing, Robertson said.

The train's horn was blowing and warning bells were sounding at the crossing at the time of the incident, Robertson said.

The engineer slammed on the emergency brakes when he saw Bowley but it can take up to 2 miles to stop a passenger train, depending on its speed, Robertson said.

The Montrealer was held for 2 hours, 18 minutes before resuming its trip to Canada, he said.

The victim of the Franklin accident was flown by Life Star helicopter to Hartford Hospital, said James Battaglio, spokesman for the hospital.

''He died at 8:30 a.m. on the operating table,'' said Battaglio.

The train was headed for Washington and the accident occurred about 20 miles north of New London, the train's next stop.

The Montrealer was held for three hours, 40 minutes as state police took statements from all 186 passengers on board, as well as a dozen or more crew members, Robertson said.

#90243u1631 08/31/1990 ~United Press International

BONN, WEST GERMANY (AUG. 31) UPI - The final bilateral treaty for German unification signed Friday states that the German people want to ''serve peace in the world as an equal partner in a united Europe.''

The treaty, which sets out the legal, financial and technical aspects of unification still must be ratified by the two German parliaments in

September, before the Oct. 3 unification date.

The document signed by the two German governments after months of negotiations, states that Berlin will be the capital of a united Germany, but that an all-German Parliament will have to decide where the seat of government will be.

The treaty formalizes an earlier decision that East Germany will form five states. They will join the 11 West German states in the Federal Republic of Germany, Oct. 3.

East Germany will automatically take over the West German constitution, the Basic Law, which is partly amended by the treaty.

A new preamble to the Basic Law states that Germans adopt the constitution with the desire ''to serve peace in the world as an equal member of a united Europe.''

The treaty includes a paragraph that says that the document is adopted ''in the knowledge of the continuity of German history and bearing in mind the responsibility - resulting from our past - for a democratic development in Germany, which remains bound to the respect of human rights and peace.''

Heinz Galinski, a West German Jewish Community leader, had strongly criticized the wording of the paragraph because it does not specifically refer to the extermination of millions of Jews during Hitler's Third Reich.

The treaty calls for the rehabilitation of victims of 40 years of Stalinist rule in East Germany, under the Socialist Unity Party of Germany (SED), ousted last fall.

''The rehabilitation of these victims of the unjust SED regime is to be linked with an appropriate compensation,'' the treaty says.

The paragraph is a reference to the hundreds of East Germans who were shot as they tried to flee to the West, persecuted by the state security police and jailed for criticizing the hard-line Communist state.

The document states that Germany will retain dual legislation on abortion for the next two years, keeping abortion legal in East Germany and illegal in West Germany.

''It is the duty of the all-German Parliament to pass by Dec. 31, 1992, at the latest, legislation which better guarantees the protection of unborn life'' and which guarantees that pregnant women ''in conflict situations'' have better access to counseling and social assistance.

Under the treaty, 144 East German deputies will join their 519 West German colleagues in Parliament.

The East German states proportional contribution of sales tax revenues to federal spending will originally be 55 percent of that paid by other states and will gradually increase to 70 percent by 1994.

The treaty incorporates a June agreement stating that property nationalized by the former East German Communist authorities should be returned to previous owners, whenever possible.

But, in a special clause incorporated in a bid to reassure investors, the treaty states that the agreement will not apply if the land or building ''is needed for urgent investment purposes, to be more clearly defined...'' in new legislation. ''The law should also rule on compensation for former owners.''

The East German debt, accumulated so far, will be managed by a special authority of the federal government, which will be empowered to take up credits and loans.

#90243u1633 08/31/1990 ~United Press International

RAMSTEIN, WEST GERMANY (AUG. 31) UPI - U.S. and West German officials Friday attended a memorial service for 13 American servicemen who died when a military plane helping transport supplies to the Persian Gulf crashed early Wednesday morning.

The servicemen were killed when a C-5A Galaxy plane plunged into a wooded area and burst into flames shortly after takeoff from the U.S. Air Base of Ramstein. Officials said Friday the cause of the crash had not been established and investigations were continuing.

Gen. Richard T. Swops of the U.S. military community of Kaiserslautern gathered with other military personel and local West German politicians Friday at the Ramstein airport for a memorial service.

A U.S. military spokesman said the four servicemen injured in the crash were in ''stable condition'' at the Landstuhl Army Medical hospital near Ramstein.

The plane, which was loaded with medical supplies, rations and maintenance equipment for U.S. troops deployed in the gulf, had 17 people aboard when it went down on its way to the Rhein-Main Air base near Frankfurt. It had been scheduled to fly to the gulf after that stop.

The aircraft was attached to the 60th Military Aircraft Wing, Travis Air

Force Base, Calif., but the flight crew was from a reserve unit, the 433d Military Airlift Wing, Kelly Air Force Base, at San Antonio, Texas.

More than 200 reservists assigned to the 433rd Military Airlift Wing have been transporting troops and cargo from around the United States to the Middle East since Aug. 8.

#90243u1641 08/31/1990 ~United Press International

GAINESVILLE, FL (AUG. 31) UPI - Police investigators reviewed a ''pool of suspects'' Friday as they searched for the serial killer suspected of slaying five college students in their apartments near the University of Florida campus.

An 18-year-old University of Florida student who once lived in an apartment complex where two of the victims were found was questioned Thursday in the Brevard County detention center by detectives investigating the murders.

Edward Lewis Humphrey was arrested Thursday and charged with beating his grandmother at her home in Indialantic. He was being held on $1 million bond.

Humphrey was scheduled for arraignment Friday on aggravated battery and assault charges in Sharpes, site of the Brevard County detention center. He initially was ordered held on $10,250 bond for the assault charges.

''His bond was upgraded to $1 million earlier this morning. We have no information on why,'' said Roberta Foster of the Brevard County sheriff's office.

''I know for a fact that there were three Florida Department of Law Enforcement persons there interviewing him. I know they were from Gainesville,'' said Gene Stevanus, executive director of the Brevard County public defender's office.

At a Friday morning news conference in Gainesville, authorities would not say whether Humphrey was a suspect.

''At this particular time, we have a pool of suspects that may be even larger than the pool we had yesterday (Thursday). To say that we have a prime suspect or a prime two or prime three suspects would be very premature,'' said Alachua County Lt. Spencer Mann.

''We're not prepared to say who our potential suspects are at this time or where our potential suspects are at this time or comment on newspaper reports about potential suspects at this time,'' he said.

The Orlando Sentinel reported Friday that Humphrey has been considered a possible suspect since earlier in the week and was tracked to southern Brevard County by a specially equipped Florida Department of Law Enforcement airplane.

Humphrey lives in Gainesville and for a short time this summer lived at the Gatorwood Apartment complex, where the bodies of two of the five victims were found earlier in the week.

The newspaper said no one was allowed into his apartment, and that his fingerprints would be compared to those found in the apartments where the five students were killed. The bodies of three victims were mutilated.

Humphrey was charged with beating his grandmother Thursday morning at her home in Indialantic. Neighbors said Humphrey had lived at her home for about 10 years and was an honor student, but had suffered severe head injuries in an automobile accident two years ago.

They said he has since had emotional and physical problems.

Carol Hyde, manager of Gatorwood Apartments, where the fourth and fifth bodies were found, said Friday that Humphrey had lived there briefly but she would not say whether management had asked him to move out. She also would not say whether he lived in Building 12, where the bodies were found.

Mayor Cortland Collier on Friday criticized news accounts that have indicated the citizens of Gainesville are terrorized.

''Gainesville is not trapped in a web of fear. The campus is not trapped in a web of fear, and words like that are simply inflammatory and irresponsible,'' he said.

He said he was proud of the way members of the community had pulled together.

''They're taking care of their neighbors, banding together, locking their doors and doing what needs to be done.''

The bodies of the five victims, all college students who lived within 2 miles of each other and within 2 miles of the University of Florida campus were discovered within an 48-hour period earlier this week.

Authorities said it appears the killer sought out slender young women with brown hair and forced his way into their apartments to kill them. All the victims fit that description, except for one young man who was the roommate of one of the women.

The funerals of four of the victims, Christina Powell, 17, of Jacksonville; Christina Hoyt, 18, of Gainesville; Tracey Paules, 23, of Palm Springs North and Manuel Taboada, 23, of Carol City, were held Friday.

Mourners jammed First Baptist Church in Pompano Beach on Thursday for the funeral of Sonya Larson, 18, of Deerfield Beach.

Larson and Powell were found stabbed to death in their apartment late Sunday.

The body of Hoyt, a Santa Fe Community College student, was found the following day. Authorities said she died of multiple stab wounds and her body was mutilated, along with Powell's and Larson's.

Published reports said Hoyt's head had been severed and placed on a shelf and her body sliced open from the pelvis to the breastbone.

Authorities have not released the official cause of death for Paules and Taboada, but Mann said they had been bludgeoned. Their bodies were discovered Tuesday in their room at Gatorwood Apartments.

#90243u1655 08/31/1990 ~United Press International

EAST BERLIN (AUG. 31) UPI - East and West Germany put a formal seal of approval Friday on their plan to merge Oct. 3, ending more than four decades of division, with the signing of the final unification treaty.

The treaty, still subject to ratification by the two German Parliaments, puts a formal seal of approval to a decision to merge East and West Germany on Oct. 3 and follows weeks of negotiations between the two countries and internally between each nation's government and opposition parties.

''The treaty is certainly one of the most important documents in post-war German history,'' East German Prime Minister Lothar de Maiziere said at the signing ceremony.

''It creates security and clarity about the many questions which arise from the completion of unity,'' he said at East Berlin's historic Palais Unter den Linden, which had been a guest house of the Communist government ousted last fall.

West German Interior Minister Gerhard Schaeuble, who signed the treaty with his East German counterpart Guenther Krause, said: ''Today is a day of joy and confidence for all Germans.''

It outlines the legal and financial framework of the merger, including the

creation of five new states in East Germany which will join the 11 West German states in the Federal Republic of Germany.

Berlin will be the capital of a unified Germany but the treaty states that a decision over the location of the seat of government still has to be made.

''The unification treaty is a big success for a unified Germany and the fact that all political parties participated in the negotiations is a big success fo democracy,'' de Maiziere said.

West German Chancellor Helmut Kohl did not attend the ceremony in East Berlin but a spokesman in Bonn quoted him as saying the document was ''of the highest historic importance'' and its signing ''a great hour of German history.''

The two parliaments are expected to ratify the treaty before a Sept. 12 meeting in Moscow of foreign ministers of the two Germanys and the four victorious World War II allies - Britain, France, the Soviet Union and the United States. The ministers are widely expected to formalize agreements reached in July when Kohl and Soviet leader Mikhail Gorbachev met in the Soviet Union.

The agreement, which is backed by Germany's Western allies, allows a united Germany to be a member of NATO and calls for the withdrawal of Soviet troops from East Germany within three to four years.

Only a few hours before the treaty was signed, Kohl's Christian Democrats and the opposition Social Democrats solved their disagreements over abortion laws, agreeing that abortion will remain legal in East Germany and illegal in West Germany for the next two years.

Another issue was also settled Thursday night when the Bonn goverment gave in to East German demands that secret files compiled by the former East German state security police be kept in East Germany.

The draft treaty originally called for the files, which contain data on over six million East Germans, to be transferred to West Germany.

#90243u1657 08/31/1990 ~United Press International

TOKYO (AUG. 31) UPI - The Ministry of International Trade and Industry said Friday it plans to provide about $5.4 million in fiscal 1991 to support a joint project between The Boeing Co. and Japanese corporations to develop a new generation passenger jetliner.

''A sum of 806 million yen (about $5.4 million) has been included in a

budgetary request made by the ministry for fiscal 1991 (beginning next April 1),'' a MITI official said.

The government of Prime Minister Toshiki Kaifu is scheduled to finalize a draft budget in December to be submitted to parliament for approval.

The money, if approved, will be used to subsidize interest payments on the development costs to be shouldered by Japanese partners, the official said.

The $5.4 million would be only a small fraction of the development costs for Boeing's proposed 777, which could cost the Seattle-based aerospace company up to $4 billion.

Boeing announced in April that three Japanese companies would design and manufacture between 15 and 20 percent of the airframe of the 777, a 350-seat, fuel-efficient jetliner designed to fill a market gap between Boeing's 767 and 747 jumbo jet.

Mitsubishi Heavy Industries Co., Kawasaki Heavy Industries Co. and Fuji Heavy Industries Co. would be responsible for key parts of the airframe, including fuselage panels and wing ribs. The three companies supply portions of other Boeing aircraft.

A formal agreement on the joint development is expected to be concluded toward the end of this year. Boeing has not yet announced full-scale development of the plane since it is waiting for airlines to line up with major orders first.

Dick Schleh, manager of public relations for Boeing's Commercial Airplanes Group in Seattle, said ''there is a high level of interest in the program'' and that the company is proceeding on the assumption that the first delivery of the aircraft will be in mid-1995.

In a related development, Kyodo News Service said MITI will slash its spending on research and development in another joint project involving Boeing and the three Japanese companies.

The project, under way since 1984, calls for development of a 150- seat jetliner code-named the YXX.

Experts have said the Boeing 777 would be more profitable than the YXX. Kyodo News said MITI will cut funds for this project to $3.7 million, about one-third of the outlay earmarked in the current fiscal budget.

#90243u1698 08/31/1990 ~United Press International

DALLAS (AUG. 31) UPI - Fulfilling one of the inducements the state offered to bring the superconducting super collider to Texas, five banks have set up a $48 million low-interest home mortgage program to help relocate the SSC employees.

The SSC Employee Mortgage and Bridge Loan program was set up as part of the overall State of Texas' 1987 site proposal for the world's largest scientific project expected to cost some $9 billion.

The loan program will provide single-family home loans at below- market rates in amounts up to $187,450 for more than 250 employees of the SSC Laboratory relocating to North texas from other parts of the country.

Under the program, employees who relocate from 100 miles away or more will be eligible for 30-year mortgages at rates one-half point below market.

The collider is proposed to be built in Ellis County west of Waxahachie, 30 miles south of Dallas.

The participating banks in the program are NCNB Texas, the state's largest bank which has committed $25 million, Texas Commerce Bank $10 million, BANK ONE, TEXAS $5 million, FirstCity Texas $5 million, and TeamBank $3 million.

In addition, bridge loans of $10 million - $5 million by NCNB and $5 million by FirstCity - for relocating the employe offered to support the superconducting super collider,'' said Richard Douglas, president of the North Texas Commission, a regional economic development body.

When completed in 1998, the collider site will encirle Waxahachie with an underground tunnel 54 miles in circumference. Powerful magnets in the tunnels will hurl atomic particles at each other and cause them to collide at nearly the speed of light to help scientists learn more about the smallest building blocks of the universe.

Federal funding for the collider is capped at $5 billion and that of Texas at $1 billion. The balance is to be raised from foreign sources. Congress has approved an appropriation of $318 million for fiscal 1991 toward the construction of the collider.

#90243u1711 08/31/1990 ~United Press International

CHATEAUGUAY, QUEBEC (AUG. 31) UPI - Mohawk Indians and Canadian soldiers continued Friday tearing down barricades around native reserves south of Montreal, even though talks between Mohawks and the Quebec government remained stalled.

Capt. Richard St. Louis said in an interview that barricades at five major points have been dismantled and holes in most roads filled with asphalt.

''We are moving slowly, but surely,'' St. Louis said. He said work began at 7 a.m. EDT with both Mohawks and soldiers involved.

Both the Kahnawake and Kanesatake Reserves were quiet through the night. But native leaders continued to meet early Friday in Dorval hoping to resume negotiations with the Quebec government.

The barricades at Kanesatake near Oka, just west of Montreal, remained in place.

Late Thursday, talks between the Mohawks and the Quebec government collapsed suddenly, raising fears of an assault by the Canadian armed forces on the two native reserves near Montreal.

Quebec Premier Robert Bourassa said in a statement released late Thursday that the Six Nation Iroquois Confederacy had withdrawn its delegates from the talks.

Their action, Bourassa said ''has made it impossible for the government of Quebec to continue these discussions without these participants.''

The collapse of the talks upset some Mohawk negotiators. They indicated the problem was caused by a clash between traditional and moderate Mohawks and militant members of the Warriors Society - specifically, disagreement over a demand for Indian sovereignty.

The dispute involving Mohawks in two communities began several months ago over a proposed expansion of the Oka golf course on land that Mohawks on the Kanesatake Reserve claim is an ancient burial ground. The dispute turned violent when a police officer was killed July 11.

Days later, sympathetic Indians at the Kahnawake Reserve south of Montreal blocked a highway and the key Mercier bridge linking Chateauguay to Montreal.

More than 3,000 heavily armed soldiers, equipped with tanks and armored

personnel carriers have been poised for several days at the Kahnawake and Kanesatake reserves this week, awaiting an order to unilaterally dismantle the barricades.

Talks between the Indians and government had appeared promising. Negotiators apparently settled on a framework agreement after meeting more than 20 hours of talks that concluded early Thursday.

As a result of progress made in those talks, the Mohawks and Canadian armed forces together had begun dismantling barricades around the Kahnawake reserve, including the bridge and highway. The barricades have remained intact at the Kanesatake reserve.

Jerry Pelletier - one of the chief negotiators for the Kanesatake reserve and a traditional Mohawk - told reporters Thursday that talks that were to resume Thursday night would have produced a settlement that would have eased tension and allowed barricades to be dismantled peacefully.

Pelletier said suspending the talks ''in essence sentences the Mohawk people of Kanesatake to the slaughterhouse.''

''(Bourassa) would prefer to see Mohawk blood instead of continuing negotiations,'' he said.

In an effort to separate traditional Mohawks from the Warriors, Pelletier said: ''We are not the ones making unreasonable demands.''

One delegate to the negotiations, Oneida Chief Terry Doxteter, said the split between Mohawk factions was related to a demand by Warriors that the final agreement to end the dispute confirm the soveriegnty of the Indians.

Doxteter said the federal government representative at the talks did not have a mandate to discuss sovereignty.

He said Warriors wanted the final agreement to set out a process by which the federal government and the Mohawks could define sovereignty and how it would work.

Essentially, the Mohawks want to establish their own system of law and order and be able to negotiate with the federal government on a ''nation-to-nation'' basis, Doxteter said.

Joe Norton, grand chief of Kahnawake and a supporter of the Warriors Society, told reporters the Quebec government was using divide and conquer tactics in an effort to draw more moderate Mohawks into the negotiations.

#90243u1741 08/31/1990 ~United Press International

MIDDLETOWN, Pa. (AUG. 31) UPI - A scientist who has studied cancer rates around the Three Mile Island since the 1979 nuclear reactor accident said Friday she found no persuasive evidence of higher rates caused by the accident.

The conclusions published in the September issue of the American Journal of Epidemiology were based on studies of hospital records for people who lived within 10 miles of the reactor, located 10 miles south of Harrisburg on the Susquehanna River

''One thing is clear: there is no epidemic of cancer,'' said Maureen Hatch the associate professor of epidemiology at Columbia University who led the study. ''We didn't find evidence for a real significant problem.''

While acknowledging her methodology was not perfect, Hatch said if there were as few as 10 ''excess'' cases of childhood cancer or leukemia cases they would have been detected.

Those assurances did little to alleviate the doubts of citizens' groups that continue to insist the accident caused cancers and miscarriages.

Kay Pickering, a spokeswoman for TMI Alert, said the use of statistical samples without interviewing people who lived near the plant was flawed research.

''The scope of the study was too small as far as we were concerned,'' she said. ''We think that the model they was set up did not '' not

She predicted the study would be used by the plant's owner, GPU Nuclear Corp., based in Parsippany, N.J., to defend itself against 2,500 damage suits filed in U.S. District Court in Harrisburg.

The study was paid for by the Three Mile Island Public Health Fund, set up in a 1981 federal court settlement against the owners of TMI.

In a step that aroused suspicions among anti-TMI groups tracking the study GPU was allowed to read a draft and comment on it before it was submitted for publication or publicly released. But Hatch said her team's independence was not compromised by allowing GPU to see the draft, which was required under the agreement establishing the fund.

The report was to have been released at a conference in Boston in November 1988 but was withdrawn becasue the journal said it would not publish pre-released studies, Hatch said in denying suggestions it was withdrawn to accommodate changes sought by GPU.

Fund officials set up a daylong series of seminars at Penn State's Middletown campus, within sight of Three Mile Island, to brief reporters, health professionals and the public.

In what remains the nation's worst commercial reactor accident, a cooling water valve failed March 28, 1979. Nuclear fuel in Unit No. 2 melted down but did not breach the containment vessel. Some radiation was released.

The study, embracing the period 1975-85, focused on cancer and leukemia in children under 14 because they are the most sensitive to low levels of radiation and occur sooner after exposure, Hatch said.

The study of the population of 160,000 people found 18 cases of cancer in children and four cases of leukemia. Both rates were slightly higher than in the population at large but Hatch said they were not statistically significant.

She said the study showed that children around Three Mile Island actually run a higher cancer risk from radiation that comes naturally from the ground.

There were 1,529 cases of child and adult cancers from 1975 to 1979, compared with 2,391 from 1981 to 1985, an increase of more than 50 percent.

She said one reason for the increase was the inadequacy of hospital records in 1975 and by other causes of cancer, including smoking and radon.

#90243u1767 08/31/1990 ~United Press International

COPENHAGEN, DENMARK (AUG. 31) UPI - Denmark's foreign minister appealed Friday to small nations throughout the world to send one warship to the Persian Gulf to swell the international armada blockading Iraq.

''I urge all the small nations to do this as part of the United Nations effort to make the blockade as effective as possible and give a clear signal to (Iraqi president) Saddam Hussein,'' said Foreign Minister Uffe Ellemann-Jensen.

Ellemann-Jensen also chided America's European allies for doing ''too little too late'' in the effort to stand up to Iraq, and criticized Austrian President Kurt Waldheim for a visit to Iraq that resulted in Austrian hostages being released. Iraq is holding Westerners to guard against attack by a U.S.-led multinational force.

The Danish official spoke as the country's parliament was to give the constitutional stamp of approval for deployment of a Danish multi- purpose corvette to the gulf. A corvette is a fast warship smaller than a

destroyer and often used in convoys.

''If as many small countries as possible from around the world take part, it will be a major boost to the United Nations and an effort that will set its mark on international cooperation for years to come,'' Ellemann-Jensen said.

''In particular it will be a clear message to dictators such as Saddam Hussein and give them something to think about before they consider invading their neighbors,'' the foreign minister added.

Ellemann-Jensen went on to underscore comments by British Premier Margaret Thatcher who Thursday chided America's allies for not acting quickly enough to help the military effort in the gulf region following Saddam's Aug. 2 invasion of Kuwait.

Speaking to delegates at a European Conservative Party organization conference in Finland, Thatcher said although there had been political support for the United States' immediate troop deployment, only Britain and France had been willing to help with military forces.

''Europe has given too little too late,'' Ellemann-Jensen said Friday.

''This is something we will have to take up in Europe in the future. We cannot expect the United States always to be there as an international policeman to safeguard our well-being,'' the foreign minister said.

He added that Denmark, along with other European nations had received a request from the United States to provide roll-on, roll-off vessels to help the further deployment of U.S. troops from America to the Middle East.

''We will have to look into this subject very carefully,'' Ellemann-Jensen said.

Denmark's government does not recognize U.S. land forces in Saudi Arabia as being part of a United Nations effort, unlike naval forces in the gulf region.

Ellemann-Jensen went on to deliver a sharp rebuke to Austria's President Kurt Waldheim for traveling to Iraq for discussions with Saddam that led to all Austrians being held against their will in Iraq being allowed to travel home.

''Of course, in the short-term Austria is happy that its citizens have come home,'' Ellemann-Jensen said.

''But the rift in United Nations solidarity that this caused was not good in the long-term. And I must admit, the sight of Waldheim and Saddam

photographed smiling together was not pleasing,'' he added.

Ellemann-Jensen meanwhile said a Scandinavian Airways aircraft was to leave Stockholm Friday night for Turkey where it was to await landing permission for Baghdad in order to pick up predominantly Swedish nationals who have already received exit visas, and others who expect Saturday to receive exit visas.

The aircraft, containing doctors and nurses, was to wait for permission to enter Iraq either at Istanbul airport or at Diyarbakir close to the Iraq-Turkey border.

''But the Swedes are, at present, the only Nordic nation who appear to have actually received exit visas from the Iraqis,'' the foreign minister said.

He added Danish diplomats had not yet received exit visas for the 10 women and 11 children waiting in Iraq to benefit from a promise made by Saddam to free all foreign women and children.

''Quite frankly I would say that we should not pin our hopes too high,'' Ellemann-Jensen said.

#90243u1810 08/31/1990 ~United Press International
LONDON (AUG. 31) UPI - King Hussein of Jordan brought his quest for a diplomatic settlement of the Persian Gulf crisis to England Friday, where it got short shrift as Foreign Secretary Douglas Hurd flew to the Gulf to steel Arab resolve against Iraq's actions.

Before leaving for Qatar, the first of six countries on his Middle East tour, Hurd said there was a reasonable chance that economic sanctions would force Baghdad to agree to end its monthlong occupation of Kuwait.

''What we're working on now is effective sanctions we can all play a part in, not only by applying them themselves, but by giving help to those who are going to suffer, going to have to make sacrifices for effective sanctions, so there is something for everyone to do,'' he said.

Also on Hurd's itinerary are the United Arab Emirates, Oman, Yemen, Saudi Arabia and Jordan. He said he wanted to strengthen Arab commitment against Iraqi President Saddam Hussein following Iraq's Aug. 2 invasion of Kuwait during an oil production and land dispute.

He expressed guarded optimism the foreign women and children held in Baghdad would be freed soon. The Foreign Office spokesman said 139 British women and children have received exit visas from Iraq. Saddam on Tuesday offered to release Western women and children.

Hurd expected to return to London in time for an emergency debate in the House of Commons on the situation next Thursday and Friday.

Prime Minister Margaret Thatcher, responding to a request from opposition Labor Party leader Neil Kinnock, recalled Parliament for the first time since the Falklands War in 1982. A debate also will take place in the House of Lords following a similar request from Lord Cledwyn, Labor's leader in the upper house.

Parliament has been recalled 13 times since World War II.

There was unlikely to be any serious disagreement between the government and opposition leaders to Britain's response to Saddam. No vote is planned

but an estimated 30 left-wing MPs said they would like one, arguing unless they act, they will be mere observers on the sidelines of their country's history.

''We will not contemplate, accept or support in any shape or form a military action against Iraq by the United States, assisted by British forces, outside the authority of the United Nations,'' said Labor MP Tony Benn said.

Shortly before seeing King Hussein, Thatcher took a 25-minute telephone call from President Bush. ''It was an occasion for checking in with each other,'' her spokesman said. ''They continue to be absolutely together in their views.''

They discussed the need for sharing the burden of enforcing the U.N. sanctions, and ''no request was made of Britain, which is already contributing to the effort,'' he said.

At Downing Street, King Hussein endeavored to head off a conflict through a negotiated settlement.

After hawking his plan around North Africa last week, he is on a European campaign.

Hussein advocates simultaneous withdrawal of Iraqi troops from Kuwait and foreign troops from Saudi Arabia. An Arab peacekeeping force would oversee Kuwait until an election was held within six months to choose a new Kuwaiti government that would then give Iraq certain unspecified rights.

Thatcher listened politely to Hussein, then dismissed her longtime friend's suggestions. Saddam's withdrawal from Kuwait is not negotiable, she has said repeatedly.

Hussein and Thatcher were ''quite far apart in their assessment of the cause of the conflict and way to resolve it,'' a Downing Street spokesman said.

They agreed on the need for Iraq to withdraw from Kuwait, U.N. sanctions, and renewing the effort to settle the Arab-Israeli dispute, he said.

Hussein expects nothing less than a rebuff in Europe but he was compelled to try by problems at home.

With an estimated 73,000 refugees who have flooded into Jordan from Baghdad and its trade with Iraq cut off, Jordan is verging on economic collapse. And some of Hussein's subjects - many of them Palestinians - have expressed support for Saddam, whom they view as Arabs' best advocate against the Western world.

Iraq claims historical rights to Kuwait and has denounced Britain's drawing of the Iraqi-Kuwaiti border in 1922, when Britain and France divided up the defunct Ottoman Empire following World War I.

#90243u1813 08/31/1990 ~United Press International

WASHINGTON (AUG. 31) UPI - Rural physicians, who generally receive smaller Medicare payments than their big-city counterparts for the same service, could see fatter checks from the government under a proposal Health Secretary Louis Sullivan sent to Congress Friday.

The proposed model fee schedule is the first step toward implementing a 1989 law that overhauls the way Medicare pays for physician services. The proposed fee schedule will be published in the Federal Register for public comment. The final version will be phased-in Jan. 1, 1992, and become fully effective in 1996.

Currently, the 25-year-old payment system under Medicare - the nation's health insurance plan for people over 65 - pays a doctor's actual charge, customary charge or the prevailing local charge for a service, whichever is lower. Payments, therefore, vary among localities.

Under the new plan, for each service, physicians would be paid either the actual charge or a specific pre-determined fee based on ''relative values '' whichever is lower. These values take into account the work involved, practice costs and malpractice insurance costs. Thus, a standard, nationwide payment policy would be developed.

''The variation in payment rates among urban and rural areas will be significantly reduced, with the only difference being a geographic adjustment for different practice costs,'' said Gail Wilensky, administrator of the Health Care Financing Administration. ''In general, this is expected to increase payments for many physicians in rural areas who had been paid less than urban physicians under the current system.''

She also said the new fee schedule will be more equitable for general practicioners and other primary care physicians, who might spend the same amount of time with a patient as a surgeon, but receive far less.

In the end, 7,000 procedures will be assigned values that will form the basis of a payment amount. The proposed model fee schedule includes preliminary values for 1,400 procedures.

In a letter to members of six congressional committees involved in the Medicare reform, Sullivan said the new payment plan, along with other reforms, ''will bring about standard nationwide physician payment policies

for the Medicare program, improve equity in Medicare payment among physician specialties and geographic areas, help assure that Medicare payments grow at a reasonable pace and better protect beneficiaries.''

#90243u1875 08/31/1990 ~United Press International

PARIS (AUG. 31) UPI - The OPEC cartel's decision to sharply raise its oil output has stabilized world oil supplies, making emergency measures by industrialized nations unnecessary, the International Energy Agency said Friday.

The agency's conclusion echoed one it had reached in an earlier Aug. 9 meeting held to review current world supplies in light of Iraq's Aug. 2 invasion of Kuwait and the subsequent U.N. embargo on Iraqi and Kuwaiti exports.

But IEA warned that the outlook for the coming months remains uncertain,

and it said future use of members' strategic reserves remained a possibility. The IEA is made up of the world's largest 21 industrialized oil-consuming nations.

The statement of the agency's governing board said the approaching winter in the Northern Hemisphere raised the specter of tighter markets as demand for heating oil increases and refineries reach operating capacity.

''The IEA welcomes the decision by OPEC and other producing countries to increase oil production,'' the statement said.

''This will do much to replace supplies removed from the market because of the embargo. Increased production at this time will also be particularly important for developing countries.''

More than 4 million barrels a day has been taken from world markets as a result of the U.N. embargo.

The 13-nation Organization of Petroleum Exporting Countries, which pumps more than a third of the world's crude, Wednesday formally approved promises made by Saudi Arabia, Venezuela and the United Arab Emirates to help offset the effects of the embargo by raising output more than 3 million barrels daily.

''We concluded that in the immediate term the situation is manageable,'' John Easton, Assistant U.S. Secretary of Energy and the American representative on the IEA governing board, told reporters after the session.

''The action of both producer countries to increase output as well as some of the demand restraint and fuel switching (by consuming nations) that has occurred makes the immediate term look manageable,'' he said.

The IEA Governing Board will meet again in September to decide whether any action is necessary to insure a fair distribution of available oil.

The agency's emergency oil sharing system may be put into effect if the oil supplies of one or more of its 21-member countries is reduced by 7 percent, with each country's quota determined according to its consumption level.

The IEA can also coordinate the use of strategic petroleum reserves held by its member governments. The largest is held by the United States, which has 590 million barrels stored in salt caverns in the nation's Southwest.

Saudi officials announced after the OPEC session they had already increased production to 7.5 million barrels a day from 5.4 million and said they would increase it further to more than eight million barrels a

day.

The IEA statement said that although oil from Kuwait and Iraq will be totally absent from the market from now on ''prospects are that the shortfall will be largely covered in September and in October as well.''

But the agency warned that conservation efforts must be maintained and that problems could arise in the longer term as the ability of oil companies to continue drawing significant amounts from commercial stocks diminishes.

IEA officials refused to speculate on the future trend in oil and gasoline prices or to say why they had risen significantly despite generally adequate supplies.

''Nobody is able to make a forecast,'' Dr. Ulrich Engelmann, chairman of the Governing Board, said at a press conference. ''If he were he would be a very rich man.''

Easton attributed the price rise to factors other than the laws of supply and demand.

''What's happening in the oil markets is the result of actions by jittery traders,'' he said, adding that the major oil companies had behaved responsibly by not building up current stocks during the crisis.

IEA Executive Director Helga Steeg estimated that the draw on commercial oil stocks averaged about 300,000 barrels a day during August and said it would be ''considerably higher'' in September, but she refused to give specific figures.

-30- 4435

#90243u1888 08/31/1990 ~United Press International

MOSCOW (AUG. 31) UPI - President Mikhail Gorbachev denied reports of a rift with Washington over the Persian Gulf crisis Friday, saying the Soviet Union and United States were working together to prevent a war.

Asked at a rare news conference about statements by two Soviet officials critical of the U.S. troop deployment in the Gulf, Gorbachev said the Soviet Union was on record as recognizing that the deployment was legitimate.

''We proceed on the assumption that in a given specific situation, and responding to a request from Saudi Arabia, the United States has taken this decision (to deploy troops),'' Gorbachev said. ''This meets with the norms of the U.N. charter.''

Gorbachev said the Soviet Union and the United States both realized that ''any escalation of a military conflict is fraught with negative consequences.''

''That is why we have to act responsibly, so as to prevent a large- scale conflict,'' he said. ''I believe this is our common goal, and we are promoting this idea.

''If you believe this is a difference in policies - on the contrary, I think that this indicates cooperation.''

Gorbachev repeated the Soviet Union's condemnation of the Iraqi invasion of Kuwait, and said he was confident that after a political solution was found the United States would remove its troops from the area and ''return the military situation to the original stage.''

An intense Soviet diplomatic effort to solve the crisis has stressed the need for a political solution to the crisis including Iraq's withdrawal from Kuwait, and Gorbachev repeated his call for Arab nations to find a solution to the crisis.

''We have to find a peaceful solution using the Arab factor,'' Gorbachev said. ''Intensive consultations are under way. I hope the consultations will be successful.''

Gorbachev's praise of Soviet-U.S. cooperation during the crisis came in response to questions about statements Thursday by a deputy foreign minister and the commander of Warsaw Pact forces criticizing the U.S. military buildup in Saudi Arabia.

Deputy Foreign Minister Alexander Belonogov said ''the buildup of American military might cannot make us happy'' because it makes the situation in the Gulf more explosive and because ''there is no guarantee that the United States will leave Saudi Arabia.''

And Gen. Vladimir Lobov, the Soviet chief of Warsaw Pact forces, said the presence of a large U.S. military contingent in Saudi Arabia ''drastically changes the strategic balance in the region'' and could affect arms talks in Vienna.

The Soviet Union has joined in the worldwide condemnation of Iraq for its invasion, cut off all military supplies to its one-time close ally and is observing U.N. economic sanctions, although it is not participating in a naval blockade of Iraq.

#90243u1915 08/31/1990 ~United Press International

CAPE CANAVERAL, Fla. (AUG. 31) UPI - Engineers will attempt electronic bypass surgery to fix a telescope aboard the grounded shuttle Columbia in a bid to ready the hard-luck ship for launch next Wednesday on a long-delayed astronomy flight, officials said Friday.

''We think the most likely solution will lead to a Wednesday morning launch, which would be a four-day delay,'' said William Lenoir, NASA's associate administrator for space flight.

Columbia's countdown was ticking smoothly toward blastoff at 1:17 a.m. EDT Saturday when data from one of the four telescopes making up the shuttle's $150 million payload suddenly stopped flowing to the ground late Wednesday.

NASA managers reluctantly stopped the countdown and delayed the 36th shuttle mission to give engineers time to track down the problem and make repairs.

With the flight on hold, engineers opened the ship's payload bay doors Friday to gain access to an electronic ''black box'' that is believed to have caused the communications glitch.

To fix the problem, engineers planned to rig a cable to bypass a faulty electrical component. If the plan works, Columbia's countdown will resume at 1 a.m. Sunday for a launch attempt at 1:20 a.m. Wednesday.

''Anytime we get close and don't go, like a kid going to the carnival, yeah, we're frustrated and we're anxious to get going,'' Lenoir said. ''But we're not going until we're ready.''

On another front, Lenoir said the hydrogen fuel leaks that grounded Columbia in May and the shuttle Atlantis in July appear to involve the same type seals, raising the possibility that both shuttles were sidelined by contamination.

But Lenoir said he does not believe the shuttle fleet is faced with a generic design problem and that he is confident Columbia, equipped with a new fuel line fitting to replace the one that leaked in May, will prove to be leak-free this time around.

''We think we have selected hardware that is from a different lot that behaved very well during acceptance tests, far better than the two that did leak,'' Lenoir said. ''We're confident we're not going to have any leaks.''

Columbia's crew - commander Vance Brand, co-pilot Guy Gardner, John ''Mike'' Lounge, Robert Parker, Jeffrey Hoffman and civilian astronomers Ronald Parise and Samuel Durrance - planned to remain at the Kennedy Space Center until engineers determine whether the bypass operation will work.

The goal of Columbia's mission is to study invisible X-rays and ultraviolet light from the most energetic objects in the universe to learn more about the forces that shape the structure and evolution of the cosmos.

During the countdown Wednesday night, data from the Broad Band X- ray Telescope suddenly stopped. Extensive testing indicates the communications glitch involves a fault in an electronic black box used to route data from the ''BBXRT'' through the shuttle and on to the ground.

The BBXRT cannot work unless it is chilled with supercold solidified argon and given the communications glitch, mission managers could not clear Columbia for launch because of an inability to monitor the temperature and pressure of the argon.

To fix the telemetry problem, engineers planned to rig a cable to bypass the faulty ''line driver'' circuit that is blocking the flow of telemetry.

#90243u1953 08/31/1990 ~United Press International

SAN FRANCISCO (AUG. 31) UPI - The videogame wars are heating up on a new front: the adult market.

Videogame rivals Nintendo of America Inc. and Sega of America Inc. said Friday they would launch major advertising campaigns next week that for the first time specifically target users over 18 years old.

Industry leader Nintendo of America Inc. plans to kick off a $15 million television campaign to support its hand-held Game Boy machine, which has proven particularly popular among business executives and other adults since it was introduced last year.

At the same time, Sega of America Inc. plans to launch a $10 million TV campaign aimed at cutting into Nintendo's estimated 80 percent hold on the $5.1 billion U.S. videogame market. Sega's campaign, which touts its technically superior Genesis system, uses the slogan ''Genesis does what Nintendon't.''

Both campaigns are aimed at all ages, but they include major components aimed at the parents and older siblings of the kids and teens they have cultivated for years.

The new focus is not suprising. Many analysts see the adult market as the next growth area for videogames. With Nintendo Entertainment Systems expected to be installed in 29 million U.S. homes by the end of the year, the youth market is nearing saturation.

''With the Game Boy, we found that 40 percent of our users were 18 or over '' said Donald Coyner, advertising manager for Nintendo of America, based in Redmond, Wash. ''It's a big opportunity.''

The Game Boy machine, which sells for about $80, has become a hit among frequent business travelers, who while away time on long flights by playing such games as Super Mario Brothers.

''Sometimes it's not seen as that cool for an executive to be sitting in front of a television playing videgames,'' said Jim Willcox, news editor of the consumer electronics magazine TWICE. ''The portables allow them to do that in relative privacy.''

Sega, of South San Francisco, Calif., which expects to have 1 million Genesis systems installed in the United States by the end of the year, is going after the adult market with a machine that incorporates 16-bit computer technology to offer better graphics, sound and action than Nintendo's 8-bit system.

''Our studies show that 60 percent of Genesis owners owned a Nintendo, and nearly half are over 16,'' said Michael Katz, president of Sega's consumer products division. ''We're opening up a market among adults who demand more sophisticated games formerly only playable on expensive personal computers.''

Both companies recognize, however, that kids and teens remain the bread and butter of the videogame industry. Along with a television commercial targeted at adults, Nintendo will launch two ads aimed at the kid and teen markets.

The teen ads, which are edited in a fast-paced MTV style, feature kids talking about the games in their own lingo. In one, teen boys refer to the games as ''slammin''' and ''giggin','' both apparently terms of endearment.

''They're almost unintelligible to adults but they're perfect for kids,'' said Tim Price, the project creative director behind the ads for Foote, Cone Belding/San Francisco, the same agency that developed the Levi's 501 Blues commercials.

Sega's ads tout its extensive list of celebrity endorsers, including pop star Michael Jackson, football great Joe Montana and heavyweight champion James ''Buster'' Douglas.

AMMAN, Jordan (AUG. 31) UPI - Demonstrators burned American, British and Israeli as about 50,000 people gathered in a stadium Friday for the largest outpouring of pro-Iraqi sentiment in Jordan since U.S.-dominated military forces were deployed in the Persian Gulf.

Protesters shouted anti-American slogans and carried banners denouncing Washington and Israel during the massive rally at Al Mahatta Stadium. The rally was organized by the Moslem Brotherhood.

''No to the U.S. presence in the land of prophesy,'' ''We shall knock on the doors of paradise with the skulls of Americans and Israelis,'' and ''Wanted: grave diggers to bury the American invaders,'' read some of the banners.

Several members of Parliament from the opposition Islamic Bloc, of which the Moslem Brotherhood is the main component, spoke to the crowd of about 50,000 people, labeling the U.S.-led military intervention as a ''crusade'' against the Arabs and Moslems.

They criticized those Arab leaders who have supported and provided troops for the multinational military contingent in the Gulf.

''(Egyptian President) Hosni Mubarak does not allow ships carrying food and medicine for Iraqi children, but yet opens his Suez Canal for the enemy to bring in their lethal weapons to kill our very own children,'' said Sheikh Abdul Mun'em Abu Zant, the most popular Islamic deputy in Parliament.

Organizers of the rally wore military outfits and green headbands and a university choir sang militant songs as youths with black masks marched through the crowd and veiled women yoddled and cried.

''I have four sons that I will give away to fight the Jihad (holy war) against the Americans if they attack any Arab nation,'' Zeina Oweini, one of thousands of women attending the demonstration, declared with tears in her eyes.

Support for Iraqi President Saddam Hussein in his confrontation with the West blossomed in Jordan when the American-led multi-national troops began deploying in Saudi Arabia and the waters of the Gulf.

Many Jordanians were outraged by the foreign presence in Saudi Arabia because it is the site of Islam's holiest shrines and reportedly some 80,000 have signed up to fight for Iraq if the United States launches an attack.

They also regard as hypocritical the swift implementation of U.N. resolutions against Iraq, while those concerning the Israeli occupation of the West Bank and Gaza Strip have not been put into effect.

Jordan's King Hussein has also condemned the foreign military intervention thereby placing government foreign policy on a par with popular sentiments, raising his popularity to an unprecedented level.

Numerous anti-American, pro-Iraqi demonstrations have been held in Jordan since the Gulf crisis erupted on Aug. 2 with the Iraqi invasion of Kuwait, but Friday's gathering was easily the largest.

#90243u2115 08/31/1990 ~United Press International

WASHINGTON (AUG. 31) UPI - Lower hog and corn prices contributed to a 1.3 percent drop in the farm price index for August, despite record-high market prices milk and cattle, the federal government said Friday.

The farm price index is the government's measurement of prices farmers receive for their crops and livestock. The August reading of 150 marked the third time this year the index has fallen.

''Lower prices for hogs, grapefruit and corn were partially offset by higher prices for cattle, eggs and milk,'' the Agriculture Department said. ''The beef cattle price, at $75.40 (per 100 pounds), was a record high. The milk price was a record for August.''

The all-milk price was listed as $14.40 per 100 pounds, up 30 cents from July and $1.20 higher than August 1989.

Beef cattle prices were $1.80 per 100 pounds higher than July and far above the $69.70 average of August 1989.

By contrast, hog prices averaged $56 per 100 pounds, down $4.80 from July.

Corn sold for an average of $2.46 per bushel, down 16 cents from July. Wheat was $2.59 a bushel, down 20 cents from July and $1.15 a bushel lower than the preceding August when farmers were harvesting a much smaller crop.

In addition, sorghum fell 29 cents to $4.15 per 100 pounds. Barley and oat were down 6 cents a bushel each with barley averaging $2.10 and oats $1.09.

Egg prices averaged 65.6 cents a dozen for August, up 10 cents from July.

At $5.57 a box, grapefruit prices were less than half of their July average of $12.32. The government said the all fruit index was down 11 percent from July. Apple, peach and strawberry prices were up but prices declined for lemons and oranges.

In June, the index stood at 151. It advanced to 152 in July. The August mark of 150 was 5 points or 3.4 percent higher than August 1989.

#90243u2119 08/31/1990 ~United Press International

WASHINGTON (AUG. 31) UPI - The Office of Thrift Supervision placed Ensign Bank of New York in receivership Friday and chartered a new institution, Ensign Federal Savings Bank, to assume certain assets and liabilities.

The new thrift will operate under the management of the Resolution Trust Corp., the government agency overseeing the bailout of the nation's troubled savings and loan industry.

The OTS said it ''initiated the action because Ensign was operating in an unsafe and unsound condition in that it had insufficient capital, with no prospect of replenishment without federal assistance.''

''Ensign's condition is due primarily to a high level of non- performing assets caused by poor underwriting, inadequate appraisal policies and, to a lesser degree, the softening New York-area real estate market,'' the OTS said.

The institution operates 19 branches in New York, New Jersey and Florida, and will remain open for business as usual. Deposits remain insured to the $100,000 legal limit.

WASHINGTON (AUG. 31) UPI - Fear, humor and exasperation were all apparent in the voices of women held as hostages in Iraq and Kuwait Friday as they waited to see if Iraqi President Saddam Hussein would follow through with promises to allow foreign women and children to leave the crisis region.

''I've got all kinds of emotion,'' one woman told Cable Network News in an interview apparently conducted Baghdad's Melia Mansour Hotelt. ''Every moment we're here is frightening.''

The most plaintive plea for freedom seemed to come from a British woman, who told CNN of an immediate need to free children from the crisis zone.

''We want a plane for children. That's all we're asking. One plane. One plane,'' she said in a choked voice. She and other said some of the children had dysentery and they were unable eat.

But other women sounded upbeat as they spoke with reporters and said they have been well treated in captivity, even though it has been wearying.

''(I was) treated very well by the Iraqis. The ones we've come into contact with they've been very nice, very obliging ... The only thing they couldn't give us was freedom, and that's the only thing we wanted,'' said a Scottish woman.

Iraqi officials said late Friday they were eager to release 237 foreign women but were waiting on foreign governments to complete their end of

preparations.

The official Iraqi news agency quoted an Iraqi Information Ministry spokesman Friday afternoon as saying Iraqi planes will be ready within hours to tranfer Britons and French home. British Ambassador to Iraq Harold Walker and other diplomats were quoted by BBC television as saying the first women and children were to leave Baghdad Saturday.

The Iraqi news report said the 237 women and children to be released include 132 Britons, 19 French, 14 Americans, two Australians, 66 Japanese and four other foreigners. Iraq said 28 women had decided to stay in the region with their families.

Jordan radio quoted Italian officials as saying 19 Italian women and children crossed Friday from Jordan from Iraq.

There was no word on the fate of thousands of other foreign women and children trapped in the region.

U.S. officials estimated there are about 250 American women and children in Iraq and 900 in Kuwait. This is out of a total estimated 3,500 Americans being held in the two countries.

Of an estimated 4,000 Britons being held, 137 women and children had received exit visas, the British Foreign Office said.

Confusion about when the foreigners would be allowed to leave was apparent in comments from some of the women waiting to leave.

''Nobody will tell us when we're going home,'' one woman said. ''Why can't anybody tell us.''

Another woman seated at a table with children said in an angry tone, ''They're breaking their hearts by taking away their fathers. ... And now we sit here again. We feel like idiots.''

But a British woman held since Iraq's Aug. 2 invasion of Kuwait said, ''We're going home. It's been implied very soon - today or tomorrow.''

The toll of being moved from one place to another and of being held in hotel rooms has been frustrating and frightening for some of the hostages.

''I really do feel like I'm a shield against bombing. I think that's a fear of everybody here.'' an American woman taken from her apartment Tuesday told CNN.

''We've been traveling ... eight moves now,'' another woman told BBC television. ''Different locations, hotels, military....'' The report was

cut at that point by Iraqi military censors.

CLEVELAND (AUG. 31) UPI - A grand jury Friday indicted Shearson Lehman Brothers Inc. and two former employees on securities fraud violations stemming from millions of dollars in customer losses in the stock market crash of 1987.

In addition to the corporation, the 126-count indictment handed up by a Cuyahoga County grand jury named Sheldon Strauss, a former account executive at Shearson's Cleveland office, and Stephen Weinberg, the former office manager.

Strauss allegedly lost millions of dollars of his clients' money by illegal trades, which authorities said were known by Weinberg.

Each was charged with 21 counts each of fraudulent securities trading and 21 counts each of making false representations regarding securities transactions.

A spokesman for Shearson Lehman in New York said the company would not

comment until officials saw a copy of the indictment. Strauss and Weinberg could not be reached for comment.

Ohio Securities Commissioner Mark Holderman, whose agency investigated the case, said Shearson Lehman has already settled more than $4.9 million worth of claims from Strauss's former clients, many of whom suffered extensive losses on ''Black Monday,'' Oct. 19, 1987, when the Dow Jones industrial average dropped more than 500 points.

He said state agents began investigating the brokerage shortly after the crash, when authorities began receiving complaints.

''He (Strauss) would place his investors in highly speculative stocks, some not even recommended by Shearson Lehman Hutton,'' Holderman said. ''Sometimes, he put them into margin accounts, so they would be highly leveraged.''

Buying on margin entails putting down only a small percentage of the stock's price for a particular day, with the understanding the balance would be paid weeks or months later - based on the stock's price at the time the margin was put down.

If the stock price goes up in that period, the investor makes a tidy profit. If it goes down, the investor is forced to buy the stock at a price considerably higher than the price it is trading that particular day.

''When we had the market crash, people found they not only lost their investment, a lot found their (purchases) were in margin accounts and that they owed money. This was a suprise to many people.

''Whenever you are leveraged like that and the market goes down, you lose your equity and you lose money you, in a sense, borrowed. People thought they were investing, say, $30,000. All of a sudden they are losing that $30,000 and considerably more.''

Strauss was buying and selling stocks without authorization and buying on margin without knowledge of his customers, Holderman said.

''Speculating with other people's money was a serious problem with Mr. Strauss,'' he said.

#90243u2203 08/31/1990 ~United Press International

MOSCOW (AUG. 31) UPI - President Mikhail Gorbachev said Friday urgent measures to stabilize the economy will be imposed during the next several months as debate continues on a draft plan to ''move resolutely'' to a market economy.

Gorbachev did not give specifics but said the stabilization program would entail a series of ''centralized methods'' designed to ''tie up hot money and block the channel for the growth of quick money and incomes.''

The Soviet president, speaking at a news conference after a two-day meeting of leaders from the central government and the 15 republics, said

a draft plan on the overall move to a market economy will be ready in a week.

''We are living through serious tests. We are running out of time,'' Gorbachev said.

''This meeting was one of the major events of perestroika, since it was dedicated to the question of further reforms, new changes in the economic life of the union,'' he said.

''Through joint effort, we have to do this, because the situation in the country is very serious,'' Gorbachev said.

The Soviet president said work was continuing to combine the ideas proposed by a joint commission he set up with his main critic, Boris Yeltsin, and a separate government panel set up by Premier Nikolai Ryzhkov.

Gorbachev said a single plan would be ready in a week to present to the parliaments of each republic and the national Supreme Soviet, but he added that compromises still need to be worked out on the key areas of prices, stabilizing measures, taxation, budgets and hard currency.

''The comparison of the two drafts will enable us to find an optimal solution,'' Gorbachev said. ''There are still two or three elements that differ. ...All these questions will be analyzed further.''

Gorbachev said any move to a market system would be hampered unless the economy is stabilized first by dealing with the so-called ''ruble-overhang'' and controlling incomes to avoid high inflation.

''It has been decided advisable at this stage of the stabilization of the economy ... to use administrative measures, that is centralized methods,'' he said. ''You should not be surprised by this. If you analyze similar situations that happen in the history of differnent states in a similar situation, they were also used.

''I believe we cannot just leap into a market without solving the task of stabilization. This does not imply that through stabilization measures we will be able to resolve the economic and social problems. It signifies we will prepare our economy better to move more resolutely to the market.

Gorbachev said the stabilization measures would be implemented ''in the last three months of this year and the first three months of next year.''

''We shall act in a manner that will enable us to introduce market elements and create market infrastructures,'' he said.

The meeting Thursday and Friday involved leaders of the central government

the Presidential Council of Gorbachev advisers, the Federation Council that groups the leaders of the 15 Soviet republics and leaders of the so-called autonomous regions within the republics. There were more than 50 speakers.

''I am satisfied with the outcome, though sometimes it was quite dramatic '' he said.

Nearly all the Soviet republics have declared their independence or sovereignty since the beginning of the year, leading to clashes with Moscow.Two of Gorbachev's biggest headaches in this regard are the Baltic republic's push for a total separation and the huge Russian republic's efforts to control valuable gold, oil and other resources on its territory.

#90243u2208 08/31/1990 ~United Press International

NEW YORK (AUG. 31) UPI - The dollar traded mostly higher Friday in thin, pre-holiday New York dealings, easing against the Japanese yen but gaining heavily on the British pound as players took protective weekend positions.

The firming of the dollar was in part a continuation of its recovery from the extremely low levels set the previous week on intense Persian Gulf war fears, but also came as a result of a rise in the key Japanese interest rate.

Currency players moved out of various European units into the yen on the Bank of Japan discount rate hike, which also helped the dollar.

Foreign exchange market participants also bought dollars on the chance that a bad turn in the Gulf situation might suddenly boost their value.

''I think your bottom line is no one will go home short dollars for the weekend,'' said Earl Johnson, a vice president and currency analyst with Harris Trust & Savings Bank in Chicago.

Late in the New York trading session, the dollar was quoted at 1.5764 German marks, up nearly a pfennig from 1.5665 marks Thursday, and at 143.80 Japanese yen, off from 144.25 yen the previous day.

Corporate trader Mark Morris of National Westminster Bank in New York said he though the dollar has hit ''a kind of plateau'' after a long decline.

But Harris's Johnson said the dollar's rally was technical. Any more progress would depend on ''whether we have a diplomatic solution or we're back to conflict'' in the Gulf crisis.

Increased tensions will bolster the dollar, he said, while lessened war

fears will focus attention on U.S. economic woes, weakening it.

Other New York dollar rates: 1.3080 Swiss francs, up from 1.2960; 5.2870 French francs, ahead from 5.2510; and 1,165 Italian lire, up from 1,161.50.

The British pound plunged to $1.8890 from $1.9170.

In Europe, the dollar closed mixed against the key currencies, but the British pound sterling took center stage as it tumbled.

Various factors combined to push sterling down 2.8 cents against the dollar to close at $1.8930 compared with $1.9210 Thursday.

Some dealers suggested the pound's surprising turnaround followed an enormous selling order from a Far East central bank.

Sterling also was pressured by a drop in oil prices, uncertainty over when it would enter the European Exchange Rate Mechanism, and speculation the Deutsche Bundesbank would shortly raise its key interest rate.

In Frankfurt, the dollar ended higher at 1.5750 marks against 1.5650. It was also up in Zurich at 1.3080 Swiss francs from 1.2969.

The dollar fell in Paris, Brussels and Milan, to 5.2425 French francs vs. 5.2615, 32.20 Belgian francs vs. 32.22 and at 1,159.20 lire vs. 1,163.30.

In Tokyo, the dollar drifted higher against the yen as market players bought the U.S. currency ahead of the long Labor Day weekend. The dollar closed at 144.50 yen, up 0.40 yen from 144.10 yen Thursday.

Gold closed lower in Zurich at $384.50 against $389.50. It also came off in London, to $385.25 compared with $389 the previous day.

Republic National Bank in New York closed cash gold at $382.75 an ounce, off from $387 Thursday. The New York Commodity Exchange settled contract gold at $382.30 an ounce, down from $386.70.

Silver closed lower in Zurich at $4.80 an ounce vs. $4.85. It fell in London to $4.81 an ounce from $4.85.

Republic closed cash silver at $4.79 an ounce, off from $4.834. Comex silver finished at $4.759 an ounce, down from $4.807.

(AUG. 31) UPI - Dozens of Westerners in Iraq were receiving passports to freedom today. 19 Italians arrived in Jordan and a number of other

foreigners received exit visas. It was the first sign that Iraqi President Saddam Hussein was keeping his pledge to release all foreign women and children trapped in Iraq and occupied Kuwait. Iraq is also reportedly set to fly 237 of the foreigners to London and Paris.

A San Marcos, California, businessman says ''it was a privilege'' to uncover an Iraqi scheme to obtain triggers for nuclear weapons. The U-S Customs Service today awarded Jerold Kowalsky its highest honor for blowing the whistle on the operation. Kowalsky warned the Iraqis would eventually get their hands on the technology for nuclear weapons, but said he was glad he could help slow them down.

South Africa's ruling National Party is on its way toward having a truly open membership for the first time since its creation in 1914. President Frederik de Klerk announced the move to admit members of all races today, saying the party was searching for new political allies in advance of negotiations with black leaders. The change was immediately endorsed by the first of four annual provincial party congresses that must approve the measure.

Saying the Soviet Union was running out of time, President Gorbachev announced today he'll impose urgent measures to stabilize the economy. Gorbachev says the stabilization program will be put in place during the next several months. He did NOT give specifics. The announcement coincided with continued debate on a draft plan to change to a market economy.

(AUG. 31) UPI - A county sheriff in Florida says investigators searching for a serial killer have a ''sincere interest'' in a University of Florida student they've questioned. But police woN'T say the man is among a ''pool of suspects'' in five slayings in Gainesville. The sheriff says the 18-year-old man was arrested yesterday for beating his grandmother and is being held on one-Million dollars bond.

NASA says it will try re-wiring a component on the shuttle Columbia to get it back on track for blastoff. The shuttle's countdown was halted Wednesday when data stopped coming in from a telescope in the ship's cargo bay. Engineers believe they will know by tomorrow whether their fix-it job

is on the right track. If so, launch will be rescheduled for Wednesday. The Columbia mission is already three months behind because of a fuel leak.

A proposal sent to Congress would mean rural physicians could see fatter checks from Medicare. Country doctors generally receive smaller Medicare payments than their big-city counterparts for the same service... because the payment is based on prevailing local charges. Health Secretary Louis Sullivan today sent Congress a proposed model fee schedule meant to make Medicare payments more uniform.

A scientist says she has found NO persuasive evidence of higher cancer rates caused by the Three Mile Island nuclear reactor accident 11 years ago. The conclusions were based on records of hospitals within 10 miles of the reactor near Harrisburg, Pennsylvania. But citizens groups say the study was too small and did NOT ask residents what they experienced.

WASHINGTON (AUG. 31) UPI - Victims of this week's devasting tornado in northeastern Illinois may be eligible for emergency food stamp benefits, the government said Friday.

The Food and Nutrition Service said it began distribution of the emergency benefits on Thursday. The aid was requested by state officials.

Victims residing in the tornado disaster area can apply through Sept. 7 for emergency food stamps if they are experiencing loss or inaccessibility of income or if they face additional disaster-related expenses.

Applicants determined to be eligible for aid will be given emergency authorizations that can be redeemed for food stamps at currency exchanges in Plainfield and Crest Hill, Ill., the government said.

ALBANY, N.Y. (AUG. 31) UPI - Timing chemotherapy treatment to the body's own biological rhythms may offer hope to some people with advanced kidney disease previously considered fatal, researchers reported Friday.

Kidney or renal cell cancer affects some 12,000 Americans each year and 10,000 die. In its late stages, when the cancer has spread beyond the kidneys, it is virtually always fatal.

The expected survival rate for advanced kidney cancer has been three months to six months. However, researchers found about 10 percent of 68 patients undergoing the new treatment timed to body rhythms had a total disappearance of the cancer.

''Chemotherapy had been thought to be totally useless, and our study shows it actually gives some hope,'' said Dr. William Hrushesky of the Albany Department of Veterans Affairs Medical Center, who directed the study published in the September issue of Journal of Clinical Oncology.

By administering chemotherapy on the basis of the body's circadian rhythms Hrushesky said it appears tumors were more efficiently attacked and there was a greater likelihood the drug would be present during a sensitive phase of the tumor cells' metabolic activity.

Circadian rhythms are cyclical changes in bodily functions, such as temperature, blood pressure and urine volume that vary on a daily, 24-hour schedule.

The decision to time chemotherapy to such rhythms was based on animal research that found chemotherapy was most effective if administered during evening hours.

In the new ouients had a small computerized infusion pump filled with floxuridine, or FUDR, implanted in their body. The pump was programmed to deliver most of each day's dose in the evening hours, when the drug was thought to have a less toxic effect. Patients did not have to be

hospitalized, and their pumps were refilled every two to four weeks on an outpatient basis.

All 68 patients chosen for the study had late-stage kidney cancer that had spread from their kidneys into other areas of the body.

''We took on all comers, and all had an advanced form of the disease,'' Hrushesky said. ''We didn't exclude anyone for any reason. We didn't select them according to any criteria that would skew the results in our favor.''

The study found one in four patients treated with circadian infusions of achieved at least a 50 percent shrinkage or total disappearance of the cancer. Long-term control of the previously progressive disease, or more than 25 percent tumor shrinkage, was achieved in another 50 percent of patients.

The median rate of survival for all patients was 15 months.

However, patients who responded to the treatment survived an average of 33 months. If just a partial response was achieved, patients survived slightly more than two years.

Formerly, the prognosis for advanced kidney cancer patients had been dismal because the disease had been unresponsive to all previously tested chemotherapy treatments, researchers said.

The only other possibly effective treatment is immunotherapy, using natural tumor-fighting cells and interleukin-2, a substance that amplifies the body's immune response. But it is highly toxic and must be administered in the hospital.

''Ours is outpatient and the results are comparable, if not better,'' Hrushesky said.

The kidney cancer study is not the first time Hrushesky has attempted to incorporate knowledge of the body's natural rhythms with the treatment of cancer.

The Albany researcher recently found the survival rate of breast cancer patients undergoing mastectomies appears to be better if performed during the middle of a woman's menstrual cycle than at other times during the cycle.

#90243u2297 08/31/1990 ~United Press International
WASHINGTON (AUG. 31) UPI - Lower hog and corn prices contributed to a 1.3 percent drop in the farm price index for August, despite record-high market prices milk and cattle, the federal government said Friday.

The farm price index is the government's measurement of prices farmers receive for their crops and livestock. The August reading of 150 marked the third time this year the index has fallen.

''Lower prices for hogs, grapefruit and corn were partially offset by higher prices for cattle, eggs and milk,'' the Agriculture Department said. ''The beef cattle price, at $75.40 (per 100 pounds), was a record high. The milk price was a record for August.''

The all-milk price was listed as $14.40 per 100 pounds, up 30 cents from July and $1.20 higher than August 1989.

Beef cattle prices were $1.80 per 100 pounds higher than July and far above the $69.70 average of August 1989.

By contrast, hog prices averaged $56 per 100 pounds, down $4.80 from July.

Corn sold for an average of $2.46 per bushel, down 16 cents from July. Wheat was $2.59 a bushel, down 20 cents from July and $1.15 a bushel lower than the preceding August when farmers were harvesting a much smaller crop.

In addition, sorghum fell 29 cents to $4.15 per 100 pounds. Barley and oat were down 6 cents a bushel each with barley averaging $2.10 and oats $1.09.

Egg prices averaged 65.6 cents a dozen for August, up 10 cents from July.

At $5.57 a box, grapefruit prices were less than half of their July average of $12.32. The government said the all fruit index was down 11 percent from July. Apple, peach and strawberry prices were up but prices declined for lemons and oranges.

In June, the index stood at 151. It advanced to 152 in July. The August mark of 150 was 5 points or 3.4 percent higher than August 1989.

#90243u2320 08/31/1990 ~United Press International

FORT BRAGG, N.C. (AUG. 31) UPI - A military jury Friday acquitted a Fort Bragg soldier of murder charges for shooting a Panamanian man in a firefight at an Army checkpoint during the U.S. invasion of Panama last December.

The eight-member court-martial panel deliberated two hours before dismissing all charges against Master Sgt. Roberto Enrique Bryan, 43.

The federal government accused Bryan, a native Panamanian, of unpremeditated murder in the shooting of the Panamanian man following a firefight that left 10 U.S. soldiers wounded.

The shooting occurred when U.S. troops ordered five Panamanian Defense Forces members out of their car at a checkpoint near Madden Dam in Panama. Following a disagreement, a grenade exploded, injuring 10 American soldiers.

In an ensuing firefight, four Panamanians were killed. Bryan shot the surviving man several minutes later.

Bryan, a decorated 19-year soldier and member of the 82nd Airborne, contended he shot the man - who was never identified by the military - in self-defense. Several other soldiers testified they felt threatened by the man.

The star prosecution witness, Lt. Brandon Thomas, told the eight- member panel that he saw Bryan fire on the wounded Panamanian five times.

But the defense argued that a personal dispute between Bryan and Thomas influenced the lieutenant's testimony. Thomas also was investigated for shooting a Panamanian soldier during Operation Just Cause, the U.S. military action to oust Panamanian strongman Manuel Noriega last December.

Other witnesses, including those for the prosecution, testified that

relations were poor between Bryan and Thomas and that the Panamanian was moving when Bryan shot him.

Pvt. Robert Valley testified if the Panamanian moved his hand further toward his pocket, he would have shot him.

''I thought he was a threat,'' Valley said. ''If he moved his hands into his pockets, I was going to shoot him in the head myself.''

Dorita Vasquez Gonzales, 30, said she saw the wounded Panamanian try to raise his hand up, ''and I thought he was going to throw another grenade.'' Vasquez lived about 30 yards from the scene of the firefight.

''I was frightened and I was going to scream,'' Vasquez said though an interpreter. ''Sgt. Bryan fired quickly.''

The United States invaded Panama Dec. 20, 1989, in a bid to oust Noriega and install an elected civilian government. Noriega is now held in the United States awaiting trial on drug charges in Miami.

(AUG. 31) UPI - Talks are scheduled to continue tomorrow between U-N Secretary- General Javier Perez de Cuellar and Iraqi Foreign Minister Tariq Aziz. The pair met for five hours today in Amman, Jordan. De Cuellar maintained his low-key stance regarding the meeting... telling reporters after the session ended NOT to expect dramatic breakthroughs to come from several hours of discussions.

.

The leader of the U-S forces in Saudi Arabia offered a blunt warning today for Iraqi leader Saddam Hussein. In the words of General Norman Schwarzkopf- ''If the Iraqis are dumb enough to attack, they are going to pay a terrible price.'' Schwarzkopf denies reports that the American contingent is geared for an offensive strike.

A military jury at Fort Bragg, North Carolina, today dismissed all charges against a soldier charged with murder for shooting a Panamanian man in a firefight during the U-S invasion of Panama last December. The eight-member court-martial panel acquitted Master Sergeant Roberto Bryan after witnesses testified they thought the Panamanian was making a threatening motion.

Funeral services were held today for the first of the 26 people killed in a vicious tornado near Joliet, Illinois. Survivors continue to pick up the remnants of the one-thousand homes severely damaged by Tuesday's twister.

The Salvation Army has asked people to stop donating clothing... but food and money are still being sought. One Chicago radio station collected three-and-a-half tons of clothing, toys and games.

NEW YORK (AUG. 31) UPI - Police arrested a 21-year-old reputed drug dealer Friday in the drive-by slaying of a Bronx assistant district attorney, apparently the innocent victim of a vendetta between two dealers.

Police Commissioner Lee Brown Lee identified the suspect as Jose Diaz of the Bronx at a news conference at the 48th precinct headquarters.

''We are talking to one other person and there may be two or three other persons,'' Brown said, indicating the possibility of other arrests later.

He described the Thursday shooting of Sean Healy, a 30-year-old former Navy attorney who joined the district attorney's staff in January, as a ''curb battle'' over drugs.

He said the Diaz was really out to kill another dealer identified only as Tony when he killed Healy by chance.

Brown said Diaz went looking for Tony in his father's car and shot at the grocery store where Healy was buying coffee, then drove away and found his adversary a few blocks away, where he shot and wounded him.

Healy was shot once in the back Thursday morning by one of three Hispanic men who fired seven or eight bullets from a moving brown Toyota into a grocery store. Healy was declared dead on arrival at Lincoln Medical Center a half hour after he was shot.

Deputy Police Inspector Thomas Mullen said the gunmen apparently were shooting at a man standing in front of the store in what may have been a drug dispute. He said the man, who was not identified, later turned up at Lincoln Medical Center for treatment of a wound.

Among those questioned at the 44th Precinct was a man who accompanied by his attorney turned himself in to police Thursday, according to another police spokesman, Officer Mark Warren, who reported ''numerous persons'' were being quesitoned.

''Healy certainly was not a target. He happened to be at the wrong place at the wrong time,'' said detective Michael Philbin, chief of Bronx detectives.

(AUG. 31) UPI - Investigators say inmates at an overcrowded Mexican jail near the Texas border may be armed with guns today after a jail riot. Last night's riot started when Mexico's equivalent to F-B-I agents tried to take a prisoner from the Matamoros city jail. Federal agents and prisoners exchanged gunfire... prompting the use of tear gas. Authorities say prisoners burned five offices and took at least 37 guns from one office.

Federal health officials are issuing some advice to high school and collegiate football players as they prepare for their playing seasons. The U-S Centers for Disease Control is reminding players of the dangers of using their helmets when blocking or tackling an opponent. Officials say that method increases the risk of permanent spinal injury.

Authorities say they'll ask an accused child molester arrested yesterday in Salem, Oregon, to submit to an AIDS test. The F-B-I tracked down Norman Powers after he wrote a letter to social services officials in Vermont, claiming he had AIDS and that children were at risk. Prosecutors say if Powers refuses to take the test voluntarily, they will seek a court order forcing him to do so.

Fans and family of Stevie Ray Vaughan withstood sweltering heat today to pay tribute to the blues guitarist at a memorial service in Dallas. Singing stars Jackson Browne, Bonnie Raitt and Stevie Wonder led the crowd

in an emotional rendition of ''Amazing Grace.'' A recording of Vaughan's ''Tick Tock'' drew heavy applause and cheers from the respectful crowd. Vaughan was killed in the prime of his career Monday in a helicopter crash in Wisconsin.

AMMAN, Jordan (AUG. 31) UPI - U.N. Secretary General Javier Perez de Cuellar and Iraqi Foreign Minister Tariq Aziz agreed after more than five hours of discussions Friday to extend into a second day their search for a negotiated settlement to the Persian Gulf crisis.

Emerging in the evening from the second of two rounds of talks at the palace of King Hussein, the U.N. chief and the Iraqi envoy gave no hint as to specific progress they and their delegations might have made, and Perez de Cuellar sought again to downplay expectations of a dramatic breakthrough.

''Every effort has to be done to find a solution, but obviously a solution to such a delicate situaton cannot be found in four, five six hours of discussions,'' Perez de Cuellar said.

The U.N. chief executive denied reports that he planned to travel on to Baghdad at this stage of his initiative, which he had described on his arrival in Amman on Thursday as ''an exchange of views'' and not negotiations.

He said that he and Aziz, who worked closely together during U.N. efforts to end the Iraq-Iran war, would resume their discussions on Saturday morning.

Aziz refused to comment when asked whether the talks had produced a change in the status of Kuwait, which Iraq invaded on Aug. 2, prompting the deployment of a U.S.-dominated multi-national military force in Saudi Arabia and the Gulf.

The pair met at noon for a two-hour first round and then adjourned until 6

p.m., with Perez de Cullear saying that ''we have had a very useful discussion together. We have discussed all aspects of the situation.

''We are convinced that these meetings have been necessary and important.''

Aziz called Perez de Cuellar his ''dear and old friend'' and said they had ''a relationship of confidence and trust.

On his arrival in the morning at a heavily guarded suburban airport, Aziz gave no indication that Iraq was prepared to agree to U.N. Security Council resolutions demanding it withdraw from Kuwait, which it invaded in a dispute over oil production and territory.

''The Arab nation will achieve all of its aims despite the international conspiracies and challenges we face. Our battle is an historic one and we must fight it with honor and victory will be on our side,'' he said.

Aziz said he had come to Amman to listen to Perez de Cuellar and that the talks were being held in Amman because ''I cannot go to New York or Geneva.''

In addition to demanding an Iraqi withdrawal from Kuwait, the U.N. Security Council has approved resolutions imposing economic sanctions on Iraq, authorizing the use of military force to enforce the measures and calling for the release of foreigners held hostage by President Saddam Hussein.

Iraq has responded with conflicting signals, declaring its annexation of Kuwait was irreversible, but also endorsing Arab proposals for a withdrawal of the massive U.S.-led multinational military force deployed in the Gulf and a pullout from Kuwait linked with an end to the Israeli occupation of the West Bank, Gaza Strip and Golan Heights.

Perez de Cuellar sought on arrival in Amman on Thursday to dampen expectations of a breakthrough, saying he was not in a position to negotiate with Aziz as he was bound by the U.N. resolutions.

''I cannot make concessions on what doesn't belong to me,'' he said.

Western officials also expressed little optimism that Perez de Cuellar and Aziz would produce a resolution to the Gulf crisis, which has pushed the Middle East to the brink of war.

A Western diplomat in Amman said he doubted that De Cuellar could ''pull a rabbit out of a hat'' and President Bush, at a White House news conference on Thursday, expressed little hope there would be movement.

#90243u2455 08/31/1990 ~United Press International

NEW YORK (AUG. 31) UPI - The Iraqi conflict is costing the United States its second largest trade partner in the Middle East, with bilateral trade between the two countries soaring 44 percent to $2.53 billion in the first half of 1990, the authoritative MidEast Report said Friday.

''Ironically, Iraq, the country which initially drew 30,000 U.S. troops to the Saudi border, was this country's second largest Arab Middle Eastern trade partner in the first six months of this year,'' the MidEast Report said in its Sept. 1 issue.

Bilateral trade between the United States and Iraq amounted to $2.53 billion from January through June this year, ''a 44 percent increase in the volume of trade between Baghdad and Washington,'' compared to the year-ago period, the newsletter said.

Saudi Arabia remains by far the largest U.S. trade partner in the Middle East, with $5.26 billion worth of bilateral exchanges in the first half of 1990.

''Washington's sanctions against the regime of Iraqi President Saddam Hussein will mean the United States will lose access to a market which accomodated $692.9 million in U.S. exports in the first half of 1990,'' the newsletter said.

The United states mostly exported farm products to Iraq while U.S. imports from Iraq were mainly oil products, valued at $1.84 billion for the first six months of 1990.

The MidEast Report warned that the U.S. deficit, which declined by 14.1 percent in July, could go up again as a result of the embargo and because of higher oil prices, expected to prop the U.S. inflation rate above the 6 percent level.

''Since the United States restored diplomatic relations with Iraq in November 1984, Iraq's trade with the United States had increased dramatically over the past six years,'' said editor David Mizrahi. ''The conflict brought an abrupt end to the trend.''

The United States is also losing Kuwait as a Middle East market, although U.S. exports to the small emirate had been decreasing before the conflict to $353.1 million in the first six months of 1990.

The economic consequences of the conflict, however, are expected to be far more serious for Iraq than for the United States, the newsletter said.

Iraq's external debt was estimated at between $70 billion and $80 billion,

and the oil producer was expected to disburse up to $30 billion this year in repayments and debt servicing - a burden which Iraqi officials said the country was unable to bear with oil revenues amounting to only $15 billion in 1989.

According to estimates, Iraq has stored about three months worth of basic food supplies for its population of 17 million people.

But the Arab country will be unable to import the 2 million tons of wheat, 500,000 tons of rice, 600,000 tons of sugar and 280,000 tons of palm oil it bought from the United States, Japan and Australia last year.

Another economic casualty of the Gulf conflict is Egypt, already behind payments on its $50 billion foreign debt, the MidEast Report said.

''Egypt will need all the help it can get after the loss in remittances from workers in Iraq and Kuwait,'' the newsletter said. ''Egyptian President Hosni Mubarak estimates that the Gulf crisis would cost Egypt $2 billion a year. This figure is particularly alarming given the fact that there are about 6 million Egyptians who depend on funds sent home by family members who were working in Iraq or Kuwait.''

#90243u2471 08/31/1990 ~United Press International

MYSTIC, Conn. (AUG. 31) UPI - Whales and dolphins have followed schooling fish into Long Island Sound, prompting worried officials to issue a plea Friday for Labor Day weekend boaters to stay clear of the creatures.

''We ask boaters to observe from a distance,'' said Bernadette Bode, a spokeswoman for Mystic Marinelife Aquarium. ''Enjoy it and leave them alone. Please don't chase them.''

Migrating fish have led to an unusually large number of whales and dolphins in congested Long Island Sound and off the coast of Rhode Island in the past week as the mammals follow their food supply.

Mystic Marinelife Aquarium, which handles strandings in the area, has received a flurry of calls from residents who mistakenly believe the animals may be in trouble, Bode said.

Sightings have included a dolphin near the mouth of the Connecticut River in Old Saybrook and whales off the Great Gull Islands, in The Race at the mouth of the Sound off the Atlantic Ocean, and in Narragansett Bay in Rhode Island.

''There are an unusually large number of whales and dolphins in our area '' Bode said. ''It depends on where the fish go, year to year. This year

is very heavy.''

With the Labor Day weekend one of the busiest of the year for boat traffic Bode and other officials were worried the animals would be harmed in collisions or pursued by curious sailors.

''With so many boats in the water and the weather supposed to be good (over the holiday weekend), it could pose a threat,'' Bode said. ''We are asking boaters to be extra careful. Please leave them alone.''

Bode said it was a violation of federal law to harm, harass or impede the progress of whales and dolphins.

WASHINGTON (AUG. 31) UPI - Del Monte Foods has recalled more than 20,000 cans of green beans because some of the beans were not cooked and could pose a health hazard, the Food and Drug Administration said Friday.

FDA spokeswomawn Faye Peterson said Del Monte of San Francisco is voluntarily recalling 843 cases, each containing 24, 16-ounce cans of French-style green beans, because about 50 cases of the beans were not cooked.

No reports of death or illness have been reported to the FDA, but the uncooked beans should not be eaten because they could harbor microbes that could cause food poisoning, Peterson said.

The cans were packed and shipped in July to 140 Pathmark stores in Pennsylvania, Connecticut, Delaware, New Jersey and the New York City area. The cans bear a one-line code, 0201J6F82, printed on the bottom end of the can, Peterson said.

Pathmark has removed all the suspect cans from store shelves, but it is feared some may still be in consumer hands, Peterson said. Anyone with cans bearing the code should return them to the store.

#90243u2591 08/31/1990 ~United Press International

NEW YORK (AUG. 31) UPI - The stock market broke a six-week losing streak this week, with the gains fueled by a plunge in oil prices as tensions in the Mideast seemed to ease and OPEC agreed to boost output during the crisis.

The Dow Jones industrial average rose 21.04 Friday to end the week at 2614.36. It gained 81.44 for the week, or 3.2 percent.

Among broader market indexes, Standard & Poor's 500-stock index jumped 11.05 to end the week at 322.56 and the New York Stock Exchange composite index rose 5.92 to close the week at 176.93.

Advances led declines 1,433-507 among the 2,154 NYSE issues traded this week. Weekly Big Board volume totaled 639,340,540 shares, compared with 949,523,020 a week earlier and 757,529,410 shares a year ago.

Prior to this week, the last weekly gain in the Dow industrials came the week ended July 13, when the blue chip indicator gained 75.25 points as it was in the process of hitting its mid-July record highs.

Stocks began the week with their best day of 1990 and their biggest gain in almost a year. Monday's rally was fueled by fading fears of war in the Mideast and a resulting tumble in oil prices. Reports of progress among OPEC members towards an agreement to boost production sent oil plunging $4 a barrel.

The Dow soared 78.71, the biggest gain of the year and the best since a surge of 88.12 posted last Oct. 16, when the market bounced back from the 190-point ''mini-crash'' the previous trading day.

Analysts called the sharp gain a ''reflex action'' after the market's plunge since Iraq invaded Kuwait Aug. 2. The Dow industrials had lost more than 415 points - about 14 percent of their value - since the invasion, before rallying Friday and Monday.

Even with the rally, August was a dismal month for the market. The Dow sank 290.84 from its July 31 close of 2905.20.

After Monday's surge, trading lightened considerably for the rest of the week as investors began to look towards the holiday weekend. Oil prices lost another $1.96 a barrel Wednesday, sending the Dow up 17 points, but some late program selling Thursday wiped out that gain and then some, taking the key index down almost 40 points but on very light volume.

Analysts generally agreed last week that with its plunge, the market had discounted a Mideast war. Fears of war faded this week as the U.N. Secretary General held talks with Iraq's foreign minister, but observers were careful to point out that the situation there would continue to affect the market.

''One of the pinches on any upside move will be the impact of energy prices on corporate profits and long-term interest rates,'' said Alan Ackerman, senior vice president at Gruntal & Co. ''The market is tied to oil prices as well as inflation and recession fears and we're going to be hampered by these complex crosscurrents until there's more clarity about the events in the Mideast.''

Ackerman said that with oil prices still above $25 a barrel and concerns that interest rates might not come down as quickly as necessary to forestall a recession, stocks could fall further.

Ronald Schroeder, chief investment officer at J & W Seligman and Co., agreed that the Federal Reserve could find itself between a rock and a hard place when it comes to an interest rate cut, fearing a revival of inflation if it cuts rates but risking a recession if it doesn't use a rate cut to try to pump up a faltering economy.

''This is a nervous period for the market, we could just back and fill (trade in a range) for a while,'' he said.

But Schroeder said he felt the market's plunge was overdone and that the rebound this week represented investors' attempts to ''separate value from the fear that was driving stocks down.''

He was a bit more upbeat about the prospects for the Mideast crisis. ''I think Saddam Hussein has already accomplished what he wanted to - to raise the price of oil and eliminate or neutralize an extreme overproducer, Kuwait.

''That should keep the price of oil at a higher level, but if the crisis is resolved diplomatically or militarily in the short run, the imbalance of oil in the world indicates oil prices would soften,'' he said.

And if the crisis is not resolved soon? ''We could be stuck in a $25 range for oil and would have to add to (projections for) inflation.

''But I don't see a long protracted crisis. Never before have we seen such unanimous worldwide support to eliminate a threat. And the free world has seen its equity drop 10 to 20 percent since the crisis began. It's in no one's best interest for this to go on for a long time,'' Schroeder said.

On the trading floor this week, Philip Morris was the most active issue, up 1 7/8 to 45 1/8.

Wal-Mart followed, up 1 5/8 to 28 1/2. Texas Utilities was third, off 7/8 to 33 3/4.

Among the other blue chips, AT&T rose 1/2 to 32 3/8, IBM gained 1 1/2 to 101 7/8, Boeing jumped 2 3/8 to 48 1/4, General Motors added 2 3/8 to 39 3/4 and Exxon gained 1 1/8 to 50, even as oil prices fell sharply this week.

On the American Stock Exchange, the Amex Market Value index added 7.10 to close Friday at 323.39. Advances led ddc'ines 568-273 among the 996 issues traded.

Amex volume totaled 58,692,010 shares, compared with 93,796,575 traded a week earlier and 69,118,290 traded in the same week a year ago.

PaineWebber's call warrants on the Tokyo market's Nikkei index led the Amex actives, off 3/4 to 7 1/8.

The National Association of Securities Dealers composite index jumped 13.88 to end the week at 381.21.

WASHINGTON (AUG. 31) UPI - In the first visible but still cautious dissent from President Bush's Persian Gulf policy, two top church leaders said Friday the United States should not block food and medical supplies from going to Iraq.

In a letter to Bush, the presidents of the United Church of Christ and the Christian Church Disciples of Christ - both mainline Protestant bodies - said they were concerned at "the growing possibility for open military

conflict."

"At this critical time, we believe that restraint by the United States and other nations, in responding to the Iraqi aggression is essential," said the Rev. John Humbert, general minister and president of the 1.1 million-member Disciples, and the Rev. Paul Sherry, president of the 1.7 million-member UCC.

During the monthlong crisis that has followed Iraq's Aug. 2 invasion of neighboring Kuwait and the American commitment of combat forces to Saudi Arabia, most religious groups - while condemning the Iraqi invasion - have maintained a wait-and-see attitude toward U.S. policy in the area.

On Thursday, Archbishop Daniel Pilarczyk of Cincinnati, president of the National Conference of Catholic Bishops, issued a second call for a peaceful resolution of the conflict and urged prayer for the hostages in Iraq and Kuwait.

For the most part, church leaders have asked Bush to continue to work with the United Nations and other international organizations in forging a response to the crisis. The National Council of Churches, for example, labeled the Iraqi invasion an "unjustifiable act of aggression" but urged the president to place more emphasis on Arab League efforts to end the conflict.

Sherry and Humbert, too, called on Bush and other Western nations to "look increasingly to the United Nations for an appropriate response," saying they were concerned the "already massive military presence in the Middle East will hamper these efforts and exacerbate tensions." "Finally, we urge that food and medical supplies not be withheld from Iraq's civilian population," they said.

At the same time, two church-related relief organizations - Church World Service and Catholic Relief Service - announced plans to aid refugees fleeing Iraq and Kuwait.

The Catholic agency said it will donate $15,000 to provide food for what it said were the thousands of Egyptian refugees arriving in the port of Nuweba, Egypt. Egyptian president Hosni Mubarak has estimated 200,000 workers arrived in the month of August alone. Relief agency officials said they are monitoring the situation in Jordan as well.

Church World Service, the relief arm of the National Council of Churches, said it had issued a special appeal for $75,000 to aid refugees unsettled by the Iraqi invasion.

HARTFORD, Conn. (AUG. 31) UPI - The state's banking commissioner said Friday he will ask prosecutors to pursue criminal charges over an unfounded rumor from a Massachusetts political campaign concerning the Bank of New England.

Banking Commissioner Howard B. Brown said he will ask the chief state's attorney's office to pursue prosecution under a law concer7/8;wntnmade about banks doing business in Connecticut.

The law makes it illegal to ''wilfully and maliciously'' circulate any false statement derogatory to the financial condition of a bank or which affects the solvency or financial standing of a bank doing business in the state.

Bank of New England stock fell to an all-time low of $1 per share after the unfounded rumor that federal regulators planned to close the bank over the Labor Day weekend.

The rumor drew attention when a Massachusetts congressional campaign issued a press release Thursday saying the Federal Deposit Insurance Corp. ''has recommended the liquidation of the Bank of New England.''

The campaign of Democratic candidate Ted Dimauro later issued another statement saying the information about the bank should have been identified as ''speculation.''

Dimauro said his campaign manager released the first statement before reading it to him. He said he asked for and received the resignation of the campaign manager.

In asking for a criminal investigation in Connecticut, Brown did not indicate who he believed should be charged. The law concerning false statements about banks carries maximum penalties of one year in prison and a $1,000 fine.

''False statements such as this can be devastating to a depository institution,'' Brown said. ''To employ such tactics in a political campaign to win votes is just flat out unscrupulous and totally irresponsible.''

Bank of New England is a subsidiary of the Bank of New England Corp., which is also parent company of Connecticut Bank and Trust Co.

Dimauro, a former mayor of Springfield, is challenging Rep. Richard Neal in a primary for the Democratic nomination in the 2nd Congressional District in Massachusetts.

(AUG. 31) UPI - A pair of protestant leaders today offered cautious dissent to the American troop deployment to the Middle East. In a letter to President Bush, the Reverends John Humbert and Paul Sherry called for restraint on Washington's part in dealing with Iraq. The two mainline protestant leaders warned the- quote- ''already massive military presence in the Middle East will hamper these efforts and exacerbate tensions.''

.

Anti-American chants were heard and U-S flags were torched as some 50-thousand Arabs filled a stadium in the Jordanian capital today. The protest... which was orchestrated by a Moslem group... also leveled criticism at Britain and Israel. Among the banners in the crowd was- quote- ''We shall knock on the doors of paradise with the skulls of Americans and Israelis.''

Police in Florida confirm they have a man in custody who is one of several suspects in the slayings of five college students in Gainesville. Authorities say 18-year-old Edward Humphrey was charged yesterday with aggravated battery for beating his grandmother. The county sheriff in Gainesville says Humphrey has shown ''psychotic behavior'' in jail.

Black college students are beginning to arrive in the resort town of Virginia Beach, Virginia... where rioting last year disrupted the annual Labor Day weekend festival. Some African-American groups have called for an economic boycott of the town, and less than 40 percent of the area's hotel and motel rooms have been booked. Officials have implemented restrictions that many students say smack of racism.

(AUG. 31) UPI - El Salvador says it has asked the U-N peace-keeping force for Central America to help stop an arms flow from Nicaragua to Salvadoran rebels. The Salvadoran government tells U-P-I it made the request yesterday to the U-N group set up to monitor Central American peace accords. The Salvadoran military says rebel arms shipments have been found recently from the Sandinista-controlled Nicaraguan army.

U-S and Vietnamese officials met today at the United Nations to search for ways to settle Cambodia's 11-year civil war. Khmer Rouge guerrillas fighting in the war warned today that they would continue the war unless rebels are given a strong position in a U- N-proposed peace plan. The U-N plan would turn over most of the functions of Cambodia's government to the United Nations until elections are held.

Marine officials are worried boaters may cause trouble this weekend for whales and dolphins in Long Island Sound. The Marinelife Aquarium in Mystic, Connecticut, asked boaters to enjoy the spouting mammals from a distance. An UNusually large number of whales and dolphins have followed migrating fish into the congested waterway. Experts say the animals are fine as long as they're left alone.

BAALBECK, Lebanon (AUG. 31) UPI - Fighting between rival Shiite forces in the ancient city of Baalbeck escalated Friday, killing 15 people and wounding more than 25 others, police said.

They said gunmen of the Syrain backed Amal movement and the pro- Iranian Hezbollah or Party of God traded machingun fire and rocket propelled grenades in Baalbeck, 52 miles east of Beirut, and in surrounding villages.

At least 15 people were killed and more that 25 others wounded in the fighting that erupted late Thursday and resumed Friday after a short morning lull, police said. Among the dead was a prominent official of the pro-Iranian Hezbollah extremist organization, Sheikh Abbas Al Hindi.

Security sources said Syrian forces that police eastern Lebanon have failed until now to halt the fighting.

Police said the clashes broke out after Amal militiamen ambushed Al Hindi's car late Thursday at the entrance to Baalbeck. They said the militiamen showered the car with automatic machinegun fire, instantly killing Abbas and three bodyguards.

But a statement by Hezbollah Friday said Amal militiamen kidnapped and murdered seven Hezbollah members late Thursday, including Abbas and another official, Sheikh Hassan Sakr.

Sources said Amal militiamen stormed houses and arrested a number of Hezbollah members.

Amal and Hezbollah have been engaged in fierce fighting for the control of the strategic district of Iqlim Al Toffah, east of the port city of Sidon, 24 miles south of Beirut, since last December.

More than 1,000 people have been killed since rival groups started fighting three years ago for the control of Lebanon's estimated 1.5 million Shiites.

#90244d0050 09/01/1990 ~French/German News Agency
Tripoli (SEPT. 1) - Libyan leader Moamer Gaddafi called Saturday for Iraqi troops to be replaced in Kuwait by United Nations forces, and for U.S troops in Saudi Arabia to be replaced by Arab and Islamic forces.

The calls came in a speech to an extraordinary session of Libya's General People's Congress, broadcast live by Libyan television.

Gaddafi outlined a plan which ''advocates the replacement of Iraqi troops in kuwait by U.N. forces, because Kuwait cannot be certain that once the Iraqi troops leave nothing will change. The Iraqi troops could return there at any time''.

He also said the departure of Iraqi troops from Kuwait ''could be exploited and U.S. and Nato (North Atlantic Treaty Organisation) troops could take their place instead''.

He said: ''Saudi Arabia and the Gulf emirates and others will not feel reassured if there is a vacuum in Kuwait, and we refuse (to accept) Iraqi troops being replaced by U.S. and Nato troops.''

Elsewhere in his speech, Gaddafi said Iraq should be given the island of Bubyan at the head of the Gulf '' so as to have a coast line on the Gulf'' and be given back the al-Rumaylah oil field.

''Kuwait's internal political system should be left to the Kuwaiti people '' Gaddafi said. ''It is not up to us to talk about who should rule Kuwait and whether the al-Sabah family should return or not. The Kuwaiti people should be respected and should be allowed to decide their own system.''

Gaddafi also spoke of the ''need for a unified Arab oil policy which should not be violated by anyone''. He added: ''If you do not want to adhere amicably then you must be stopped by force. Only then will the use of force be permitted to stop oil production in Kuwait, Abu Dhabi or Saudi Arabia.''

ABIDJAN (SEPT. 1) - Peacekeeping troops sent in to war-torn Liberia last weekend by the Economic Community of West African States (ECOWAS) called on rebels Friday to "abandon intransigence and cooperate," the Ghana News Agency (GNA) reported Saturday.

In a dispatch received here, a GNA correspondent in Monrovia quoted the peacekeeping force commander, Lieutenant-General Arnold Quainoo, as saying his men were not interested in killing rebel leader Charles Taylor and his National Patriotic Front of Liberia (NPFL) troops.

Gen. Quainoo, a Ghanaian, also called on Mr. Taylor's forces to stop "shooting indiscriminately" and allow ECOWAS engineers, doctors and nurses and Liberians to move about Monrovia freely.

He announced that engineers had restored electricity which was cut off in June to most of Bushrod Island north of the Monrovia city center, and that work was continuing to restore water and other essential services.

"Our concern is the ordinary masses and the re-establishment of Liberian sovereignty and we hope that the leaders of the warring factions will suppress personal ambitions for national unity and interest," Gen. Quainoo said.

In a press release, the general said the 2,500 troops dispatched by ECOWAS to Liberia, from Ghana, Sierra Leone, Guinea, the Gambia and Nigeria, will remain neutral in the crisis. The troops are known as the ECOMOG force.

On Friday, the GNA correspondent quoted witnesses as saying that NPFL rebels had killed about 200 West African nationals living in Liberia,

apparently in response to the arrival of ECOMOG.

The peacekeeping troops Friday captured Monrovia's Spriggs Payne Airport, four kilometers (2.5 miles) from where embattled President Samuel K. Doe remains holed up in his executive mansion surrounded by about 500 loyal troops.

#90244d0330 09/01/1990 ~French/German News Agency

WASHINGTON (SEPT. 1) - President George Bush is considering forgiveness of Egypt's 6.7-billion-dollar military debt to the United States, national security adviser Brent Scowcroft said Saturday.

Wiping out Egypt's debt for U.S. arms would reward Cairo for supporting the U.N. embargo against Iraq and sending troops to join the U.S. and other Arab and multinational forces defending Saudi Arabia.

Egypt owes the United States 4.5 billion dollars in principal with the remainder interest, amassed from 1979 to 1985. In recent years, the United States has also given Cairo annual grants of about 1.3 billion dollars for military purposes and one billion dollars in economic assistance.

The Washington Post, citing government sources, reported Saturday that Mr. Bush had decided on forgiving the debt, but Mr. Scowcroft said it was simply one of the options being reviewed by the administration.

Speaking at a press briefing Saturday in Kennebunkport, Maine, where the president is vacationing, Mr. Scowcroft said the administration has been "worried about Egypt's debt."

"They are bearing a very significant burden" in their role in the Gulf crisis, he added.

Since Iraq's invasion of Kuwait August 2, Egypt has extended to the United States overflight rights, staging and transit rights from Egyptian air basees and facilitated passage of dozens of U.S. warships through the Suez Canal.

#90244d0770 09/01/1990 ~French/German News Agency

LAGOS (SEPT. 1) - The government has asked oil firms operating in Nigeria to take steps to be ready to increase output, the official news agency NAN said on Saturday, quoting Oil Minister Jibril Aminu.

It said the move was being made in the light of the decision on Wednesday by the Organization of Petroleum Exporting Countries (OPEC) to raise

production to offset the effect of the international embargo on Iraqi and Kuwaiti oil.

NAN quoted Mr. Aminu as having said that the meeting of the OPEC price monitoring committee in Vienna had been held to "salvage" the organization and disprove rumors that it was about to break up.

During the meeting, the minister said that Nigeria, which has an OPEC production quota of 1.611 million barrels a day, could provide a further 250,000 barrels.

He insisted on the need for a "formal meeting" of OPEC and the International Energy Agency to strengthen stabiity of the world oil market. He criticized the IEA's "divisive" policy of consulting OPEC members separately, rather than dealing with them as a group, NAN said.

#90244d0870 09/01/1990 ~French/German News Agency

CAPE CANAVERAL, Florida (SEPT. 1) - National Aeronautics and Space Administration (NASA) officials Saturday delayed the Columbia shuttle launch until late next week to fix electronic controls for a telescope mounted on the orbiter.

The launch of Columbia with its seven astronauts and the 150-million-dollar Astro observatory had been scheduled for Saturday but was scrapped late Thursday after the space agency discovered a fault in an electronic box that routes electrical power and telemetry between the shuttle and an X-ray telescope mounted in its cargo bay.

Workers entered the cargo bay Friday to examine the box. Engineers later concluded that a quick repair would not be sufficient, saying an electronic part or the entire box will have to be replaced.

Engineers were to attempt replacing a component Saturday to see if they could restore communications. The X-ray telescope is to be managed by ground controllers during the 10-day mission.

The launch had also been threatened by a problem with an instrument that measures acceleration and vibration on the shuttle itself. The instrument was replaced Saturday.

Four of the Columbia astronauts are astronomers who will operate Astro's three ultraviolet telescopes, probing some of the hottest objects in the universe.

The shuttle crew planned to stay at the Kennedy Space Center here into the weekend.

NASA officials, who had hoped to be able to launch Columbia on Wednesday, did not set a liftoff date Saturday but a decision was expected this weekend.

The crew, led by commander Vance Brand, age 58, consists of co-pilot Guy Gardner, 42; mission specialists Mike Lounge, 53, Robert Parker, 53, and Jeffrey Hoffman, 45; and astronomers Ronald Parise, 38, and Samuel Durrance, 46.

Columbia's first launch attempt on May 30 was scrubbed because of leaking hydrogen fuel. The shuttle has until September 14 to lift off, otherwise it will be forced to wait until after the launch of the shuttle Discovery, which is to place the European space probe Ulysses in orbit around the sun.

To give Ulysses a gravity boost for its long journey to the sun, Discovery is to sling the probe around the planet Jupiter, a task that must be accomplished between October 5 and October 23 when Earth and Jupiter will be in the necessary alignment.

#90244d1020 09/01/1990 ~French/German News Agency

PRAGUE (SEPT. 1) - The Soviet Union and Czechoslovakia signed a trade agreement Saturday laying down guidelines for bilateral trade next year, official sources said.

The accord, signed at Zbraslav Castle in central Bohemia, particularly concerns payments in convertible currencies and partial decentralization of two-way trade.

It was signed by Czechoslovak Deputy Premier Vaclav Vales and Soviet Foreign Trade Minister Konstantin Katushev.

Mr. Katushev said the agreement is the first of its type between the Soviet Union and a member of the basically East European economic grouping Comecon, and he stressed its importance in helping both countries move toward a "real market economy."

The new agreement calls for all bilateral trade to give rise to invoicing in convertible currencies at usual international prices, starting next January 1. However, about half of the trade will be carried out on the basis of lists of goods, including particularly machines, equipment and consumer goods from Czechoslovakia in exchange for Soviet raw materials.

The latter include oil, constituting about 40 per cent of Czechoslovak imports from the Soviet Union.

Observers here noted that the new accord is the first one providing for partial decentralization of Soviet foreign trade, opening up the possibility of direct trade relationships between Czechoslovakia and Soviet republics and regions.

New negotiations will be held in September and October concerning volumes and exact prices of future deliveries. Prague and Moscow wiil also continue their discussion of the factor to be used to convert the Czechoslovak surplus, now estimated at around 2.5 billion rubles, into dollars, expert sources say.

-30- 1896

#90244d1030 09/01/1990 ~French/German News Agency

MOSCOW (SEPT. 1) - Boris Yeltsin, president of the Russian Federation, resumed his offensive against Soviet President Mikhail Gorbachev Saturday by demanding the resignation of the Soviet government.

Mr. Yeltsin announced at a press conference Saturday that he had made the challenge during a joint meeting on Friday of the Presidential Council and the Council of the Federation on economic reform.

He said the Russian Federation would go its own way on economic reform if the government of Prime Minister Nikolai Ryzhkov did not resign.

The challenge came just two days after Mr. Gorbachev stated at another press conference that the Soviet Union "could not afford the luxury" of launching into a leadership reshuffle.

This followed a five-hour meeting between the two leaders after which they declared, in what was considered a truce, that they were in broad agreement on economic reform. But this truce has now been broken.

Mr. Yeltsin said at Saturday's press conference: "I consider the resignation of the government (of Prime Minister Nikolai Ryzhkov) as a condition for the successful application of economic reform."

He added: "This demand was supported by other representatives of the republics, as well as representatives of trade unions and workers."

Mr. Yeltsin also rejected President Mikhail Gorbachev's proposal to fuse the government's economic reform plan with the programme drawn up by a commission which Mr. Gorbachev chairs jointly with Mr. Yeltsin.

The two programmes were completely incompatible, he said. Earlier, Mr. Yeltsin threatened to implement his own "500-day" reform programme even if the plan were rejected by the Soviet government.

#90244d1250 09/01/1990 ~French/German News Agency
KABUL (SEPT. 1) - Afghan President Najibullah ordered a mass release Saturday of prisoners from a dreaded prison here as a goodwill gesture, state television announced.

A total of 130 prisoners were set free unconditionally from the notorious Pule-e-Charkhi prison, one day after Mr. Najibullah returned from a three-day state visit to India, the television said.

He ordered the surprise release by invoking a presidential decree that provides freedom to those imprisoned for offenses other than acts of terrorism.

The state-run television said those released from the maximum security Pule-e-Charki prison were physically or mentally ill, but gave no details.

"It is possible that several of the released detainees are political prisoners," a government spokesman said later.

"They had been arrested in some case or the other," the official said.

Although the government vehemently denies it, sources here say the prisoners suffer from acute mental shock caused by alleged torture during internment.

The sources say that thousands have been executed in the prison since the 1979 Soviet invasion of Afghanistan prompted widespread armed resistance against the Moscow-installed regime.

Mr. Najibullah's order precedes his preparations for a high profile visit to France to attend a United Nations conference on least developed countries.

His French tour would be the third abroad in two months. The former Afghan secret police chief made a long visit to the Soviet Union last month.

-30- 1701
#90244d1320 09/01/1990 ~French/German News Agency
WASHINGTON (SEPT. 1) - The rebel National Patriotic Front of Liberia (NPFL) Saturday denied a report that its forces massacred some 200 West Africans living in the war-torn country.

Randolph Cooper, who identified himself as the U.S. spokesman for the rebels, said in a telephone call to Agence France-Presse that the report by the Ghanaian state news agency was "completely false."

In its dispatch, the Ghana News Agency quoted witnesses in Monrovia saying that the rebels led by Charles Taylor had killed about 200 nationals from countries participating in a five-nation military intervention force trying to halt the fighting between rebels and the government of President Samuel Doe.

Mr. Taylor has refused to recognize the intervention force, which he accuses of siding with Mr. Doe.

The force deployed by the Economic Community of West African States (ECOWAS) includes troops from Ghana, Gambia, Guinea, Nigeria and Sierra Leone.

Mr. Cooper accused Ghana of fabricating the massacre story. "It's propaganda by the Ghana Government to justify sending more troops to Liberia," he said.

He asserted that Ghana was also seeking to legitimize an interim government-in-exile formed this week in Gambia, which the rebels have also refused to recognize.

Mr. Cooper said he called NPFL headquarters in Buchanan, Liberia, following the Ghana News Agency report, which was carried by international news agencies, and was assured that no massacre had occurred.

He acknowledged that some foreigners had been rounded up by rebel troops, but said "the foreign nationals are being kept in a safe area as much as possible."

He accused the ECOWAS force of "indiscriminate shelling" of civilian areas around Monrovia, including Fantytown and Gardnersville, and said there had been "significant civilian casualties" as a result of the bombardments.

He estimated the casualties at 500 killed and wounded.

New York (SEPT. 1) - West Germany'se Steffi Graf beat South African Elna Reinach 6-4, 3-6, 6-1 on Saturday to advance to the last 16 of the U.S. Open tennis tournament.

The World Number One ran into some unexpected resistance from the 123-ranked Reinach in the second set but recovered her composure in the final set to clinch the third-round match.

Graf's opponent in the next round is American teenager Jennifer Capriati,

who breezed to a 6-1, 6-4 victory over unseeded Maria Strandlund of Sweden.

In other women's play Arantxa Sanchez of Spain beat Patty Fendick of the U.S. 6-2, 6-1, Argentina's Gabriela Sabatini defeated Belgian Sabine Appelmans 6-2, 6-4 and Katerina Maleeva of Bulgaria eliminated Raffaella Reggi of Italy 6-4, 6-0.

In men's third round play, Andre Agassi of the U.S. beat Argentina's Franco Davin 7-5, 6-4, 6-0 to earn a berth in the fourth round.

DAR ES SALAAM (SEPT. 1) - Pope John Paul II arrived here Saturday at the start of his seventh tour of Africa, after appealing to Iraq during an in-flight news conference to "cooperate" in the search for peace in the Gulf.

Everything possible must be done to avoid a military solution to the crisis sparked by Iraq's invasion of Kuwait on August 2, the pope said on the plane before landing in Tanzania.

Iraq should be "reasonable" and cooperate in international efforts to forge a peaceful settlement, he said.

It was the first time the pope had spoken out so clearly on the crisis. He earlier expressed concern twice over the "danger of a war".

The pope arrived here to a 21-gun salute. It will be the first time he has visited Tanzania.

President Ali Hassan Mwinyi and Tanzanian church leaders greeted the pontiff, who kissed the soil before inspecting a guard of honour. Tanzanian traditional dancers and musicians then gave him an African welcome.

The Pope, in a speech at the airport, urged industrialised countries not to neglect their moral duty to help Africa, the world's poorest continent.

He urged developed nations to cut arms spending and use the funds to help the needy peoples of the Third World.

Thousands of Tanzanians lined the streets from the airport to the city centre, cheering and waving as the Pope's motorcade drove to St. Joseph's Cathedral where he led prayers.

The Pope was later to meet Tanzanian leaders and former President Julius Nyerere at Mr. Mwinyi's official residence.

Vatican officials said the Pope would appeal for international solidarity to help Africa check the AIDS epidemic and solve its refugee crisis.

On his way to Dar Es Salaam, the Pope stopped over for one hour in Malta.

At Valletta airport, the Pope met for 20 minutes with Maltese President Censu Tabone, Prime Minister Eddy Fenech Adami, Foreign Minister Guido de Marco, Archbishop Joseph Mercieca and Papal Nuncio Pierluigi Celata.

The Pope waved from the plane to a crowd of 200 gathered at the Valletta airport to welcome him.

From Tanzania, the pontiff is to go on to Burundi, Rwanda and the Ivory Coast. He returns to Rome on September 10.

#90244d1560 09/01/1990 ~French/German News Agency

AMMAN (SEPT. 1) - Iraqi Foreign Minister Tareq Aziz described as "useful" his third round of talks with U.N. Secretary-General Javier Perez de Cuellar on the Gulf crisis here Saturday, but called afresh for an Arab settlement.

"We had very useful discussions", Mr. Aziz said, reading a prepared statement after the 75-minute meeting on the crisis sparked by Iraq's August 2 invasion of Kuwait.

Mr. de Cuellar and Mr. Aziz refused to answer reporters' questions after the meeting. Mr. Aziz was to leave the Jordanian capital immediately after he read the statement to reporters, his advisers said.

But the U.N. chief was to give a news conference before leaving Jordan, according to his spokeswoman Nadia Younes.

Mr. Aziz said in his statement: "We exchanged views of the current situation. The common goal is peace, stability and justice in the region".

He said Iraq believed the situation was "an Arab problem" and "must be resolved by Arab means ... There is no other solution."

The statement added: "This does not mean that the U.N. Secretary-General has no role. He has the mission of peacemaker". Mr. Aziz had told the U.N. chief he would be available for future contacts.

He also criticised "a number of governments who have seats in the (U.N.) Security Council, saying they were "not neutral" and acted "out of selfish policies".

The latest meeting took place at an administrative building in the grounds of the Jordanian royal palace. In two previous sessions there Friday the two men held almost five hours of talks.

In Washington, White House National Security Adviser Brent Scowcroft earlier said the discussions were not going well.

ABU DHABI (SEPT. 1) - British Foreign Secretary Douglas Hurd raised the possibility of imposing an air embargo on Iraq here Saturday, but said the United Nations Security Council would have to agree first.

The Security Council has already imposed a trade embargo on Iraq and given states the go-ahead to use force to back it up, in retaliation for the Iraqi invasion of Kuwait August 2.

Speaking on local television after arriving here from Qatar on the second leg of a Gulf tour, Mr. Hurd stressed the international community's determination to confront "Iraqi aggression" against Kuwait.

He echoed a U.S. appeal to several countries, including the United Arab Emirates, to share the cost of deploying the multi-national force in the Gulf region.

In remarks carried by the official news agency WAM, he stressed that U.N. resolutions could not be negotiated.

Talks in Amman between U.N. Secretary-General Perez de Cuellar and Iraqi Foreign Minister Tareq Aziz that wound up earlier were aimed at seeing if Iraq would conform to international resolutions, Mr. Hurd commented.

Earlier in Doha, he said Britain would transfer some of its squadron of 12 Jaguar warplanes from Oman to Qatar.

Mr. Hurd, quoted by the Qatar News Agency, did not specify how many aircraft would be transferred.

Qatar announced August 27 that it would supply military facilities to friendly countries. Three days later the United States said it would send F-16 planes there from a base in Spain.

RIO DE JANEIRO (SEPT. 1) - Brazil's oil workers are threatening to strike from Tuesday if the state oil company does not increase a salary offer, an

oil official said Saturday.

Sixteen of 19 oil workers' unions which met Friday across the country rejected a Petrobras state oil company offer to increase salaries by more than 98 percent, said Francisco Ramalho, a Petrobras official.

Oil workers said they would begin striking Tuesday indefinitely if they did not get a better offer, said Mr. Ramalho.

"Negotiations have ended," he said. "Either the oil workers accept the 98.3 per cent or we will go to the Supreme Court of Labor, where they will not get more than the 83 percent they were offered before."

The negotiations between the 120,000 state oil workers and oil officials have reached an impasse, said Mr. Ramalho. He blamed oil workers for the deadlock, citing their demand for a 279 percent wage increase.

Three unions - Paulinia and Campinas, Sao Paulo and Recife -- accepted the Petrobras offer Friday.

BAGHDAD (SEPT. 1) - An Iraqi Airways Boeing 747 with some 330 foreigners on board, mostly British women and children, left the Iraqi capital for Paris overnight Saturday, officials at the airport said.

The plane took off at 0.20 a.m. local time (2020 GMT Saturday), they said.

Around 200 British nationals were on the plane as well as some 30 elderly and sick Americans from Kuwait, whose release was secured by the U.S. black civil rights activist Reverend Jesse Jackson.

The plane, with the Rev. Jackson also on board, was expected to travel on from Paris to London and Washington.

SINGAPORE (SEPT. 1) - The Shell petroleum company has raised its pump price of premium petrol in Singapore by 20 Singapore cents (11.4 U.S. cents) per litre effective Saturday, its second increase in two weeks.

The latest price rise represents an increase of 28 percent or 31.1 Singapore cents (17.7 U.S. cents) per litre since Iraq's August 2 invasion of Kuwait, the Straits Times reported.

Before the Gulf crisis, premium petrol was selling at 1.12 Singapore

dollars (64 U.S. cents) per litre and diesel for 43.7 Singapore cents (24.7 U.S. cents).

Shell denied it was profiteering, saying that the increase reflected higher postings of these products and that it comprised 10 cents for product cost and another 10 cents for government tax, which currently accounts for 50 per cent of the retail price of petrol.

It was reported that the other oil companies were expected to follow suit either Saturday or Sunday. Esso and Caltex could not be reached for comment.

#90244d8030 09/01/1990 ~French/German News Agency

BEIJING, Sept 1 (AFP) - China will register a drop in foreign investment this year due to sanctions imposed by industrialised nations after the crushing of the pro-democracy movement last year, the China Daily said Saturday.

Quoting Vice-minister of Foreign Economic Relations and Trade, Shen Jueren, the newspaper said foreign investment for the first six months of this year stood at 2.35 billion dollars, down 22.3 percent on the same period last year.

Mr. Shen said he expected overseas investment committments for 1990 to be some 3.3 billion dollars, the same as last year, but forsaw a drop in new foreign capital from last year's 5.6 billion dollars.

However foreign investment should pick up next year thanks to investment from other Asian countries, especially Japan, Mr. Shen said.

Indonesia was also expected to increase investments following the resumption of diplomatic relations between Jakarta and Beijing in July, while Mr. Shen said China was also holding talks with South Korea on several unspecified industrial projects although the two countries do not have diplomatic ties.

Chinese imports, affected by China's austerity programme, fell 24.3 percent to 19.8 billion dollars in the first six months of this year compared to the same period in 1989.

#90244d8070 09/01/1990 ~French/German News Agency

JOHANNESBURG (SEPT. 1) - Mining house Johannesburg Consolidated Investment (JCI or Johnnies) has laid off 1,200 workers as a result of the falling gold price, a JCI spokesman said Saturday.

He said a total of 4,500 miners had been affected but the company had managed to place 3,300, leaving 1,200 without jobs.

The north shaft of the Western Areas gold mine, west of Johannesburg, had been hardest hit by the lower gold price, he said.

Twenty of South Africa's 33 gold mines are at risk with the gold price below 390 dollars an ounce.

The recent surge in the price of bullion sparked by tensions in the Gulf would have to be sustained for more than six months to have any long-term effect on South Africa's marginal mines, gold analysts say.

Mining houses Anglovaal and Gengold have have already announced the loss of 1,100 jobs while Anglo American has warned that some 8,000 jobs are on the line unless the gold price stabilises above 400 dollars an ounce.

#90244d8740 09/01/1990 ~French/German News Agency

Wiesbaden, West Germany (SEPT. 1) - Turnover in the West German building industry increased by 11.4 percent to 58.3 billion marks (about 38.8 billion dollars) in the first half of 1990 compared to the same period last year, the industry association reported Saturday.

New orders rose at about the same rate, the association said. Order books were filled for the next 3.2 months, about half a month ahead of last year.

The number of people employed by the construction trades rose by 1.9 percent to 998,000.

The biggest gain was posted in residential construction, with a growth rate of 20 percent for the first six months. Industrial construction grew by 9.3 percent, the association said.

#90244d9700 09/01/1990 ~French/German News Agency

KUALA LUMPUR (SEPT. 1) - Malaysian conglomerate Sime Darby Bhd. said Saturday its group pre-tax profit had risen 21 percent to 611.4 million Malaysian dollars (226.4 million U.S.) for the year ended June.

The group recorded a pre-tax profit of 505.3 million dollars (187.1 million U.S.) for the corresponding period of last year.

In releasing unaudited interim results, the conglomerate said Tractors Malaysia was the main contributor to group earnings with a pre-tax profit

of 136.3 million dollars (50.5 million U.S.), more than double last year's figure of 65 million dollars (24.1 million U.S.).

Turnover for the group posted an 18 per cent increase to 4.98 billion dollars (1.84 billion U.S.), but that for the company fell 30 percent to 98.6 million dollars (36.5 million U.S.), it said.

Sime Darby said overall plantations profitability fell sharply to 55.9 million dollars from a high of 130.6 million (48.4 million U.S.) last year due to lower palm oil and rubber prices.

It also said that excellent results reported from Hong Kong were due to the strong demand in the motor trade, particularly in the luxury segment of the market in an economy which is now beginning to slow down.

Sales of construction equipment and trade with China produced satisfactory results and profitability, the statement said.

It said that the Singapore region again showed increased profits with good results being reported in all segments, while the tyre company in the Philippines increased output and profits in the face of a fast-rising volume of imports, which are seriously eroding margins.

The statement said that barring any unforeseen circumstances and difficulties arising out of the current situation in West Asia, the board expected continuing good results for the year ahead.

Sime Darby's interests range from plantations to manufacturing to property development, and its group of companies is scattered throughout Southeast Asia, Hong Kong, Australia and Britain.

BERLIN (SEPT. 1) - Mercedes-Benz AG announced Saturday in Leipzig that it will invest a billion Deutsche marks (625 million dollars) in the Ludwigsfelde truck plant in south Berlin, the ADN news agency reported.

The giant auto manufacturer intends to make the East German truck plant one of the largest and most modern in the world, said company vice-president Helmut Werner at a press conference the day before the opening of the Leipzig autumn fair.

In 1991, the Ludwigsfelde plant is expected to turn out medium size trucks at the rate of 6,000 per year, increasing yearly production to 90,000 by the mid-1990s, Mr. Werner said.

The Ludwigsfelde plant is owned by the East German firm IFA. A joint

Mercedes-Benz Ag-IFA company will be set up and IFA will gradually be integrated with Mercedes-Benz AG, although Mercedes-Benz will not assume reponsibility for IFA debts, Mr. Werner said.

He added that Mercedes-Benz had sold about 2,000 new and secondhand trucks in East Germany so far this year, as well as 250 buses and 2,000 new cars. Mercedes-Benz aimed at winning 10 per cent of the East German market, Mr. Werner said.

#90244e0001 09/01/1990 ~Latin America New Agency

Buenos Aires (SEPT. 1) EFE - The Argentine government has raised the price of gasoline and public services and tightened tax laws in a bid to slash the public deficit and rein in soaring inflation.

Economy Minister Erman Gonzalez Friday announced a 35 percent increase in fuel prices and a between 12 and 15 percent hike in the cost of utilities and other public services.

In a nationally-broadcast speech, Gonzalez said the government would crack down on tax evasion and eliminate fiscal loopholes in the new phase of the government's economic program.

Gonzalez said public employees on temporary contracts would be layed off as part a bid to streamline state companies and administration.

Earlier this week, officials said the decision not to renew the contracts of some 80,000 state workers was part of President Carlos Menem's efforts to reduce the size of the public administration to what it was 25 years ago.

The government Friday also took steps to restrict bank operations, ordering those financial institutions which are in debt to the Central Bank to pay up by December 1 or face bankruptcy.

Gonzalez said the government had managed to slash the 1990 budget by dlrs 4 billion and boost reserves to dlrs 3.8 billion.

He praised the results of the far-reaching privatization program initiatied by Menem after he took office in July 1989 in a bid to unload burdensome and inefficient state companies.

Among the state enterprises sold off were the communications company ENTel Aerolineas Argentinas airlines, 10,000 km in toll roads, and two Buenos Aires television stations.

Since taking office, Menem has had little success in lifting the country

out of its dire economic straits and controlling inflation.

Prices in the first seven months of the year rose 802 percent and the government aims to bring the monthly average inflation down to below 10 per cent.

Madrid (SEPT. 1) EFE - Police have seized 77 kg of heroin worth an estimated dlrs 15O million and arrested five traffickers led by a Lebanese in the Spanish capital, authorities said Saturday.

Anti-narcotics agents stopped a car in Madrid on Thursday and found the heroin in the boot. They arrested a Tunisian with a false Lebanese passport and a Belgian who was apparently contracted to drive the car.

The seizure led to the later arrests of three Lebanese men, including the gang's leader, in the capital. Police said the heroin came from the Middle East and that it was the largest haul by authorities this year in Spain.

In April, 62 kg of heroin were seized by police in Guipuzcoa, 330 km northeast of Madrid.

A Spanish government report released two months ago said more drugs were seized in Spain last year than in any other European nation.

#90244p0770 09/01/1990 ~PR Newswire
WASHINGTON, DC (SEPT. 2) PR NEWSWIRE - Aloha Airlines Flight Attendants, represented by the Association of Flight Attendants (AFA), announced today that they have not reached agreement by the August 31 amendable date of the current contract. The two parties have been in negotiations since July 18 over a new contract covering Aloha's 222 Flight Attendants.

Aloha Airlines recently announced 1989 profits of $1.26 million, as well as gains in revenue passenger miles and passenger load factor. "Twice during negotiations in past years, when the company was having financial difficulties, the AFA membership made significant sacrifices to keep the airline flying," said Peggy Heidel Gordon, AFA's Master Executive President at Aloha.

"Now that the company is doing well, we believe the Flight Attendants deserve a fair agreement." The AFA negotiating team plans to continue to press the company for an equitable settlement.

The Association of Flight Attendants, AFL-CIO, represents 30,000 Flight Attendants on 18 airlines, and is the largest Flight Attendant union in the world.

CONTACT: Peggy Heidel Gordon, (808) 239-9478 of the Association of Fligh Attendants.

#90244u0130 09/01/1990 ~United Press International
(SEPT. 1) UPI - Wildlife officials in Alaska are trying to figure out the cause of a large-scale bird die-off along the shores of the Gulf of Alaska. Biologists have found about one-thousand dead birds in the area. Most of the carcasses are white-winged scoters... a bird hard-hit by last year's Exxon Valdez spill. Investigators haveN'T ruled out oil as a factor in the die-off, although there are NO signs of oil causing the recent deaths.

Farmers in Alaska would like to inform you that the crops they grow are NO small potatoes. Take for instance the hefty cabbage showed off at the Alaska State Fair in Palmer Friday. The massive vegetable tipped the scales at 98 pounds... four pounds more than its closest competitor... and more than 14 pounds heavier than the previous record-holder. Another record was set in among zucchini, where the top prize went to a 21-pounder.

-30- 1037

#90244u0148 09/01/1990 ~United Press International

WASHINGTON (SEPT. 2) UPI - The State Department says it is keeping a file on possible war crimes committed by President Saddam Hussein of Iraq. State Department spokeswoman Margaret Tutwiler said Friday it is normal practice for the department to review actions by other governments that might violate the 1949 Geneva Convention on the rules of war.

The convention, which Iraq signed, forbids the taking of civilian hostages and using civilians as human shields around potential military targets. Administration sources told the Los Angeles Times that they hope the threat of a war crimes tribunal will deter Saddam from taking any further action against the thousands of foreign hostages he now holds, or against prisoners of war if fighting erupts.

The allegations also could help justify any direct military action by the United States. "Some (legal) action has to be taken, both because we have a right to bring him to justice and to deter him from further violations," said an administration official who asked not to be identified.

The building of a legal case also appears to be part of a larger administration effort to justify its presence in the Arabian desert and to provide the basis for a war not just to protect Saudi Arabia and the Persian Gulf oil fields, but also to eliminate Saddam and his vast arsenal from the Middle East.

Officials said Saddam clearly has violated the most serious precept in international law by waging a war of aggression. That charge was the foundation of the war crimes trials of Nazi leaders in Nuremberg.

Saddam also committed "grave breaches" of the Geneva Convention by taking hostages, removing them from occupied territory and placing them at military installations as shields against attack, the officials said.

They further allege that the Iraqi army's treatment of civilians and its looting in Kuwait are violations of the Geneva Convention's international rules of warfare. In addition, they said, Saddam's actions against embassies and diplomatic personnel have breached the 1973 New York Convention.

While rounding up Saddam and his advisers to stand trial could be problematic in a city as large and well-defended as Baghdad, one expert said just convening a war crimes trial could have a sobering effort on Saddam.

"They can try in in absentia. He would be given every opportunity to come and represent himself if he likes," said John Norton Moore, a former State

Department international law specialist.

"But there's no question that the (U.N.) Security Council has jurisdiction to hold an international war crimes tribunal as a measure to restore international peace and peace and security," Moore said.

#90244u0238 09/01/1990 ~United Press International
EAST RUTHERFORD, N.J. (SEPT. 1) UPI - It took all of 30 minutes for the 1990 Southern Cal defense to look like the 1989 version.

Todd Marinovich passed for 337 yards and three touchdowns and USC held co-No. 24 Syracuse to just 139 yards and six points after halftime Friday night, helping the sixth-ranked Trojans to a 34-16 victory in the Kickoff Classic.

Ricky Ervins ran for 96 yards and a touchdown and caught a 22-yard TD pass for the Trojans, while Gary Wellman had 7 catches for 109 yards and a score. Marinovich, named the game's Most Valuable Player, completed 25 of 35 passes with no interceptions.

But it was the USC defense which turned the game the Trojans' way. Southern Cal returned only two starters from a unit that led the nation in total defense in 1989 and was second in scoring defense.

''It's awful hard to get into the end zone against USC,'' Syracuse Coach Dick MacPherson said. ''Inside the 25 (yard line), their defense is one of the best in the country. Very few people get into the end zone from inside the 25 on them.''

Led by multiple-threat quarterback Marvin Graves, the Orangemen rolled up 194 yards total offense in the first half in trailing 14-10. But USC's nine new defensive starters played more cohesively in the second half.

''I thought in the first half, we were very confused,'' Southern Cal Coach Larry Smith said. ''At halftime they got together and in the second half played together pretty good.

''The main thing was to gey to get in the right defense. The adjustments were better. Defense is that way - you play better as the game goes on. You don't scrap anything.''

The Trojans, leading 17-13, used a blocked punt and Wellman's 46- yard touchdown catch to take control with 2:44 left in the third quarter.

With the ball at the Syracuse 47, Calvin Holmes shed his blocker and stormed in from the left side to block Ken Hawkins' punt. Holmes picked up the ball and ran into the end zone, but the return was called back because of a clipping penalty.

''That was a called block,'' Smith said. ''We brought nine people and got one free. Fortunately for us, that was our fastest man.''

On the next play, Marinovich found Wellman streaking on a post pattern and hit him over the shoulder to complete the 46-yard TD pass.

''Gary kept saying, 'The post is there. The post is there,''' Marinovich said. ''I finally saw him open.''

Marinovich's 71 percent completion rate was the second-highest of the sophomore's career, and his three TD throws tied the Kickoff Classic record set by Brigham Young's Robbie Bosco in 1985.

''It surprised me when they told me how many yards I passed for and what my completion percentage was,'' Marinovich said. ''I was just trying to get the ball to my guys.''

Syracuse drove 70 yards on its next possession to the USC 2-yard line, but the drive stalled and the Orangemen had to settle for a 21- yard John Biskup field goal with 12:07 to go.

Southern Cal took a 27-16 lead with 7:24 remaining on a 25-yard field goal by Quin Rodriguez. The Trojans had been forced to punt, but the drive was kept alive when Syracuse was flagged for having 12 men on the field. Marinovich completed passes of 19 yards to Frank Griffin and 16 to Wellman before the drive stalled again.

Ervins gave Southern Cal a 34-16 advantage with a 2-yard TD run with 36 seconds left.

Graves, a redshirt freshman seeing his first collegiate action, led the Orangemen with 59 yards rushing and 191 passing, including a 30-yard TD strike to David Walker.

''Marvin was marvelous,'' MacPherson said. ''I thought he was tired at the end - he wasn't functioning the way he should. He'll need to keep the level up to play in Division I. But he has tremendous skills.''

Southern Cal took advantage of a turnover deep in Syracuse territory to take a 7-0 lead on the first play of the second quarter.

Syracuse's Duane Kinnon fumbled at the Orangemen 19-yard line after receiving a pass from Graves and linebacker Matt Gee recovered. Four plays later, Marinovich hit Scott Lockwood with a 12-yard scoring pass, with Lockwood scampering the final five yards through the Syracuse defense.

Following an exchange of punts, Graves led the Orangemen on a 9- play, 72-yard drive to a 25-yard field goal by Biskup. Syracuse was aided early in the drive by a pass-interference penalty against USC's Howard McCowan, then Graves took a keeper all the way to the Trojans 23.

Facing third-and-12 from the USC 25, Graves ran the quarterback draw 14 yards, but the drive stalled.

Southern Cal took the ensuing kickoff 80 yards for a touchdown and a 14-3 lead. Marinovich connected on an 18-yard pass to Larry Wallace and Ervins

had a 23-yard run on the drive before Ervins took a screen pass and scampered 22 yards for a touchdown with 5:11 left in the half.

Syracuse also used a screen pass to score just before halftime, coming on a 30-yard TD reception by Walker to pull within 14-10 with 59 seconds left. Graves marched the Orangemen 78 yards in six plays, hitting four of five passes on the drive.

The two teams exchanged field goals on their opening possessions of the second half. Southern Cal went 41 yards in nine plays to Rodriguez' 44-yarder, then Syracuse's Qadry Ismail took the ensuing kickoff 57 yards to set up a 46-yard field goal by Biskup.

(SEPT. 1) UPI - A published report says Israel is in line to receive up to one-BILLION dollars in advanced weaponry. The weapons transfer is said to stem from Washington's desire to shore up Israel's defenses against possible Iraqi agression. It's also reported that the action is intended to offset U-S arms sales to Saudi Arabia. Earlier this week, the Bush administration O-K'd a multi-BILLION-dollar package to the Saudi kingdom.

Further talks are scheduled Saturday between U-N Secretary General Javier Perez de Cuellar and Iraq's foreign minister. The pair met for five hours Friday to discuss the situation in the Middle East. NEITHER man was very talkative following the session, although the day's proceedings prompted them to agree to meet again. The White House has expressed pessimism about what the talks could produce.

Researchers in Albany, New York, say the timing of chemo-therapy for people with kidney disease could be important to the treatment's success. The researchers say timing chemo-therapy to the patient's biological rhythms may offer hope for some people with advanced kidney disease that was previously considered fatal. Some patients using that method were totally cured.

Officials in Alaska Friday announced the discovery of the mummified remains of 30 humans and their possessions from an Aleut culture from hundreds of years ago. Biologists found the ancient cave on one of Alaska's Aleutian islands. It contains perfectly preserved weapons, art, toys and household goods. An archeologist for the U-S Fish and Wildlife Service in Anchorage said the find is one of the most important in Alaska in half a century.

(SEPT. 1) UPI - Renowned blues musician Taj Mahal joined the Texas agriculture commissioner in Austin Friday to endorse a package of minority rights in the 1990 farm bill. Mahal worked on a family dairy farm in Massachusetts as a youngster. He decried the fall in the number of black farmers to 35-thousand from what he said was nearly one-Million in the 1920's.

At least one group in Madison, Wisconsin, is NOT happy to see the circus come to town. The Alliance for Animals staged a protest during Friday night's opening of the Ringling Brothers and Barnum and Bailey Circus... dubbing it ''The Cruelest Show on Earth.'' The alliance charges animals endure numerous atrocities and inhumane treatment in being trained for the circus.

(SEPT. 1) UPI - After setting the table at home in the Kingdome Friday night, the Griffeys will be eating out.

As if making baseball history as the first father/son tandem to play together in the same lineup wasn't enough, senior and junior Griffey each contributed singles to set up Seattle's three-run first inning Friday night and help the Mariners roll to a 5-2 victory over the Kansas City Royals.

''We had a (dinner) bet on the first hit,'' said the younger Griffey. ''He won, but I had a chance to tie, and I did.''

Hitting in the second spot in the lineup with his new team, Griffey Sr. singled to center. However, his son, hitting third, followed with a single of his own, which started the Mariners rolling to their three-run outburst.

''Either way, he has to take me out to dinner,'' Griffey Sr. said.

Griffey Jr., the Mariners' centerfielder, said when he watched his father playing leftfield next to him, it nearly brought tears to his eyes.

''It was different, a lot of fun,'' he said. ''But it hasn't sunk in yet.''

In 1987, when Griffey Jr. signed with the Mariners, Griffey Sr. said he felt someday the two might play together.

''I knew how good he is,'' the father said, but he admitted feeling the chance they would be on the same team was a long shot because he thought his son might have to wait two more years to play in the major leagues.

''By then I thought I might be gone,'' Griffey Sr. said. ''I owe a lot to Pete Rose,'' the former Cincinnati manager, who found a place for him on the Reds' roster in 1989. Cincinnati released Griffey earlier this week,

and he signed with the Mariners Wednesday.

Even Kansas City Manager John Wathan found the situation interesting.

''That was exciting,'' he said. ''But I would have rather seen it on ESPN and been playing some other team.''

The only time a father/son tandem played in professional sports was when Gordie Howe played with his sons Marty and Mark with the Hartford Whalers hockey team from 1977-1979.

Mariners' starter Randy Johnson, 13-8, allowed five hits over 7 1-3 innings for the win. Bill Swift, scheduled to start Saturday, worked the final 1 2-3 innings for his third save.

Storm Davis, 7-10, suffered the loss.

Red Sox 7, Yankees 3

At Boston, Luis Rivera belted his first career grand-slam to break the game open in the eighth inning and Greg Harris pitched a four-hitter to lead the Red Sox. Rivera, who drove in another run in the fourth, collected a career-high five RBI. Harris improved to 12-5. Chuck Cary, who fell to 5-9, has lost five of his last six decisions.

Blue Jays 12, Indians 8

At Cleveland, Luis Sojo drove in five runs with two hits, including a three-run homer that highlighted a six-run sixth inning. Jim Acker, 3- 4, got the win in relief of starter David Wells. Loser Greg Swindell, 10-8, gave up eight runs on 10 hits over five innings.

Tigers 12, Twins 6

At Minneapolis, Lou Whitaker and Larry Sheets collected three RBI apiece to power Detroit to their third straight victory. Clay Parker, 3- 1, pitched 3 2-3 innings of scoreless relief for the victory. Paul Abbott, 0-2, allowed six runs and five hits and Kent Hrbek and Gary Gaetti - who both homered for the Twins - also drove in three runs each in a losing cause.

Brewers 4, Orioles 1

At Milwaukee, Greg Brock drove in two runs and Ron Robinson pitched his fourth complete game of the season. Robinson, 8-3, allowed eight hits in the complete-game effort. John Mitchell fell to 6-6, allowing nine hits and four runs over 5 1-3 innings.

Athletics 4, Rangers 2

At Oakland, Bob Welch earned his major-league leading 22nd victory and Carney Lansford contributed a pair of RBI singles. Welch, 22-5, scattered six hits over 7 1-3 innings and Dennis Eckersley pitched a scoreless ninth for his 40th save. Rangers' starter Jamie Moyer, 1-6, lasted just 2 2-3 innings, allowing three runs and six hits while walking two.

White Sox 6, Angels 5

At Anaheim, Calif., rookie Frank Thomas delivered a three-run homer with two outs in the seventh, helping Chicago snap California's five- game winning streak. Greg Hibbard, 11-8, allowed four runs and eight hits in 6 1-3 innings for the win. Bobby Thigpen recorded his 45th save, one short of a major-league record set in 1986 by Dave Righetti of the New York Yankees. Mark Langston, 8-16, took the loss and had his personal three-game winning streak halted.

#90244u0405 09/01/1990 ~United Press International

(SEPT. 1) UPI - The New York Mets were the aggressors and the Pittsburgh Pirates the victims in mirrored ninth innings Friday night.

New York produced a three-run two-out rally for a 4-3 victory over the San Francisco Giants, while Pittsburgh surrendered three runs with two outs to drop a 3-2 decision to the Houston Astros.

With their fourth-straight victory, the Mets picked up a full game on the first-place Pirates in the NL East and now trail by just 1-2 game.

Howard Johnson's bloop single scored Darryl Strawberry from third base to cap the Mets' improbable comeback.

Trailing 3-1, Dave Magadan singled and scored on Gregg Jefferies' double to right-center field. Giants' loser Steve Bedrosian, 6-8, relieved starter Don Robinson and issued an intentional walk to Strawberry. Kevin McReynolds singled home Jefferies with the tying run, with Strawberry moving to third on the play. Strawberry scored the winning run when Johnson's flare fell just in front of diving right- fielder Mike Kingery.

''With a chance to win the game you've got to be aggresssive and go for it '' Johnson said. ''That's why I swung at the pitch and only got a piece of it, but just enough. It was a lot like Game 6 of the World Series in 1986. We shouldn't fall behind like this but this was some big victory.

The scene was similar in Houston.

After coming back from a 2-0 deficit to tie the game, pinch-hitter Glenn Wilson capped Houston's game-winning surge with an RBI single off reliever Bill Landrum, which scored Franklin Stubbs from second base.

''It looked like we were in good shape,'' Pittsburgh manager Jim Leyland said. ''We just couldn't get the 27th out. Sometimes that's a tough one to get. We had the game under control and we let it get away.''

The defeat marred an outstanding performance by Pittsburgh starter Zane Smith, who allowed just one Houston baserunner to advance to third over eight innings.

Back in New York, Giants' starter Robinson, who was one out away from a complete-game victory, took a no-decision after allowing three runs and eight hits.

Giants' Manager Roger Craig defended his decision to pull Robinson.

''I'm not going to let Strawberry beat me,'' Craig said. ''He's been hitting extremely well and that's why we walked him intentionally. I took Robinson out because he was tired and I had Bedrock (Steve Bedrosian) throwing in the bullpen at 90 mph.''

Jefferies, who was the last Met to hit off Robinson, disagreed.

''Robinson was pitching just as good in the ninth as in the first,'' Jefferies said. ''He still had his stuff and his velocity.''

Frank Viola, 17-9, pitched his seventh complete game and posted his second win in his last six starts. The left-hander allowed 11 hits and one walk while striking out six.

Cubs 4, Reds 3

At Chicago, Joe Girardi's bases-loaded single scored Dwight Smith and capped the Cubs' two-run, ninth-inning rally. Andre Dawson led off the ninth with a double to right off Randy Myers, 3-4. Wilkerson pinch- ran for Dawson and scored on a single by Luis Salazar to tie the score. Bill Long moved to 6-0 with one perfect inning.

Phillies 4, Padres 2

At Philadelphia, John Kruk doubled in two runs in the eighth inning to enable the Phillies to break a three-game losing streak. Kruk doubled off reliever Greg Harris to score Randy Ready and Von Hayes and hand the Padres their third straight loss. Roger McDowell, 6-6, went two innings for the victory. Atlee Hammaker dropped to 4-6.

Expos 5, Dodgers 2

At Montreal, Chris Nabholz threw a one-hitter for seven innings and Delino DeShields picked up three RBI to help Montreal snap Los Angeles' five-game winning streak. Nabholz, 3-0, earned the win despite walking six. Mike Morgan, 10-12, took the loss.

Braves 4, Cardinals 1

At Atlanta, John Smoltz and Kent Mercker tossed a combined eight- hitter to pace the Braves. Smoltz, 12-9, allowed seven hits in 8 1-3 innings while striking out six and walking four. Cardinals' starter and loser Jose DeLeon, 7-14, scattered three hits over six innings.

#90244u0408 09/01/1990 ~United Press International

(SEPT. 1) UPI - Skies were clear over much of the nation early Saturday as Americans began celebrating a long holiday weekend to mark the unofficial end of summer.

Scattered early morning showers and thunderstorms developed over the panhandle area of Florida, where temperatures were in the 70s and 80s and forecasters expected some afternoon showers and thunderstorms and highs in the low to middle 90s.

There was patchy fog in eastern Pennsylvania and portions of western New York and the lower Hudson Valley, but clear skies dominated most of the rest of the Northeast, with a bright and warm day expected to follow.

But a switch to southerly winds brought a touch more humidity to the region and a chance of thunderstorms later Saturday loomed for parts of western New York.

Temperatures dipped into the 60s early Saturday, but were forecast to rise into the middle to upper 80s for much of the Northeast by later in the day.

In much of the West, skies were clear to partly cloudy, except for morning coastal low clouds and fog. Temperatures were forecast to be near seasonal normals, 60s and 70s along the coast and high 80s to the 90s inland.

Las Vegas hit 103 degrees Friday, four points above the normal for the date, and similar readings were expected through the holidays.

Skies were partly to mostly cloudy in parts of the Midwest, especially in lower Michigan.

In Texas, where daytime readings Friday hit 107 in Waco, 105 in Austin and

103 in Dallas, a tornado touched down Friday evening south of the city of Ganado and high winds ripped a roof off a mobil home and tore trees down in northern De Witt County.

#90244u0426 09/01/1990 ~United Press International

CAIRO, Egypt (SEPT. 1) UPI - Renewing a call for the unconditional withdrawal of Iraqi troops from Kuwait, Arab League foreign ministers demanded Saturday that Iraq release all foreigners and pay reparations for damages from its invasion.

Release of the five-part resolution came a day after 13 Arab League members concluded a two-day extraordinary session on the Persian Gulf crisis. While Libya attended the ministerial meeting, it voted against the demands.

Eight Arab League members declined to attend the session - Iraq, Jordan, Yemen, Algeria, Tunisia, Sudan, Mauritania and the Palestine Liberation Organization.

''We have differences when we come to the way of handling the crisis,'' Egyptian Foreign Minister Esmat Abdel Meguid said after releasing the session's decisions. ''We do not hide this.''

But he added he did not believe the divisions signaled an end of the Arab League.

The decisions by the Arab League foreign ministers reaffirmed the full, but divided, Arab League's call Aug. 10 for an immediate Iraqi withdrawal from Kuwait and restoration of the legitimate government. Iraq, Libya and the PLO had voted against that resolution while several either abstained or voiced reservations.

But the final communique of the foreign ministers released Saturday added several new elements, specifically the call for payment of reparations.

Within the communique, the Arab League ministers also affirmed their support for U.N. Secretary-General Javier Perez de Cuellar's mission aimed at implementing U.N. resolutions against Iraq. But, in an apparent reference to several initiatives circulating, they emphasized that any Arab solution to the Gulf crisis should emanate from the Arab League and be based on its Aug. 10 resolution.

Asked if there was a time limit for the peace efforts, Meguid told reporters, ''There is no time limit, but patience is not unlimited.''

The communique denounced Iraq for damaging or confiscating property

belonging to the Kuwaiti government, private and public establishments, and Arab and international organizations, and urged authorities to immediately stop such actions.

The ministers held ''the Republic of Iraq responsible for offering compensation for the damages and losses which the Iraqi invasion and occupation of Kuwait has inflicted and continues to inflict.''

The ministers also demanded Iraq allow foreigners in Kuwait and Iraq to leave ''any time they wish'' and said they held Iraq ''totally responsible for any harm done to the lives of the subjects of other countries or damages inflicted on their properties.'' On the issue of Kuwaiti citizens, the Arab delegates denounced acts committed against them and demanded Iraq protect them.

The ministers affirmed ''the legitimate right of Kuwaitis and nationals of other countries who have suffered, to receive fair indemnity for the damages and losses inflicted upon them.''

The Arab leaders also declared null and void Iraq's order for all foreign missions to close Aug. 24 and relocate to Baghdad. Several embassies, including the Soviet Union, have evacuated their staff but maintain their missions are technically open.

The United States, the European Community and several other countries have kept a limited number of diplomats at besieged embassies in an effort to maintain contact with their citizens trapped in Kuwait and to show they do not consider Iraq's annexation of Kuwait valid.

In the communique, the ministers also demanded Iraq not ''infringe upon the demographic composition or change the administrative division or alter the namings in the state of Kuwait.''

However, their demand came a little late. On Tuesday, Iraq designated Kuwait its 19th administrative province and renamed districts within Kuwaiti territory, including changing Kuwait City to Kadhima.

#90244u0427 09/01/1990 ~United Press International

SACRAMENTO, Calif. (SEPT. 1) UPI - The state Assembly early Saturday effectively killed a proposal to dramatically alter the dynamics of the 1992 presidential primary season by moving California's contest from June to March.

The effort to give California, the most populous state, greater clout in the selection of major party presidential nominees fell victim to partisan bickering over a related state issue concerning citizen ballot initiatives.

''I think it's unfortunate, because the voters in California deserve to have their voice heard on issues affecting them,'' said Assemblyman Jim Costa, a Fresno Democrat who has tried unsuccessfully for 11 years to advance California's presidential primary date.

The traditional June date for the California primary usually has come after the Democratic and Republican nominations have been decided by voters elsewhere in the country.

''Once again, the most populous state in the nation is going to find itself on the sidelines in 1992,'' Costa said.

The lawmaker said his plan to move California's primary to early March - after Iowa's caucuses and New Hampshire's primary, but before the South's ''Super Tuesday'' primary - would have been good for the nation as well.

He said it would have forced presidential candidates to present themselves to a diverse multiethnic electorate that more closely resembles a national cross-section than the electorate in Iowa.

In the past, California's June primary generally has had little significance. The last time California made a difference in a Democratic nomination was 1972, when George McGovern defeated Hubert Humphrey. The last Republican primary season in which California counted was 1964, when Barry Goldwater beat Nelson Rockefeller.

But state Sen. Bill Lockyer, a San Leandro Democrat and one of the leading opponents of an early primary, told a reporter: ''California so far has contributed three people to the White House: Herbert Hoover, Richard Nixon and Ronald Reagan. Why should we try to amplify our influence when that's the kind of record we have?''

Critics also argued that an early presidential primary would have limited presidential elections to wealthy candidates who could afford the expensive campaign that a huge state like California would require.

Still, what eventually killed the early primary was not these national concerns, but rather a fight to exclude citizen initiatives from the presidential primary ballot.

Many lawmakers were concerned that a March presidential primary - held in addition to the usual June primary for state races and the November general election - could be manipulated by special interest groups seeking to seize upon a low voter turnout to push through ballot initiatives.

Republican legislators favored excluding initiatives from the March primary because they do not expect many voters to turn out in 1992 to

renominate President Bush, a likely shoo-in. Democratic lawmakers, however insist on excluding initiatives from the June primary, which they said would have a low turnout without a presidential contest at the top of the ballot.

A proposal to ask voters to exclude initiatives from the March ballot fell seven votes short Saturday of the 54 needed for passage in the Assembly. Senate leaders said it would have had trouble in that chamber as well.

With the initiative measure dead, Costa did not ask for a vote on his early primary bill.

''The bottom line is that a number of my colleagues in both houses chose to put their own partisan politics above voters' right to have their own voice heard,'' Costa said.

But Senate President Pro Tem David Roberti, a Los Angeles Democrat, said the placement of initiatives on the ballot has become a critical issue for California, more critical than an early presidential primary.

Costa said he has not ruled out another effort next year, but said it could be even more difficult to get the necessary votes just a year before the 1992 elections, when the effects of an early primary on various potential candidates would likely be weighed.

#90244u0430 09/01/1990 ~United Press International

JAKARTA, Indonesia (SEPT. 1) UPI - Indonesia urged industrialized countries Saturday to release their oil reserves and help ease the world oil market that has been tightened by the Persian Gulf crisis.

Mines and Energy Minister Ginandjar Kartasasmita told reporters after meeting with President Suharto that oil prices have continued to rise even though the Organization of Petroleum Exporting Countries decided to increase its output.

The OPEC meeting ended Wednesday in Vienna with a decision to allow members to raise output to compensate for crude lost in a U.N. embargo against Iraq.

The United Nations embargoed about 4 million barrels a day of oil exported from Kuwait and Iraq.

''The oil stocks in the industrialized countries must be released,'' Ginandjar said. ''This cannot wait until an oil crisis developed further '' Ginandjar said.

He said if the current prices are remains high, the coming winter the price would go more higher.

Oil prices, which reached $32 last week, fell to under $26 after the reports of the OPEC agreement, but it Has risen again as the situation has remained uncertain.

BOSTON (SEPT. 1) UPI - Former hostage Frank Reed said he fears the spotlight on foreigners held in Iraq will detract from efforts to free Westerners who have spent years in captivity in Lebanon.

Reed, 57, returned to his home in suburban Malden Friday night after a reunion in Dublin with his former colleague in captivity, Brian Keenan. The Irish hostage was released by pro-Iranian Moslem extremists Aug. 24 after more than four years in captivity.

Reed said Westerners still held in Lebanon face a more harrowing ordeal than the foreigners stranded in Iraq.

''I have a difficult time equating hostaging as I know it in terms of chains and cruelty and blindfolding to what's going on (with those in Iraq),'' he told reporters at Boston's Logan International Airport.

''Sitting around the swimming pool in a hotel doesn't, to me, equate to what's going on with those men (in Lebanon). I've called them (those in Iraq) prisoners of war,'' he said.

The widespread attention accorded the plight of foreigners caught in Iraq ''just pushes the other hostages further and further away,'' he said.

Reed was freed April 30 after 44 months as a hostage in Lebanon. Subsequent medical tests showed that he had been fed arsenic during his captivity. He has been extremely vocal in his call for the release of other Westerners held in Lebanon.

He renewed that call after his meeting with Keenan, saying the White House should negotiate for the safe return of Americans in both Lebanon and Iraq.

''The French talked and traded. They feel no shame. The Irish feel no shame getting their citizens out. We should feel no shame getting our citizens out,'' he said.

He also said he did not believe Iraqi President Saddam Hussein would hurt Westerners in his power.

''He will never hurt anybody because the Arab mind says 'We love children and we protect women.' I'm sure nothing will ever happen to them,'' Reed said.

The former hostage said he would embark on a lecture tour to speak about his ordeal and to lobby for the release of the 13 Westerners still held in Lebanon. He said eight publishers are competing with offers for a book on his experience and ''there's talk'' about a movie.

-30- 2428

#90244u0490 09/01/1990 ~United Press International

AMMAN, Jordan (SEPT. 1) UPI - The government unveiled Saturday an unprecedented austerity program to reduce subsidies for three basic commodities through rationing in a move to ease Jordan's financial problems and to combat food hoarding during the Persian Gulf crisis.

Supply Minister Ibrahim Ayoub denied the measure was forced by the impact on Jordan of U.N. trade sanctions imposed on Iraq, the kingdom's main trading partner, and said the program had been planned before the gulf crisis arose.

''Although we have been planning this measure for six months, it will be even more feasible now with the current gulf situation,'' Ayoub told a press conference.

He said the move will save the government a ''large amount of money,'' but did not disclose how much. He said that his ministry will evaluate the results in four months and ''take new steps according to our findings.'' He did not elaborate.

Under the plan, which went into immediate effect, the amounts of rice, sugar and powdered milk sold at subsidized rates will be limited.

To purchase the subsidized goods, residents will have to show ration cards and coupons, which are being distributed at municipal offices, Ministry of Supply buildings and public schools.

The rationed amounts are severe, with every member of a family restricted to purchasing 1.5 kilograms of rice and sugar each month and 1 kilogram of powdered milk every six months, Ayoub said.

The commodities, however, will be available in unlimited quanities at double the rationed prices, he said.

The plan is being implemented to comply with an International Monetary Fund program aimed helping Jordan repay an $8.2 billion foreign debt accumulated as a result of large loans. Some portion of the loans reportedly were siphoned away from public use into private pockets.

The financial problems of the nation of 3.5 million people have mounted because of the trade embargo on Iraq, which the government estimates will cost Jordan more than $3 billion over a year.

The rationing move had been expected for some time, but the government had been reluctant to implement it because of fears of popular unrest. Economic problems led to riots in 1988.

However, King Hussein's opposition to foreign military intervention in the gulf crisis has generated unprecedented support for his administration, easing fears of a backlash, political analysts said.

Ayoub said that the rationing program would also cut down on hoarding by the affluent, which increased with fears that a war would erupt in the Middle East.

According to the minister, Jordanians have bought double the normal monthly consumption of rice and sugar since Iraq invated Kuwait Aug 2. He would not disclose the amount of monthly consumption.

''This decision simply came to organize the distribution of these commodities and it was pure coincidence that the ration cards and coupons were ready during such a time,'' the minister added.

The program, however, is expected to affect the donation of food, particularly milk, that is being given by ordinary citizens to the thousands of Asian and Arab refugees arriving from Kuwait and Iraq, as well as charity shipments sent to Iraq.

The minister said the government would not raise the price of bread, which is priced and subsidized by the government. Some sugar is used in the dough of flat Arabic bread.

BONN, West Germany (SEPT. 1) UPI - The opposition Social Democratic Party Saturday called for drastic military cuts in Germany and demanded that NATO give up its strategy of forward defense, flexible response and first use of atomic weapons.

In a ''government program'' that will form the basis for the SPD's electoral campaign leading to Dec. 2 all-German elections, the party called for the ''ecological transformation of the industrial society'', the economic rehabilitation of East Germany and a better living conditions for all Germans.

The program, presented in Bonn Saturday, demands the halving of German forces, which now include 480,000 West German troops and about 98,000 East German troops.

''As there is no relationship of conflict anymore between Eastern and Western Europe, drastic disarmament is called for,'' the party said.

The SPD also demanded an end to all low-level training flights over West German territory by West German and NATO military aircraft.

''We want the gradual removal of nuclear deterrence, and demand - instead of cosmetic corrections - the immediate renunciation of the strategy of forward defense, flexible response and of first use of nuclear weapons.''

The SPD is the main German opposition party. The East and the West German Social Democratic parties are due to unite in late September.

The East and West German branches of the Christian Democratic Union, chaired respectively by Prime Minister Lothar de Maiziere and Chancellor Helmut Kohl, are also due to merge a few days before Oct. 3 unification.

The SPD said that ''German unification offers major chances for the improvement of people's living conditions.''

''But first one has to ensure that the East German economy finds its way

out of the crisis in which it was plunged through Kohl's wrong policies.''

The left-of-center party said that an SPD government would take immediate measures to create new jobs in East Germany, which has registered spiraling unemployment levels in recent months.

It said it would encourage private investment in labor-intensive areas and in environmental protection sectors.

''The ecological transformation of the industrial society is at the center of our concept,'' the party said in its program.

The Social Democrats also said they wanted a new abortion law which both ''protects the unborn life and emphasizes the self-determination of women.''

After tough negotiations with Kohl, SPD leaders agreed late Thursday night on an interim law for a united Germany under which abortion will remain legal in East Germany and generally illegal in West Germany.

The agreement, included in the final bilateral unification treaty signed Friday, states that an all-German parliament will have to pass new legislation within two years.

The CDU, under pressure from its more conservative and largely Catholic sister-party, the Bavaria-based Christian Social Union, wants the West German law to prevail throughout Germany.

The SPD has long insisted on more liberal legislation.

GAINESVILLE, Fla. (SEPT. 1) UPI - A University of Florida freshman jailed for allegedly beating his grandmother is a ''valuable'' suspect in the killings of five college students, but there were several other potential suspects and investigators were not close to making an arrest, police said Satruday.

Edward Lewis Humphrey, 18, who was arrested Thursday on assault charges and being held on $1 million bond, is ''extremely valuable to us as a suspect,'' said Gainesville police Lt. Sadie Darnell. But other suspects were being investigated with equal or greater vigor, she said.

''The larger share of our resources is devoted to receiving and processing information on additional suspects,'' Darnell said. ''To me, it's frightening that there are so many candidates out there who could be considered candidates for a crime of this caliber.''

Gainesville authorities initially refused to confirm that Humphrey was a suspect. But police said Friday he was being questioned and was one of several suspects being given equal attention.

''We're still not on to one individual,'' Darnell said. ''We're not looking at one person or even close to an arrest.''

Investigators also wanted to question Warren Tinch, 58, who is wanted by the FBI in connection with the stabbing death and mutilation of a 52-year-old Ohio woman.

On Friday, FBI agents carried pictures of Tinch to an Ocala, Fla., car dealership, where five employees identified him as the man who posed as a doctor and stole a van 16 days ago.

Also Friday, police barricaded the Hawaiian Village Apartments in Gainesville, where Humphrey lives, searched garbage bins for evidence and refused to allow anyone but residents to come and go.

Darnell said Saturday authorities had not obtained a search warrant for Humphrey's apartment, but investigators had talked to his brother, George, who also lives in Gainesville. She did not say what information was obtained.

Edward Humphrey was charged with aggravated battery against an elderly person for allegedly beating his grandmother Thursday at her home in Indialantic, a town about 150 miles southeast of Gainesville near Cape Canaveral.

Humphrey was being held on $1 million bond in the Brevard County detention center in Sharpes. He originally was ordered held on $10,250 bond, but that was increased to $1 million Thursday night on the telephone order of Circuit Judge Dean Moxley, sheriff's records showed.

''There wouldn't be a $1 million bond if he were not a suspect in the Gainesville homicides,'' said Randy Moore, a Brevard County public defender.

-30- 2804

#90244u0574 09/01/1990 ~United Press International

WASHINGTON (SEPT. 1) UPI - Military analysts say it is unlikely a U.S.-Iraqi conflict could start by accident but believe both sides are prepared to turn a minor incident into a provocation that would warrant a fight.

''It will be no accident. You can rule that one out,'' said Bill Taylor, vice president for international security programs at the Center for

Strategic and International Studies.

''The chance of an inadvertent war is slim,'' added Jay Kosminsky, deputy director of defense policy at the Heritage Foundation.

What is more likely, should the situation in the Persian Gulf region turn into a shooting match, is the deliberate manipulation by one side or the other of an incident that appears sufficient to require a military response.

While the various scenarios range from a U.S. attack in the event of harm to Western hostages to such things as trying to lure a flight of Iraqi warplanes into a fight, analysts agree Iraqi President Saddam Hussein cannot win but also note the obvious - there will be U.S. casualties.

Iraq has a 1 million-man army, and the crack Republican Guards that invaded Kuwait have been pulled back to Iraq, most likely to defend the homeland in the event U.S. M-1 tanks roll forward into Kuwait or around to the west up toward Baghdad. Lesser-trained forces from the Iranian border have moved in to replace them.

The United States has dispatched between 60,000 and 70,000 ground troops and an armada of aircraft carriers, a battleship and a variety of combatants for what has been described as a defensive effort to protect Saudi Arabia from any Iraqi offensive.

But also weighing heavily on the minds of U.S. commanders, analysts say, is their desire to be allowed to prosecute any military action fully and not be hamstrung by politicians as was the case in the Vietnam War. That, the analysts observe, is evidenced by the massive firepower being poured into the area and the crack units being sent in.

''I think we are kind of spoiling for a fight,'' said retired Rear Adm. Gene LaRocque, director of the Center For Defense Information. ''A lieutenant general said they were not looking to this to be a political solution. My feeling is this is the Vietnam syndrome in reverse.''

''This time we have a president who takes his role as commander in chief very seriously but is giving the military its head,'' said LaRocque. ''... We want to win one for a change.''

Taylor, a retired Army colonel, noted that the question of political will arises the longer the situation continues and U.S. troops are told to take up positions in a burning desert, up to 10,000 miles from home, without the usual recreational amenities - beer and women - available.

And beyond that is the question of political support the minute fighting starts. Any battle in Southwest Asia will make recent U.S. military

episodes - Beirut, Grenada, Libya and Panama - look like walks in the park.

''All the research tells me if you can go in fast and get the job done (quickly), regardless of body bags and hostages, the American people will understand the objective and see the rapid progress. They'll put up with body bags and hostages, but if you let this thing drag out the American public falls off this in a hurry,'' Taylor said.

Kosminsky said both sides are likely to have the opportunity to turn an incident into a provocation sufficient to launch a full-bore battle, if only to rally political support.

For instance, if Saddam were feeling the pinch from a populace squeezed by the embargo, a battle could rally Iraqi public opinion. For President Bush a long-term stay in Saudi Arabia in the face of waning public support and a national economy sliding into an oil-driven recession could be the trigger for a support-boosting battle.

''If one or the other or both are looking for a fight, there is going to be plenty of opportunity and plenty of potential pretext,'' Kosminsky said. ''... If there's a war it's going to be deliberate by one side or the other.

''I think we would look for a provocation or pretext before we moved,'' Kosminsky said.

History is full of provocations and pretexts. A reported attack on U.S. ships in the Gulf of Tonkin - an attack which some believe never took place - was used by President Lyndon B. Johnson as the trigger to draw the United States deeper into Vietnam.

History also is replete with military actions that had little impact other than their ability to rally public opinion. The failed effort a decade ago to rescue U.S. hostages in Iran was such an attempt.

#90244u0710 09/01/1990 ~United Press International

KENNEBUNKPORT, Maine (SEPT. 1) UPI - President Bush announced Saturday that he will meet with Soviet President Mikhail Gorbachev in Finland on Sept. 9 to discuss an array of issues, including the crisis in the Persian Gulf.

Bush told reporters that Secretary of State James Baker and Soviet Foreign Minister Eduard Shevardnadze ''have been working out the details of this meeting over the last few days, and we got the word this morning that an announcement at this time would be agreeable to the Soviets.''

''There is no special agenda relating to the Middle East. Nobody's doing any negotiating or anything of that nature. When President Gorbachev was here he and I agreed it would be useful to have periodic meetings without

casting them in the vein of a summit, and that's exactly what that meeting's about,'' Bush said.

''I will be delighted to see him again, and we have many subjects to discuss,'' Bush said.

A simultaneous announcement of the Helsinki meeting was made on Soviet television in Moscow. The meeting will focus on ''bilateral and international issues,'' the announcement said.

Bush, vacationing at his summer home in Maine, said he approached Gorbachev more than a week ago about setting up the meeting.

Since the Aug. 2 Iraqi invasion of Kuwait, Bush has spoken with more than two dozen foreign leaders, although Gorbachev had not been among them as of Saturday morning.

''I think it is important at this juncture that we discuss issues not just as they relate to Europe and try to update where we stand on these arms negotiations, but also to discuss the Middle East,'' Bush said.

Bush dismissed suggestions that the Soviet Union, an old ally of Iraq, may play a mediating role in resolving the crisis.

''I don't see a mediating role at all, and I don't think the Soviets see themselves as having a mediating role,'' Bush said.

Earlier in the day, national security adviser Brent Scowcroft told reporters that ''a lot has happened'' since Bush and Gorbachev met three months ago in Washington and that ''there's no lack of things for the two to talk about,'' including the gulf crisis, a proposed U.N.- sponsored settlement of the Cambodian civil war and U.S.-Soviet efforts to find a political solution to the conflict in Afghanistan.

The meeting comes in the midst of a swirl of diplomatic activity that has done little to raise American hopes of finding a political way out of the confrontation with Iraq, which now has the United States, the Soviet Union and some 20 other countries with military forces in and near the Persian Gulf.

Bush has taken pains to praise the Soviets for supporting the U.S.- led drive in the United Nations to isolate Iraq through a virtual trade embargo, including a cutoff of oil exports. At the same time, the Soviets have expressed concern about the huge American military buildup in the region.

Bush emphasized repeatedly that the meeting will not focus solely on the gulf crisis.

''It is my view that it's just important that we have good, free- flowing discussions about this, so it wasn't driven about any worry that we might be apart, rather that there's a wide array of questions that could use consultations at this time,'' Bush said.

The international outrage over the Iraqi takeover of Kuwait has aligned the United States and the Soviet Union in ways not seen during more than four decades of superpower rivalry. It has at once offered a vivid display of the dangers that will remain in the post-Cold War era and a glimpse of what Bush described only Thursday as a ''new world order.''

''We both agreed up at Camp David that this kind of informal, unstructured format might be very good in a world where there's so many changes. And so it's a good chance to test that now,'' Bush said.

He said Gorbachev is ''very enthusiastic'' about the meeting. Barbara Bush and Raisa Gorbachev are expected to accompany their husbands to the meeting.

Regarding Iraqi President Saddam Hussein's piecemeal approach to releasing hostages in Iraq and Kuwait, Bush said, ''I don't like it. I don't think the world likes it. I'm glad when any American comes out of there, but there's a certain brutality, a certain tawdry performance, in all of this.''

Bush said he had talked to many world leaders who agreed ''this is just a despicable performance.''

But he would not say how long he would tolerate Saddam's holding Americans against their will.

''I don't deal in deadlines,'' Bush said.

(SEPT. 1) UPI - Police in Florida say 18-year-old Edward Humphrey is ''extremely valuable'' as a suspect in their investigation of the the serial killings of five college students. Humphrey is being held on a one-Million-dollar bond, charged in a separate case with beating his grandmother. He's one of several suspects in the serial killings.

Pope John Paul is on his way to the East African republic of Tanzania to start an 11-day tour of four African countries. It's the pope's seventh tour of Africa since his election in October 1978. His primary goal is to draw world attention to the plight of poverty-ridden African republics.

In the Philippines, President Aquino's advisers opened consultations today with groups proposing peace talks with rebel leaders from both the left and the right. The military says 23 communist guerrillas and five soldiers were killed yesterday in two separate encounters in a southern island.

President Gorbachev says the Soviet Union will try to take advantage of higher world oil prices by expanding its oil exports during the Persian Gulf crisis. Gorbachev says the Soviet Union needs the hard currency... but he did NOT specify how it would be possible for Moscow to increase exports.

The Navy says it will name a new guided-missile destroyer the U-S-S Stethem in honor of 23-year-old Navy diver Robert Stethem. He was shot and killed by terrorists in Beirut during the 1985 hijacking of a T-W-A airliner. It's one of four new ships authorized in the current building

program.

-30- 1701
#90244u0765 09/01/1990 ~United Press International
WASHINGTON (SEPT. 1) UPI - The long-planned, once-postponed U.S.-Israeli attempt to revive the Middle East peace talks has been curtailed by the need to deal with the Persian Gulf crisis.

Israeli Foreign Minister David Levy, scheduled to meet with Secretary of State James Baker Tuesday and Wednesday, has been informed by the State Department ''with regret,'' that Baker's schedule will only permit him to meet on Wednesday with Levy.

The talks had originally been scheduled for Aug. 9-10, but they had to be postponed because Levy was recovering from what has been described as a mild heart attack. The talks were to have lasted two days in Washington, but one day was dropped from the schedule because of the gulf crisis.

Baker has been drafted by President Bush to travel to Western Europe and the Persian Gulf to round up financial support for the burdens on the United States and other countries in their response to the Aug. 2 Iraqi invasion of Kuwait.

Levy, a hard-line Likud member who does not speak English, had been invited to Washington in the early summer to see if there was any chance of reviving the moribund negotiations for establishing ground rules for negotiations between Palestinian representatives and the Israeli government.

Then Levy had a heart attack. Baker had showed impatience with the Israeli government, which had delayed negotiations for nearly a year because of an internal political crisis, and suggested sardonically in June that if Prime Minister Yitzhak Shamir were serious about beginning negotiations, he should call President Bush.

Since then, Congress has deducted $2.8 million from the $3 billion in U.S. economic and military assistance to Israel. The relatively minor cut was meant as a signal to Israel of lessening support from pro- Israeli members of Congress, since it is the exact amount that Levy, when he was minister of housing, covertly supplied to a group of Jewish settlers to take over a building near the Church of the Holy Sepulchre in East Jerusalem.

The takeover of the hospice in East Jerusalem was later annulled by the Israeli Supreme Court.

Although the Israeli government opposed it, the Defense Department informed Congress last week of its intention to sell Saudi Arabia $2.3

billion in emergency defense equipment, including F-15 fighters and Stinger anti-aircraft missiles. The administration said further sales will be announced. The Saudis are part of the multi-national force opposing Iraqi expansion.

Baker also said in June that the administration would oppose a $400 million housing loan guarantee for new Soviet immigrants until the Israeli government promised that the money would not be spent on new settlements in territories occupied since 1967, including East Jerusalem.

Shamir said last week that he promised the United States that no Soviet immigrants are being settled in occupied territory and expressed annoyance in interviews in Israeli newspapers, that there was no recognition by the United States of the Israeli promises.

There was no direct response, but the United States and Israel disagree on what constitutes ''occupied territory.'' The United States includes East Jerusalem. The Israeli government, which annexed greater Jerusalem in 1967 does not.

Baker, who flew to Houston during the Labor Day weekend to help celebrate the birthday of his 96-year-old mother, has been preoccupied with the gulf crisis since he cut short a Wyoming vacation to return to Washington.

According to Israeli sources, the United States has asked Israel to maintain a low profile in the delicate process of trying to forge an alliance of many nations, including Arabs, to oppose the Iraqi invasion of Kuwait.

Shamir expressed support for the U.S. strategy in the crisis, and said this week, ''Israel has no offensive plans regarding any Arab country, be it even the most extremist. We want to live in peace in this region and unless attacked we will not harm anyone.''

However, Israeli Defense Minister Moshe Arens has said that any movement of Iraqi forces into Jordan would be regarded as a cause for war by Israel.

#90244u0769 09/01/1990 ~United Press International

MANILA, Philippines (SEPT. 1) UPI - Monsoon rains triggered flooding Saturday in the Philippine capital and surrounding areas, killing 12 people, sending thousands to safer ground and disrupting domestic air services.

The Manila weather bureau said typhoon Abe, which hammered Taiwan and was railing at China, and a low pressure area in the Pacific Ocean together pushed the rain-laden monsoon over the Philippine island of Luzon.

Police and relief officials said six people drowned in suburban Quezon City, two in neighboring San Juan town, two in Bocaue, and two in Manila.

The military Office of Civil Defense and the Social Welfare Department said 68,000 people were evacuated in the capital at the height of the flood.

OCD said typhoon-related landslides earlier in the week in the provinces of Benguet, Nueva Viscaya and Nueva Ecija north of Manila left 32 people dead. The Red Cross toll was 85 dead.

It was the second time in eight days severe flooding hit Luzon. On Aug. 24 floods raged through the capital, killing 13 people.

Wide areas of the capital were flooded Saturday, prompting Philippine Airlines to suspend domestic air services in the afternoon. International flights remained normal. Schools were ordered closed.

The U.S.-run television Far East Network also reported severe flooding at the American air base at Clark Field, where more than 8 inches of rainfall was recorded.

Bulacan province Gov. Roberto Pagdanganan said the towns of Bocaue, Malolos and Calumpit were under water, in some areas water was ''neck deep.'' He said 25 houses were destroyed in Bocaue, sending 120 people to evacuation centers.

Bocaue Mayor Lorenzo Gonzales said hundreds more were marooned in rice fields or on rooftops. He pleaded with authorities in Manila to send amphibian tanks to rescue them.

#90244u0816 09/01/1990 ~United Press International

(SEPT. 1) UPI - There's possible movement finally in getting foreign women and children out of Iraq. France says an Iraqi plane carrying Western hostages apparently will leave Iraq today, and France has given permission for the plane to land in Paris. Iraq indicated earlier the Boeing 747 would carry 237 women and children and six Americans being allowed to leave because they are sick. A French Foreign Ministry spokesman also says Iraq agreed ''in principle'' to let in a French plane to pick up additional hostages.

10 people were shot and injured this morning at a dance club in Brooklyn. Police speculate a man who may have had a disagreement with club workers returned with some friends and fired into a crowd outside the club. Police say none of the injuries are life-threatening. The shooting took place at

a club called the Dynasty in Brooklyn's Flatbush neighborhood. NO arrests have been made.

Vermont prosecutors want AIDS tests for an accused child molester who said he might have infected his victims with AIDS. The suspect, Norman Powers, was arrested Thursday in Salem, Oregon. After his arrest, he denied he had AIDS. But a Vermont prosecutor says if Powers does NOT volunteer for an AIDS test, authorities will ask for a court order forcing him to have one.

An 18-year-old college freshman considered a suspect in the five Gainesville, Florida, killings made his first court appearance yesterday, his hands and feet shackled. Edward Humphrey appeared on a charge of allegedly beating his grandmother. Police say he is only one of several suspects in the Gainesville killings, but they have NOT identified any others.

-30- 1810

#90244u0820 09/01/1990 ~United Press International

(SEPT. 1) UPI - New York Knicks player Patrick Ewing leads a parade in Virginia Beach, Virginia, today. It's one of the activities planned to keep an annual celebration by black college students peaceful. Last year, violence erupted during the Labor Day weekend and police clashed with students. Attendance is down this year. Other cities in the East are having similar celebrations that might keep people from visiting Virginia Beach.

A campaign manager for a Massachusetts congressional candidate issued a release Thursday saying regulators planned to close the Bank of New England. The release was later corrected and the manager resigned. But Banking Commissioner Howard Brown of neighboring Connecticut wants to bring criminal charges. The bank's stock fell to an all-time low after the release by the campaign of Democratic candidate Ted Dimauro.

Plans to build a large Islamic religious center in Lyon, France, are in jeopardy because of the Persian Gulf crisis. A spokesman for the mosque project says Arab nations that were to provide most of the money are preoccupied with the conflict. Kuwait and Saudi Arabia are among them. Islam, with two and one-half Million French followers, is France's second largest religion.

A woman walked into a Chicago police station and told an incredible tale. Police say Sheila Jones told them she and her husband killed her two children in 1986. The children were a two-year-old boy and a one- year-old girl. Then they put the bodies in their car trunk for about a year before transferring them to a steamer trunk. Eventually the trunk smelled so bad they bought a new one. Police have charged the couple with murder and concealing the deaths.

(SEPT. 2) UPI - Sports Digest:

AUTO SPORTS

Australian Mick Doohan Saturday powered his 500cc Honda into the pole position for the inaugural Hungarian Motorcycle Grand Prix. Doohan, consistently faster in each of the four practice sessions, clocked 1 minute, 43.971 seconds. Americans Eddie Lawson, on a Yamaha, and Kevin Schwantz, riding a Suzuki, were second and third.

COLLEGE

Richard "Itchy" Jones, long-time Southern Illinois University baseball coach, is leaving to coach University of Illinois. Jones, credited with building the Salukis into a perennial national contender with College World Series appearances in 1971, 74 and 77, has helped produce 13 major leaguers, including current Toronto Blue Jays pitcher Dave Stieb.

Some members of the Marquette men's basketball team have been declared ineligible for NCAA rule violations, Athletic Director Bill Cords said. Cords said in a release the violation stemmed from an "administrative error that involved student campus parking permits for some members of the team living on campus."

No further details were released and the number of players involved and their identities were not being released. Cords said an appeal has also been filed for the reinstatement of the players.

CYCLING

Mirko Gualdi rode nearly 45 miles alone Saturday to win the men's amateur road race title and give Italy its third victory at the World Cycling Championships at Utsunomiya, Japan. Gualdi, 22, completed the 108-mile, 12-lap course in 4 hours, 39 minutes and 17 seconds.

Compatriot Roberto Caruso was second and France's Jean-Phillipe Dojwa third. Lance Armstrong, 18 and competing in his first world championships, was the leading U.S. finisher in 11th place.

OBITUARY

Clifton "Sweetwater" Nathaniel, an early member of the Harlem Globetrotters who became one of the first black stars in pro basketball, was found dead in his cab Friday. He was 63. An unidentified man who was in the cab told

police Nathaniel was about to pull away from the curb, took a deep breath and passed out. Better known as "Sweetwater" Clifton, Nathaniel, was one of the first black players to star in the then-fledgling NBA.

TRACK

The French men's 4 x 100 meter relay team of Max Mornier, Daniel Sangouma, Jean Charles Trouabal and Bruno Marie Rose set a world record of 37.79 seconds in winning the gold medal at the European Track and Field Championships in Split, Yugoslavia.

#90244u0886 09/01/1990 ~United Press International

(SEPT. 1) UPI - A ''quick fix'' electronic by-pass operation failed to fix the problem with a telescope aboard the shuttle Columbia, forcing engineers to replace a faulty component. The replacement will push the already delayed astronomy mission launch back to the end of next week. The launch had been scheduled for early today but was pushed back to Wednesday because of the trouble. Now, officials say it probably will NOT come before Friday.

French officials say they have given permission for an Iraqi jetliner carrying Western hostages to land in Paris. A Foreign Ministry spokesman in Paris says officials were told the plane would carry a number of Western women and children, including 20 French citizens. Earlier, Iraq had indicated that the Boeing 747 would be carrying 237 women and children and six Americans who were being allowed to leave Iraq because of illness. The French spokesman says Iraq has agreed ''in principle'' to allow a French plane to land in Baghdad to pick up more civilians.

Arab League foreign ministers meeting in Cairo, Egypt, renewed a demand today that Iraq immediately withdraw its forces from Kuwait. At the end of an extraordinary two-day meeting, the League introduced a new element to its resolution... a call for the payment of reparations to Kuwait for damages caused by the Iraqi invasion. Eight Arab League members- including Iraq, Jordan and the Palestine Liberation Organization- declined to attend the meeting.

(SEPT. 1) UPI - Police in New York City say an irate dance club patron opened fire on a crowd in front of the Brooklyn night spot early today, wounding 10 people. Police say a preliminary investigation indicated that the gunman may have had a disagreement with club personnel and then returned with several friends. They say shots were fired into the crowd in the front of the club, wounding four men and six women. They say none of

the wounds was life-threatening. NO immediate arrests were reported.

The California State Assembly today effectively killed a proposal to dramatically alter the 1992 presidential primary election season by shifting the state's contest from June to March. The move to give the nation's most populous state a greater role in determining the major-party presidential nominees fell victim to partisan bickering over the state issue of citizen ballot initiatives.

#90244u0940 09/01/1990 ~United Press International

LONDON (SEPT. 1) UPI - Prince Charles was resting comfortably Saturday following three hours of surgery to repair a bone in his right arm that has not healed since he broke it in a fall from his polo horse two months ago, a hospital official said.

''The prince of Wales' condition is excellent,'' said Nigel Clifton, general manager of Queen's Medical Center in Nottingham. ''I am told that he is already moving his arm. He will experience some pain, but the pain is under control.''

Charles was expected to stay in a prhvate wing of the hospital for up to 10 days, a hospital spokeswoman said.

The prince's arm has been in a plaster cast since June 23 when he fell off a horse during a polo match. His upper arm bone was broken in two places, and the fracture nearer the elbow joint has failed to heal.

In a three-hour operation, a metal plate was permanently placed on the humerus to stabilize the bone while a graft taken from the pelvis and placed around the fracture works to promote healing, doctors said.

Doctors said a great deal of his recovery would depend on physiotherapy, and Charles may be left with a permanent restriction in the use of his elbow.

Despite being one of the richest men in Britain, the prince has insisted on being treated on the National Health System, rather than as a private patient. Certain amenities have been granted him, however.

A previously closed ward was reopened to accommodate the prince and his staff, which includes a chef. The prince is in a newly refurbished private room off the main ward.

All the prince's public engagements, including a planned official visit to Brazil in October with his wife, Diana, are off until his arm is fully recovered.

#90244u0951 09/01/1990 ~United Press International
SAN SALVADOR, El Salvador (SEPT. 1) UPI - Col. Rene Emilio Ponce took up the post of defense minister Saturday, replacing Gen. Rafael Humberto Larios who retired last month to become head of a newly founded military college.

''Col. Ponce has been named the new defense minister,'' the armed forces said in a statement.

Ponce, considered a moderate within the right-wing Salvadoran military and favored by the U.S. Embassy, assumes the important post at a time when the military is besieged with demands for internal reform.

His promotion came despite assertions by political analysts and some diplomats that it would be preferable to clear up army involvement in the slayings last Nov. 16 of six Jesuit priests before naming a new minister.

Col. Guillermo Benavides has been charged with ordering the killings, but Supreme Court Justice Mauricio Gutierrez Castro said Friday the court must investigate the possibility that the decision involved others higher up in the army.

Gutierrez said the judge handling the case will call on all those who attended a meeting of the military high command held hours before the operation to kill the priests was launched.

A number of the soldiers charged with murder in the case said they were also present during a search of the priests' residence at the University of Central America that was approved by President Alfredo Cristiani and the army chiefs of staff three days before the killings.

Cristiani acknowledged he approved the search after the government received reports of guerrillas on the campus at the height of a major rebel offensive, but stressed that the killings were different altogether.

#90244u0953 09/01/1990 ~United Press International
(SEPT. 1) UPI - Iraq says six ailing Americans will be among the dozens of foreign women and children allowed to leave on flights departing Baghdad today. The release of the half-dozen Americans apparently came at the urging of former presidential contender Jesse Jackson, in Baghdad for a meeting with Saddam Hussein.

Iraq's Foreign Ministry revealed the release of the six Americans in

Kuwait in a surprise announcement today. It was at first believed that the Americans were men... but by mid-day it was unclear whether the Americans are men or women. An Iraqi government source describes the decision as a ''humanitarian'' one made- quote- ''because they are ill.''

NASA engineers are replacing a faulty component aboard the shuttle Columbia today in work that will delay the ship's launch until late next week. The 10-day astronomy mission has already been postponed... with the space agency at one point planning to launch the ship early today.

In Bonn today, the opposition Social Democratic Party called for drastic military cuts in Germany as well as major changes in NATO strategy. The party says there is NO reason not to take drastic steps toward disarmament since there is NO conflict anymore between Eastern and Western Europe.

Former hostage Frank Reed says he is concerned that the attention on foreigners held in Iraq and Kuwait will detract from efforts to free Westerners in Lebanon. Reed says the spotlight on the plight of those caught in the Persian Gulf crisis- in his words- ''just pushes the other hostages further and further away.''

The federal Centers for Disease Control says it will NO longer breed monkeys after an outcry by animal rights activists over the deaths of 14 monkeys. The animals died in their cages last month at a facility in Lawrenceville, Georgia, during a heat wave that had the mercury climbing near 100 degrees.

#90244u1019 09/01/1990 ~United Press International

GENEVA (SEPT. 2) UPI - Hikes in air fares of between five and eight percent will not take effect before mid-October at the earliest because computers worldwide muat be re-programmed, the International Air Transport Association said Saturday. The same condition will hold true for cargo increases of seven percent, IATA officials said.

The price increases were agrees at a three-day meeting of executives of 56 of the world's leading airlines and announced in the early hours of Saturday. The airlines themselves had called or IATA to coordinate a fare and freight rise in the wake of rising fuel prices occasioned by the Middle East crisis, IATA spokesman John Brindley said.

Intra-European fares will go up by five percent but most trans-continental fares will increase by seven percent, with those to and from the United States rising between seven and eight percent. Rates to and from Japan have yet to be decided.

Flights to and from Venezuela, a member of OPEC and a leading supplier of

aviation fuel, will rise by only three percent. Airline sourcs said special dispensations were given on fares to and from Saudi Arabia, Iran, and Yemen.

(SEPT. 1) UPI - .

Iraq says six ill Americans in occupied Kuwait will be among the Westerners allowed to board planes departing with dozens of foreign women and children today. The decision to release the sick Americans apparently came at the request of Jesse Jackson. Iraq's foreign ministry says the American politician flew to Kuwait aboard an Iraqi airplane to accompany the six back to Baghdad.

The shuttle Columbia will NOT be getting off the ground in the next few days. NASA engineers tried and failed in efforts to fix a telescope aboard the ship, with the necessary repairs expected to delay launch until late next week. The space agency at first hoped the ship would takeoff on a 10-day astronomy mission today... but instead repair work is under way at Cape Canaveral.

Police in Gainesville, Florida, say they are NOT close to making an arrest in the killings of five college students. Police say investigators are looking at several potential suspects, inlcuding a University of Florida freshman jailed on charges of beating his grandmother. A spokeswoman says it is ''frightening'' that there are so many possible suspects for such a heinous crime.

Colombia is changing its tactics somewhat in fighting the nation's cocaine traffickers. Top administration officials say President Cesar Gaviria has halted the wholesale extradition of suspected traffickers to the United States. The officials say extraditions will NO longer be automatic, saying the government that took office on August 7th will stop most extraditions.

#90244u1148 09/01/1990 ~United Press International

SOFIA, BULGARIA (SEPT. 2) UPI - Residents of the Bulgarian capital formed long lines outside grocery stores with food ration coupons in hand Saturday to redeem limited amounts of sugar and other basics in short supply. Rationing of sugar and other basic foodstuffs is being introduced in Sofia, as well as other cities in the country.

Beginning Saturday, inhabitants of Sofia can only purchase limited amounts of sugar using coupons, which were distributed according to place of residence. Authorities plan to introduce coupons redeemable for five other

staples.

Despite assurances by the authorities that the coupons are backed by goods long lines formed in front of Sofia grocery stores. Discontent on the part of housewives and others lining up was heightened by rumors that delivery trucks and store managers do not distribute all of the sugar they receive.

Currently in Bulgaria, soap powders, washing liquids and other detergents are not on sale. Officials explain that when they have amassed sufficient quantities, then they will start rationing them. Soon cooking oil will be offered with coupons. Also under consideration is the rationing of dairy products like cheese.

Government officials say the reason for the rationing of oil was not due to lack of supplies, but because of shortages in packaging such as bottles and bottle caps.

President Zhelyu Zhelev, meanwhile, began consultations Saturday with a wide range of political forces and parties to find a formula for forming a new government. The opposition Union of Democratic Forces has refused to take part in a coalition government with the ruling Bulgarian Socialist Party.

Former Prime Minister Andrei Loukanov was chosen last week to form the new government. He said that the government must be above the party issues and that he aimed to safeguard civil peace.

Zhelev also has stressed that in forming the government, Loukanov should take into consideration the internal situation and the attitude of the international community toward Bulgaria.

The suggestion follows the controversy surrounding the arson and vandalism of the party headquarters last Sunday night. A videotape of the events was aired on the popular Panorama program Saturday.

In one scene of the videotape, a vandal inside the burning building was filmed as he stuffed packets of sugar into a bulging duffle bag. He looked at the camera and said, "Why not steal it?"

#90244u1207 09/01/1990 ~United Press International

(SEPT. 1) UPI - President Bush says he will be ''delighted'' to see Mikhail Gorbachev next weekend, adding that he and the Soviet leader ''have many subjects to discuss.'' Bush announced the September 9th summit from his vacation home in Kennebunkport, Maine. A simultaneous announcement of the Helsinki meeting also was made on Soviet television in

Moscow. The Persian Gulf crisis is expected to be a major topic of the talks. .

Bush says he approached Gorbachev more than one week ago about setting up the meeting. But Bush dismisses any suggestions that the Soviet Union may play a mediating role in resolving the crisis involving its old ally. In Bush's words- ''I doN'T think the Soviets see themselves as having a mediating role.'' .

Moammar Gadhafi wants to replace U-N troops to replace Iraqi forces in Kuwait... and Arab and Islamic forces to replace U-S troops in Saudi Arabia. The Libyan leader outlined his plan in a speech today to Libya's General People's Congress. Gadhafi is trying to find an Arab solution to the crisis.

A South African judge today recommended that the police be investigated for unjustly shooting and killing 11 black anti-apartheid protesters and wounding up to 281 others. The judge in Johannesburg was appointed by President Frederik de Klerk in March to probe the police action. .

South Africa's rival black factions signed a historic accord in their region of strife-torn Natal province, paying the way to ending years of conflict. The Inkatha movement and the African National Congress signed the pact condemning violence in hard- hit townships to the north of the Indian Ocean province.

#90244u1281 09/01/1990 ~United Press International

(SEPT. 1) UPI - The launch of the shuttle Columbia has been put off until late next week. NASA today announced that its fix-it job on a faulty part didn't work... so the part must be replaced and run through a full battery of tests. The part relays data on super-cold argon used to operate an X-ray telescope on the shuttle.

A Gainesville, Florida, police officer says ''it's frightening'' there are so many viable suspects in the killings of five students this week. Investigators say one ''valuable'' suspect is an 18-year-old University of Florida student... arrested on Thursday on charges of beating his grandmother.

Authorities in New York say a retired prison guard is wanted in the slaying of ex-state Senator Vander Beatty. A man shot Beatty in his Brooklyn campaign office on Thursday and left in a car found stalled and abandoned three blocks away. Police say the owner of the car is a friend of Beatty's who was mad about losing a child-support dispute.

Most Americans are enjoying warm sunshine on their first full day of the

Labor Day weekend... but some folks weren't so lucky. Scattered showers roamed the South... soaking coastal Louisiana. And fog blanketed parts of New Hampshire and Vermont as morning temperatures lingered in the 50's.

-30- 1431

#90244u1508 09/01/1990 ~United Press International

(SEPT. 1) UPI - An Iraqi Airways plane carrying more than 70 women and children flew out of Baghdad today and landed a short time later in Amman, Jordan. Jordanian airport officials say the craft carried mostly Japanese nationals. At least one other Iraqi Airways plane- expected to carry more than 145 Britons and Americans- is scheduled to leave Baghdad for London and Washington today. .

British officials in London say the plane that left Iraq may have been delayed for other passengers arriving from Kuwait. A British Foreign Office spokesman says officials are NOT sure what's happening. As he put it- ''We're back to the usual state of confusion.'' Only a handful of the thousands of foreigners trapped by Iraq have been allowed to leave since Iraq said Tuesday that it would free all foreign women and children. .

In Kennebunkport, Maine, President Bush today assailed the piecemeal release of Westerners in Iraq and Kuwait, calling it a ''despicable performance'' by Saddam Hussein. Bush also remains skeptical about prospects for a diplomatic solution, citing a lack of ''flexibility'' by Saddam. .

Bush spoke to reporters while announcing that he and Soviet President Gorbachev will meet next Sunday in Helsinki, Finland, for talks on the gulf and other issues. Bush says the talks are a test of the post-Cold War spirit of co-operation forged at the super- power summit three months ago in Washington.

A study finds that malnutrition and infectious disease account for half of the infant deaths in Mexico. A Mexican government report published today says 17-Million Mexicans live in extreme poverty. Only one percent of children in rural areas have milk, meat, eggs and fish on a regular basis.

#90244u1711 09/01/1990 ~United Press International

PORTLAND, OR (SEPT. 2) UPI - A woman and her boyfriend face up to 20 years in prison following guilty pleas to sexual abuse of her three young children in a case the prosecutor called the "most horrifying" of its kind she's ever seen.

Anita Ann Meyers, 27, and Timothy Brian Davis, 28, abruptly changed their pleas to guilty Friday just as they were to be tried on more than a dozen criminal charges.

Multnomah County Circuit Judge James Ellis immediately sentenced the Portland couple to five to 20 years in prison and ordered that they not be released until they complete an intensive treatment program for sex offenders.

"This is the most horrifying case of sexual abuse of children I have ever seen," Deputy District Attorney Jill Otey said. "These people had sex orgies with one-, four-, and seven-year-old children."

Otey said the damage to at least one of Meyers' children is irreversible. The boy, now 6, is filled with rage and talks of raping people when he gets older. She said the boy already has tried to sexually assault her and two caseworkers. "I don't think this child is capable of responding to any human warmth and attention except by respondiung sexually and aggressively " Otey said.

Meyers and Davis each pleaded guilty to four crimes that took place in 1987, including two counts of first-degree sodomy and one count of first-degree rape. The rape charge involved making Meyers' younger son, then four, have sex with his one-year-old sister.

Meyers and Davis also pleaded guilty to distributing drugs to a minor, a charge that stemmed from having the older son, seven at the time, puff on a marijuana pipe, Otey said.

Davis said nothing during the hearing, other than to mutter "guilty" to each of the four charges. Meyers spoke only briefly, crying as she pleaded

guilty, then again as she stood and faced her oldest son, seated in back of the courtroom. "I'd just like to tell my son that I love you and I wish you luck. That's it," she said.

#90244u1762 09/01/1990 ~United Press International

(SEPT. 1) UPI - A West German foreign ministry official says a Lufthansa airliner carrying 311 women and children has left Baghdad and is headed to Frankfort. Among those aboard the flight are at least 60 Americans and about as many Germans. There's also word that an Iraqi Airways plane is carrying at least 145 Westerners, including Americans, to London and Paris. The releases are the first significant moves by the Iraqi government to grant freedom to an estimated 10-thousand detained Westerners.

.

The Persian Gulf crisis has prompted the superpowers to schedule a summit next Sunday. President Bush will meet his Soviet counterpart... Mikhail Gorbachev... in Helsinki, Finland, for what Bush says will be a ''free-flowing discussion.'' Speaking to reporters during the final weekend of his New England vacation, Bush says the suprise gathering will have ''NO special agenda.'' UNlike Washington, Moscow has distanced itself from the use of force in settling the situation.

Canadian soldiers today moved into a Mohawk reserve near Montreal. The army says personnel carriers and 300 armed troops advanced after two Mohawks were beaten by other tribal members overnight. An army spokesman says the move is NOT aggressive but is to protect people in the area. The spokesman says troops are dismantling barricades without resistance. Negotiations over the land dispute between the government and the Indians remain at a standstill.

-30- 1616

#90244u1949 09/01/1990 ~United Press International

(SEPT. 1) UPI - .Two days of talks between the U-N secretary general and Iraq's foreign minister have yielded NO apparent breakthroughs in the Persian Gulf crisis. De Cuellar is scheduled to discuss the six-and-a-half hours of talks at a news conference tomorrow morning.

President Bush says a week of behind-the-scenes maneuvering has resulted in a surprise meeting with his Soviet counterpart next Sunday. Bush and Soviet leader Mikhail Gorbachev will have lunch September 9th in Finland to discuss ''international and bilateral matters.''

Tensions may cool in South Africa's violence-torn Natal province. Today,

the African National Congress and the rival Inkatha movement reached an UNprecedented peace accord. The two sides also called on their national organizations to seek peace pacts throughout the country.

Pope John Paul kicked off an 11-day African visit by urging the international community to join in the battle against AIDS. John Paul also called for global assistance to combat Africa's refugee problem. Africa is estimated to have five-Million refugees and another 13-Million displaced people.

#90244u2039 09/01/1990 ~United Press International
(SEPT. 1) UPI - The airport in Frankfurt, West Germany, was witness to tearful reunions as a plane carrying 311 former Iraqi detainees arrived from Baghdad. Aboard the Lufthansa airliner were 60 Americans, 71 Germans and citizens of 20 other countries. Despite the joy experienced in Frankfurt, it is estimated that some three-thousand Americans remain in

Iraq against their will. Iraqi leader Saddam Hussein has said these so-called ''guests'' will be placed at strategic sites to prevent possible U-S military strikes.

.

In Washington, a spokesman for the Federal Aviation Administration says an Iraqi Airways plane is slated to arrive in the nation's capital tomorrow morning. The F-A-A says 50 Americans will be aboard the flight, which also has stops planned in Paris and London. It is NOT clear if the craft will pick up Iraqi nationals during its layover at Dulles International Airport.

Three men are in custody in connection with an early morning shooting spree at a Brooklyn club. New York police say one of the three men was refused admission into the night spot. He later returned with two friends and a small arsenal of weapons. The trio allegedly fired upon a crowd outside the popular club. 10 people were injured, NONE critically, before the assailants drove off.

-30- 1449

#90244u2043 09/01/1990 ~United Press International

(SEPT. 1) UPI - Police in Florida say they are NOT even close to an arrest in the slayings of five college students in Gainesville this week. But they have plenty of suspects... so many that one officer calls it ''frightening.'' The officer says one 18-year-old charged with beating his grandmother Thursday is an ''extremely valuable suspect.'' But investigators warn people in Gainesville NOT to let their guard down.

Young black students partied in the town of Virginia Beach, Virginia, today... with NONE of the violence that marred last year's Labor Day weekend. The number of students was much lower than a year ago when police clashed with revelers. Some of last year's participants charged the city with over-reacting because of the crowd's race. One 19- year-old said this year's security was- in his words- ''a little overboard.'' But he added that was O-K- quoting again- ''if it prevents a riot.''

-30- 1070

#90245d3800 09/02/1990 ~French/German News Agency

FRANKFURT (SEPT. 2) - Hundreds of women and children began arriving in West Germany, France, and Britain on flights from Iraq early Sunday - clearly relieved, but with worry for husbands or fathers left behind etched on their faces.

On the first flight to arrive, 316 people from 22 countries - mainly West Germans and Americans - landed in Frankfurt aboard a West German government-chartered jumbo jet.

Shortly afterwards, 20 French and an American were taken off an Iraqi jumbo jet which stopped over in Paris before flying on to London to discharge another 284, mainly Britons. Another Iraqi airliner had earlier landed in Amman with 68 Japanese nationals on their way to Tokyo.

There were emotional scenes in Frankfurt as relatives and friends greeted the women and children from 22 nations who had been kept for days in uncertainty in Baghdad before being finally allowed out.

They streamed off the aircraft, many clutching small children, herded by West German government officials, most looking weary and showing the strain of days of uncertainty about being able to leave.

Almost none were prepared to talk, for fear of endangering those left behind only a few hours before at tearful farewells in Baghdad before the flight aboard the crowded jumbo, in which small children sat on mothers' laps to create more room for the departing.

Gisela Jassim, a Berlin woman whose Iraqi-born husband was also allowed to leave - one of just six men on the flight - said the supply situation in Baghdad was not desperate and as far as she could tell, most people there still did not think there would be war. West German government officials said there were 66 West Germans, 55 Spaniards, 23 Dutch, 17 Britons, and 14 Swedes aboard the flight.

A dutch woman with a small child said her husband had been taken by Iraqi authorities back to the oil refinery where he had been working, and a West German government official said at least ten West German men were known to be held hostage at strategic points. "They were at the airport and couldn't come with us," said another West German woman clearly close to tears of the menfolk who had been left behind.

A british woman aboard the flight said she had been in Kuwait until Friday, and had left her husband there after being allowed out to Baghdad by bus. She said Iraqi troops had been courteous at what had once been the Iraqi-Kuwait border. The past few weeks had been very tense, with foreigners in Kuwait "waiting at any time for a knock on the door".

In London, a teenage boy among those arriving said that Iraqi troops had well treated everyone he saw. "They made sure they treated us well," he added. He said he and his mother and sister had been with his father until just before they left. "I expect he's at some military installation now," the boy said. "My dad said it was better for me and my mum and sister to come back. It's been a pretty rough four weeks."

Also aboard the flight arriving in London were a group of sick American men whose release had been negotiated in Iraq by former U.S. presidential

candidate Jesse Jackson.

It was not immediately clear when the next planeloads of women and children would be allowed to leave by Iraqi authorities, though no more were expected Sunday.

In Tokyo, the Japanese Foreign Ministry issued a statement deploring that a total of 143 Japanese men were still detained at unknown places by Iraqi authorities.

Baghdad meanwhile informed the Japanese embassy in Baghdad that it would allow 12 family members of Japanese diplomats to leave the Iraqi capital later Sunday.

MANILA (SEPT. 2) - Philippine Foreign Secretary Raul Manglapus said on his return from a Middle East tour Sunday that Baghdad allowed him into Kuwait last week for a visit to the Philippine Embassy in the Iraqi-occupied emirate.

Manglapus gave scant details of his visit to Kuwait City, saying only that he stayed there for one day and that he did not see soldiers surrounding the U.S. Embassy.

He told reporters he also met with several thousand Filipinos at the Philippine Embassy compound who were waiting to be evacuated. Informed sources here said the visit took place Thursday.

Manglapus said that during his visit to Baghdad, Iraqi Foreign Minister Tareq Aziz told him Manila's plan to take the stranded Filipinos out of Kuwait and Iraq through Iran could not be implemented for the moment.

The proposal, to which Teheran had agreed earlier, was "not turned down outright" but "I understand the problem is security," he said. Iraq and Iran fought an eight-year war that ended in a truce in 1988.

There were about 60,000 Filipinos in Kuwait and 5,000 in Iraq before the August 2 Iraqi invasion. Although the Filipinos have not been detained - unlike Western nationals - less than a tenth of the total have managed to return home.

Manglapus said Aziz proposed that Iraqi Airways planes be used to fly the Filipinos out or they could be evacuated by sea via the Iraqi port of Basra. He said Manila considered the first plan "unrealistic" because the Philippines could not afford to subsidize the plane fares while the second proposal would mean the vessels would "then have to go through the

(U.S.-led naval) blockade."

BELGRADE (SEPT. 2) - Twenty Albanians, most of them under 30 years old, crossed into Yugoslavia illegally overnight saying they could no longer bear the harsh living conditions and deprivation at home, the Tanjug news agency reported Sunday.

The 20 fled over the border near Plav in Montenegro where 50 other Albanian refugees arrived in July overland and by sea.

Under Yugoslav law, all the Albanians will spend a month in prison for entering the country illegally. After their release, they will be taken in charge by the Belgrade office of the U.N. High Commissioner for Refugees.

KABUL (SEPT. 2) - Afghan resistance guerrillas slammed at least five rockets into Kabul Sunday, a day after the government shifted several Scud missiles to their silos to target rebel positions.

A government spokesman here said some of the missiles fell around the Scud silos located near the luxury Intercontinental Hotel. The spokesman said some rockets also crashed into two residential districts, causing some damage. He could not say if there were any casualties.

More than a dozen blasts were heard Sunday in different areas of Kabul but other government officials said some of them were outgoing rockets fired by the Afghan army at rebel bases around the capital.

Taxi drivers and residents said at least five people were killed in one area by the rocketting. These reports could not be immediately confirmed. The rocket attacks, after a lull of six days, were launched from the west of the capital.

"We cannot prevent the rockets from coming in ... It is a war of rockets," the spokesman said. Sunday's attacks occurred a day after the Kabul garrison moved several Scud missiles to silos near the Intercontinental, witnesses said.

Kabul has used these Soviet-supplied surface-to-surface missiles, which have a maximum range of 250 kilometers (150 miles), to target mujahedeen positions in several provinces.

LAHORE, PAKISTAN (SEPT. 2) - Railway staff foiled an attempt to blow up a Pakistani train Sunday following four bomb blasts in the past two days that left at least 13 people dead and more than 60 injured, officials said.

Plastic explosives were tied to both sides of the main line track near Wazirabad railway station in Punjab province, about 180 kilometers (110 miles) south of here, railway officials said. A bomb disposal squad defused the explosives just before the usually crowded Awam Express train was scheduled to pass the spot, the officials said.

At least three other passenger trains, due to cross through the same booby-trapped section, were stopped pending clearance of the track which took three hours, they said.

A railway lineman, Mohammad Nawaz, detected the explosives and informed the authorities and has been given a "handsome" cash award for his vigilance, the railway administration said.

On Thursday, a bomb exploded in a passenger train near here, killing eight people and injuring more than two dozen. Two more bombs went off the same day in Punjab's industrial city of Faislabad and a rural market town of Muridke near Lahore, killing five people and injuring over 30.

The seizure of plastic explosives near Wazirabad followed a bomb blast in the same district on Saturday in which six people were injured. No arrests have been made so far.

Interior Minister Zahid Sarfraz has blamed the Pakistan Peoples Party (PPP) of ousted Prime Minister Benazir Bhutto for the new wave of blasts. The party has denied the allegation, calling it part of the interim government's campaign to defame the PPP ahead of elections promised on October 24.

#90245d5030 09/02/1990 ~French/German News Agency
WASHINGTON (SEPT. 2) - Some 50 U.S. citizens freed by Iraq arrived here from Baghdad Sunday aboard an Iraqi Airways jetliner. The green and white Boeing 747 touched down at Dulles International Airport in Maryland, just northwest of Washington, at around 9:40 a.m. (1340 GMT).

Medical personnel loaded one of the female passengers into an ambulance. Although neither the woman nor her problem were identified, there were reports out of Baghdad that a female foreigner had suffered a broken hip in a traffic accident in the Middle East.

Some 3,000 Americans were trapped in Kuwait and Iraq after Iraqi troops invaded Kuwait August 2 and Baghdad prohibited thousands of foreigners from leaving.

The group of U.S. citizens arriving here left Iraq at 2200 GMT Saturday, after The Rev. Jesse Jackson visited Iraq and Kuwait last week and intervened with Baghdad to secure the hostages' release.

Jackson estimated that 44 to 50 U.S. citizens were aboard the jetliner that landed here. He said ten of the American men were suffering various illnesses, such as heart disease and diabetes.

The passengers were greeted by family members, U.S. officials, and Mohamed Al-Mashat, Iraq's ambassador to the United States. A State Department spokesman said Al-Mashat explained he was at the airport to ensure that that the Iraqi Airways crew had no problems. Jackson suggested that Al-Mashat's presence was "a desperate attempt to make some point of contact."

Al-Mashat, speaking to journalists, blasted Western news coverage of the Gulf crisis and offered conditions for the release of all foreigners held by Iraqi authorities.

"When we promise something, we deliver," he said, referring to Iraqi President Saddam Hussein's promise Tuesday to permit all foreign women and children to depart Iraq or Iraqi-occupied Kuwait.

Al-Mashat insisted that the hostages' return here Sunday was "an example and evidence that we have honored our commitment." "This is the best answer to the skeptics, to the belligerent talk, to the negative talk about Iraq," he said. "It's not what the mass media are saying against us, unfairly and unjustly.

"As far as the men are concerned, we are willing to let them go, providing the United States will give us a guarantee that they are not going to strike Iraq," Al-Mashat said.

U.S. officials have accused Baghdad of relocating Western citizens to Iraqi military installations to deter a possible attack by U.S. and allied forces gathered in the Middle East.

The multinational forces were deployed to enforce a U.N. embargo against Iraq and occupied Kuwait and to defend Saudi Arabia from a possible Iraqi attack.

Al-Mashat indicated that the embargo was another reason Iraq was holding male foreigners. "They are there because - as a result of your threat to us - you have besieged our country and denied our children milk. You have

denied our people food," he said.

#90245u0118 09/02/1990 ~United Press International
(SEPT. 2) UPI - Freedom has come for some 500 foreigners previously held against their will in Iraq. Baghdad allowed three planeloads of NON-Iraqis... mostly women and children... to leave Iraq Saturday. It is NOT clear how many U-S citizens were among the group granted freedom. 60 Americans traveled to West Germany aboard a Lufthansa flight that carried 316 people out of Iraq. Several of those interviewed in Frankfurt said they were NOT harassed while in Iraq.

Canadian troops Saturday night were reported to have assume strategic positions inside a Mohawk reservation where militant tribe members have held authorities at bay for seven weeks. The deployment of several hundred combat-ready forces to the reserve in Oka, Quebec, appeared to catch the Indians off guard. This was seen in the relative ease troops had in trapping militants in a community center on the reserve. Troops also removed barricades put up by Indians at a key commuter bridge outside Montreal.

Guatemala Saturday accused rebels of growing and dealing illicit drugs. Government forces say a recent raid using U-S Drug Enforcment Administration helicopters turned up 10-Million opium poppy plants. Officials valued the confiscated crop at 20-Million dollars. An army official said weapons and guerrilla propaganda also were found near the drug plantations.

Vietnamese Prime Minister Do Muoi says Vietnam's Communist Party will continue market reforms... but he cautions the party will guard against so-called ''hostile forces.'' Security officials report foreign intelligence agencies and overseas Vietnamese groups are spreading propaganda to topple the communist hierarchy. Despite the alleged outside intervention, the prime minister reiterated Vietnam's interest in normalizing relations with Washington and Beijing .

#90245u0122 09/02/1990 ~United Press International
(SEPT. 2) UPI - Britain's Prince Charles was reported resting comfortably Saturday following surgery to repair his broken right arm. The prince's arm did NOT heal despite being in a cast after a fall from his polo horse two months ago. A metal plate has now been permanently placed on the bone and a graft from the pelvis placed around the fracture. A previously closed ward in a London hospital was reopened to accommodate the prince and his staff... which includes a chef.

Police in Portland, Oregon, Friday caught their man red-handed... thanks to a quick-thinking bank teller. Friday afternoon, the Security Pacific Bank was robbed. The clerk handed over a bag of bills that contained a tear gas canister and a packet of red dye. Several minutes after leaving

the bank, the suspect noticed his booty was smoking. But when he tried to snuff the smoke, he wound up coating himself with dye. He was nabbed by Portland authorities moments later.

(SEPT. 2) UPI - The home stretch is in sight and the Cincinnati Reds' top thoroughbred is starting to feel his oats. "September is here," announced Eric Davis after going 3-for-4 with a home run and three RBI Saturday to lead the Reds to an 8-1 rout of the Chicago Cubs and extend Cincinnati's lead in the NL West to 6 1-2 games.

"Everybody's pushing now, trying to rise to another level," said Davis, whose 18th home run of the season, a towering shot to left field, gave the Reds a 1-0 lead in the second. "This is when you win or lose the division. If this doesn't get you going, then you don't belong here."

Davis has certainly gotten it going of late. After struggling much of the season, he has hit in eight of his last ten games (15-for-36, .417), with five doubles, three home runs, eight RBI, and one run scored.

In that stretch he has brought his average up from .223 to .242. "He's been swinging the bat great for the last week or so," Cubs Manager Don Zimmer said. "He's got too much talent to be hitting .220."

"Davis got us going today," Reds Manager Lou Piniella said. "It's amazing

how when he's swinging the bat well, everything falls into place offensively for us."

Things have been falling into place for Rick Mahler as well. The veteran right-hander went the distance, giving up one run on four hits to improve to 7-5. Since moving back into the starting rotation on Aug. 21 after Tom Browning sprained an ankle, Mahler has made the most of his opportunity, posting a 3-0 record and a 1.58 ERA in three starts.

"I was throwing a lot of fastballs today," said Mahler, who got 14 groundball outs and struck out three. "I had good control of my fastball, and fortunately they hit a lot of balls on the ground and our infield played outstanding defense. "This is the fun part of the year. Not only me but everybody on this team has to go out and turn it up a notch."

-- AROUND THE NL --

Elsewhere in the National League: New York topped San Francisco 6-5, Houston nipped Pittsburgh 2-1 in 10 innings, Montreal blanked Los Angeles 6-0, Philadelphia swept a double-header from San Diego, 3-2 and 2-1, and Atlanta edged St. Louis 4-3.

Mets 6, Giants 5

At New York, Darryl Strawberry belted his 30th homer of the season and collected his 1,000th major-league hit and Tommy Herr had a solo shot to lead the New York Mets into first place by a half-game in the NL East. Rookie Julio Valera, 1-0, pitched six innings in his major league debut. John Franco pitched 1 2-3 innings for his 31st save.

Astros 2, Pirates 1, 10 innings

At Houston, pinch-hitter Karl Rhodes singled home Craig Biggio with two out in the 10th inning to knock Pittsburgh out of first place. The Pirates have lost six of their last seven games. Ted Power dropped to 1- 3. Dave Smith, 5-5, worked two hitless innings for the victory.

Expos 6, Dodgers 0

At Montreal, Andres Galarraga hit a two-run homer and Oil Can Boyd pitched a three-hit shutout. The loss dropped the second place Dodgers 6 1-2 games behind the Cincinnatti Reds in the NL West. Boyd, 8-5, pitched his third complete game of the season. Mike Hartley, 5-2, lost for the first time as a starter.

Phillies 3, Padres 2, 10 innings (1st game)
Phillies 2, Padres 1, (2nd game)

At Philadelphia, John Kruk singled home Mickey Morandini with two outs in the 10th inning to give the Philadelphia Phillies a 3-2 victory over the San Diego Padres in the first game of a doubleheader. Three Philadelphia pitchers limited the Padres to three hits.

In the nightcap, Darren Daulton singled home John Kruk with two outs in the eighth inning to complete the sweep and send the Padres to their fifth straight loss. Darrel Akerfelds, 5-1, pitched one inning and Roger McDowell hurled the ninth for his 18th save.

Braves 4, Cardinals 3

At Atlanta, Ron Gant slid home with the go-ahead run on a fielder's choice in the eighth inning. Tony Castillo, 5-1, was winner, and Kent Mercker notched his fifth save. Ken Hill dropped to 4-3.

#90245u0225 09/02/1990 ~United Press International
(SEPT. 2) UPI - Bobby Witt missed the strike zone plenty of times Saturday night but made it into the win collumn nevertheless. Witt amassed ten walks over seven innings of work but was still able to lead the the Texas Rangers to a 3-2 victory over the Oakland Athletics.

Witt, whose tied a team record for bases on balls, also collected ten strikeouts and pitched out of three bases-loaded jams to improve his record to 14-8.

"He got off the hook, that's all," Ricky Henderson said, who went down on strikes against Witt in the fourth with bases loaded. "We left too many runners out there that we didn't bring across the plate. That means that you beat yourself. He didn't beat us. He put them out there for us."

Rangers Manager Bobby Valentine seemed baffled that his ace starter missed the strike zone so much. "It's amazing, he only threw 130 pitches too, just amazing," Valantine commented. "He had great stuff today. Geez, he was just missing."

The right-hander gave up both of Oakland's runs and four hits while improving to 11-0 in his last 12 starts." "I'm trying to go out there and be consistent and keep the team in the game," Witt said about his 11th straight victory. "In the past I'd go out there and get roughed up early and be out of there, but now I'm more able to battle through it." Kenny Rogers pitched the final 1 2-3 innings for his 13th save.

A's starter and loser Curt Young, 7-5, lasted just 2 1-3 innings and allowed three runs and two hits while walking a season-high six batters. Todd Burns pitched 7 2-3 innings of one-hit relief.

-- AROUND THE AL --

Elsewhere in the American League, Chicago topped California 9-5; Boston blasted New York 15-1; Toronto blanked Cleveland 8-0; Detroit beat Minnesota 9-5; Milwaukee stopped Baltimore 4-3 and Seattle blanked Kansas City 3-0.

White Sox 9, Angels 5

At Anaheim, Calif., Bobby Thigpen pitched out of a bases-loaded jam in the ninth inning to gaain his 46th save and tie the major-league record saves in a season and guide Chicago to within 5 1-2 games of first-place Oakland in the AL West. Melido Perez, 12-12, allowed two runs on seven hits over the first seven innings. Rookie Joe Grahe, 1-2, took the loss.

Red Sox 15, Yankees 1

At Boston, Ellis Burks hit two homers and Mike Greenwell added an inside-the-park grand slam to boost Boston to its ninth-straight victory. Mike Boddicker improved to 14-8. The Red Sox pounced on Andy Hawkins, 5-11 for five runs - including two homers - in one-third of an inning.

Blue Jays 8, Indians 0

At Cleveland, Fred McGriff collected a career-high five hits, including his 29th homer of the season, and Todd Stottlemyre pitched 7 1-3 scoreless innings to lead Toronto. Stottlemyre, 12-14, gave up six hits, struck out three and walked one. Knuckleballer Tom Candiotti gave up six runs and fell to 13-10.

Tigers 9, Twins 5

At Minneapolis, Travis Fryman collected three RBI and rookie Randy Nosek won in his first start of the season to help Detroit to their fourth-straight. Nosek, 1-0, worked six-plus innings, yielding four runs and six hits and Mike Henneman earned his 19th save. Allan Anderson fell to 6-17.

Brewers 4, Orioles 3

At Milwaukee, Cal Ripken Jr.'s first throwing error of the season set up a two-run single by Robin Yount to propell the Brewers. Ripken's first throwing error since Sept. 24, 1989 helped Brewers' starter Teddy Higuera, 9-6, gain the victory. He allowed three runs over 7 2-3 innings. Loser Ben McDonald fell to 5-4.

Mariners 3, Royals 0

At Seattle, rookie Russ Swan and Bill Swift combined on a two- hitter and Jay Buhner's RBI single keyed a three-run seventh inning. Swan, 2-2, lost his no-hit bid in the seventh and Swift notched his fourth save. Steve Crawford, 5-4, took the loss.

MANILA, PHILIPPINES (SEPT. 2) UPI - Influential Roman Catholic bishops threw their support Sunday behind President Corazon Aquino's proposed cease-fire with communist rebels, but cautioned the government to study the offer carefully.

Defense Secretary Fidel Ramos, meanwhile, called on Filipinos Sunday to unite in the face of extremist threats against the government and the economic difficulties the nation is undergoing because of the devasting July 16 earthquake and the Persian Gulf crisis. Ramos spoke to some 50,000 Filipinos who attended the annual "Walk for a Cause" march at the seaside Rizal Park.

The most Rev. Teodoro Bacani, spokesman for the Catholic Bishops Conference of the Philippines, said the church leaders in Asia's only Christian nation preferred a "peaceful way" to settle the nation's bloody 21-year insurgency.

"The ways to peace should be peaceful as much as possible so we are happy if ever there are small chances like that (proposed cease-fire)," said Bacani in a radio interview.

"But we also understand that the government should study very well those offers of a cease-fire because it might be used to destroy peace. You know God has said, 'Be wise as serpents, not only simple as doves'."

Aquino's security advisers began discussions Saturday with groups proposing the peace talks and agreed to pursue the effort "with utmost caution." The peace advocates were represented by Sen. Wigberto Tanada and leaders of church and human rights groups.

Peace talks with the 19,000-member New People's Army, the armed wing of the outlawed Communist Party, collapsed in February 1987 over rebel demands for power-sharing.

Officials said a truce with rebel soldiers led by former Army Col. Gregorio Honasan also was mentioned, but further discussions were discontinued. Honasan terminated a cease-fire he unilaterally called after the quake and has ordered the resumption of attacks against the government.

In another development, the military said six followers of another right-wing leader, Col. Alexander Noble, and four troopers were killed in a gunbattle Saturday in Agusan del Sur province, 500 miles south of Manila.

A former deputy chief of Aquino's security unit, Noble joined the December uprising and later escaped to Mindanao in a bid to establish a breakaway

state, the military said. At least 119 people were killed and more than 500 were wounded in the December uprising, the sixth and worst against Aquino.

#90245u0243 09/02/1990 ~United Press International

PERTH, AUSTRALIA (SEPT. 2) UPI - Robert Holmes a'court, one of Australia's most successful businessmen, died Sunday after suffering a massive heart attack at his home. He was 53. Holmes a'court, chairman of the Bell Group, was at one time described as Australia's richest man, but suffered badly during the 1987 stock crash.

"I think Australia is the worse off for not having the on-going participation of a great man of vision, as Holmes a'court was," said Alan Bond, chairman of Bond Corporation, which is closely associated with the Bell Group.

In his high-profile career, Holmes a'court made forays into some of the biggest companies, both in Australia and overseas, including Australia's market leader, Broken Hill Propriatory. He was also a prominent racehorse breeder and owner, whose thoroughbreds won a number of major races. His horse Black Knight won the Melbourne Cup in 1971.

Holmes a'court suffered a heart attack at his Perth suburban home early Sunday morning. He was rushed to the hospital but was reportedly dead on arrival.

Holmes a'court began his career in 1969 and by 1985 he was described by Australian Business Review Weekly as Australia's richest man. The magazine valued his fortune then at $240 million. He is survived by his wife and four children.

#90245u0244 09/02/1990 ~United Press International

SEOUL, SOUTH KOREA (SEPT. 2) UPI - South Korean Prime Minister Kang Young-hoon and his North Korean counterpart will meet this week in the highest-level contact ever between the two Koreas.

The unprecedented talks in Seoul will focus on ending political and military confrontation and promoting exchanges and cooperation between the Korean states, which were divided 45 years ago.

A seven-member North Korean delegation led by Prime Minister Yon Hyong-muk will cross into the south through the truce village of Panmunjom 35 miles north of Seoul Tuesday morning, accompanied by 33 support personnel and a 48-man press corps.

The first meeting, to be held Wednesday morning, will be open to news coverage and televised live. The second session, scheduled for Thursday, will be held behind closed doors. The North Koreans will return home Friday through the truce village.

A second round of prime minister-level talks is scheduled in the North Korean capital of Pyongyang on Oct. 16-19. Later sessions, not yet scheduled, will be alternated between the two capitals.

This week's talks will mark the first visit to Seoul by an official North Korean delegation since September 1985. There have been contacts between the two Koreas since then, all at Panmunjom.

Seoul officials said they are ready to discuss any issues the North may raise, including arms control, a non-aggression pact and U.N. membership for the two Koreas.

Seoul hopes for some agreement, even a provisional one, on exchanges of people and goods between the two sides as the first step toward building up mutual trust, government sources said. Analysts said North Korea may focus on military issues, hoping to speed up the withdrawal of about 43,000 U.S. troops stationed in South Korea.

The North Koreans may also want to discuss the U.N. membership question. Seoul has proposed that the two Koreas seek separate U.N. membership simultaenously. Pyongyang has opposed the idea, saying it would perpetuate Korean division, and insists that South and North Korea share a single seat in the world body.

AGANA, GUAM (SEPT. 2) UPI - The widow of former Gov. Ricardo Bordallo won a decisive primary victory to become the Democratic Party gubernatorial candidate in the Nov. 6 general election, returns showed Sunday.

The final count from the Saturday primary showed Sen. Madeleine Bordallo ahead by 3,000 votes over former Lt. Gov. Rudolph Sablan, who served under Bordallo's husband from 1974 to 1978. Sen. Bordallo is currently serving her second term in Guam's unicameral 21-seat legislature.

The late governor committed suicide last February on the day he was scheduled to leave for California to begin a three-year prison sentence. He was found guilty in federal court on several charges of corruption in office. Sen. Bordallo will face current Gov. Joseph Ada, in the the general election. Ada had no opposition in Saturday's Republican primary.

Guam's congressional delegate, Ben Blaz, a Republican, was more than 1,000 votes ahead of his challenger, Ben Pangilinan. Neither candidate had party opposition as in the gubernatorial race. they will face eacohother again in the november 6, general election.

Election officials said Saturday's primary had one of the lowest turnouts in Guam's history. Only 28,000 of the 39,000 registered voters went to the polls.

#90245u0249 09/02/1990 ~United Press International

AMMAN, JORDAN (SEPT. 2) UPI - U.N. Secretary General Javier Perez de Cuellar said Sunday that two days of talks with Iraqi Foreign Minister Tariq Aziz produced no "real progress" toward an accord on the Persian Gulf crisis, blaming Iraq's refusal to withdraw from Kuwait.

"As I leave Amman, I must acknowlege a certain disappointment because I had hoped for more in my discussions with Foreign Minister Tariq Aziz," Perez de Cuellar said before departing for Paris, where he was to open a special U.N. conference and possibly meet with King Hussein, who is on a European tour.

He attempted to maintain an air of optimism, saying that the Helsinki meeting set for Sept. 9 between President Bush and Soviet President Mikhail Gorbachev raised "some hope" for "a resolution."

Reading from a prepared statement, Perez de Cuellar told a packed news conference at Hussein's tightly guarded, fortress-like palace that he planned to brief the U.N. Security Council later in the week on his discussions with Aziz.

"I should have liked to inform the council that real progress had been made during the discussions here in Amman. But in all honesty, I cannot do so at present, nor can I anticipate the council's reaction," he said.

Asked why more than seven hours of talks on Friday and Saturday had not brought movement toward an accord to avert war in the Gulf, Perez de Cuellar said Aziz had failed to convey Baghdad's readiness to withdraw from Kuwait without conditions as demanded by U.N. Security Council resolutions.

"If we want to start solving the problem, we have to go to the root of the problem, that is the invasion and annexation of Kuwait," Perez de Cuellar said. "It is for me and the United Nations, the main problem is the occupation and annexation of Kuwait by Iraq. "If this problem is solved, all the others will be immediately solved," he said.

Iraq invaded Kuwait on Aug. 2 in a dispute over oil production and

territory, prompting the deployment of a multinational military contingent in the gulf and Saudi Arabia, dominated by U.S. forces and including troops from several Arab states.

The Security Council approved resolutions calling for an Iraqi withdrawal, approving severe trade sanctions on Iraq and Kuwait enforceable by military means and demanding a restoration of the exiled Kuwaiti royal family and freedom for all foreigners.

The government of President Saddam Hussein has conveyed conflicting stances, saying that his annexation of Kuwait is irreversible, but then linking the issue to an Israeli withdrawal from its own occupied territories and a Syrian pullout from Lebanon.

Asked if Aziz had given any indication that Iraq was prepared to alter its position on a pullout, Perez de Cuellar replied: "Not in a manner which I had expected." "A clear cut determination to withdraw from Kuwait, that is what I had expected," he said.

Perez de Cuellar welcomed Saddam's agreement to free thousands of foreign women and children held hostage in Kuwait and Iraq as a shield against attack. But he added he did not consider the step "sufficient," calling on Saddam to release thousands of foreign men, many of whom have been moved to strategic sites in Iraq and Kuwait.

Perez de Cuellar said he was prepared to hold further talks to resolve the crisis, adding that "we all need to work with a sense of determination and urgency."

DAR ES SALAAM, TANZANIA (SEPT. 2) UPI - Thousands of Tanzanians flocked to hear Pope John Paul II celebrate mass Sunday at Jangwani Grounds, a park on the outskirts of the Indian Ocean port of Dar Es Salaam.

The pope on Saturday had charmed flag-waving crowds that had swarmed into Dar Es Salaam for the previous week to greet him on his arrival for an 11-day African tour. The pontiff began his speech in Swahili, the official language of the East African country.

Calling himself a pilgrim of peace among followers of different religions, the pope went on to say: "I am confident that good relations will increase and flourish among Tanzanian Christians and those of the Islamic faith."

Tanzania has seen growing tension in the past five years between coastal Moslems and up-country Christians. President Ali Hassan Mwinyi, a Moslem and the chosen successor of former president and devout Christian Julius

Nyerere, told the pope that the secularity of the state was the bedrock of the country's unity.

The pope soon after his arrival also tackled two of the continent's gravest problems: AIDS and refugees. In a speech to an audience of diplomats, the pope called for a massive international effort to combat acquired immune deficiency syndrome, a major killer of both men and women in sub-Saharan Africa.

He also called for further help for the five million refugees and 13 million displaced persons on the continent, made homeless by wars and failed development policies. The pope repeated his hopes that violent conflict in the Persian Gulf could be avoided.

On his seventh African tour, his 49th trip outside Italy since he was elected head of the Roman Catholic Church in 1978, John Paul plans to leave Tanzania Sept. 5 for tiny landlocked Burundi, which borders Tanzania to the west. From there, his itinerary takes him north on Sept. 7 to neighboring Rwanda.

He then flies across the continent to Ivory Coast, where he plans Sept. 10 to consecrate an enormous and controversial basilica built at the cost of the equivalent of $150 million by President Felix Houphouet-Boigny.

SEOUL, SOUTH KOREA (SEPT. 2) UPI - U.S. Attorney General Richard Thornburgh arrived in Seoul Sunday to take part in the four-day Conference of Attorneys General of Asia and the Pacific.

The meeting runs from Monday through Thursday and has attracted top prosecutors from 22 countries. The purpose is to discuss ways to fight drugs and organized crime, Korean organizers said.

Among the participants will be Soviet Prosecutor General Alexander Sukharev, the highest ranking Soviet official ever to visit South Korea. He arrived on Friday.

Participants in the meeting also include officials from Japan, Australia, India, Indonesia, Thailand, Taiwan, and Mongolia.

#90245u0255 09/02/1990 ~United Press International

NAIROBI, KENYA (SEPT. 2) UPI - The disease that wiped out half of Europe in the Middle Ages, bubonic plague, has struck in the Kenyan capital, killing three, putting 23 in the hospital and sending hundreds rushing for

checkups by Sunday, local newspapers reported.

The plague, known in 14th century Britain as "The Black Death," broke out late last week among workers at a grain store in eastern Nairobi, swiftly killing the three men, the newspapers said.

Local health authorities ordered the burning of all garbage in the Embakasi area, a mile from Nairobi's Jomo Kenyatta International Airport, in order to discourage plague-infested rats, thought initially to have been attracted by the granaries in the area.

The plague is caused by a bacterium, yersinia pestis, carried by rat fleas which pass the disease to humans by biting them. It was incurable until the discovery of antibiotics this century, but is now treated relatively easily if caught in its early stages.

If not so treated, however, bubonic plague - whose symptoms are headaches, swollen glands and lumps on the skin - can develop into the highly contagious pneumonic plague, which attacks the lungs and is spread by coughing.

Plague has killed millions of people throughout history, sweeping repeatedly across ancient Greece and Rome, and emptying whole regions of northern Europe between the 10th and 17th centuries.

Most recently, an estimated ten million people died of plague in India at the beginning of this century. Isolated outbreaks have occurred in recent years in the United States, Europe, Asia, and Africa.

#90245u0260 09/02/1990 ~United Press International

BEIJING (SEPT. 2) UPI - A state-run magazine renewed the government's defense of communism Sunday, insisting China will not follow liberalizations in Eastern Europe and warning such changes could cause a "recurrence of civil war."

"To follow the capitalist road would undermine the political and economic foundation of the country's unification ... and result in different political factions and turmoil," said the signed article in the Beijing Review, an English-language weekly. The article is to appear in the Review's Monday edition. Excerpts were carried by the official Xinhua news agency.

The article was a fresh defense of the hard line on communism the government has maintained since the June 1989 crackdown on the pro-democracy movement. Chinese leaders have steadfastly warned the country will not match the sweeping reforms in Eastern Europe.

"After the rapid change in the situation in Eastern Europe, some foreigners hoped that China would follow suit," the article said, but added that any conclusion that communism had collapsed "does not apply to China."

Moving back towards capitalism would create large gaps between rich and poor and lead to "a forest of factions, each dominating a region, each doing things in its own way and, in the process, each trying to eliminate the other," the article said.

"If the conspiracy to negate socialism and create internal disorder in China were allowed to succeed, it would mean recurrence of civil war," the Beijing Review said.

The excerpts did not elaborate on the alleged conspiracy, but Chinese hardliners h'vi repeatedly warned of an ongoing effort by dissidents at home and unspecified foreign forces to subvert communism.

If such turmoil erupted, the article said, "people would flee the country" and there would be as many as 100 million Chinese refugees, so "maintaining stability in China is not only in China's own interest, but also a responsibility to the world and humanity."

The article said China's setbacks were not the fault of socialism, but rather "were caused by erroneous guidelines and a rigid management system and methodology."

#90245u0323 09/02/1990 ~United Press International

NEW YORK (SEPT. 2) UPI - Some blacks contend that white racism is to blame for the lack of publicity about a Kenyan drug hailed as an inexpensive cure for AIDS, it was reported Sunday.

Kenyan President Daniel arap Moi announced earlier in the summer that a cure for acquired immune deficiency syndrome had been found, a drug called Kemron that is marketed by the Kenyan government.

But blacks involved in the debate say that white-dominated news organizations did not publicize the drug because of a racially based distrust of African science, The New York Times reported. The blacks also said the drug was played down because it posed competition for expensive AIDS medications offered by the white medical establishment.

About 800 New Yorkers, most of them white, are thought to have tried one form of the drug, low-dosage alpha interferon taken orally, apparently with little success. Hundreds more in Dallas and Fort Lauderdale, Fla. were using a different form, the newspaper said.

"I don't know how this works but there's nothing else that holds a candle to it," said Ronald Woodroof, who founded the Dallas Buyers Club. He said that after 122 days on the drug, he feels better than even before he had AIDS.

The Black Leadership Commission on AIDS, a group of New York professionals and religious leaders, is studying the drug and The Amsterdam News, a weekly black newspaper, has run front page stories about it. WLIB, a black-oriented New York radio station, has also reported on the drug.

Kenyan scientists claim they have documented benefits in more than 1,000 patients there, including 50 who say they no longer test positive for the AIDS virus. There have been no such cases among Americans.

AIDS specialists have reacted with curiosity and disbelief and the World Health Organization's attempt to duplicate Kenya's findings produced data that Kemron proponents called supportive but skeptics said were discouraging, The Times said.

The Amsterdam News suggested the study results were ignored because of an attitude that "blacks could not possibly have come up with an effective therapy or cure for AIDS that has eluded white scientists."

"If this had come out of Sweden or somewhere else, it would have been Page 1 everywhere," said Wilbert Tatum, editor in chief of The Amsterdam News.

Articles about the drug appeared in major newspapers as early as April and then in the homosexual and black press. A delegation of black New Yorkers, including Dr. Barbara Justice, visited Nairobi a month ago to learn more about the drug. Justice said she was impressed by the results and would like to see the drug pursued.

AIDS groups, organized most often by homosexuals, have clashed with the medical community in recent years over the system for testing experimental drugs. The debate over Kemron is the sparked by blacks, among whom the number of AIDS cases is increasing rapidly.

#90245u0350 09/02/1990 ~United Press International

WASHINGTON (SEPT. 2) UPI - Seven months ago, President Bush nixed a Chinese attempt to purchase a Seattle aerospace firm that held classified Navy contracts, citing potential national security risks posed by the takeover.

Bush acted in the case of MAMCO Inc., a manufacturer of aerospace parts for such industry giants as Boeing. It was the first time such a purchase

has been prevented under a 1988 law empowering the president to prohibit or modify any merger, acquisition or takeover of a U.S. company by a foreign firm if the transaction could threaten national security.

In the two years since the law took effect, the government has received notification of more than 425 foreign takeovers of U.S. firms, including those in the most sensitive high-technology and defense-related industries.

The government, however, has formally reviewed only ten of those transactions and stepped in only in the case of MAMCO, which was targeted by the agency that handles purchases for China's Ministry of Defense.

Critics claim that much of America's technology base - the key to the nation's economic vitality and defense capability - is on the international auction block and that neither the Reagan nor the Bush adminstrations have done much to stop it.

Congress is considering legislation to strengthen restrictions on certain foreign takeovers, but it has received a mixed reception from industry and strong opposition from the Bush administration. "We don't want to see America fall behind," said Rep. Doug Walgren, D-Pa., who introduced the legislation.

"If you don't protect the civilian technology base, you put the military technology base directly at risk," said Walgren, chairman of the House subcommittee on commerce, consumer protection and competitiveness. "And you create circumstances under which we will be absolutely dependent on foreign powers for certain kinds of technologies."

Foreign ownership of American interests, such as manufacturing, petroleum, agriculture, real estate, and banking, amounted to $401 billion at the end of 1989 - a nearly 400 percent increase over a decade ago, according to the U.S. Bureau of Economic Analysis.

Japanese, French, German and other foreign owners control an expanding share of such leading-edge industries as semiconductors, computers, robotics, fiber optics, advanced materials, and software.

The latest available government figures show foreign firms account for 14.7 percent of U.S. manufacturing assets, 4.1 percent of the nation's jobs and 4.3 percent of the nation's gross national product.

The Walgren legislation, which would amend a provision of the 1988 Trade and Competitiveness Act, would give the president new powers to restrict foreign takeovers. It also requires an interagency government panel to formally investigate all foreign takeovers of high-technology and defense-related industries deemed "essential" to national security.

The legislation would allow the president to impose such conditions as assurances that a takeover would not harm national security, that U.S. customers would not lose supply and that technology would not be transferred out of the United States. National security would be expanded to include consideration of whether a purchase would undermine the nation's civilian industrial and technology base.

"Mind you, we're not saying foreign investment should be stopped," Walgren said. "We're simply saying that foreign investment when it involves control of essential technology should be reviewed and thought about."

The administration argues that the legislation runs counter to the long-held "open door" U.S. policy toward foreign investment. The measure "will have a severe chilling effect on foreign investment" and "ignores the positive impact of foreign direct investment on the U.S. economy," said John Niehuss, the Treasury Department's international economic policy chief.

"It sends a strong negative signal that foreign investment is not welcome in the United States, contradicting 200 years of U.S. policy," Niehuss said. Niehuss also said the measure would weaken the ability of U.S. firms to attract capital, promotes unwarranted government intervention in business and invites retaliation by other nations against investment by U.S. firms.

The National Association of Manufacturers, which represents 13,000 U.S. firms, claims the measure could hurt the U.S. manufacturers' export boom. Howard Lewis, the group's vice president for international economic affairs, pointed out that the United States long has sought to persuade other countries to reduce barriers to direct investment by U.S. firms.

"It is ironic that just as we're beginning to see signs of progress in this area - look at some of the investment treaties we've signed with Eastern Europe - that we then are turning around and potentially making it more difficult for foreign countries in our country," Lewis said.

One industry strongly in favor of the Walgren measure is the superconductor industry, which has been ravaged by foreign takeovers. In addition, a Defense Department advisory panel has released a report supporting restrictions on foreign takeovers of key firms.

#90245u0354 09/02/1990 ~United Press International

WASHINGTON (SEPT. 2) UPI - About one in four American households had at least one family member who was a victim of crime last year, the Justice Department announced Sunday.

"During the last five years, the percentage of households victimized by crime has remained level at about 25 percent," said Steven Dillingham, director of the department's Bureau of Justice Statistics. "In 1975, when this statistical series commenced, about one in three households was struck by crime."

During 1989, the department said, statistics showed that black households, households with higher incomes and households in cities were more vulnerable to crime: 29 percent of black households, 27 percent of households with incomes of $25,000 or more and 31 percent of urban households experienced crimes.

Since 1986, the percentage of urban households hit by crime has risen to 31 percent from 28 percent. The rate for rural households has fallen to 17 percent from 20 percent, the department said.

As in earlier years, homes in the Northeast were the least vulnerable to crime in 1989, 19 percent; homes in the West were the most vulnerable, 30 percent; and homes in the South experienced a crime rate of 25 percent, while homes in the Midwest had a 24 percent rate.

The Justice Department defines a household as a group of people living together in a dwelling unit such as a house or apartment. A household was victimized by crime if it suffered one of the following:

- a burglary, motor vehicle theft, or a theft from the household.
- a household member 12 years or older was raped, robbed, assaulted, or was
  the victim of a theft at home or elsewhere.

An estimated 22.8 million of the 95 million households in the United States experienced one or more of the specified crimes last year, the department said.

One in 13 households suffered what the department termed crimes of high concern, those where people were burglarized or had a family member who was the victim of a violent crime committed by a stranger.

The department noted that the percentage of households affected by crime has never shown a year-to-year increase since the crime indicator was begun in 1975.

Individual components of the indicator have changed a little, however. Last year the percentage of households that experienced a burglary declined moderately, and the percentage that experienced a household theft was sightly higher.

#90245u0359 09/02/1990 ~United Press International
LONDON (SEPT. 2) UPI - Prime Minister Margaret Thatcher said Sunday whatever action Britain has to take to deter Iraqi President Sadddam Hussein will not be influenced by the foreign hostages he has taken.

Nearly 200 British women and children who had been prevented from leaving Iraq and Kuwait by Saddam for four weeks landed aboard an Iraqi Airways jumbo jet at London's Heathrow Airport just before dawn.

Among them was Stuart Lockwood, the five-year-old boy with a solemn face that Saddam stroked on television, invoking international accusations that the Iraqi leader was hiding behind women and children.

"We are getting out people who had a right to come out," said. Foreign Minister William Waldegrave, who met the plane. "This is not a bargaining situation, this is a matter of the law being obeyed." He said there was "a real prospect" of freedom for more women and children.

"The expectation is that more will be granted exit visas," but additional departures are not imminent, a Foreign Office spokesman said. About 2,900 Britons remain in Iraq and Kuwait, which Saddam took control of Aug. 2 in a land and oil dispute.

Thatcher, known for her hardline against the captors of three British men in Beirut - Terry Waite, John McCarthy, and Jackie Mann - said she likewise would not be intimidated by Saddam's hostage taking.

"If you in fact allow the taking of hostages, terrible as it is, to determine your action against a dictator he has won," Thatcher said in an interview with David Frost on TV-AM.

"And all he'll ever do, or anyone else with similar ambitions will do, is to take hostages, knowing that other people would then never take the requisite action to stop such a dictator." Thatcher also warned that when the crisis is resolved individual Iraqis could be prosecuted for "cold and brutal acts."

The Britons who were freed along with French and Americans celebrated under the harsh glare of television lights upon landing in London. Their relief was tempered, however, by having to leave loved ones behind. Men were not released.

"I just wish I was with my dad," said Stuart Wickett, who speculated his father had been taken to a military installation in Iraq as part of Saddam's "human shield" against attacks.

He and others had little else to say, fearful for those who remained in

Iraqi custody. "They made sure that they treated us well," Wickett said of his captors. "They needed to, really."

Alma Pennington said she was kept with a small hut for three days. She was one of the participants in "guests news," Saddam's televised propaganda campaign. "They wanted us to say we enjoy being his guests," she said. "That we enjoyed being a pawn on a chessboard." No one in her group complied, she said.

#90245u0360 09/02/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (SEPT. 2) UPI - Black leader Nelson Mandela returned home unannounced Sunday from a week-long tour of four African nations, including a controversial stop in Libya, as renewed factional fighting erupted in townships outside the city.

An official of Mandela's African National Congress said the 72-year-old Mandela slipped back into the country to avoid crowds of journalists and go through customs without delay. He arrived from Zambia with a message for President Frederik de Klerk from other African states to end all factional conflicts in South Africa.

Fighting had flared in townships around Johannesburg overnight, killing at least 17 people and shattering a tenuous peace enforced by the imposition in late August of emergency rule in the stricken areas.

Police Capt. Eugene Opperman said patrols found the bodies of many people shot or hacked to death in Thokoza and Tembisa after an unidentified group of men armed with rifles and sharpened weapons "went on a rampage" late Saturday.

The deaths come only hours after the signing of a regional peace accord Saturday between the ANC and arch rival Inkatha in the north of hard-hit Natal province, since 1987 the scene of the worst fighting between the groups.

A member of Mandela's household confirmed the ANC deputy president and de facto leader had arrived back at his Soweto home, but said he would not be issuing any immediate statement regarding his time abroad or local matters. "Libya, the violence, and everything else will be discussed at a press conference on Monday," he said.

Mandela also visited Norway and Algeria, and in Tripoli apparently sought funds for the ANC from Libya's Col. Moammar Gadhafi, one of the movement's most stalwart foreign supporters.

Mandela has refused to condemn Libya's exporting of terrorism, cutting off

questions and criticism on the issue. He said in an address last month, "We don't all share the same enemies."

In Lusaka, leaders of a coalition of seven southern African states working against apartheid and known as the "Frontline States," ended a one-day summit Saturday with the appeal to de Klerk to end the black strife.

The meeting of Zambia, Angola, Botswana, Mozambique, Tanzania, Namibia, and Zimbabwe sent with Mandela "a message to Mr. de Klerk to stop the carnage," group chairman and Zambian President Kenneth Kaunda said.

De Klerk imposed emergency rule on 27 townships straddling Johannesburg Aug. 24, giving police and the army sweeping powers to quell the violence between the multi-tribal supporters of Mandela's ANC and followers of the exclusively Zulu Inkatha movement that in two weeks last month killed more than 500 people.

Police said the latest deaths, in three townships east of Johannesburg, followed attacks late Saturday by an unidentified group of men armed with rifles and sharp weapons and a separate attack by gunmen on an opposing group.

Mandela had condemned the imposition of the emergency rule as "totally useless," noting the three-month renewable measures would not solve the problem of what the ANC calls Inkatha provocation.

Battles between the two sides in Natal have killed up to 4,000 people since 1987, and De Klerk reimposed a state of emergency there June 8 while lifting it after four years in the country's other three provinces in a move to placate anti-apartheid movements.

Despite denials from Inkatha leader Mangosuthu Buthelezi, the ANC has insisted he has fomented the violence to undercut Mandela's position as preeminent black leader ahead of full-blown power-sharing talks with the white minority government.

#90245u0366 09/02/1990 ~United Press International

BANGKOK, THAILAND (SEPT. 2) UPI - Cambodian President Heng Samrin has agreed to a new round of peace talks in Indonesia meant to clear the way for a political settlement on the basis of a U.N. peace plan, official Phnom Penh radio reports. The talks could take place within a few days.

"We welcome the meeting in Jakarta in order to complete the formation of the Supreme National Council (SNC) and arrange the SNC meeting to discuss the document of the five permanent members of the U.N. Security Council," Heng Samrin said in a speech broadcast late Saturday.

U.S. officials have said the talks in the Indonesian capital and the U.N. peace plan backed by all the superpowers may provide the last good chance for a political settlement of the 11-year-old conflict.

Previously, the Vietnamese-backed Heng Samrin government insisted that the National Council had already been formed in an agreement signed in June, but never implemented.

The Khmer Rouge, the most powerful of the three resistance groups, rejected the June agreement, demanding on a larger and more explicit role in the Council.

On Sunday, the resistance radio "Voice of the Khmer" said the Jakarta meeting was planned for Sept. 5-8 and that confirmation of the meeting date would be officially confirmed soon. It said the meeting would also discuss a peace plan formulated by the five permanent members of the U.N. Security Council.

Heng Samrin said the Jakarta meeting should "discuss the preparations for the first meeting of the SNC to continue solving all remaining problems, such as the U.N. seat, the SNC's composition, role, and duty, and the agenda, place, and chairman of the first meeting of the SNC.

The Cambodian leader said he welcomed the plan worked out by the five permanent members - Britain, China, France, the Soviet Union and, the United States.

The backing of China, which arms the Khmer Rouge, and the Soviet Union, which provides military aid to the Heng Samrin government, has stepped up the pressure on both Cambodian factions to accept the U.N. plan.

But, in a list of "five fundamental principles" for ending the conflict, Heng Samrin said that the question of what to do with the various armed forces should be left for the government elected in planned general elections. This contrasts with the U.N. plan, which envisions a program confining the armed forces of all sides to separate camps and disarming them.

Heng Samrin, who defected from the Khmer Rouge in 1978, also insisted that any peace plan must be able to prevent the Khmer Rouge from returning to power or restarting the civil war after the elections. He said there must be a cease-fire and an end to terrorism.

Khmer Rouge radio Sunday said a statement last week by Vietnamese Foreign Minister Nguyen Co Thach opposing disarmament of all sides in Cambodia showed that the Vietnamese did not want to end the conflict. It charged that Vietnam still has 70,000 regular troops in Cambodia and another

30,000 soldiers mixed in with the Cambodian army.

"If the over 100,000 troops are disarmed, this will not only affect the Vietnamese strategy of swallowing Cambodia, but also reveal to the world the true tortuous, tricky and perfidious nature of Vietnam which has intensely told a pack of lies about having completely withdrawn its forces from Cambodia in September 1989," the broadcast said.

Western intelligence sources have said they do not have any evidence of large Vietnamese units in Cambodia since the September pullout, although advisers, technicians and possibly small combat units are believed to have remained behind.

A Vietnamese invasion in December 1978 ousted the Khmer Rouge government, blamed for the deaths of more than one million Cambodians during nearly four years in power.

The two resistance groups officially backed by the United States are followers of the non-communist former monarch, Prince Norodom Sihanouk, and the former Prime Minister, Son Sann, also an anti-communist. The Soviet Union backs the Vietnamese-installed regime in Phnom Penh.

#90245u0369 09/02/1990 ~United Press International

OKA, QUEBEC (SEPT. 2) UPI - Heavily-armed Canadian soldiers Sunday inched toward a group of armed and defiant Mohawk Indians in an operation to end a seven-week-old dispute involving Indian burial grounds being turned into a golf course by developers.

Army spokeswoman Capt. Lynne Bermel said the government forces, some on foot and others in armored prsonnel carriers, were following "the principles of our military operation (and) have moved forward progressively and deliberately."

She said the army took the Mohawks' remaining and largest barricade at 8:45 a.m. EDT and that military engineers were checking out the area for "explosives and booby-traps."

The tension between soldiers and Mohawk Warriors shown in face-to-face encounters in television reports from the reserve Sunday has decreased, Bermel said. "It seems to be a lot calmer now," she said.

The Mohawk Nation Office, however, issued several grim statements early Sunday decrying the army's actions in the standoff. "The armed advances against our people are equivalent to the first shot. Therefore, Canada and Quebec have fired the first shots against our people," the statement said. In another statement, the Mohawks pleaded for United Nations help, saying,

"You must act now before it is too late."

About 300 troops were in control of most of the reserve, and have driven about two dozen members of the militant Mohawk Warriors and an unknown number of women and children to an area called "The Pines," an Indian drug and treatment center.

The army has established "defensive positions", Bermel said, including the setting up of barbed wire fences. There was little resistance Saturday to the army's advance other than shouting matches between combat-ready soldiers and the militants. There were reports of a handful of single shots being fired Saturday and overnight but no one was reported injured.

Army spokesmen said the troops were redeployed onto the reserve to ensure "the safety of civilians and soldiers in the area." At a second standoff site at the Kahnawake reserve near Chateauguay, south of Montreal, troops Saturday moved in and removed a barricade on a key commuter bridge.

An army spokesman said Sunday asphalt was being laid and safety inspections were underway but the public wasn't expected to gain access to the area for "a couple of days."

Talks for a peaceful, non-military, settlement of the natives standoffs collapsed Thursday after the Quebec government refused to return to the negotiating table.

The collapse upset some Mohawk negotiators who said there was a split between moderate, traditional Mohawks and militant members of the Warriors Society who were pressing a demand for Indian sovereignty.

The dispute in the two communities began several months ago over a proposed expansion of the Oka golf course on land that Mohawks on the Kanesatake reserve claim is an ancient burial ground. The dispute turned violent when a police officer was killed July 11. Days later, sympathetic Indians at the Kahnawake reserve blocked highways and the Mercier bridge.

More than 3,000 heavily armed soldiers, equipped with tanks and armored personnel carriers, have been poised for several days at the Kahnawake and Kanesatake reserves awaiting orders to dismantle the barricades.

KOLOLI, GAMBIA (SEPT. 2) UPI - A conference aimed at ending Liberia's civil war concluded Sunday with an announcement that an interim exile government had been formed but would remain in the background until multinational forces can establish order in Monrovia.

The "national unity" government named by 60 Liberian participants is part of the peace effort by the five-nation Economic Community of West African States and calls for the removal of President Samuel Doe.

Under the plan, the government would be seated for one year before elections are held. Few details about the composition of the government, including its president, were officially released.

Some 3,000 troops from the five-nation West African alliance are seeking to establish order in Liberia so that the government can be installed. But guerrilla leader Charles Taylor's National Patriotic Front, who boycotted the conference, continued to battle troops from the alliance.

Battlefield reports said that some Liberian government forces have joined troops from the West African alliance in efforts to stop Taylor, even though Doe's regime opposes the alliance and refused to recognize the conference.

Participants in the National Conference on the Future of Liberia declined to confirm the naming of political scientist Amos Sawyer as president. Sawyer's administration will remain in Gambia until the peacekeeping forces establish order in Monrovia, the sources said.

Sources who spoke on the condition of anonymity said Sawyer was sworn in Thursday night at the Kairaba Beach Hotel in Kololi, where the conference was held.

Sources also said a vice president and 35-seat national assembly were named, excluding the Doe government but allowing for representation from Taylor's forces and another rebel faction headed by Prince Johnson, who has agreed to a cease-fire. A delegation from the conference was to meet with Taylor to try to persuade him to participate in the government and end the fighting.

The West African alliance includes Gambia, Nigeria, Sierra Leone, Guinea, and Ghana. Their intervention has been opposed by Burkina Faso, which has reportedly supplied arms to Taylor's faction, a factor that could prolong hostilities.

Sawyer was named by Doe in 1982 to help write Liberia's constitution but jailed in 1984 after trying to build a coalition of parties to oppose Doe in the 1985 elections. His Liberian People's Party was banned before that election.

Bishop Ronald Diggs was chosen as vice president of the interim government, conference sources said. Diggs has been bishop of the Lutheran Church of Liberia since 1984 and was an founding member of the Interfaith Mediation Committee moderating the conference.

He has also held executive positions with the Liberian Council of Churches an organization criticized by Doe for its allegations on human rights abuses in the country.

In the National Assembly, Taylor was given six seats and the speaker of the house to entice him to join the government, according to sources. Johnson, who heads the National Patriotic Front, was named minister of defense and his party given four seats and the deputy speaker post.

The Johnson delegation earlier proposed a 6,500-man "national defense service" to replace the multinational peacekeeping forces before elections but no official announcement was made on the proposal. Many of the delegates to the national assembly are Liberians living in exile in the United States, according to sources.

#90245u0399 09/02/1990 ~United Press International
MOSCOW (SEPT. 2) UPI - Soviet Foreign Minister Eduard Shevardnadze held four hours of talks Sunday in Pyongyang with his North Korean counterpart, Kim Yong Nam, the official Soviet news agency Tass reported.

The discussions focused on "the situation on the Korean peninsula" as well as bilateral relations and the Persian Gulf crisis, Tass said. A key issue was expected to be Pyongyang's concerns about increased Soviet contacts with South Korea recently.

Soviet President Mikhail Gorbachev met with South Korean President Roe Tae-Woo while in the United States in June and there have been increasing trade and diplomatic contacts. North Korea is one of the few Soviet bloc states not yet touched by the dramatic reforms sparked by Gorbachev's glasnost and perestroika policies.

Tass carried few details of Shevardnadze's talks with Kim, which were to continue Monday morning, quoting the Korean official as saying only that "the interest in Soviet-Korean talks is extremely high both in the Democratic People's Republic of (North) Korea and abroad."

Shevardnadze stopped in Pyongyang on an Asian tour that began Saturday in Harbin, China, for talks with Chinese Foreign Minister Qian Qichen. From Korea he will travel to an international conference in the eastern Soviet city of Vladivostok and then to Tokyo for an official visit.

SRINAGAR, INDIA (SEPT. 2) UPI - Moslem rebels fighting for independence

from Indian rule captured and later decapitated three air force servicemen Sunday and dumped their headless bodies in a village near the military airport on the southern outskirts of the city, police sources said.

The three Indian airmen had been abducted earlier by Moslem rebels, the sources said. Villagers in the town of Wana Bal found the bodies of the three men Sunday morning, the police sources said.

They said the servicemen apparently were killed and with a sharp-edged weapon and their heads severed. Villagers in Wana Bal confirmed that the bodies had been dumped in the town, located near the military airport on the outskirts of Srinagar.

The incident came amid a spate of violence Sunday in the northern Kashmir Valley. At least five other people were killed in the attacks and ten were wounded, police sources and witnesses said. The Press Trust of India news agency said at least 11 other people were killed and 38 wounded in the violence.

In the old city of Srinagar, rebels hurled a grenade at a military patrol and soldiers retaliated by firing at civilians and setting ablaze five houses, four shops and a mosque, witnesses said.

The witnesses said at least two civilians were killed in the incident, including a shopkeeper who was summoned from his store by soldiers and shot dead at point-blank range. Six other civilians were wounded, the witnesses said.

Two Moslem men were found dead in different towns in the Kashmir Valley, apparently slain by Moslem rebels who thought they were informants for the security forces, police sources said.

The violence came as Moslem rebel groups issued a series of stern warnings to state government employees Sunday, saying if they failed to participate in a scheduled five-day strike they would be "punished severely."

The warnings came after leaders of the estimated 175,000 government workers decided to cancel the strike. Representatives of the state employees said they called off the walkout because the government agreed to consider a series of nine demands, including investigation of alleged atrocities by security forces.

The threats representated a potential break between the militant groups and the government workers, who have been sympathetic to rebel demands for secession while maintaining a distance from their violent activities.

The Jammu and Kashmir Liberation Front, in a statement published in the region's newspapers, appealed for "all employees, including students in

educational institutions, to make the strike a success." It also warned that "saboteurs will be killed."

But Abdul Hamid Matto, the head of a committee representing government workers, said, "We are completely satisfied with our agreement with the government."

"It will not be possible to review the decision already taken," he added. Matto criticized the militants for interfering in the matter, saying, "This can give the government an idea that our strike was an extension of the militants' program."

Matto and another representative of the workers, Naeem Ahmad, said they had been contacted by the militants after the decision to cancel the strike, which was to begin Monday. "We have to bear threats from all sides that is, (from) the government and the militants both," Ahmad said.

MEXICO CITY (SEPT. 2) UPI - Peruvian novelist Mario Vargas Llosa slipped out of Mexico, leaving intellectual circles abuzz over his televised remarks calling Mexico "the perfect dictatorship," news reports said Sunday.

Vargas Llosa - who lost Peruvian presidential elections to Alberto Fujimori earlier this year - had come to Mexico to participate in a televised roundtable discussion of intellectuals, organized by Mexican writer and poet Octavio Paz.

"Vargas Llosa left the meeting titled '20th Century, Experience of Freedom', and the country, late Friday night while being described by Mexican intellectuals as a right-wing writer who deserved to be defeated as he was in the presidential elections in his country," said the Mexico City daily newspaper Uno Mas Uno in a front page story.

Paz wrote a letter to another newspaper, La Jornada, explaining that Vargas Llosa's swift exit was because of family commitments and not because of the reaction his comments had stirred up.

"The absence (from the conference) of my dear friend Mario Vargas Llosa has provoked malicious insinuations ... he had to leave our country in a hurry and fly to London for family reasons," Paz wrote.

On Thursday, the opening day of the discussions, Vargas Llosa said Mexico was "the perfect dicatatorship ... not Communism, nor the Soviet Union, nor Fidel Castro. It is Mexico ... The permanence not of one man, but of an unmovable party."

Mexico's ruling Institutional Revolutionary Party, known by its Spanish initials PRI, has been in power since its formation more than 60 years ago. "I know that all the dictators of Latin America have tried to create an equivalent to the PRI, without achieving it," Vargas Llosa added.

The next round of talks at which Vargas Llosa was scheduled to speak was cancelled, prompting Mexican journalist Federico Campbell to write in Sunday's edition of La Jornada, "This proves the intolerance of the PRI."

President Carlos Salinas de Gortari, interviewed briefly by reporters at the airport in Manzanillo on the Pacific coast, said only, "Vargas Llosa is a good novelist."

The roundtable preceded the 14th National Assembly of the PRI, where party leaders are discussing internal changes to make the party more democratic. One of the major reforms will be in the selection of candidates, particularly those chosen by labor leaders who often need to resort to electoral fraud to win.

Sen. Luis Donaldo Colosio, who was ratified as party chairman before the assembly, declared Saturday an "end to impositions within the PRI."

#90245u0524 09/02/1990 ~United Press International

(SEPT. 2) UPI - Iraqi Foreign Minister Tariq Aziz ended two days of talks in Jordan with the U-N secretary-general, with an attack on the Security Council. Aziz says the permanent members of the Council are NOT neutral. He named only one- the United States. The Council has passed resolutions demanding Iraq's withdrawal from Kuwait. Aziz says he got NOwhere with U-N chief Javier Perez de Cuellar on requests for concessions from those resolutions. Perez de Cuellar said today he is ''disappointed'' about the talks.

Canadian army troops moved onto a Mohawk reservation last night and dismantled barricades... in an effort to end a seven-week standoff. The soldiers controlled most of the reserve at Oka, Quebec, by nightfall. The troops surrounded militant Indians in a community center where their spokeswoman said they are- quote- ''kind of helpless to do anything now.'' The standoff began with a dispute over a golf course expansion.

Newspapers in the African nation of Kenya report three deaths last week in the capital, Nairobi, caused by the bubonic plague. 23 other patients were hospitalized. The plague killed Millions of people in Europe during the Middle Ages. With modern antibiotics, however, it can be cured if treated in the early stages. Nairobi authorities have ordered all garbage burned in the area where the plague was reported.

Officials say Colombia will reduce the extraditions of suspected cocaine dealers to the United States. Under former President Virgilio Barco suspected drug criminals were automatically turned over. But the officials say Cesar Gaviria, who became president last month, feels differently. They say the acquittal of Washington, D-C, Mayor Marion Barry on a number of drug charges brings up questions about the Bush administration's will in fighting cocaine use.

#90245u0564 09/02/1990 ~United Press International

FARNBOROUGH, ENGLAND (SEPT. 2) UPI - Farnborough International '90, one of the world's foremost airshows, opened Sunday as the aerospace industry faced a number of searching questions.

Political changes in Eastern Europe, a threat of economic recession, and the current crisis in the Persian Gulf all offer challenges to the industry. Up to 350,000 visitors are expected to visit the eight-day show featuring exhibits from more than 100 countries. The aerospace industry is big business. Two years ago $6 billion worth of orders were announced.

Recent rises in world oil prices threaten a recession in the aerospace industry and are likely to reduce sales this year, said Dan Honley, deputy director of Farnbourgh '90.

Increased oil prices mean increased airfares and reduced orders for aircraft from the world's commercial airlines. Manufacturers also are facing increased competition, not least from the Soviet Union.

Farnborough '88 gave the West the first public view of the MiG-29, Fulcrum, an air superiority fighter. This year, the Soviet Union is also displaying the Sukhoi SU-26 in a bid to capture a share of the West's lucrative arms market. The Soviet Union already has offered the MiG-29 fighter to neutral Switzerland.

The Warsaw Pact now poses a much diminished threat to the West and changes to the NATO forces are occurring as a result. Reduced military spending seems inevitable. While the current conflict in the Gulf may delay defense cuts, what seems more likely is that there will be a change of emphasis. In particular, the armed forces must maintain an ability to operate anywhere in the world.

For the public, the highlights of this year's show are the six Vertical Takeoff and Landing Harriers and the Treble One Squadron Wittering, demonstrating the unequalled maneuverability of the Harrier jump jet. The MiG-29 and Sukhoi SU-26 demonstrate backwards stalling, both planes being flown hydraulically rather than by computerized systems.

On a much grander scale is the Soviet Union's Antonov, AN-225, the world's largest aircraft. It was first seen in the West in 1988 when, at a preview for the media, one of its engines backfired and the plane ground to a halt while attempting to take off. A replacement engine had to be flown in from the Soviet Union and it flew later in the week. This time, the Antonov has six engines instead of four and a stretched fuselage.

The statistics on the Antonov are awe inspiring. It can carry over 500,000 pounds of cargo, yet for a plane of its size is astonishingly maneuverable. Itis used to carry unwieldly loads to the most inaccessible areas of the Soviet Union.

#90245u0598 09/02/1990 ~United Press International

VIENNA (SEPT. 2) UPI - Former Austrian Chancellor Fred Sinowatz and two of his Cabinet ministers have been charged with abuse of power as an investigation into alleged arms smuggling between Austria and Iran widens, a mass circulation newspaper reported Sunday.

Prosecutors have brought charges alleging Sinowatz and former ministers Karl Blecha and Leopold Gratz did not properly ensure that Austrian-produced cannons would not be illegally sold to Iran in 1985 during the Iran-Iraq war, thereby endangering Austria's neutrality, Kronen Zeitung reported.

The scandal, known as the "Noricum" affair, led last year to the forced resignations of Blecha from the Interior Ministry and Gratz, a former longtime mayor of Vienna, from the Foreign Ministry. The Noricum Co. is a state-owned engineering firm which produces cannons for export.

Some of the weapons made by Noricum apparently fell into Iranian hands, and an investigation is focusing on whether or not some government officials had prior knowledge that the arms would end up in Iran. The newspaper said the three face charges of abuse of power, but could face charges of endangering Austria's neutrality. Both charges carry a maximum sentence of five years.

Austrian law prevents the central government from exporting arms to a nation at war. Prosecutors have already charged 18 government officials with endangering Austrian neutrality for the arms shipments. The newspaper did not name the third-party nation or nations believed to have taken part in the alleged smuggling operation.

Sinowatz, who was chancellor from 1982 to 1986, responded to the allegations by declaring he would be found innocent of all charges, Austrian television reported late Saturday.

The tribulations of the three former government leaders are likely to intensify the political campaign in the stretch leading to October's general elections. The three come from the ranks of the Socialist Party, Austria's senior political party in the ruling coalition.

Chancellor Franz Vranitsky predicted the ruling Socialist Party would not be hurt by the charges, telling the newspaper "Austrians don't care about the Noricum affair." "It was expected (that) the Justice Department would come out with these charges now because it's been the talk of the town," he said.

#90245u0602 09/02/1990 ~United Press International

(SEPT. 2) UPI - Pope John Paul celebrated mass in Swahili today in Dar es Salaam, a coastal city in Tanzania. Swahili is the official language of the east African nation. More than one-Million people gathered to hear the pope. Police had to hold back the enthusiastic crowds. The pope began his journey to Africa yesterday, saying he hoped good relations would grow between Tanzania's Christians and Moslems.

South African police near Johannesburg report an unidentified group of men ''went on a rampage'' last night. 15 people were found shot or hacked to death in two townships. In another township, police found two bodies riddled with gunshot wounds near a hostel used by Zulu migrant workers. Fighting between the Zulu Inkatha movement and followers of the African National Congress killed more than 500 people last month.

Gainesville, Florida, police say they still have NOT zeroed in on one suspect in the killings of five young people near the University of Florida. Lieutenant Sadie Darnell says they are NOT even close to an arrest. There are several potential suspects. One is a 58-year-old man wanted by the F-B-I in the killing of an Ohio woman. Another is an 18-year-old college freshman being held for allegedly attacking his grandmother.

U-N chief Javier Perez de Cuellar hopes President Bush and Soviet President Mikhail Gorbachev have more luck than he did in finding a diplomatic solution to the Persian Gulf crisis. Perez de Cuellar met for two days with Iraqi Foreign Minister Tariq Aziz in Jordan, and the U-N leader says he's disappointed with the outcome. Bush and Gorbachev hastily arranged a summit in Finland next Sunday. Perez de Cuellar says the key is Iraq's refusal to withdraw from Kuwait. He says if that is solved, the other problems will be solved.

#90245u0620 09/02/1990 ~United Press International
TYRE, LEBANON (SEPT. 2) UPI - A car bomb exploded late Sunday in this mainly Shiite-inhabited southern port city, killing five people and wounding six others, police said.

They said the bomb in a Japanese-made car went off as militiamen of the pro-Syrian Amal movement were trying to disarm it. The car, they said, was parked at the northern entrance of the Amal-controlled city of Tyre, 46 miles south of Beirut.

Five people were killed and six others were wounded, police said. Among the dead were two Amal militiamen. Witnesses said Amal militiamen blocked the road and rushed the wounded to nearby hospitals.

It was the second car bomb explosion in the south in less than a week and the ninth in Lebanon this year. On Aug. 27, a car bomb exploded in the village of Houmine, 11 miles east of the port city of Sidon, 24 miles south of Beirut. Six people in the car were killed.

Houmine is also patrolled by Amal which has been locked in bloody 3.5-year struggle with the Iranian-backed Hezbollah or Party of God for the control of Lebanon's Shiite community. Amal has accused the fundamentalist Hezbollah and Iran of being behind "such sabotage incidents to disturb security and peace in the south."

#90245u0675 09/02/1990 ~United Press International
(SEPT. 2) UPI - An Iraqi Airlines jetliner carrying U-S hostages arrrived at Dulles International Airport, outside Washington, D-C, this morning. At least 50 Americans were among hundreds of foreign women and children released by Iraq. Three planes carrying hostages left Baghdad yesterday, heading for the United States, Europe and Japan. Iraq has promised to release more than 10-thousand foreign women and children, but says it will use foreign men as shields against potential attacks against Iraqi military targets by U-S-led forces massing in Saudi Arabia. .

The arrival came as U-N Secretary-General Javier Perez de Cuellar expressed ''disappointment'' over his two days of talks with Iraq's foreign minister in Amman, Jordan. The U-N chief says he made No ''real progress'' toward resolving the month- old Persian Gulf crisis. He says he failed to persuade Iraq to comply with U-N Security Council demands that it withdraw from Kuwait.

More than one-Million people gathered in the east African nation of Tanzania today to hear Pope John Paul celebrate an open-air mass. The pontiff is on the second of an 11-day African tour. John Paul said mass in Swahili, the official language of Tanzania. Police say hundreds of thousands of Tanzanians and thousands more from four neighboring African nations had flocked into the former capital for the past week to get a glimpse of the pope.

-30- 1563
#90245u0695 09/02/1990 ~United Press International
(SEPT. 2) UPI - NASA officials say the delay-plagued shuttle Columbia will probably remain grounded until late this week. Engineers, performing an electronic bypass operation, failed to fix a faulty telescope aboard the orbiter... forcing crews to take the more drastic step of removing the entire assembly. Officials now say liftoff may be pushed back to around Friday. Columbia is already running three months behind schedule because of a hydrogen fuel leak.

Areas of the Midwest, West and Southwest were drenched by thunderstorms early today. The line of storms stretched 125 miles through northeast Colorado from the Denver area to northern Logan County. The storms dropped marble-sized hail in Nebraska and swept southeastern Arizon with 50 mile-an-hour wind gusts. Elsewhere, variable cloudiness was reported across the southern Middle Atlantic area, with temperatures slightly above normal.

#90245u0868 09/02/1990 ~United Press International

(SEPT. 2) UPI - The Bush administration will this week be facing a new front in the Persian Gulf crisis- Capitol Hill. Members of Congress have basically supported President Bush's policy in the region since Iraq invaded Kuwait one month ago. But there have been rumblings from members of both parties who want Bush to more clearly define his goals. Indiana Repubican Senator Richard Lugar says Bush needs to- in his words- ''outline what the bottom line is for us.'' .

Britain voiced a hard stance today as nearly 200 women and children arrived in London from Iraq. Foreign Minister William Waldegrave met the jetliner, saying- ''this is NOT a bargaining situation, this is a matter of the law being obeyed.'' And British Prime Minister Thatcher reiterated that she will NOT be influenced in steps to deter Saddam Hussein by the estimated 29-hundred Britons still held by Iraq.

The countdown begins again early tomorrow at Cape Canaveral, Florida. NASA today tentatively cleared the space shuttle Columbia for a predawn blastoff Thursday on a long-delayed astronomy mission. However, the space agency says the launch could be delayed until Friday if engineers do NOT finish testing a replacement telescope part by tonight.

#90245u1291 09/02/1990 ~United Press International

NEW YORK (SEPT. 3) UPI - Two hours after John McEnroe revived memories of past glory by winning a five-set thriller, Martina Navratilova suffered one of the more dismal defeats of her career Sunday night when she was bounced out of the U.S. Open by Manuela Maleeva-Fragniere.

Navratilova, like McEnroe a four-time Open champion, fell 7-5, 3-6, 6-2, in the fourth round. In seven previous meetings, Navratilova had dropped merely one set to Maleeva, and in last year's Open she crushed Maleeva, 6-0, 6-0, in 44 minutes.

This marks the first time since 1980 Navratilova has failed to reach the quarterfinals of the Open.

''I don't know if the desire will be there 100 percent,'' a dejected Navratilova said of her future plans. ''I don't know if I'll play next year or not. Anything is possible.''

Maleeva, the ninth seed, as customary showed little emotion after the victory.

''I thought it was about time I beat a big player in a Grand Slam,'' she said. ''I went on court feeling very positive.''

McEnroe, the underdog in his match, struggled for 4 hours and 20 minutes to overcome Emilio Sanchez, 7-6 (8-6), 3-6, 4-6, 6-4, 6-3, to gain the quarterfinals for the first time in three years.

''I've had a great career, but to go out on a high and win another major would be fantastic,'' the 31-year-old left-hander said following his biggest victory of the year. ''Winning this would be the icing on the cake.

''To be in the quarterfinals and have another chance to win this championship is unbelievable. There is a lot of satisfaction in winning a match like this but it would be nice to take it a little bit farther and get a chance to play an even bigger match.''

Navratilova jumped to a 4-1 lead and served for the first set at 5- 4, but was broken at 15 in the 10th game and at love in the 12th. The 33-year-old Wimbledon champion drew even in the second set with breaks in the first and ninth games of the second set, Maleeva double faulting on set point.

Maleeva, though, got on top in the deciding set with a break in the third game. She broke again in the seventh game after being down 0-40, and although Navratilova broke back in the next game, Maleeva ended it with another break in the ninth game.

''I had too many games where I had game point, but you can't let them get away against a player like Manuela,'' Navratilova said. ''There's no excuse for not putting away those game points.

''I didn't hit the ball as hard as I should have, I really wimped out on a lot of shots.''

In contrast to McEnroe's marathon, third seed Ivan Lendl, comfortable with his game and his situation, required one minute more than two hours to defeat Gilad Bloom, 6-0, 6-3, 6-4, and gain the quarterfinals for the ninth consecutive year.

McEnroe, who defeated Sanchez' younger brother, Javier, in the first round next plays unseeded David Wheaton, a 7-5, 7-6 (7-1), 4-6, 6-4 winner over Kevin Curren. A victory would catapult him into the semifinals for the first time since 1985.

McEnroe, ranked No. 20 in the world, won his last Open in 1984. He received a standing ovation from a near capacity crowd of 20,000 people after a forehand service return by Sanchez went some 60 feet into the air to end a match which started in bright sunshine and concluded under

evening clouds.

''He doesn't want to disappoint anyone because he's a champion,'' commented Sanchez. ''He showed it today on the court.''

McEnroe appeared beaten after falling behind two sets to one against an opponent six years younger and appreciably quicker. But he warded off two potentially fatal break points in the ninth game of the fourth set before breaking in the next game to even the match.

After squandering a break point in the fourth game of the decisive set, McEnroe cashed in on the only other break point either player managed in the set, achieving the decisive break in the sixth game when Sanchez netted a backhand.

It was McEnroe's 22nd career victory in five-set matches against 12 defeats.

''I would prefer not to go five sets with a guy like Sanchez because he's a good player and very fit,'' McEnroe said. ''But it beats the hell out of losing.''

The first set alone required 66 minutes as McEnroe squandered a 5-2 lead and a total of three set points in the eighth and ninth games. He then rallied from a 4-2 deficit to win the tie-break with a forehand crosscourt volley into the corner, eliciting the first of several standing ovations.

Sanchez took the second set routinely and won the third with a break in the seventh game on a forehand pass down the line. McEnroe had triple break point in the next game, only to lose the next five points.

The two men traded service breaks in the second and third games of the fourth set before McEnroe got even.

(SEPT. 2) UPI - Women and children freed from Iraq arrived home in the United States, Britain, France, and Italy today. They were among some 500 Westerners and Japanese released yesterday after being kept in Iraq since its invasion of Kuwait one month ago. 25 to 50 Americans arrived in Washington, D-C. One freed hostage disputed Iraqi claims by saying the foreigners are detained against their will withOUT food, water, or electricity.

NASA says the repair job it's done on the shuttle Columbia has cleared the ship for blast-off Thursday morning. Technicians were told to stand by at Cape Canaveral to restart Columbia's interrupted countdown early tomorrow. Earlier today... officials said they needed more tests on a new part put in the shuttle... but this afternoon they announced all systems are ''go.''

South African black leader Nelson Mandela is home with a message from African leaders. Mandela arrived in Johannesburg today with a statement from seven southern African nations urging President Frederik de Klerk to ''stop the carnage.'' The appeal refers to the fighting between Mandela's African National Congress and the Zulu Inkatha movement. The conflict claimed 17 more lives last night.

The Justice Department announced today that one in four American households had at least one family member who was a victim of crime last year. The percentage has remained steady for five years... an improvement over the 1975 rate of one in three households. The department says the most likely targets are black households... households with higher incomes... and households in cities.

The White House is denying the accuracy of a report issued today that says the Bush administration has pursued policies that have NOT benefited the majority of Americans. The Washington-based Economic Policy Institute accuses President Bush of advocating economic plans that have increased the wealth of America's richest citizens, while leaving the majority of Americans with NO real gains.

#90245u1559 09/02/1990 ~United Press International
(SEPT. 2) UPI - U-N Secretary-General Javier Perez de Cuellar expressed disappointment earlier today aobut his two days of meetings with Iraqi Foreign Minister Tariq Aziz. Speaking at a news conference in Amman, Jordan, de Cuellar said he had ''hoped for more'' in discussions with his old colleague. But de Cuellar held out hope for a negotiated settlement in the Middle East, especially in light of next Sunday's surprise superpower summit.

The chairman of the powerful House Ways and Means Committee says the Persian Gulf crisis makes a hike in the nation's gasoline tax more necessary than ever. In a report published today, Illinois Democrat Dan Rostenkowski said Americans interested in conserving gas and reducing the federal deficit would support a hike in the tax. Rostenkowski spent the weekend on a Middle East fact-finding mission.

Talks designed to halt further bloodshed in Liberia wrapped up today with an announcement that an interim exile government has been named. The group called for the removal of President Samuel Doe, but said the interim government would take power for one year and then allow elections to occur. The announcement was made in Gambia and is part of a peace effort by the five-nation Economic Community of West African States.

(SEPT. 2) UPI - Environmentalists charged today that the government is failing to protect the nation's food supply. An organization known as the U-S Public Interest Research Group noted that 69 pesticides linked to cancer are legally allowed in food. The group issued a report in Washington listing numerous pesticides allowed in meat, vegetables, and dairy products that have been shown to cause tumors in laboratory animals.

A team of U-S health experts is set to leave for Romania Tuesday to help evaluate health care in the Eastern European country. Romania holds the dubious distinction of having one of the world's highest infant and maternal mortality rates. Part of the blame the policies of former leader Nicolas Ceausescu. The group will also deliver one-half-Million dollars worth of AIDS testing equipment and medical supplies.

#90245u1779 09/02/1990 ~United Press International
(SEPT. 2) UPI - East Germany's news agency says the East German ambassador to Kuwait and his wife were arrested by Iraqi forces. The couple reportedly was taken to Baghdad. Iraq had threatened to arrest

diplomats remaining in Kuwait after August 24th.

.

British Prime Minister Thatcher says the presence of hostages in Iraq will NOT deter Britian from taking steps to contain Saddam Hussein and prevent him from further aggression. Thatcher is known for her tough stance in hostage situations.

NASA hopes to end a summer without shuttle launches this week. The space agency has cleared the shuttle Columbia to take off from its Cape Canaveral launchpad Thursday, five days after its scheduled liftoff. Permission to launch came today after technicians replaced a part in the spaceplane's cargo bay.

The task force working on the mutilation murders of five Florida college students has spread its search into nine states across the country. Law enforcement officials in Gainesville say despite the expanded investigation, they have reduced the number of viable suspects.

One year after a beach celebration degenerated into looting, fighting and violence, the situation in Virginia Beach, Virginia, is reported calm. The annual Laborfest, attended primarily by black college students, has proceeded smoothly and officials anticipate NO problems.

A new report by the Justice Department indicates that you or someone you know have likely been crime victims. The report says one in four U-S households had at least one family member who was a crime victim in the past year.

#90245u1780 09/02/1990 ~United Press International

(SEPT. 2) UPI - Philippine officials say monsoon-driven floods have caused at least 23 deaths this weekend. The most severe flooding occurred in Manila and a town 110 miles north of the capital. The area was devastated by similar conditions just more than one week ago.

India's troubled Kashmir province experienced more bloodshed today as police found three decapitated air force servicemen. Police sources say at least five others were killed in the region where militant Moslems are seeking independence.

Local health officials in Kenya have ordered trash to be burned outside the capital in an attempt to get rid of rats infected with the bubonic plague. The disease is reported to have caused three deaths while hospitalizing 23 people last week.

Officials in Namibia have arrested six men and are looking for two more after linking them to a cache of weapons. Police discovered scores of arms during weekend raids. Authorities have NOT said if the men in custody are connected with right-wing South African extremists opposed to Namibia's independence.

A report today on Cambodian state-run radio says a new round of peace talks between the country's Vietnamese-backed governments and rebels may begin within the next few days. The report says President Heng Samrin cleared an obstacle to participation in the talks by accepting the basis of a U-N plan.

Peace talks are also on tap to end fighting in Guatemala. Discussions between rebels and an umbrella group made up of business and church leaders are tentatively slated for the end of the month in Mexico or Venezuela.

#90245u1853 09/02/1990 ~United Press International
(SEPT. 2) UPI - United Nations Secretary-General Javier Perez de Cuellar said today it appears that Iraq is trying to consolidate its annexation of Kuwait. In the words of the U-N chief... ''Time is working against peace and in favor of Iraq.'' De Cuellar also said two days of talks with Iraq's foreign minister led him to believe the Middle East nation is inflexible except for releasing women and children.

.

Reports on Riyadh Radio today say Saudi Arabia has kept its promise to increase its oil output in an effort to offset the shortages caused by the worldwide embargo of Iraqi and Kuwaiti oil. The report says Saudi Arabia boosted its daily oil production to seven- point-four-Million barrels. That's two-Million barrels more than its OPEC-decreed quota.

The premiers of the Soviet Union, Estonia, Latvia and Lithuania failed to attend a much-heralded Baltic environmental conference in Sweden today. The Soviet premier withdrew because of economic problems at home... and the Baltic republics stayed away reportedly because they are miffed at Sweden's refusal to treat them as sovereign nations. The conference was called to address worries that much of the Baltic Sea is dead because of pollution.

A new study says American media largely ignore or distort the working lives of 100 Million men and women. The study by the group Fairness abd Accuracy in Reporting found that nightly network news last year devoted only two percent of its coverage to workers' issues... and only one percent to U-S unions. And the report said while P-B-S and C-N- N offer

regular business shows... neither offers a show dealing specifically with labor issues.

#90246d0060 09/03/1990 ~French/German News Agency

Leipzig (SEPT. 3) - The West German consumer electronics market leader Grundig expects its sales turnover to rise at a double-digit rate to surpass 4 billion marks (2.5 billion dollars) in the current business year the company's top executive said here Monday.

Grundig chairman Johan van Tilburg said that in the first five months of the 1990-91 year which began April 1, earnings had risen by 35 per cent, with Tv set sales particularly spurred by the World Cup.

He also noted the East German factor in the company's performance. Sales in East and West Germany had risen 32 per cent in the first five months, with some of the growth in West Germany the result of East German consumers' purchases.

Van Tilburg made the remarks in celebrating Grundig's first-ever appearance at the Leipzig Autumn Fair, which opened here on Sunday. He said that Grundig till now had not appeared at the fair because the East German market had been of little importance.

Now the company foresees sales turnover volume in the current East German area - soon to be united with West Germany - reaching 200 to 250 million marks in the 1991-92 business year.

-30- 1343

#90246d0170 09/03/1990 ~French/German News Agency

ESCHBORN, West Germany (SEPT. 3) - West German crude oil imports rose 17.8 percent in July to 6.7 million tons from 5.7 million in the same month last year, the federal statistics office said Monday.

But in value terms, the oil bill fell 111 million Deutsche marks (69.3 million dollars) bcause of a 21.6 percent fall in prices over the 12 months.

The figures brought total West German crude imports for the first seven months of the year to 42.1 million tons, up 15.3 percent on the 36.5 million tons in the same period last year.

The oil bill for the seven months was 9.6 billion Deutsche marks, 245 million more than for the same period in 1989.

Some 30 percent of West German crude imports came from Britain and Norway

and 51 percent from members of the Organisation of Petroleum Exporting Countries (OPEC), the statistics office said.

#90246d0190 09/03/1990 ~French/German News Agency

BEIRUT (SEPT. 3) - Negotiations are under way to release one of the three British hostages in Lebanon, possibly Church of England envoy Terry Waite, a Lebanese source close to Iran said here Monday.

"Negotiations and preparations are taking place, with Terry Waite's release as the priority," the source told Agence France-Presse, declining to be named.

Mr. Waite, 51, a special envoy of the archbishop of Canterbury, was kidnapped in January 1987 while on a mission to secure the release of other hostages. His abduction in mainly Moslem west Beirut was never claimed.

The Iranian government has charged "an Arab political personality to play the role in Lebanon of mediator in this affair," the source added, without identifying him.

"The release of Terry Waite, who is considered a hostage of primary importance, depends on progress being made in the normalization process between Iran and Great Britain," he said.

"If this process drags, the released hostage will be John McCarthy," a 33-year-old TV camerman who was kidnapped here in April 1986.

The third British hostage, retired airline pilot Jack Mann, 75, went missing in May 1989. Six Americans, two West Germans and an Italian are also believed to be in the hands of pro-Iranian groups.

The Lebanese source said it was unlikely that the 12 Western hostages, notably those from the United States, would be released shortly. The situation of the six Americans was further complicated by the massive U.S. military deployment in the Gulf.

Hussein Mussawi, a pro-Iranian Shiite fundamentalist leader, also told AFP that he expected European hostages to be freed before the Americans "because the United States is leading the conspiracy to invade our region."

-30- 1950

#90246d0280 09/03/1990 ~French/German News Agency

FRANKFURT (SEPT. 3) - West German electrical engineering firm AEG said Monday its sales rose four per cent in the first half of this year over the same period last year, but the balance sheet showed a zero profit.

Sales were up to 5.8 billion Deutsche marks (3.6 billion dollars) from 5.5 billion (3.4 billion dollars), but in terms of profit the account was balanced.

The group has generally shown small or zero profit, apart from 1989 when it showed an exceptional result of 275 million Deutsche marks (171 million dollars).

The first half boost in sales was largely due to a rise in domestic sales of eight percent to 3.1 billion Deutsche marks, while overseas sales were stable at 2.6 billion Deutsche marks.

-30- 902

#90246d0300 09/03/1990 ~French/German News Agency

FARNBOROUGH, England (SEPT. 3) - Dassault Aviation of France said here Monday it had signed a cooperation agreement with Aeritalia of Italy for the development and production of the Falcon 2000 business plane.

Aeritalia and Dassault would share the investment in the project, and would cover some 25 percent of the total development cost, Dassault chief Serge Dassault told French journalists during the Farnborough Air Show.

He would not give a figure for the total cost of the project or the price at which the aircraft would be sold.

The Falcon 2000, expected to be available in 1994, will be based on the intercontinental Falcon 900, but with two engines instead of the Falcon 900's three and a range of 5,500 kilometers (3,400 miles).

Mr. Dassault said his company had been little affected by a U.N. embargo on trade with Iraq and Kuwait following Baghdad's invasion of Kuwait on August 2, although the embargo had blocked the delivery of some Mirage F1's to Baghdad.

Mr. Dassault refused to confirm or deny press reports that seven planes were involved.

"Financial questions had already prevented any new sales to Iraq in the past year ... while for Kuwait it would have been 1992 before that country had the technical and human potential to order such equipment," said Bernard Retat, Dassault's new director general for international affairs.

#90246d1410 09/03/1990 ~French/German News Agency
NEW YORK (SEPT. 3) - Pan American World Airways will receive 150 million dollars from Lufthansa for the provision of certain services and facilities when the West German carrier starts service to Berlin, probably next month, under a tentative agreement announced Monday.

Pan Am - along with British Airways and Air France - has had traffic rights from West Germany to West Berlin under a post-World War II agreement between the four major allies of the time, Britain, France, the United States and the Soviet Union. Under that agreement, West German carriers were barred from operating to and from Berlin.

But Lufthansa expects to be allowed into Berlin when East and West Germany are formally reunited next month.

Pan Am currently operates 74 daily flights between West Berlin and Hamburg, Nuremburg, Frankfurt, Stuttgart, Dusseldorf. Pan Am said it was anticipated that these intra-German services would be terminated in late October.

The agreement does not affect Pan Am's non-stop service from New York to Berlin nor the operations of Pan Am Express, a Pan Am subidiary operating between Berlin and 10 other European cities with 34 flights per day.

Under the agreement, Pan Am will lease to Lufthansa "at least nine Pan Am Boeing 727 aircraft, with pilots," said the U.S. carrier. By mid-1991, the equipment and crews will be provided by Lufthansa.

#90246d1800 09/03/1990 ~French/German News Agency
KABUL (SEPT. 3) - A huge explosion rocked the Soviet embassy in Kabul late Monday, sowing panic in the area, witnesses said.

The blast shattered several windows of the heavily guarded embassy, but there were no immediate reports of anyone being injured or killed.

Witnesses said an Afghan military armoured personnel carrier (APC) parked outside the misson in the Darul Amand area suddenly exploded, but they could not say what caused the blast.

Other sources, mostly from the embassy, said a short circuit in the APC's electrical system caused its petrol tank to blow up, igniting ammunition stored in the vehicle.

-30- 802
#90246d2030 09/03/1990 ~French/German News Agency
TUNIS (SEPT. 3) - The Arab League secretary general, Chedli Klibi, has resigned after 11 years in office, the secretariat said Monday. The resignation came amid divisions in the Arab world over the Gulf crisis.

Mr. Klibi, a Tunisian, held the post since 1979 when the League headquarters were transferred from Cairo to Tunis, following Egypt's signing of a peace treaty with Israel. His term was extended for another five years in March 1989.

There was no official reason given for his resignation.

"Mr. Chedli Klibi on Monday addressed messages to kings and heads of state of the 21 Arab states in which he informs them of his resignation from the post of secretary general of the League of Arab States," the secretariat said.

Diplomatic sources said he also thanked Arab leaders for their support during his term in office.

At an Arab conference in Cairo last week, Egypt called for an Arab League emergency ministerial meeting in its capital on September 10 to announce the transfer of the League's secretariat back to the Egyptian capital.

The request was accepted by the 13 countries that attended the conference, out of the 21-member Arab League.

Tunisia's official media criticized the call for another conference within days, saying it was a bid to achieve a "fait accompli" by rapidly "liquidating" the League's presence in Tunis despite opposition from some Arab states.

Since the Gulf crisis divided the League into pro- and anti-Iraqi camps, Arab states have been involved in a tug-of-war over the question of the League headquarters, which Arab countries had decided in March to move to

Cairo.

Iraqi Foreign Minister Tareq Aziz has argued that Egypt could no longer qualify because of its "partial" stand on the crisis.

Mr. Klibi resigned one week before the next Cairo conference because he did not want to oversee the division of the organisation, according to analysts in the Tunisian capital.

#90246d2940 09/03/1990 ~French/German News Agency

TOKYO (SEPT. 4) - New vehicle sales in Japan surged 11.5 percent in August from a year earlier to 356,312 units, the Japan Automobile Dealers Association said Tuesday.

It was the first double-digit gain in five months, and August was the 18th consecutive month to show a year-on-year increase, it said.

Passenger cars accounted for 252,033, up 10.0 percent, while sales of trucks jumped 15.4 percent to 102,532 units and bus sales rose 17.5 percent to 1,747.

-30- 637

#90246d3030 09/03/1990 ~French/German News Agency

TOKYO (SEPT. 4) - Dai-Ichi Kangyo Bank, Ltd. (DKB), the world's biggest bank, is to raise short-term prime rates by 0.625 percentage point to 8.0 per- cent effective next week, banking sources said Tuesday.

The planned rate hike is aimed at coping with an increase of fund procurement costs, caused by an interest rate rise in the short-term money market and an official discount rate hike last Thursday to the highest level in nine years, they said.

Other city banks and trust and banking companies are likely to follow suit, the sources said.

DKB officials said the bank is considering a short-term prime rate hike but is undecided on the margin of rate hike.

The sources said the 0.625 point rise added to the August increase of 0.25 percent to make a two-month rise of 0.875 percent.

-30- 983

#90246d3040 09/03/1990 ~French/German News Agency

KARACHI (SEPT. 4) - Pakistan's economy has been hard hit by the Gulf

crisis and is facing a worsening balance of payments deficit, analysts here say.

The loss of hard currency remittances from Pakistani workers in Iraq and occupied Kuwait and the higher prices Islamabad has to pay for oil are expected to cause the balance of payments deficit, which last year hit 1.8 billion dollars, to further deteriorate.

Before it was invaded on August 2 by Iraq, Kuwait supplied Pakistan with about half of its imported oil at concessionary rates.

Domestic oil prices were increased substantially in March to satisfy the International Monetary Fund (IMF) and other aid donors demanding a reduction in Pakistan's budget deficit.

But Petroleum Minister Abdul Majeed Malik has said the government would for the time being not increase domestic prices of petroleum products.

The government was making arrangements for spot purchases of certain petroleum products on the international market to offset an expected shortage caused by the disruption of supplies from Kuwait.

Officials said two Kuwaiti oil tankers had luckily left for Karachi only hours before the Iraqi invasion. One of them brought 27,000 tonnes of kerosene and the other carried 30,000 tonnes of diesel to Pakistan.

The Kuwaiti and Saudi embassies in Islamabad have assured Pakistani authorities that all possible efforts would be made to maintain oil supplies under the ongoing concessionary agreements.

Pakistan consumes about 180,000 barrels of oil per day, while domestic production has nearly doubled in the past two years to 60,000 barrels per day.

Kuwait used to provide about 60,000 barrels per day of oil and petroleum products at concessionary rates of 15 dollars per barrel, worth a total of some 700 million dollars a year.

Now that international prices have jumped to nearly 30 dollars per barrel,

Pakistan will have to pay substantially more for its oil imports, further broadening the balance of payments deficit.

JERUSALEM (SEPT. 4) - The price of gasoline went up by 17 percent at midnight on Monday, Israeli radio reported.

The increase, linked to rises in crude oil prices caused by the Gulf crisis, was put into effect after representatives of the Finance and Energy Ministries said on Sunday that that a fuel price hike of around 15 percent was necessary, and the government had decided on such an increase during the day.

The increase is expected to be followed by rises in the cost of electricity and numerous products.

Fuel prices have risen by 33 percent since the beginning of the Gulf crisis on August 2.

#90246d3150 09/03/1990 ~French/German News Agency

PARIS (SEPT. 4) - Against the background of the Gulf crisis the French government is seeking to fight inflation and save energy -- and in addition to paying higher prices for gasoline, the country's motorists may be called on to help by slowing down, observers say here.

While no measures have yet been officially announced, rumors are rife here of a cut in speed limits. Finance Minister Pierre Beregovoy is also known to be preparing a cut in France's top rate of value-added tax (VAT), a measure which among other effects would reduce the price of cars. The two steps might even be announced simultaneously, observers say.

In June, Mr. Beregovoy said the top VAT rate of 25 percent would be reduced in the 1991 budget, but he did not say by how much. On Friday, the daily Le Monde said the cut would be two or three points and would occur in mid-September for automobiles.

That report has not been confirmed by the authorities because of fears that it would encourage car-buyers to postpone their purchases.

Auto industry sources said the beneficial effects of lower VAT on sales could not be determined exactly because of the influence of other factors, such as sales promotions and the general health of the auto market.

The speed limit issue has given rise to greater uncertainties yet. Remarks on Sunday by Prime Minister Michel Rocard to the effect that the limit on expressways might be cut from 130 to 110 kilometers an hour (81 to 69 miles an hour), from 90 to 70 on other major roads, and from 60 to 50 in towns have not exactly won rave notices, even within the government.

Mr. Rocard commented that lower speed limits would "reduce the national oil bill by several billion francs and save lives".

But although such reductions could save the equivalent of more than 1.2 million tonnes of oil a year according to the national Energy Saving Agency,
 Transport Minister Michel Delebarre opposes such measures, which would displease the country's vocal motorist lobby.

The French Association of Auto Clubs has already called Mr. Rocard's proposals "unrealistic", and recommends obligatory adjustment of vehicle ignition and carburation.

Mr. Delebarre said Thursday that he favored greater observance of existing speed limits. But he is for lowering city speed limits, not to save energy but for safety reasons.

Mr. Rocard also said that he has decided to have government economic policy focus, among other things, on improving the country's production system.

For instance, he has approved the principle of lowering the tax rate on profits that are re-invested in companies -- a recommendation for which Mr. Beregovoy came under strong attack. However, the cautious Mr. Rocard has not advanced a figure for the moment.

Another measure contemplated by the government, though the prime minister did not mention it on Sunday, is favorable tax treatment of investments offering energy savings.

Mr. Beregovoy noted Monday that lower VAT is also planned on some consumer goods. And some sources have reported that an improvement in tax measures aimed at encouraging energy savings that were part of the 1990 budget is also being studied.

But such measures are unlikely to lead the government, which is Socialist,

to forget about the "new social round" to which it committed itself in the spring.

Thus Mr. Rocard has pledged, despite reluctance in some quarters, to implement a new tax called a "generalized social contribution" and to push negotiations on raising low and medium-level salaries. He has also announced that Labor Minister Jean-Pierre Soisson will present a new employment plan on September 13.

TOKYO (SEPT. 3) - Japan's holdings of gold and foreign exchange reserves rose from 74.59 billion dollars at the end of July to 75.32 billion dollars at the end of August, the finance ministry said Monday.

The increase of 730 million dollars marked the fourth consecutive rise in the monthly figure and followed a jump of almost one billion dollars in July.

-30- 535

#90246d8530 09/03/1990 ~French/German News Agency

JERUSALEM (SEPT. 3) The Israeli Government is Monday to approve an increase in the price of fuel, an energy ministry spokesman said.

On Sunday, officials from the ministries of finance and energy met and decided that a rise of about 15 percent in fuel prices was needed, he said.

The Israeli press has reported that the increase, tied to the worldwide hike in oil prices triggered by the Gulf crisis, will be effective on Monday at midnight local time (2100 GMT).

Thousands of Israeli motorists have already rushed to gas stations across the country to fill up their tanks.

BRISBANE, Australia (SEPT. 3) - Australian mining group MIM on Monday reported a 92 million dollar (74.5 million U.S.) increase in profits to 295.5 million dollars (239 million U.S.) for the year ending July 1.

Announcing the figures, the chairman of MIM Holdings, Sir Bruce Watson, said that in the same 12 months, sales reached a record 1.9 billion dollars (1.54 billion U.S.), thanks in part to record sales of copper.

Net profits after accounting for foreign exchange movements and minority interests were 275 million dollars (223 million U.S.), up from 240.1 million (194 million U.S.).

Net profit on an equity accounting basis dropped from 328 million dollars (265 million U.S.) to 317.1 million (257 million U.S.), and an eight-cent final dividend was paid.

"MIM's financial position strengthened during the year," Sir Bruce said, and the company's indebtedness was reduced by 129 million dollars (104.5 million U.S.) to 966 million (782.5 million U.S.).

Sales of copper jumped from 173,986 tons to 192,027 tons "as supply problems in Canada, Mexico, Papua New Guinea and Peru prevented any rebuilding of the low stock levels in the face of record consumption."

In the same period, "new production records were again set in mining, smelting and refining" at Mount Isa, 1,600 kilometres (1,000 miles) from here in northwest Queensland.

But sales of coal slumped from 8.14 million tons to 6.93 million tons, and MIM's coal division made a pre-tax loss of 31 million dollars (25 million U.S.), following a loss of 85 million (69 million U.S.) the previous year.

Sales of gold were also up sharply, from 68,775 ounces to 112,994 ounces.

#90246d8610 09/03/1990 ~French/German News Agency

LONDON (SEPT. 3) - Freight rates retreated on world shipping markets this past week.

Very little business was closed because of uncertainty over the future level of bunker fuel prices during the Gulf crisis.

The Baltic International Freight Futures Exchange (BIFFEX's) Baltic Freight Index (BFI) closed down 12 points on the week at 1,208 points.

Shipbrokers expected no change in activity or rate levels in the coming week unless war broke out in the Gulf, in which case they expected freight rates to derive some support from firmer oil prices.

The United States' Military Sealift Command, which charters ships for the movement of military hardware, was reported booking vessels on a timecharter basis for trips from the U.S. Gulf to the Middle East.

It was also said to be looking for further tonnage in European zones to back up the military movement of equipment to Saudi Arabia.

But shipbrokers here said that the amount of tonnage being sought was of minor significance for rate levels.

In the absence of fixtures in any great numbers, brokers saw the heavily-weighted U.S. Gulf to Japan grain route as vulnerable.

The index value of fixings on the route edged down to 21.167 dollars per ton from 21.250 at the end of the previous week.

Quotes for other main grain routes were also lower, with vessels on the U.S. Gulf to Europe trip fetching 10.967 dollars per ton down from 11.50, and carriers bound for Japan from North Pacific ports being quoted at 10.567, down from 10.65.

U.S. Gulf to Venezuela loaders saw slightly improved rates, up from 12.03

dollars per ton to 12.042.

Rates for coal carriers dropped to 10.283 dollars per ton from 10.50 on the Australia to Europe route, and to 6.192 dollars per ton from 6.2 for East Coast USA to Europe fixings.

Ankara (SEPT. 3) - The French aeronautics firm Aerospatiale has been picked to build and launch Turkey's first communications satellites, the Turkish posts and telecommunications authority Ptt announced here Monday.

The project involves two satellites, to be mamed Turksat. The first is to be placed in orbit in mid-1993 and the second is to be launched a year later.

British Aerospace and the U.S. firm Hughes had also been competing for the project estimated to cost roughly 600 million dollars.

#90246d8790 09/03/1990 ~French/German News Agency

WIESBADEN, West Germany (SEPT. 3) - West Germany's trade surplus fell 23 percent in July over the same month last year to 8.2 billion Deutsche marks (5.1 billion dollars) from 10.6 billion DM (6.6 billion dollars), the federal statistics office said Monday.

The economy ministry meanwhile announced Monday that industrial production rose 1.7 percent in July over the June level according to provisional seasonally-adjusted figures.

The July trade surplus was the same as that in June, when it also stood at 8.2 billion Deutsche marks, and took the cumulative surplus for the first seven months of the yar to 72.9 billion Deutsche marks (45.5 billion dollars), down 9.7 percent from the 80.7 billion (50.4 billion dollars) in the same period last year.

The trade surplus for the whole of 1989 totalled a record 134.7 billion Deutsche marks (84.1 billion dollars).

Imports rose 12 percent in July over the same month last year to 45.8 billion Deutsche marks (28.6 billion dollars), while exports were up 4.6 per cent at 54 billion Deutsche marks (33.8 billion dollars).

For the first seven months of 1990, total imports were up 5.7 percent over the same period last year at 308.7 billion Deutsche marks (192.9 billion dollars), while exports rose a mere 2.4 percent to 381.6 billion (238.5

billion dollars).

Import prices fell 3.9 percent over the seven months compared to the same period of 1989, while export prices were down 0.7 percent.

The statistics office did not, as is its usual practice, publish current account figures for July along with the trade figures.

LONDON (SEPT. 3) - British retail sales rose 1.3 percent in July over the June level, according to revised figures released here Monday by the Central Statistical Office.

An earlier official estimate had put the retail sales increase in July at one percent.

The revised figure gave a rise in retail sales of 2.7 percent year on year, against 1.1 percent in June.

In the three months to July retail sales rose 0.2 percent over the previous quarter, in line with the government's forecasts, and 1.75 percent over the same quarter in 1989.

#90246d9140 09/03/1990 ~French/German News Agency

Manama (SEPT. 3) - Saudi Arabian oil output for September was expected to rise to 7.65 million barrels per day to make up for the Iraq and Kuwait shortfall, while the United Arab Emirates was expected to restore its output to around 2 million bd, it was reported Monday.

The authoritative newsletter Middle East Economic Survey (Mees) said it the Saudi rise represented 2.27 million bd over the level of 5.38 million bd which the country had been producing since last May.

The increase followed the the Organisation of Petroleum Exporting Countries (Opec) aggreement, reached in Vienna last week allowing members states to raise output to compensate for supply shortages.

Of the 7.65 million bd September output, 7.5 million bd is programmed to come from the Arabian American Oil Company fields in eastern Saudi Arabia.

The remaining 150,000 bd would be from Saudi Arabia's half share of the 300,000 bd produced by the Arabian Oil Company of Japan from the Neutral Zone offshore fields. The other half share belongs to Kuwait.

The aoc neutral zone, whose production and export facilities are located on the Saudi side of the border, are still operating normally. But the Neutral zone onshore fields, whose output and export facilities are on the Kuwaiti side of the borders, were shut down August 2 after the Iraqi invasion.

As to distribution of the additional output, Mees said Saudi Arabia is giving top priority to developing countries whose oil supplies have been affected by the IraqiKuwait cutoff. These include Turkey, Brazil, the Philippines, India, Pakistan, Bangladesh, South Korea and Taiwan.

Meanwhile with Opec restrictions lifted, Uae crude production was also expected to increase by 500,000 bd above the quota level of 1.5 million bd. The increase will come from Abu Dhabi, while Dubai will maintain its 400,000 barrels per day output.

#90246d9200 09/03/1990 ~French/German News Agency

BonnBerlin (SEPT. 3) - West German industrial production rose by 1.5 percent from June to July, and was running 4 percent above June-July 1989 levels, at the same time that East German output plunged 42 percent in July, according to separate reports Monday.

In Bonn, the Economics Ministry said that the two-month period of June-July showed a 2.5 percent industrial output growth over the preceding April-May period and 4 percent over June-July of 1989.

Manufacturing was the strongest sector, with an overall 4.4 percent higher output in June-July compared to the same two months last year, the Bonn ministry said.

The construction sector was running 2.8 percent stronger in June-July, while electricity and gas production was barely higher at 0.2 percent. The only decline was the 1.3 percent dip in mining activity in June-July, the ministry said.

In East Berlin, the East German Office of Statistics said that during July, the first month of the East-West German economic union, industrial output in East Germany plunged 35 percent from June levels and was 42 percent below July 1989.

Contributing to the July figures was a 60 percent plunge in metallurgy, a 58 percent drop in food production, and a 51 percent decline in both textiles and light manufacturing.

Out of 69 branches of industry in East Germany, the office said, only three managed to achieve the same level of output as in July 1989. These were railroad construction, polygraphic machinery, and wood and paper processing

equipment.

#90246d9290 09/03/1990 ~French/German News Agency

MANILA (SEPT. 3) - President Corazon Aquino on Monday defended her policy to repay the Philippines' 26 billion dollar foreign debt after she was sharply criticised by the influential leader of the country's Roman Catholic church.

"What we are hoping to do is to have a negotiated arrangement. We are against a unilateral approach to the debt problem," she told a news conference, 10 days after she had to sit through a biting sermon by Jaime Cardinal Sin.

The Manila archbishop said during a memorial mass for victims of July's earthquake that it was "morally wrong" to service the country's foreign debt "in the face of such widespread lack of basic necessities among our people."

Mrs. Aquino confirmed reports that a senior aide, Finance Secretary Jesus Estanislao, had since called on the cardinal to explain the government's position on the issue, and said she would order Mr. Estanislao to seek another appointment with him.

Mrs. Aquino said she had given instructions to Manila's debt negotiators to "seek more relief measures and also seek a better debt program with our foreign creditors."

The church exerts a tremendous moral influence in this predominantly Roman Catholic nation of 60 million, whose population program has failed to take off due to church opposition to virtually every form of birth control.

Most of the foreign debt was acquired under Mrs. Aquino's deposed predecessor Ferdinand Marcos. It stood at more than 28 billion dollars when she came to power in 1986 after a popular revolt.

Bankers have warned that international credit could dry up for Manila if it adopts a radical solution to the debt problem like Peru's unilateral moratorium on debt servicing.

#90246d9440 09/03/1990 ~French/German News Agency

Accra (SEPT. 3) - Ghana said Monday that drilling tests conducted by Petro-Canada and Philips offshore the Tano Basin in the west of the country have shown ''real potential'' for oil and gas production, the Ghana News Agency (Gna) reported.

Gna quoted Ghana National Petroleum Corporation (Gnpc) executive chairman Tstsu Stikaka as saying that the corporation will embark on appraisal tests between between October and December to increase Ghana's chances of success in oil and gas production.

The appraisal tests will be financed by Petro-Canada with five million Canadian dollars, the World Bank with three million U.S. dollars, and the Ghana government.

''Ghana is encouraged to carry out more tests because two studies done by Gnpc prove that using the horizontal drilling technology could increase oil discoveries in the Tano Basin,'' Tsikata said.

He added that Ghana is also studying how best to integrate oil and gas production in the area into a common production facility in order to save costs.

Talks have also been going on with the Volta River Authority which manages Ghana's hydro-electric power to determine how any electrical power generated from gas could be fed into the national grid.

#90246d9960 09/03/1990 ~French/German News Agency

BANGKOK (SEPT. 3) - Kuwaiti Oil Minister Rasheed Al-Ameeri Al-Sabah pledged Monday to fulfill his country's investment commitments in Thailand while seeking continued support for U.N. sanctions against Iraq.

Mr. Rasheed made the pledge in talks here with Thai Foreign Minister Subin Pinkayan, saying that Kuwait planned to draw from its bank accounts around the world to fulfill multi-million dollar investment commitments made in Thailand before Iraq's August 2 invasion of Kuwait, a foreign ministry official said.

The Kuwaiti commitments include plans to set up 200 gasoline stations nationwide and develop Thailand's southern seaboard.

The foreign ministry's ambassador-at-large Kobsak Chutikul quoted Mr. Rasheed as saying that Kuwait would reimburse all foreign workers for costs incurred in fleeing the occupied country if the former independent regime was restored.

Mr. Rasheed was on a tour of Asia, which had already taken him to Indonesia, Singapore, Pakistan and Bangladesh, to seek pledges for the continued support of U.N. sanctions against Iraq, Mr. Kobsak said.

The discussions between the two ministers did not touch on Thailand's bilateral relations with Iraq, he said.

While supporting the sanctions, Bangkok has maintained contact with Baghdad to facilitate the exodus of Thai nationals from Iraq and Kuwait, Mr. Kobask said.

#90246f0439 09/03/1990 ~United Press International

(SEPT. 3) UPI - The Year of the No-Hitter means even Dave Stieb can pitch one.

Stieb, who had lost three previous no-hit bids with two out in the ninth, Sunday fired the ninth gem of the season and the first in Blue Jays history, leading Toronto to a 3-0 victory over the Cleveland Indians.

Stieb, 17-5, faced 28 batters and hurled with such command that only Ken Phelps - with a liner that went foul by three feet in the eighth inning - came close to hitting safely. Stieb, 33, a seven-time All Star, struck out nine and walked four.

''At one point or another, I wondered,'' Stieb said on whether he thought he would ever throw a no-hitter. ''It's not the kind of thing you want to dwell on. It takes a lot of luck to do it. That's how I felt today. It was all luck.''

''We didn't hit the ball hard,'' said Cleveland Manager John McNamara. ''There were no tough plays.''

Before a crowd of 23,640, Fred McGriff hit two solo homers, in the fourth and eighth innings, giving him 31 for the year and 30 or more three straight seasons. Manny Lee doubled home Ken Williams in the fifth for the other run.

Toronto swept the three-game series and has won four straight. The Indians finished their homestand with an 0-7 record. Bud Black, 10-9, took the loss.

Stieb walked Alex Cole to start the game and also walked Carlos Baerga in the second, but both Cole and Baerga were caught stealing. Phelps also walked to lead off the eighth and Cole walked with two out in the ninth.

Toronto outfielders recorded just seven putouts, the last of which ended the game.

''I thought about it in the second or third inning,'' Stieb said of the no-hitter. ''There were a lot of zeroes up there. I started thinking seriously about it in the sixth. But the way I've lost them before, it's always too soon.''

Stieb entered the game with a record of hard luck in achieving no-hitters. On Sept. 24, 1988, he lost a classic with two out in the ninth on Julio Franco's bad-hop single over the head of second baseman Lee. In his next start, Stieb again went 8 2-3 innings before Baltimore spoiled it.

Last Aug. 4, New York's Roberto Kelly doubled with two out in the ninth to break up a bid for a perfect game.

''I had much better stuff the other times,'' Stieb said. ''All along I knew it took a lot of luck to get a no-hitter. I had great stuff in those games I lost in the ninth. I thought I should have gotten one then. It's ironic to get one here.''

Royals 8, Mariners 0

At Seattle, Danny Tartabull drove in five runs, George Brett collected three hits and Tom Gordon fired a three-hitter, helping Kansas City break a three-game slide. Gordon, 10-9, earned his sixth complete game and first shutout of the season.

Athletics 4, Rangers 2

At Oakland, Harold Baines hit his first home run as a member of the Athletics and Rickey Henderson stole the 925th base of his career. The decision, combined with Chicago's loss to California, raised Oakland's lead to 6 1/2 games. Dennis Eckersley pitched the ninth for his 41st save.

Angels 1, White Sox

At California, Chuck Finley, 17-6, and Bryan Harvey combined on a five-hitter and Jack Howell homered in the fifth to down Chicago. The game ended with Ozzie Guillen being picked off second by catcher Lance Parrish. Alex Fernandez fell to 2-2. Chicago had won all previous five games in Anaheim this season.

Brewers 4, Orioles 2

At Milwaukee, Greg Brock homered and hit a sacrifice fly and Jaime Navarro allowed eight hits over 8 1-3 innings for the Brewers. Navarro, 6-5, struck out four and walked one. He took a shutout into the ninth but surrendered a two-run homer to Mike Devereaux with one out. Jose Mesa, 0-2 took the loss.

Twins 4, Tigers 3

At Minnesota, Greg Gagne hit a two-run homer and Scott Erickson pitched 7 2-3 strong innings to help the Twins snap a three-game losing streak. The decision also ended Detroit's four-game surge. Erickson, 4- 4, notched his first victory since Aug. 8. The Tigers' Jack Morris fell to 11-16.

Red Sox 7, Yankees 1

At Boston, Mike Greenwell and Ellis Burks combined to drive in all of Boston's runs, backing Tom Bolton and helping the Red Sox complete an historic sweep. By notching its 10th straight victory, Boston also capped its first ever home series sweep of New York in a rivalry that dates to 1903.

#90246p0801 09/03/1990 ~PR Newswire

ATLANTA (SEPT. 4) PR NEWSWIRE - The merger of The Citizens and Southern Corp. (NYSE: CTZ) and Sovran Financial Corp. (NYSE: SOV) was completed Saturday, Sept. 1, creating C&S/Sovran Corp., the 13th largest financial institution in the U.S. with assets of $50.3 billion at June 30.

The common stock of C&S/Sovran Corp. will commence trading on the New York Stock Exchange Tuesday, Sept. 4, under the symbol CVN.

The merger was announced Sept. 26, 1989, and approved by the Federal Reserve July 25 this year. Chairman and CEO Bennett A. Brown said, "This combination creates a significant force as we build on the historic strengths of each institution."

President and Chief Operating Officer Dennis C. Bottorff said, "We have assembled a management team and designed an operating structure that will permit us to maximize value for our shareholders and customers, and control risks throughout the company."

Headquartered in Atlanta and Norfolk, the company serves more than 5 million individual and business customers in its principal banking region -- Georgia, Florida, Kentucky, Maryland, South Carolina, Tennessee, Virginia and the District of Columbia.

#90246u0087 09/03/1990 ~United Press International

(SEPT. 3) UPI - As tens of thousands of U-S troops sit poised in the Saudi desert, Jesse Jackson called upon Washington to pursue diplomatic means to resolve the situation. Jackson returned to Washington Sunday after interviewing Iraqi leader Saddam Hussein and acting as an intermediary for U-S detainees in the tense region. In Jackson's words... ''if there is a window of opportunity for dialogue... it ought to be pursued.''

Illinois Governor James Thompson said Sunday that the area ravaged by a tornado last Tuesday has been declared a federal disaster area. Thompson said President Bush extended his August 29th disaster declaration to include Kendall County. The previous announcement included only Will County. The new status enables Kendall residents to qualify for low-interest loans and a variety of services that include crisis counseling and family grants.

America's shuttle program appears to be back on track, at least tentatively. NASA engineers Sunday replaced a deficient electronics component in a telescope which will be used in the spaceplane's upcoming astronomical mission. The repair paved the way for space agency officials to set Columbia's launch date for Thursday. The spaceplane was supposed to lift off last week.

A survey of America's teachers indicates that recent talk of school reform is little more than talk. A large majority of educators... 71 percent... questioned by the Carnegie Foundation say they play a minimal role in shaping their schools' curriculum. Despite the frustration cited by the more than 21-thousand participants in the poll, 96 percent say they spend money from their own pockets to improve their classes.

CAPE CANAVERAL, Fla. (SEPT. 3) UPI - Countdown clocks resumed ticking Monday for the shuttle Columbia's delayed blastoff Thursday, with the ship's telescope payload back in order after an around-the-clock weekend repair job to fix a communications glitch.

The carefully orchestrated countdown began on time Monday at 1 a.m. EDT Monday for a launch attempt at 1:20 a.m. Thursday, five days late because of an electrical problem with one of the four telescopes making up Columbia's $150 million payload.

A faulty electronics assembly was removed from the Broad Band X-ray Telescope Saturday and replaced with a unit flown in from the Goddard Space Flight Center in Greenbelt, Md.

Engineers initially had problems verifying the new component would work properly in orbit, but around 4 p.m. Sunday, NASA spokesman Richard Young said the telescope was working properly once again and that Columbia had been cleared for a second launch attempt Thursday.

''We're go for Thursday,'' he said.

With Columbia already running three months behind schedule because of a hydrogen fuel leak, NASA managers are eager to finally get the spaceplane off the ground to end a long, launchless summer highlighted by a storm of criticism over problems with the Hubble Space Telescope and other agency programs.

But NASA officials said last week Columbia would not be launched until all systems were ''go,'' regardless of the potential impact of a delay on the space agency's tight flight schedule.

Shuttle skipper Vance Brand, 59, co-pilot Guy Gardner, 42, John ''Mike''

Lounge, 44, Robert Parker, 53, Jeffrey Hoffman, 45, and civilian astronomers Ronald Parise, 39, and Samuel Durrance, 46, originally were scheduled for launch at 1:17 a.m. Saturday.

But last Wednesday night, as Columbia's cargo bay doors were being closed for launch, data from the Broad Band X-ray Telescope suddenly stopped flowing to the ground.

The ''BBXRT'' is one of four astronomical telescopes aboard Columbia that are designed to study the high-energy X-ray and ultraviolet light emitted from some of the most violent objects in the universe in a bid to learn more about the structure and evolution of the cosmos.

With the 10-day flight on hold, engineers opened the ship's payload bay doors Friday to gain access to a faulty ''multi-rate multiplexer'' bolted to the side of the BBXRT.

The multiplexer is used to convert engineering data from the telescope to a form that can be transmitted to the ground through the shuttle. Such data is important for safe telescope operation because the BBXRT is chilled with supercold solidified argon.

Given the communications glitch with the multiplexer, mission managers could not clear Columbia for launch without first fixing the multiplexer because of an inability to monitor the temperature and pressure of the argon.

Overnight Friday, engineers rigged a special cable to bypass a faulty electrical component in the multiplexer called a ''line driver.'' If the plan had worked, Columbia would have been cleared for a launch at 1:20 a.m. Wednesday.

But the electronic bypass operation did not correct the problem, forcing engineers to take the more drastic step of removing the entire assembly.

The goal of Columbia's mission is to study invisible X-rays and ultraviolet light from the most energetic objects in the universe to learn more about the forces that shape the structure and evolution of the cosmos.

Unlike the Hubble Space Telescope, the four Astro-1 telescopes will remain in Columbia's payload bay throughout the mission.

Working in two shifts around the clock, Columbia's astronauts will operate three ultraviolet telescopes from the shuttle's flight deck. The Broad Band X-ray Telescope, however, will be operated by remote control by scientists on the ground.

#90246u0175 09/03/1990 ~United Press International
TOKYO (SEPT. 3) UPI - Soviet Foreign Minister Eduard Shevardnadze held talks with his North Korean counterpart Kim Yong Nam shortly after flying into Pyongyang from northeast China, the (North) Korean Central News Agency reported Monday.

The agency's brief dispatch, monitored in Tokyo, said the two Communist foreign ministers discussed ''matters of the international situation including the situation in the Asia-Pacific region and a series of matters of mutual concern.''

The agency declined to elaborate.

The Soviet news agency Tass, in its dispatch from Pyongyang, said Shevardnadze and Kim met for four hours with discussions focused on ''the situation on the Korean Peninsula.''

Before departing from Moscow, Shevardnadze said in an exclusive interview with a major Japanese daily that he would discuss with North Korean officials ways to ease military confrontation on the Korean Peninsula and stressed the importance of U.S. participation in achieving the goal.

The United States deploys about 40,000 troops in South Korea.

Shevardnadze said removal of tension on the peninsula conforms to national interests of both Koreas and nations in Asia.

Shevardnadze also said the Soviet Union and South Korea have steadily expanded economic and trade ties but declined comment on when the two countries will establish diplomatic relations.

The Korea Peninsula is divided into the democratic South and the Communist North.

North Korea, ruled by President Kim Il Sung since its founding after World War II, is one of few Soviet bloc nations clinging to the old form of communism despite sweeping reforms in Eastern Europe.

Korea watchers said North Korea was displeased with the recent moves toward rapproachement between the Soviet Union and South Korea, particularly the June meeting in San Francisco between Soviet President Mikhail Gorbachev and South Korean President Roh Tae Woo.

En route to Pyongyang, Shevardnadze stopped in the northeast Chinese city of Harbin for talks with Chinese Foreign Minister Qian Qichen.

He is scheduled to arrive in Tokyo Tuesday to attend the regular

Soviet-Japanese foreign ministers' meeting after a stop in the Siberian naval port of Vladivostok.

The Foreign Ministry said Shevardnadze and Japanese Foreign Minister Taro Nakayama will hold three sessions to discuss matters of common interest.

Topics of discussions will include Gorbachev's long-pending visit to Japan probably in the spring, and a territorial dispute over four North Pacific islands held by Moscow since the end of World War II but claimed by Japan, ministry sources said.

The dispute has prevented improvement of relations between the two countries and the signing of a bilateral peace treaty.

The two foreign ministers also are expected to discuss Japan's economic and technological assistance to support Gorbachev's glasnost and perestroika reform policies, the sources said.

At the Houston summit of seven Western advanced nations in July, Japan withheld its decision to offer financial aid to Moscow because of the territorial issue.

#90246u0201 09/03/1990 ~United Press International

(SEPT. 3) UPI - The major league baseball record book received another entry Sunday as Toronto Blue Jay pither Dave Steib hurled the major league's ninth NO-hitter of the 1990 season. Toronto defeated Cleveland 3-0. For Steib, the accomplishment was sweet justice... coming after three previous cases in which he lost NO-hit bids with one out to go. This year's major-league season has featured a record number of NO hitters.

Sunday marked the opening of one of the world's foremost air shows. The gathering in Farnborough, England, is expected to attract 350- thousand visitors. The show boasts exhibits from more than 100 countries. Demand is falling for products from the aerospace industry for reasons ranging from sagging economies to reduced tensions throughout Europe.

#90246u0206 09/03/1990 ~United Press International

BANGKOK, Thailand (SEPT. 3) UPI - Cambodian Prime Minister Hun Sen will not attend planned peace talks in Jakarta unless resistance leader Prince Norodom Sihanouk also participates, official Cambodian radio reported.

The radio quoted a letter from Hun Sen, leader of the Vietnamese- backed Cambodian government, in response to an invitation by Indonesian Foreign Minister Ali Alatas to attend the talks Wednesday in Jakarta.

''I am very happy over the Cambodian informal meeting that Your Excellency has proposed ... in order to decide the composition of the Supreme National Council which will quickly open the way toward a common solution for the Cambodian problem,'' he wrote.

But, Hun Sen said, since Sihanouk, leader of the U.N.-recognized resistance coalition, would not attend the talks, he also would not attend sending in his place Hor Nam Hong, a minister attached to the prime minister's office.

''In the case that Prince Norodom Sihanouk ... agrees to attend this meeting, I will leave immediately for Jakarta in order to attend the meeting,'' Hun Sen's letter said.

A spokesman for Sihanouk in Bangkok, Ek Sereywuth, said Sihanouk was sending son Prince Norodom Ranariddh to the Jakarta meeting because he felt it was only the opening preliminary in what is likely to be a protracted negotiations.

''The prince believes there will have to be other meetings including a reconvening of the Paris conference before there is any final agreement,'' Ek Sereywuth said.

The Jakarta meeting is intended to bridge differences over the formation of a Supreme National Council and to consider a comprehensive peace plan worked out by the five permanent members of the U.N. Security Council.

In a separate broadcast Sunday Phnom Penh radio reported on what it said was a secret meeting in April of the Khmer Rouge, the most powerful guerrilla group within the three-party resistance coalition.

It said the chairman of the meeting, Khmer Rouge chief of staff Chhit Chhoeun, also known as Ta Mok, told military commanders that the four factions would be unable to maintain a peace settlement and that civil war would soon break out again.

According to the radio, Ta Mok said the Khmer Rouge would use subversive tactics and stores of ammunition.

''The masses who have been indoctrinated will certainly support us and we will be able to seize the final victory,'' he was quoted as saying.

The radio said the account came from secret government agents who have infiltrated the Khmer Rouge, but gave no other substantiation for the report, which justifies repeated government warnings that the Khmer Rouge is planning a second phase of war after a political settlement.

The report said the guerrilla group still enjoyed firm support from China, but it warned that the situation was fluid and ''liberal democracy has infiltrated the world.''

It said former Khmer Rouge Prime Minister and Communist Party leader Pol Pot was in charge of military research and strategy with the title of commander of the western and southwest military region.

Earlier this year, the Khmer Rouge reported that Pol Pot resigned from all active positions.

A Vietnamese invasion ousted the Pol Pot government in 1979 after nearly four years in power that left more than 1 million Cambodians dead from political executions, hunger and inadequate medical care.

#90246u0211 09/03/1990 ~United Press International

TOKYO (SEPT. 3) UPI - Share prices tumbled 2 percent in Tokyo Monday as investors worried that the market had advanced too far the week before.

Profit-taking and arbitrage selling dominated light trading as the 225-issue Nikkei average fell 557.94 points, or 2.1 percent, to end at 25,420.43.

The Nikkei closed Friday with a 308.41-point gain.

The Tokyo Stock Price Index of all major shares, which advanced 17.95 points Friday, slid 28.05 points to end at 1,945.92.

Volume was estimated at 360 million shares, down from Friday's estimate of 600 million shares.

Buyers faded to the sidelines as rumors of insider trading scandals and reports of higher energy prices swept the market floor, brokers said.

Rising oil prices and a Japanese press report that Saudi prices for liquified petroleum gas was about to jump 64 percent discouraged buying, they said.

Additionally, arbitrage selling pushed the Nikkei down, they said.

But the underlying factor, said broker Paul Migliorato of Jardine Fleming (Securities) was that after a week that saw the Nikkei rise 7.3 percent, market players felt it was time for a correction.

''The Tokyo market led other world markets by about two times. That unnerved investors. They felt the market was too far out ahead,''

Migliorato said.

The market took a pessimistic view of the release of women and children hostages from Iraq, he said.

Combined with the failure of U.N. Secretary-General Javier Perez de Cuellar's peace mission, investors felt the release increased the probability of war with Iraq, he said.

Share prices fell broadly, with 33 out of 36 sectors in the main section dropping.

Only mining shares showed any particular strength, advancing about 3 percent on speculation about future energy demands, brokers said.

#90246u0260 09/03/1990 ~United Press International

ON THE U.S. FRONT, Saudi Arabia (SEPT. 3) UPI - Should Iraqi President Saddam Hussein order his armor to roll down the main highway from Kuwait, they are going to have to get past Col. Carl Fulford and his band of dirty U.S. Marines.

''If he chose to pour 1,000 tanks down that road, I would take them out one at a time,'' said Fulford in a slow Georgian drawl, gazing north across the shimmering desert toward Iraqi-occupied Kuwait.

''Give me six hours, and I would put a barrier plan in here that would make it tough as hell,'' said Fulford, the quintessential plucky Marine leader.

About 70,000 U.S. personnel are now deployed in Saudi Arabia, equipped with the world's most advanced weaponry, and by all estimates, able to turn any Iraqi invasion into a foolhardy and bloody experience for Baghdad.

Security rules forbid giving the exact location of America's anti- Iraqi front, but the brunt of any attack would first be borne by Arab troops under Saudi command along the Kuwaiti frontier.

Small units of U.S. special forces would direct in devastating barrages from naval vessels in the Persian Gulf, including salvos from the 16-inch guns of the battleship USS Wisconsin.

Sorties by tank-buster aircraft such as Apache and Cobra gunships and A-10 Thunderbolts would try to blunt the armored advance, but should the Iraqi tanks still keep coming, the first large-scale U.S. ground opposition would probably come from the Marines.

The 7th Marine Expeditionary Brigade is strewn across a 15-mile- long front that straddles the main highway leading down from Kuwait.

Baghdad could order its armor to outflank the Marines and traverse through the desert, but vital wheeled resupply vehicles bearing fuel and munitions could not keep up with the tracked leaders, and controlling the freeway would become essential.

The 24th Mechanized Infantry Division is now deploying in the desert to the west of the Marines to deter any Iraqi flanking operation, and mines sown by air would also direct Baghdad's forces into areas where they could be hammered by artillery and mobile anti-tank units.

''If we fight the battle, we have got to be totally mobile because of (Saddam's) strength,'' said a senior Marine officer. ''(Armored vehicles) and Cobras would come on back, and delay, hit, delay, hit, and then we go into our main battle positions.''

Militarily, Baghdad has started displaying great caution, apparently anxious not to provoke any action with a superpower, and clearly aware that any attack on Saudi Arabia would be for stakes of nothing less than national survival.

If political options are exhausted and war erupts, it is probable the American and pan-Arab forces will do the advancing, giving Iraq the more desirable task of defending.

Strategists have always held that attackers should outnumber defenders by 3 to 1 to outweigh the vulnerability of moving against fixed positions, such as Fulford's.

American ground forces should double in two weeks and about 1,000 top-range M1 tanks will soon be in place, giving the United States a clear ground offensive capability.

But they will still be numerically inferior to the estimated 170,000 Iraqis in Kuwait, part of Baghdad's overall million-strong military.

This disadvantage is outweighed by a presumed air superiority and pejorative assessment of the fighting ability of Saddam's armies, but there should be no doubt that a war will involve plenty of fatalities on both sides.

''If the president and national command authority asks us to go north, we will go north,'' said Fulford.

Naturally, death is an unpalatable concept, but also unsavory is the thought of longterm deployment in a forbidding enviornment of heat, snakes

and grime.

Showers and sleeping in air-conditioned rooms are luxuries given during overnight rotations to rear positions about once every two weeks. The onus on the dust-ladden men is to adjust to the desert and train, train, train, should the order come to head north.

''If you want to come out of this, you have to know your job,'' said a staff sergeant from Chino, Calif. ''We know that we are going to lose some.''

#90246u0261 09/03/1990 ~United Press International

(SEPT. 3) UPI - Thunderstorms rumbled across parts of the upper Midwest and threatened boaters off the Delaware coast Monday but most of the nation enjoyed a last taste of summertime sunshine on the final day of the holiday weekend.

Temperatures in northeastern New York state responded like clockwork to the unofficial end of summer by dropping steadily through the morning as brisk winds ushered in a cold front.

Crystal clear skies covered the area as temperatures dropped into the 50s. The thermometer was expected to continue its fall into the night, and forecasters warned of possible frost at higher elevations in the extreme northern sections of the state.

The National Weather Service posted a severe thunderstorm warning for northern South Dakota as rain moved eastward across the state.

To the east, Minnesota also received a dousing by thunderstorms that carried frequent lightning and possibly some small hail. The storms moved at about 15 mph, producing heavy rains in certain areas.

A cold front passed across the Delaware and Maryland coasts spawning thunderstorms with lightning, gusty wind and hail. Boaters in the Atlantic Ocean off the coast of Delaware were warned to move out of the storm's path.

To the north along the Atlantic coast, the greater Boston area and nearby parts of Massachusets had sunny skies and cool temperatures for the holiday.

Skies were generally fair over the West Monday, except some showers in the Pacific Northwest that resulted from a low-pressure area off the coast.

Hot and generally fair weather continued across the South on Labor Day.

The only rain of note came Sunday in scattered thundershowers across Florida and south Mississippi, where Natchez got three quarters of an inch and McComb slightly more than half an inch of rain.

Muscle Shoals, Ala., recorded a 100-degree reading Sunday, and Greenwood, Miss., Tupelo, Miss., and Memphis, Tenn. had 99s.

#90246u0267 09/03/1990 ~United Press International

LONDON (SEPT. 3) UPI - The U.S. dollar opened higher against the major European currencies Monday, gaining strength from the absence of fighting in the Persian Gulf, analysts said. Gold was up.

Trading was very thin, however, because U.S. financial centers were closed for the Labor Day holiday, dealers said.

Against the dollar, the pound fell 2.3 cents, opening at $1.8695 against $1.8930 Friday.

The recent fall in oil prices and bearish comments on the British economy were blamed for the drop in sterling.

In Frankfurt, the dollar opened higher at 1.5845 German marks against Friday's close of 1.5750. It was also up in Zurich at 1.3195 Swiss francs from 1.3080.

The dollar rose in Paris, Brussels and Milan, at 5.3125 French francs against 5.2425, 32.5750 Belgian francs against 32.20 and at 1,174.50 lire against 1,159.20.

Earlier in Tokyo, the U.S. dollar drifted lower against the Japanese yen amid expectations of easing U.S. credit to stimulate America's slowing economy.

The dollar closed at 143.55 yen, down 0.95 yen from Friday's close of 144.50 yen, the Bank of Japan said.

The U.S. unit closed higher in Hong Kong at 7.7662 Hong Kong dollars compared to 7.7618, and was up in Singapore at 1.7655 Singapore dollars from 1.7650 Thursday.

Gold closed higher in Hong Kong at $387.05 an ounce from $385.25.

Gold opened higher in Zurich at $387 against $384.50, but was unchanged in London at $385.25.

Silver opened unchanged in Zurich at $4.80 an ounce, but was fractionally

higher in London at $4.82 an ounce from $4.81.

-30- 1730

#90246u0274 09/03/1990 ~United Press International

(SEPT. 3) UPI - Here is a roundup of the latest major events in the Persian Gulf crisis stemming from the Aug. 2 Iraqi invasion of the oil-rich emirate of Kuwait.

Hundreds of female and children hostages freed by the Iraqis arrived in their home countries, at least 40 of them Americans accompanied by civil rights leader Jesse Jackson, but the captives' release did little for the prospects of resolving the Persian Gulf crisis any time soon. In a further deterioration of the situation, East German Ambassador Kurt Merkel and his wife in Kuwait City were arrested by Iraqi authorities, East Germany's ADN news agency reported Sunday. It was believed to be the first such Iraqi action against diplomats since Baghdad ordered all foreign embassies in occupied Kuwait to close Aug. 24, an order that has been defied by the United States and other nations.

ON THE U.S. FRONT, Saudi Arabia - Should Iraqi President Saddam Hussein order his armor to roll down the main highway from Kuwait, they are going to have to get past Col. Carl Fulford and his band of dirty U.S. Marines. ''If he chose to pour 1,000 tanks down that road, I would take them out one at a time,'' said Fulford in a slow Georgian drawl, gazing north across the shimmering desert toward Iraqi-occupied Kuwait. ''Give me six hours, and I would put a barrier plan in here that would make it tough as hell,'' said Fulford, the quintessential plucky Marine leader. About 70,000 U.S. personnel are now deployed in Saudi Arabia, equipped with the world's most advanced weaponry, and by all estimates, able to turn any Iraqi invasion into a foolhardy and bloody experience for Baghdad.

WASHINGTON - A former male hostage expressed anger at the conditions under which Iraq held the hostages. ''The people that I just left about 24 hours ago are held against their will without water, without food, without electricity,'' said Lloyd Culbertson, 76, a Canadian national who made his home in El Paso, Texas, before going to Kuwait to teach electronics to the military.

Iraq's ambassador to the United States, Mohamed al-Mashat, was at the airport to greet the women and children and told reporters Iraq is ready to set male foreigners free if the United States promises not to attack Iraq. He left the airport as Culbertson spoke.

LONDON - Prime Minister Margaret Thatcher said Sunday whatever action Britain must take to deter Iraqi President Sadddam Hussein will not be influenced by the hostages he has taken. ''If you in fact allow the taking of hostages ... to determine your action against a dictator, he has won. And all he'll ever do ... is to take hostages, knowing that other people would then never take the requisite action to stop such a dictator.''

WASHINGTON - The Bush administration may have to start answering questions from Capital Hill soon on its Middle East policy. Congress returns to Washington this week and many members visited the troubled area during the recess. Rep. Lee Hamilton, D-Ind., chairman of a House subcommittee on the Middle East, said the president has had his way so far but, ''Now that changes and the president is going to have to deal with the Congress.''

AMMAN, Jordan - U.N. Secretary-General Javier Perez de Cuellar reiterated Sunday that he was ''disappointed'' that two days of talks with Iraqi Foreign Minister Tariq made no real progress toward resolving the crisis. He said he was unable to persuade Iraq to comply with U.N. Security Council demands that it withdraw from Kuwait.

-30- 3697

#90246u0355 09/03/1990 ~United Press International

AMMAN, Jordan (SEPT. 3) UPI - Fifty more Jordanians departed by bus Monday on the long, dusty trip to Kuwait, joining hundreds of others who in recent days have been quietly slipping back to try resuming their lives under Iraqi rule.

''I have to go back to my home and family,'' Mohammad Zackaria, an accountant, said before he boarded the bus with his wife and daughter to rejoin their four sons who have remained since the Iraqi invasion Aug. 2.

According to sources at the Jordanian Interior Ministry, hundreds of Jordanians who live in Kuwait but were in Jordan at the time of the invasion have been returning.

They were unable to give a figure for the total number of people who have returned, but said that on Sunday alone, at least 1,346 Jordanians departed on the drive to Kuwait through Iraq.

The return of Jordanians, mostly of Palestinian origin who have lived and worked in the tiny oil-rich Gulf state for decades, has gone virtually unnoticed - overshadowed by the exodus of tens of thousands of foreigners from Iraq and Kuwait.

About 300,000 Jordanians resided in Kuwait and many reportedly have stayed on, preferring to attempt to continue their lives rather than face uncertain futures back home, where unemployment is officially pegged at 15

percent.

In addition, support for Iraqi President Saddam Hussein is high among Palestinians and Jordanians, despite the severe economic consequences of the Iraqi invasion, because of their bitterness over their treatment in Kuwait and opposition to the American-led military intervention in the Gulf.

The private Amman-based Shbelia Transport Co. is among a number of firms that have begun running regular trips by air-conditioned video- equipped buses to Kuwait for those wishing to return.

A spokeswoman for the firm said the first bus left last Thursday with 50 people aboard. Fifty more paid about $35 each to make the trip on Monday. The trips will be made twice a week, she said.

''My brother called from Basra in Iraq and he encouraged us to return to Kuwait, saying everything is quiet and that food, water and electricity are still available,'' Ismat Mohammad, who was born in Kuwait 30 years ago said as she boarded the bus.

Mohammad worked in a private import-export company for two years and like many Jordanians who live in Kuwait, spends her summers in Amman. She said that her Palestinian boss told her after he arrived in Jordan a week ago that the company was forced to close by the U.N.- imposed sanctions on Iraq and Kuwait.

Despite the loss of her job, she said she was returning to be with her family.

Bitterness was evident among those on the bus over the American-led military intervention in the Gulf and the blockade on Iraq.

''I've been in the private import-export business in Kuwait for 20 years, and my business has now gone down the drain because of the sanctions,'' said Wa'el Jardaneh. He has lived in Kuwait for 34 years.

Maha Mahmoud, who was also born and raised in Kuwait, was at the bus company offices seeking information on their service, saying she planned to join her husband and parents in Kuwait soon.

She said she would rather live under Iraqi rule than under the deposed-Kuwaiti royal family.

''I really believe it will be much better for us Palestinians now in Kuwait. We were not able to work in government institutions or even banks. I wasn't even allowed to enroll at the university because I was a non-Kuwaiti Palestinian. In Iraq, Palestinians are treated as equals, as

they are in their universities,'' Mahmoud said.

The fear of war breaking out was shared by those boarding the bus, but they said it is a risk they have to take.

''What options do we have? We must continue our lives normally and not wait around for a war to break out,'' said Mohammad. ''We can't afford to live in fear of war.''

-30- 4082

#90246u0361 09/03/1990 ~United Press International

(SEPT. 3) UPI - Hundreds of female and children hostages held in Iraq arrived in their home countries yesterday, among them at least 40 Americans who were accompanied by civil rights leader Jesse Jackson. Despite the captives' release, it does NOT appear the Persian Gulf crisis will be resolved any time soon. U-N Secretary-General Perez de Cuellar said- ''Time is working against peace and in favor of Iraq.''

.

Saudi Arabia has raised its oil production by two-Million barrels a day to compensate for shortages brought on by the crisis. Riyadh Radio made the announcement yesterday and quoted a Saudi source as saying the United Arab Emirates and Venezuela also are increasing their production levels. The decision follows an emergency OPEC meeting in Vienna last week.

One year ago rioting gutted the resort city of Virginia Beach, Virginia, during an annual beach party for black college students from along the East Coast. But this year, the crowd of about 28-thousand young people created few disturbances as they partied in the streets last night. City Manager Aubrey Watts Jr. said Laborfest '90, as it's called, had turned a corner for Virginia Beach.

A report released in Washington says the major newspapers and television networks routinely ''ignored, marginalized, or inaccurately portrayed'' the lives of the nation's 100-Million working men and women in 1989. The study by the Fairness and Accuracy in Reporting group says nightly network news programs devoted about two-point-three percent of their coverage to workers' issues.

-30- 1726

#90246u0362 09/03/1990 ~United Press International

(SEPT. 3) UPI - NASA will try again Thursday morning to launch the long-delayed shuttle Columbia on an astronomy mission. The countdown clocks were re-started early this morning. Saturday's lift-off was canceled because of an electrical problem with one of four telescopes

aboard the shuttle. Columbia already is three months behind schedule.

Police say a 22-year-old man visiting New York with his family was fatally stabbed last night as he tried to protect his mother while the family was robbed and attacked by a group of teens. The incident occurred on a subway platform. Police say one youth punched the mother in the face. Brian Watkins was stabbed in the chest when he and his brother jumped to protect her.

U-S Park Police and Washington, D-C, authorities kept the public and media away from about 50 Ku Klux Klan members as they staged a small rally on the east side of the Capitol yesterday. Klan members originally planned a march from the Washington monument to the capitol, but anti- Klan demonstrators blocked their path and the group was driven by bus to their rally site.

The Persian Gulf crisis is certain to figure prominently when President Bush and Soviet President Gorbachev meet in Helsinki, Finland, on Sunday. But the surprise summit will also give the two leaders a chance to discuss the slow pace of arms reductions talks regarding conventional forces in Europe and strategic nuclear arsenals.

#90246u0395 09/03/1990 ~United Press International

LA VERNE, Calif. (SEPT. 3) UPI - A fire at a computer circuit board manufacturing plant produced a toxic cloud that forced evacuation early Monday of more than 400 people from a mile-square residential area, authorities said.

Six people were treated for nausea, dizziness and headaches after breathing chemical fumes, officials said.

The fire broke out about 9 p.m. Sunday at Super Tech, a computer circuit manufacturer plant 32 miles east of Los Angeles, La Verne Police Sgt. Jim Strona said.

An hour later a small surrounding area was evacuated and the evacuation zone was widened before midnight to one square mile. Officials estimated that 400 people were forced from their homes, some of them from a mobile home park.

By midnight, about 50 evacuees had gathered at a shelter set up at the La Verne civic center, Assistant City Manager Jeff Allred said.

Firefighters and hazardous materials teams from the La Verne, Pomona and Los Angeles County Fire Departments battled the blaze using fire-retardant foam and water, he said.

''It's a very slow process,'' he said. ''The (tainted water and foam) residue has to be vacuumed up by a hazardous materials truck. The hazardous materials truck they have out there is completely full and another truck is en route from Bakersfield,'' about 110 miles away, he said.

By sunrise the fire had almost burned itself out but some embers were still blazing, Strona said.

Some residents on the outskirts of the evacuated area were allowed back into their homes about 3 a.m. but about 200 others remained out of their homes in a five square-block area because of lingering fumes, he said.

The injured included two police officers who breathed the fumes and two firefighters. They were released after treatment for nausea, dizziness and headaches, Strona said.

Paramedics treated another person and a child for similar complaints at the evacuation center.

-30- 2143

#90246u0397 09/03/1990 ~United Press International

OKA, Quebec (SEPT. 3) UPI - Heavily armed Canadian soldiers Monday tightened their perimeter around a group of armed and defiant Mohawk Indians who refused to surrender ''unconditionally,'' stalling an end to the seven-week-old dispute.

Army spokeswoman Capt. Lynne Bermel said troops moved in ''to tighten the perimeter as part of our military operation against the last Warrior stronghold.''

Bermel said the army moved several hundred yards closer to ''The Pines,'' an Indian alcohol and drug treatment center on the Kanesatake reserve, west of Montreal.

Oneida Nation Chief Terry Doxtator, a representative of the Six Nation Iroquois Confederacy and spokesman for the Mohawks, told reporters outside the treatment center the situation was ''desperate.''

Doxtator said the remaining Mohawk Warriors ''will not lay down their arms if the army moves in.''

He said the army issued an ultimatum to the Warriors Sunday night to lay down their weapons and surrender, and then gave notice of its intent to move in Monday morning.

Doxtator said the Warriors will not surrender ''unconditionally''.

More than 200 combat-ready soldiers, some on foot and others in armored personnel carriers, were concentrated in the area around the treatment center, the army said.

Bermel said the army's action was consistent with its original mandate to restore peace and security to the area. ''The security of the public is still at risk,'' she said. ''There are people there with arms and they pose a danger to public safety.''

But Bermel said the army now was consolidating its position and reestablishing defensive positions until further orders were issued.

About two dozen members of the Mohawk Warriors and an unknown number of women and children were reportedly holed up in the treatment center.

A larger group of men, women and children remained inside the reserve's community center and food bank, also refusing to leave.

The dispute in Oka began several months ago over a proposed expansion of the town's golf course on land that Mohawks on the Kanesatake reserve claim is an ancient burial ground. It turned violent July 11 when a provincial police officer was killed in a shootout with Mohawks.

The Mohawks fear retribution for the policeman's death from the Surete du Quebec, the province's police force, if they are handed over, Mohawk spokesmen indicated.

The Canadian army moved in to the Kanesatake reserve Saturday and since then has dismantled several native barricades, including the original standoff site where the July 11 ill-fated police raid was aimed.

The army's advance has not met with any resistance other than shouting matches and a series of stare-downs between soldiers and the militants. There have been reports of single shots being fired, including early Sunday, but no one has been reported injured.

A sympathetic dispute at a second Mohawk standoff site at the Kahnawake reserve near Chateauguay, south of Montreal, ended Saturday when the army moved in and removed a barricade on a key commuter bridge.

Talks for a peaceful, non-military, settlement of the native standoffs collapsed last Thursday after the Quebec government refused to return to the negotiating table.

The collapse upset some Mohawk negotiators who said there was a split between moderate, traditional Mohawks and militant members of the Warriors

Society who were pressing a demand for Indian sovereignty.

More than 3,000 heavily armed soldiers, equipped with tanks and armored personnel carriers, have been poised for several days at the Kahnawake and Kanesatake reserves awaiting orders to dismantle the barricades.

#90246u0422 09/03/1990 ~United Press International

COLOMBO, Sri Lanka (SEPT. 3) UPI - About 300 army reinforcements landing on a strategic northern island met stiff resistance from Tamil rebels and fought a series of skirmishes that left 53 guerrillas and two soldiers dead, a senior military official said Monday.

The violence came as the military continued its battle to gain control of northern Sri Lanka, where the Liberation Tigers of Tamil Eelam are fighting to establish an independent Tamil homeland.

Navy landing craft carrying the 300 Sri Lankan army reinforcements landed on the island of Mullaitivu amid rebel gunfire Sunday morning, the senior military official said.

He said 20 rebels and two soldiers were killed by rebels during the landing phase of the assault. Another 33 rebels were killed as troops moved inland, he said.

The island is located a few miles south of the northern port town of Jaffna and was a staging area for the ongoing northern military offensive against the Tigers.

Security forces launched their offensive nearly two weeks ago in an attempt to break through guerrilla lines and relieve some 200 soldiers and policemen trapped inside a 300-year-old Dutch-built fort in Jaffna.

The operation, which involved about 3,600 troops backed by mortar fire and helicopter gunships, was expected to last only three days. But heavy enemy resistance slowed the military's drive and as of Monday they had failed to achieve their mission.

The soldiers and policemen have been trapped inside the star- shaped, 17th century fort since hostilities broke out in mid- June when the Tigers launched simultaneous attacks on four army camps in the eastern part of the country.

Since then, more than 2,600 soldiers, rebels and civilians have been killed in the fighting.

The Tigers have been fighting since 1983 to create an independent Tamil

homeland in the north and east of the country. But the situation in the teardrop-shaped island had remained relatively quiet for a year before the latest outbreak of warfare.

The minority Tamils, who are mostly Hindu, claim a separate state is necessary because of years of oppression by the majority Sinhalese, who are predominantly Buddhist and control the Colombo government.

#90246u0426 09/03/1990 ~United Press International

VIRGINIA BEACH, Va. (SEPT. 3) UPI - Laborfest '90, a gathering of young blacks that erupted in violence a year ago and made this resort city a target of racial recriminations, moved peacefully toward its finale Monday.

At a morning news conference, law enforcement officials credited the presence of chaplains and community volunteers with defusing racial tensions and said the number of criminal incidents was less than on normal summer weekends.

But the president of the Virginia chapter of the NAACP said the ''jury's still out'' on the sucess of the weekend that city officials have painstakingly planned for a year.

Jack Gravely, who was highly critical of police in 1989 when rioting and looting broke out along the oceanfront, said police outnumbered the revelers along the resort strip Friday night.

''It was too suffocating. It was just too much,'' said Gravely.

But Jonathan Chace, regional director for the Department of Justice's Community Relations Service in Philadelphia, said a nine- member team was ''delighted'' with the weekend's events.

''You saw the presence of the police but you also saw the response of so many other agencies to help lend their support and assistance in resolving that matter,'' he said. ''You saw the National Black Police Association, you saw the clergy, you saw the volunteers, you saw so many others who could provide a first response so that the burden of response did not fall on the local police department.''

About 28,000 uouths in Virginia Beach for a Labor Day weekend festival directed toward college-age blacks frolicked overnight along the resort strip, blaring boom boxes and carrying on squirt gun fights.

Young people headed to the streets instead of a rap concert at a nearby park but, unlike last year when police pressed in on a massive crowd, people were allowed to freely roam along Atlantic Avenue, which was closed

to traffic.

Along the main beachfront thoroughfare, smaller gatherings broke off from the main crowd at various hotel fronts through the night. Usually young people gathered around a blaring car stereoes, chanting and often singing in unison. The area was filled with chaplains and community volunteers who gently stepped in when signs of trouble arose. State and local police were always nearby but generally did not intervene.

The event was a contrast to last year when Virginia Beach residents awoke to find their city turned into a battle zone: Rioting had gutted the resort strip during an annual beach party for black college students from along the East Coast.

Black leaders in 1989 charged that police in riot gear overreacted to regain control of the streets. Bitter merchants of looted stores threatened to shut down. City leaders were ducking questions.

But this year, Virginia Beach was a different city: State and local police were looking over a calm oceanfront of young people having fun. Businesses held open their doors. Local leaders were smiling as they presided over news conferences.

City Manager Aubrey Watts Jr., a low-key bureaucrat who has overseen the mobilization of thousands of local officials to welcome young blacks this weekend, said Laborfest '90 had turned a corner for Virginia Beach.

''I think you can tell probably by the demeanor of this normally pretty non-smiling individual that I am obviously very pleased with what is occurring here in our city,'' Watts said Sunday.

''I certainly find this a more enjoyable situation than what I woke up to a year ago,'' said Watts, adding he still has not been getting much sleep.

One year ago, Watts awakened to nationally televised images of thousands of young blacks clashing with riot police, after more than 100 storefronts had been smashed and merchandise looted at a cost of $1.4 million.

But Sunday, the resort strip was bustling with mostly black visitors eager to hit the beach, check out the opposite sex and buy souvenirs. Most complaints were confined to logistical matters, such as parking and closed-off traffic routes.

Police early Monday reported no major incidents and no felony arrests. Since Friday evening, police had reported 86 arrests, a large share of them for public intoxication.

Authorities said the number of arrests was roughly similar to any weekend

during the summer.

The city spent the entire year analyzing what went wrong last year and worked with historically black universities to put on Laborfest '90, an event aimed at welcoming young blacks and erasing last year's negative images of the resort.

Last year's violence erupted during the annual gathering of black college that was then known as ''Greekfest.'' Up to 100,000 crowded into the city and local authorities only gained control after hundreds of riot police formed a massive wedge and marched down Atlantic Avenue.

The Virginia National Guard was later called in and black leaders charged the the high-profile presence of authorities heightened racial tension.

#90246u0466 09/03/1990 ~United Press International

BONN, West Germany (SEPT. 3) UPI - Jordan's King Hussein met with West German Chancellor Helmut Kohl Monday for talks on the Gulf crisis, continuing his efforts to find a peaceful solution and win support from European governments for his beleagured kingdom.

It is widely believed the king is seeking additional emergency aid for Jordan's economy, which has been crippled by tens of thousands of refugees who have poured into Jordan since the Aug. 2 Iraqi invasion of Kuwait.

In addition to medical supplies, tents and food, the West German government has already sent a chartered plane to Jordan to fly out refugees.

West German President Richard von Weizsaecker welcomed Hussein with military honors at the presdidential residence.

Foreign Minister Hans-Dietrich Genscher met with his Jordanian counterpart Marwan AL-Qasem and Prime Minister Mudar Badran to discuss the situation in the Gulf.

After his meeting with Kohl, Hussein was to continue on to Paris. He is visiting five European countries for talks on the Gulf.

Meanwhile, Israeli Defense Minister Moshe Arens, also in Bonn, met earlier with West German Defense Minister Gerhard Stoltenberg and with Kohl Monday.

''The talks focused on the Gulf crisis,'' a government spokesman said.

In other developments, the spokesman said that 98 German women and children were taken from Kuwait to Baghdad Monday, leaving behind another

150 Germans, many of them embassy personnel.

''We hope they will get exit visas in Baghdad right away,'' Foreign Ministry spokesman Juergen Chrobog said.

Including the new arrivals, about 500 Germans are now believed held in Iraq.

Chrobog said the West German embassy in Kuwait was continuing to function despite the cut off of water and electricity, but with the help of a small emergency power generator.

In East Berlin, government spokesman Matthias Gehler said the East German ambassador in Kuwait, Kurt Merkel, and his wife had been taken to Baghdad Sunday, because the living conditions in the embassy had become unbearable.

The Merkels had stayed in the mission without water and electricity for more than a week.

Gehler said that the Iraqi authorities had allowed Merkel and his wife to stay in the West German embassy in Kuwait, but upon entering the building, the two were arrested.

After returning to their own embassy for a short while, Merkel and his wife were then escorted by Iraqi troops to Baghdad.

Gehler said there are still about 30 East Germans in Iraq.

#90246u0490 09/03/1990 ~United Press International

(SEPT. 3) UPI - One of the former American hostages who arrived in Washington yesterday had some harsh words for both Iraqi and U-S officials. 76- year-old Lloyd Culbertson, a Canadian who lives in El Paso, Texas, said Iraqi officials have left hostages without water, food and electricity. He also criticized American officials for NOT doing more to free those held in Iraq. Said Culbertson- ''Our State Department hasN'T lifted a hand for us.''

The countdown clocks are moving toward Thursday morning's re- scheduled launch of the shuttle Columbia. Countdown resumed early this morning. NASA engineers at Cape Canaveral worked around the clock this weekend to repair an electrical problem on one of four telescopes the shuttle will carry into space. NASA is eager to get the spaceplane off the ground following a launchless summer.

The Justice Department says about one in four American households had at least one family member who was a victim of crime in 1989. The

department's statistics director says black households and households with higher incomes were more vulnerable to crime. Homes in the Northeast were the least vulnerable to crime with a 19 percent crime rate, while homes in the West were the most vulnerable at 30 percent.

Authorities in Gainesville, Florida, say the task force set up to investigate the slayings of five young people is comparing similarities with murder cases in nine other states. Police say the list of suspects has been narrowed to eight. University of President John Lombardi announced yesterday classes will resume tomorrow. They were postponed for about a week following the murders.

#90246u0500 09/03/1990 ~United Press International

(SEPT. 3) UPI - Hundreds of thousands of people gathered to hear Pope John Paul celebrate open-air mass in the East African nation of Tanzania yesterday. The pontiff urged Christians and Moslems to work together to put aside religious differences in the interest of their nation. The pope said mass in Swahili, the official language of Tanzania. It was the pope's second stop on an 11-day African tour.

Official Cambodian radio reports Cambodian Prime Minister Hun Sen will NOT attend peace talks in Jakarta, Indonesia, unless resistance leader Prince Norodom Sihanouk also participates. Sihanouk says he's sending his son because he believes the Jakarta meeting will be only the first in a series of on-going negotiations.

Nobel prize-winning author Alexander Solzhenitsyn was exiled from the Soviet Union in 1974 for his writings. But now the Soviet media, which led staunch campaigns against Solzhenitsyn, is calling for the writer's return. The Communist Party newspaper Pravda pleaded with the author to ''come back'' and said- quote- ''What is obvious is that... he is a gigantic talent.''

Former Philippine first lady Imelda Marcos is back in Hawaii after a seven-month absence during which she was tried and acquitted on racketeering charges in New York. Marcos arrived in Honolulu dressed in black and appearing happy and relaxed. After leaving the airport, she went to visit the temporary resting place of her husband, the late Ferdinand Marcos. He has NOT been buried because Mrs. Marcos hopes to take his body back to the Philippines.

#90246u0505 09/03/1990 ~United Press International

DHAHRAN, Saudi Arabia (SEPT. 3) UPI - American forces deployed in the shifting sands and 123-degree heat of Saudi Arabia are inventing a new

desert-oriented array of weapons to fight one of the military's most oppressive enemies: boredom.

Some Marines, for example, are spending their off-hours snaring scorpions and pitting them against each other in desert fights, with bets being placed all around.

Troopers of the 101st Airborne Division are building their own amenities.

They have fashioned a mock television out of cardboard, a pay phone, an electronic teller machine and - the piece de resistance - an air conditioner, before which they stand and pretend to bask in a rush of cool soothing air.

''Have you ever heard the saying, 'improvise, overcome, and adapt'?'' asked Marine Corp. ''Gonzo'' Haynes, 23, from Texas.

''We are doing it,'' the corporal said and then, reflecting on their situation in the sizzling heat, offered that ''it sucks.''

There is no lengthy time off in the front-line positions. Nights are mostly filled with training. During the day, troops huddle beneath sun-shielding camouflage nets.

Military organizations have an abundance of brain-addling tasks to fill a trooper's time - soldiers politely call them bovine excreta - ranging from endless cleaning of rifles to seemingly continous orders in the desert environment to dig out of aircraft engines and tank parts the powdery sand that blows and settles in every possible nook and cranny.

Servicemen say they must tend to equipment far more frequently here than at home bases because the heat and sand both take a toll. Troops are reported to be using toothbrushes to clean machine-gun parts. The army is said to beflushing the engines of its helicopters daily, and ships and other equipment must use desert-grade oil and clean filters often. The heat is melting sensitive radio wires.

But servicemen do their best to add fun to their off hours, a difficult task in an Islamic nation that offers no access to ''babes and booze.''

They play cards - the favorite games are ''spades'' and ''bastard rummy'' - and games of checkers are played with the tops of mineral water bottles.

Books read around the camps are mostly escapist adventures, with the spooky thrillers of Steven King hot numbers among one group of marines that was recently resting in a moonscape of rocks, sand and more sand.

''It's stupid, but it keeps you from thinking,'' Lance Corp. Michael Dunn,

19, from Amarillo, Texas, said as he scanned a novel with an amorous woman on its cover. ''That's all its good for.''

Most servicemen are hungry for any information from home. Newspapers, even though a few days old, are read slowly, with troopers dwelling on every article before the papers are gently passed on to other young comrades.

Many troopers actually go jogging in the desert heat, an exercise made more difficult by orders to run only if a weighty gas mask is strapped to the belt.

At one staging area, soldiers set up an impromptu gym with weights made from concrete-filled paint cans linked by a steel bar.

Super-short hair is also favored here. One member of the 82nd airborne Division was reported to have buzzed the hair off 1,000 men in hopes that baldness would be better in the severe heat.

Soldiers speak longingly of cookies and other treats from home. But they will not get them if a rule on this mission forbidding any package over 12 ounces is enforced.

The scorpion fights must take place covertly because the military brass frowns on it.

A bite by such toxic creatures invariably means shipment to the rear, and officers order that anyone with scorpion wounds that are not on the leg will face a court martial.

''The scorpions out here are really nasty, and we have been told not to play with them,'' said a Marine named Ty Chapman. ''It we get bitten anywhere but the leg, it means we have been screwing around with them.''

The service men and women are constantly dreaming of ways to get cool.

''I sleep out on the flightline and wear my earplugs,'' said Sgt. Jimmy Velasquez, 24, from Brooklyn, New York. ''When the helicopters come, there is a nice breeze. I get a nice sleep, until the C-5s (massive transports) come in.''

#90246u0513 09/03/1990 ~United Press International

(SEPT. 3) UPI - Voters in Florida will decide Tuesday whether Sen. Lawton Chiles or Rep. Bill Nelson, two Democratic veterans of Florida politics, will win an opportunity to unseat Republican Gov. Bob Martinez in November.

The Florida Newspaper Poll indicated Sunday that Chiles was leading Nelson

55 percent to 30 percent, with 15 percent still undecided.

But the poll suggests the general election campaign will begin in a virtual dead heat, no matter which Democrat wins the nomination Tuesday. The governor has been running a $2 million ad campaign touting his achievements, while Nelson and Chiles have been concentrating on each other.

Martinez won the GOP primary with 62 percent of the vote against four challengers, all of whom registered single-digit support. Twenty- three percent of the Republicans polled were undecided.

Looking ahead to November, Chiles outpolled Martinez 45 percent to 40 percent, with 15 percent undecided - a loss of 7 percentage points for Chiles and a gain of 5 points for Martinez since a similar poll in April.

In a Nelson-Martinez match-up, Nelson leads 42 percent to 40 percent, with 18 percent undecided. Martinez has lost 2 points and Nelson has gained 1 point since April.

The survey of 750 registered voters, conducted by telephone Aug. 26-28 on behalf of The Fort Lauderdale News and Sun-Sentinel, The Florida Times-Union and The Orlando Sentinel, was considered accurate to within 4 percentage points.

Nelson dismissed the poll, saying he expected the undecided voters to swing his way once their attention turned to the election.

''People haven't been thinking about this. They've been thinking about Gainesville, about the Persian Gulf, about Labor Day. The undecided vote's going to break,'' Nelson said.

Martinez, campaigning Monday in Fort Lauderdale, also disputed the polls' results, saying Chiles ''believes he can get elected on nostalgia and it just doesn't work.''

In Nevada, acting Gov. Bob Miller, a favorite of the gambling industry, faces token opposition for the Democratic nomination in Nevada's primary election Tuesday while eight political unknowns are scrambling for the GOP nomination.

Voters will also select party nominees for two congressional seats, four other statewide jobs, the Legislature and local offices.

Miller, 45, was elected four years ago as lieutenant governor and became acting governor when Dick Bryan was elected to the Senate in 1988. In this campaign, he has raised more than $585,000 in contributions of $500 or more from the Nevada casinos, the major industry in the state.

In contrast, the clubs have not given a contribution of $500 or more to any of the five other Democratic candidates or the eight Republicans.

Miller, the son of a Las Vegas casino executive, has stressed his support of education and his staff is now working on a proposed payroll tax to provide an extra $100 million a year for bigger support of the schools and other state programs.

The Republican field has narrowed to a battle between self-made millionaire James Gallaway and contractor Charlie Brown.

In races for two House seats, 69-year-old Republican Rep. Barbara Vucanovich is expected to easily defeat two opponents and face former Las Vegas Assemblywoman Jane Wisdom, who is unopposed for the Democratic nomination.

Democratic Rep. James Bilbray seeking a third term in the 1st Congressional District, faces Josh Elliott, a tax accountant.

-30- 3696

#90246u0530 09/03/1990 ~United Press International

(SEPT. 3) UPI - The promised exodus of foreign women and children trapped in Iraq and occupied Kuwait ran into further delays Monday, while diplomats reported the worsening plight of 60,000 refugees stranded in the desert between Iraq and Jordan.

More than 40 Americans accompanied by former Democratic presidential contender Jesse Jackson were among hundreds of foreigners flown out of Baghdad for home Saturday and Sunday.

Iraqi President Saddam Hussein promised a week ago that he would allow all foreign women and children to leave Iraqi custody, but even after the weekend release, thousands remained behind, some in hiding.

No flights were reported to have left Baghdad Monday, although a group of 19 Italian women and children arrived in Amman after an overnight bus journey through the desert from the Iraqi capital,.

Iraq said late Sunday that foreign airliners would no longer be allowed to land in Baghdad unless Iraqi planes were given rights to land at foreign airports.The official Iraqi News Agency denied Monday that foreign aircraft had been banned from landing at Baghdad airport, but there was confusion over whether any more captives would be allowed to leave.

Britain said it was looking at the possibility of getting its nationals out by bus to Jordan if flights were not possible. There are some 500

British women and children still stranded in Baghdad hotels waiting to leave.

More than 10,000 foreign women and children, including an estimated 1,000 Americans, were trapped in Iraq and Kuwait after Iraq's Aug. 2 invasion and annexation of Kuwait. Iraq said the foreign ''guests'' were taken to strategic sites to deter attacks by U.S.-led multinational forces massing in the region.

Asian diplomats in Amman, meanwhile, described the conditions of the estimated 60,000 refugees gathered in the neutral zone as ''extremely bad.''

Jordan has been restricting the flow of refugees from Iraq to about 20,000 a day, and those caught in the backlog have to wait in desert areas with no sanitation and sometimes no food and water.

Iran offered to receive 100,000 mostly Asian refugees across its border with Iraq, but said people of any nationality, including Americans and Britons, would also be welcomed.

In Yemen, British Foreign Secretary Douglas Hurd continued his tour of the region and received assurances from the Yemeni government that it would adhere to U.N. economic sanctions against Iraq, the British Broadcasting Corp. reported.

Yemen, which abstained from a U.N. Security Council vote condemning Iraq's invasion of Kuwait, is opposed to both the presence of Iraqi troops in Kuwait and the U.S.-led forces in the Persian Gulf.

Despite the U.N. embargo, life in the Iraqi capital was quiet and there were no major shortages apparent, according to one Western journalist who flew out Sunday.

''The reality is actually rather boringly strange,'' BBC correspondent John Simpson said. ''It is a quiet place at the moment. There are no great shortages that one can see.''

He said he saw ''a lot of Japanese, Korean and other Far Eastern goods being unloaded'' in Baghdad's markets, including fruit, vegetables and cloth, ''which seemed to indicate that the embargo was still being broken.''

In a hardening of its position on foreign embassies in occupied Kuwait defying Iraq's order to close, Iraqi authorities arrested East German Ambassador Kurt Merkel and his wife in Kuwait City on Sunday and transferred the couple to Baghdad.

The United States, the European Community, Egypt, Saudi Arabia, Canada and Australia continued to defy the order, even though they have suffered electricity and water cutoffs.

A disappointed U.N. Secretary-General Javier Perez de Cuellar said after two days of talks in Amman with Iraqi Foreign Minister Tariq Aziz that he had made no real progress in resolving the dispute.

The U.N. chief executive said Sunday he could find no flexibility on the Iraqi side other than Saddam's decision to allow a trickle of foreign women and children hostages to leave.

In other developments Monday:

-Jordan's King Hussein met with West German Chancellor Helmut Kohl for talks on the gulf crisis. It is widely believed Hussein is seeking additional emergency aid for his country's economy, crippled by the thousands of refugees who have poured into Jordan since the Iraqi invasion of Kuwait. Both Japan and West Germany, which import most of their oil from the Middle East, have been criticized in Arab newspapers for their lack of financial and other support of nations affected by the U.N.-backed sanctions battle against Iraq.

-European Community foreign ministers will hold an emergency meeting on the gulf crisis in Rome on Friday. The session will focus on an EC aid package to countries suffering economic harm from the U.N. sanctions on Iraq, particularly Jordan, Egypt and Turkey. The 12-nation EC's executive commission is due to propose such an aid package at its meeting on Wednesday.

#90246u0574 09/03/1990 ~United Press International

(SEPT. 3) UPI - As most Americans take the day off to enjoy Labor Day, a magazine survey reports an overwhelming majority of Americans are happy with what they do for a living. The study cites a National Opinion Research Center poll. It says married people tend to be more satisfied with their jobs than those who have never been married.

Civil rights leader Jesse Jackson accompanied about 40 Americans back to the United States from Iraq yesterday after Iraqi officials agreed to let them go. Hundreds of other female and children captives also were allowed to leave Iraq to return to Britain, Japan and Spain. Also, the East German news agency reports East Germany's ambassador to Kuwait and his wife were arrested in Kuwait City and taken to East Germany's mission in Baghdad.

New York police say a 22-year-old man was fatally stabbed last night when he and his family were robbed and attacked by a group of teen-agers on a

subway platform. Police say Brian Watkins was stabbed in the chest as he and his brother lunged to protect their mother who had been punched in the face. The family was visiting New York from Provo, Utah.

Authorities in La Verne, California, say a fire forced the evacuation of more than 400 people. The fire broke out last evening in a factory filled with chemicals and spewed a chemical cloud above the residential part of town. Police say two firefighters and two police officers were hospitalized suffering from headaches and dizziness. Officials could NOT say what the chemical was.

#90246u0578 09/03/1990 ~United Press International

MWANZA, Tanzania (SEPT. 3) UPI - Pope John Paul II carried a message of friendship to Moslems Monday during a whistle-stop to southern Tanzania on the third day of his African tour.

Aware of the multi-racial, multi-religious character nature of the east African country, the pope called on Islam and Christianity to develop mutual respect and for the believers of the two religions to work together.

''To the followers of the Islamic faith, I extend the hand of friendship and love,'' he told the congregation at a mass in the southern town of Songea, about 380 miles southwest of the capital, Dar Es Salaam.

''As believers in one, merciful God it is essential that we develop a relationship of justice, brotherhood and mutual respect,'' John Paul said.

Virtually the entire population of Songea - about 25,000 people - turned out to cheer the pope on his arrival. Huge applause, ululating cries and hot tropical sunshine greeted the 70-year-old pontiff as he climbed out of a Fokker 28 airplane borrowed from Tanzanian President Ali Hassan Mwinyi.

The pope has twice expressed hopes for a peaceful solution to the Persian Gulf military crisis, which has threatened to stir Islamic- Christian antipathies. Iraqi leader Saddam Hussein, who annexed Kuwait after invading the gulf sheikdom Aug. 2, called on Moslems to wage ''holy war'' on the United States for stationing troops in Saudi Arabia, seat of two of Islam's most sacred places.

The pope also spoke of his distress that many African countries had not acheived the economic development they hoped for in the wake of independence of much of Africa in the 1960s.

''The failure of development is evident in continuing hunger and malnutrition, in the plight of refugees, in exposure to disease and the lack of even basic health care,'' he said.

Tanzania, which has experimented with socialism for almost 30 years, is one of Africa's poorest nations, with an average per-capita income of only $180 a year, according to the World Bank.

Tanzania has more Moslems than Catholics - 25 percent are Moslem and 21 percent Catholic - and there have been religious tensions since Mwinyi, a Moslem, took over from Julius Nyerere, a devout Catholic, as president in 1985.

Islam traditionally has viewed Christianity as a sister religion, accepting the same God but differing in its interpretation of the roles of the Prophet Mohammed and Jesus.

Mwinyi Saturday assured the pope that secularity was the basis of the Tanzanian state.

Later the pope flew to Mwanza on Lake Victoria, where he comforted patients at a medical center.

The pope spent the weekend in Dar Es Salaam, where a million people turned out for his first mass in Tanzania. This is the pope's seventh visit to Africa but his first to Tanzania.

-30- 2996

#90246u0602 09/03/1990 ~United Press International

MANILA, Philippines (SEPT. 3) UPI - President Corazon Aquino Monday ruled out the declaration of martial law in battling mutinous soldiers attempting to oust her and rejected a call in the Senate for her resignation.

Another bomb exploded in the capital later in the evening, police said. The blast tore the roof of the one-story staff house of the suburban Greenhills shopping center and injured four people inside. Glass panes at an adjacent pastry shop were shattered.

Efren Rivera, 27, who suffered bruises, said the explosive device apparently was tossed on the roof from a passing car.

It was the 18th blast in Metropolitan Manila since July 13 and came hours after the military announced the arrest of two civilians carrying 113 sticks of dynamite at a military checkpoint in suburban Pasig town.

The two, however, denied involvement in the bombings, blamed on rebel soldiers. They said they had stolen the explosives.

Meanwhile, the military announced Monday it was easing the red alert

status - the maximum state of preparedness - which was ordered Aug. 21 for the 159,000-member armed forces.

Aquino told a news conference she was convening soon a meeting of concerned citizens to discuss political and economic repercussions of the devastating July 16 earthquake and the Gulf crisis.

''I think that for the present, it is not necessary for me to declare martial law,'' Aquino said. ''What is needed here is the support and unity of all of our people, especially the government officials.''

Aquino dismissed a call made last week by Sen. John Osmena, a member of the ruling coalition, for her resignation along with that of her Cabinet, which he likened to an ''orchestra out of tune.''

Osmena proposed the creation of a three-member committee headed by Senate President Jovito Salonga, National Security Adviser Rafael Ileto and businessman Washington Sycip to rule the country for Aquino until a new constitution is crafted.

''I would like to remind Senator Osmena that executive power is vested not in many people but only in the president,'' Aquino said. She also noted that Sycip is an American citizen.

Rebel soldiers had earlier called on Aquino to step aside, accusing her government of corruption and inefficiency. Aquino has crushed six coup attempts since she took power in a civilian-backed military revolt in 1986.

Aquino also said she agreed in principle to a proposed cease-fire with the 19,000-strong New People's Army, armed wing of the outlawed Communist Party of the Philippines.

But she said she favored regional cease-fires instead of a national truce because not all areas of the country are affected by the 21-year communist insurgency.

Peace talks with the communists collapsed in February 1987 over rebel demands for power-sharing.

-30- 3039

#90246u0649 09/03/1990 ~United Press International

(SEPT. 3) UPI - Foreign ministers of the European Community will hold an emergency meeting Friday in Rome to discuss the Persian Gulf crisis. E-C officials say the community's executive commission will propose a package of aid for nations hurting economically by the U-N sanctions against Iraq. The commission is considering short-term loans to hard-hit nations, particularly Jordan and Egypt.

Police in New York say they're questioning three suspects and have leads on two others in the fatal stabbing of a tourist trying to protect his mother. Police say Brian Watkins of Provo, Utah, was knifed in the chest when he tried to defend his mother after she was punched in the face. Watkins and four family members were attacked and robbed on a subway platform late last night.

Pope John Paul is repeating his call for Christians and Moslems to respect each other in southern Tanzania, where he flew today on day three of an 11-day tour. Officials in the east African nation say 25- thousand people greeted the pontiff... who celebrated mass for the huge crowd under sunny skies. The pope also spoke about the failure of many African nations to achieve the development they had hoped for in the wake of independence in the 1960's.

President Bush and Soviet President Mikhail Gorbachev will have a lot to talk about besides the Persian Gulf situation when they meet next weekend. The negotiations on reducing conventional forces in Europe have resulted in disagreements on artillery and airplanes. They also need to work on cutting strategic nuclear arsenals.

Hanoi radio says an U-S team visiting Vietnam has finished a 25-day mission looking for evidence of Americans missing since the Vietnam War. 11 searches were carried out in conjunction with Vietnamese experts. The broadcast says a U-S forensic team studied 70 sets of remains, but there was NO word how many were identified as Americans. 16-hundred-70 Americans still are listed as missing in Vietnam.

FARNBOROUGH, England (SEPT. 3) UPI - Asiana Airlines of Korea has ordered 27 Boeing aircraft, with an option to buy another 24, in a deal that would total $6 billion, Boeing announced Monday.

Asiana Chairman I.S. Hwang and Boeing Commerical Airplane Group President Dean Thornton signed the order agreement at the biennial Farnborough International Air Show.

The annoucement brings Boeing's 1990 firm orders to 283 with total value of about $27 billion, the Seattle-based firm said.

The deal includes firm orders for 27 aircraft and options for 24 more. The total value of the 51 aircraft is almost $6 billion, of which about $3 billion is firm, Boeing said.

The order breaks down as follows: 747-400 passenger-combination planes,

six firm and six options; 747-400 freighters, three firm and three options; 767-300s 10 firm and eight options; 737-400s, eight firm and seven options.

Asiana previously announced orders of about $1 billion for two 767- 300s to be delivered in October; two 747-400s with first delivery in late 1991; and five 737-400s with options for another five 737-400s.

Asiana now operates a fleet of 10 737-400s and two 737-500s, all under lease.

The Seoul-based airline began service on domestic routes in December 1988 and introduced international fights between Seoul and Japan in January 1990. The airline plans to expand to other Asian destination this winter and the United States in next fall.

#90246u0677 09/03/1990 ~United Press International

GAINESVILLE, Fla. (SEPT. 3) UPI - University of Florida students began returning Monday for the resumption of classes as investigators said they were searchng for new leads in the slayings of five college students.

The killings prompted an exodus of nervous students from the campus last week, and others left because of the Labor Day holiday. University officials said classes would resume Tuesday in atmosphere as close to normal as possible.

University of Florida President John Lombardi urged students to return. He said security patrols would be increased, and on-campus housing would be arranged for those who were too scared to stay off- campus alone.

''To tell you that there is no crime, to tell you that there are no fatalities that will occur ... is simply not to be realistic,'' Lombardi said. ''Would I send my child back to the University of Florida? The answer is, yes, I would.''

Lombardi said only about 100 of the university's 34,000 students had notified campus officials that they would not return.

A spokesman for the Gainesville Police Department said there was no new information to report about the search for the killer or killers.

''The media has requested daily briefings from us, so we're complying, even if there is nothing new to report, which is the situation today,'' said Barry Luke, director of communications for the police department.

Luke clarified a report from Sunday's briefing in which police said they

have eight suspects, four of whom were described as ''primary.'' Warren Virgil Tinch, a car salesman being sought by the FBI for the mutilation-murder of his former girlfriend in Ohio, was dropped from the Gainesville list.

''It's unfair to say that he is no longer a suspect,'' said Luke. ''He has been dropped from the top eight, however, and there was some confusion on the part of the news media about that.''

The only suspect on the list of eight to be identified by police was Edward L. Humphrey, an 18-year-old UF freshman being held on $1 million bond on charges of beating up his grandmother.

Investigators have staked out Humphrey's room in the Hawaiian Village apartments in Gainesville, but have not secured a warrant to search it. However, officers have searched garbage dumpsters and a stream at the complex.

Luke said Monday that police would neither confirm nor deny that search warrants were being sought for Humphrey's apartment or several other locations.

There was no mention of the Gainesville slayings during Humprhrey's arraignment Friday on the assault charges.

A bond hearing was scheduled Tuesday in Melbourne for Humphrey, and his attorney planned to asked that his bond be reduced. That move seemed calculated to force police to reveal what evidence they had against Humphrey.

After a week of investigating, police said they were not close to making an arrest and were warning residents not to let their guard down.

The bodies of the five college students were discovered within a 48-hour period early last week.

The victims were Christina Powell, 17, of Jacksonville; Christina Hoyt, 18 of Gainesville; Tracey Paules, 23, of Palm Springs North; Manuel Taboada, 23, of Carol City; and Sonya Larson, 18.

Hoyt was a student at Santa Fe Community College, while the other victims attended the University of Florida.

The search for clues went nationwide last weekend as the task force investigating the slayings deployed 18 officers to nine other states. Detectives were sent to California, Oregon, New York, Montana, Alabama, Louisiana, Mississippi, Tennessee and Nevada to compare similarities with cases in those states and the Florida slayings, said Luke.

Another 15 detectives, technicians and crime analysts were added to the state, federal and local task force investigating the murders that occurred within a 2-mile radius of the University of Florida campus.

#90246u0692 09/03/1990 ~United Press International

BRUSSELS, Belgium (SEPT. 3) UPI - Britain's alternative proposal on European currency union receives a crucial hearing Tuesday before the European Community's monetary committee.

The committee, which includes treasury and central bank officials from EC countries, will present a report to this weekend's meeting of Community finance ministers in Rome.

Britain, which opposes plans to quickly forge a single EC currency, has instead proposed a 13th currency - a ''hard ECU'' backed by a new European Monetary Fund.

The hard ECU (European Currency Unit) proposed by John Major, Britain's chancellor of the exchequer, would compete alongside the 12 national currencies in the Community.

The British plan was unveiled in June, just days before EC leaders approved a special conference in Rome, beginning Dec. 13, to blaze the trail toward full economic and monetary union.

EC officials have given the British plan a cool reception, saying it would complicate economic coordination, but EC finance ministers in July agreed to have a look at the plan in September.

The EC executive Commission, in its Aug. 21 final report on economic and monetary union, said a single currency is an ''essential element'' because it would eliminate costly and time-consuming exchange operations.

''The monetary committee will look at the British proposal, and then report in Rome this weekend on which parts might work, and which won't work at all,'' said an Italian official in Brussels. Italy holds the rotating EC presidency through December.

Britain says it expects a full and fair hearing, though some Brussels officials predict the monetary committee session will only provide legitimacy to the finance ministers' previous resolve to reject Major's plan.

Britain's appeal to the monetary committee is coupled this week with a trip by Major to Portugal and Spain, on Tuesday and Wednesday, to drum up

support for the ''hard ECU.''

Britain feels a quick transition to a common currency could cause economic strains between the Community's richer and poorer countries, and may damage some of the EC's more fragile economies.

Some of the Community's poorer cousins, including Portugal, Spain and Greece, were alarmed earlier this year when the West German Bundesbank president, Karl Otto Pohl, proposed a two-stage economic and monetary union.

That plan would include only Germany, France, Belgium, Holland and Luxembourg in the first stage. Other countries saw the plan as a threat that could leave them behind on the slow track, and Major hopes to capitalize on those fears in his trip to the Iberian countries.

#90246u0700 09/03/1990 ~United Press International

DHAHRAN, Saudi Arabia (SEPT. 3) UPI - A blaze swept through a U.S. military vehicle in eastern Saudi Arabia Monday, igniting ammunition and firing anti-tank rockets into the air but causing no casualites, officials said.

U.S. military officials said the cause of the fire was accidental at a marshaling area for the 82nd Airborne Division, one of the first army units to be stationed in the kingdom on a U.S. mission to counter Iraqi occupation forces in Kuwait.

The officials said a driver and supervisor battled to extinguish the blaze which erupted around noon, but the flames ignited ammunition and destroyed the Highly Mobile Multi-purpose vehicle, or Humvee, the successor to the jeep.

Soldiers at the facility said the Humvee was mounted with Tube- launched Optically-sighted Wire-guided, or TOW anti-tank missiles, and that some of the projectiles as well as bullets were fired off by the blaze.

''It was a miracle nobody was hurt,'' said one soldier. Other nearby vehicles were moved out, but witnesses said some sustained peripheral damage.

#90246u0753 09/03/1990 ~United Press International

PARIS (SEPT. 3) UPI - President Francois Mitterrand opened a conference on the plight of the world's 42 poorest countries Monday by pledging and to give 0.2 percent of the French gross domestic product to help the nations

and suggesting that other industrialized nations follow suit.

The pledge is dramatically above the aid level most countries give to the third world. France and seven other countries - Canada, Italy, Norway, Sweden, Denmark, Finland and the Netherlands - give 0.15 percent of their gross domestic products to poor nations. The United States, in contrast, gives 0.04 percent and Japan, 0.07 percent.

U.N. Secretary General Javier Perez de Cuellar also appealed to the conferees for extra aid for the poorest nations.

Over the past decade, official yearly aid to the least developed countries represented only 0.09 percent of advanced nations' gross domestic products.

Mitterrand, a Socialist, said he would propose to Parliament that the government also forgive debts that all third-world countries owe to France.

During his address to the opening session of the ministerial-level conference, Mitterrand called on the International Monetary Fund and the World Bank to estimate the consequences of rising petroleum prices and to draw up, if necessary, a plan to compensate poor countries for oil- import costs.

Economic analysts fear surging petroleum prices could be the straw that breaks the camel's back for such poor countries as Afghanistan, Ethiopia, Haiti, Mozambique, Somalia and Sudan.

Some developed nations - the United States among them - opposed fixing any target figure for financial aid during preparatory talks for the Paris meeting.

However, the United Nations Conference on Trade and Development and the delegates of the least developed countries proposed this year that advanced countries adopt an the 0.2 percent aid level, compared with a 0.15 percent level set as a target at the last conference on the problems of poorest countries in 1981.

Besides calling on industrialized nations to follow France's example in raising aid to the 0.2 percent level, Mitterrand said the conference should reaffirm the 1981 aid target of 0.15 percent of GNP. Advanced countries that have not already reached the target should attain it within five years, Mitterrand said.

A draft ''program of action'' adopted at Geneva preparatory talks in April failed to reach agreement on the main issues of future financial aid and debt relief.

But the draft did include a commitment in principle by the least developed

countries to try to reduce high birthrates.

Population growth in the least developed countries averaged 2.9 percent a year in the 1980s against economic growth of 2.2 percent and negative agricultural growth of minus 0.8 percent, according to UNCTAD.

Delegates from Iraq and Kuwait both were present at the conference, organizers said. In all, delegates from 105 nations were attending the meeting, which opened Sunday and is to run through Sept. 14.

#90246u0793 09/03/1990 ~United Press International

LONDON (SEPT. 3) UPI - Australian corporate raider Robert Holmes a Court died over the weekend, and his death sparked an immediate battle for control of the 13 major London theaters he owned.

Holmes a Court, 53, dubbed ''the world's biggest loser in the share market crash'' of 1987, died of a heart attack on Sunday at his home outside Perth, Australia.

He owned a quarter of London's major theaters, including Drury Lane, which is currently showing ''Miss Saigon,'' Her Majesty's, now playing ''Phantom of the Opera'' and the London Coliseum, which is leased to the English National Opera.

Louis Benjamin, former president of Stoll Moss Theaters, said that within hours of the news of Holmes a Court's death reaching London, two consortia contacted him with plans to buy the group from his widow, Janet.

''It was amazing,'' Benjamin told The Daily Telegraph. ''By 11 a.m. I had had two phone calls asking me if I was interested in joining in. I suppose the theater has got such glamour attached to it that people always want a stake in it.''

An entertainment analyst said several consortia were being established to attempt to gain control of Stoll Moss Theaters, but there was no indication yet that his widow would sell.

Derek Williams, chief executive of Heytesbury, Holmes a Court's private company, said it was too early to comment on the future of the theaters.

Reportedly the wealthiest man in his adopted country in the booming 1980s, Holmes a Court was forced to sell Stoll Moss Theaters, the parent company for the 13 theaters, after the 1987 stock market crash.

The following year, Holmes a Court recaptured Stoll Moss, London's largest theater landlord, buying it back from fellow Australian businessman Alan

Bond, who had encountered financial problems.

Benjamin said one of the bidders was British and the other American. Both are reputable, Benjamin said, refusing to further indentify them.

Before the 1987 crash, the South African-born Holmes a Court owned a 30 percent share of BHP, Australia's biggest company, and 10 percent of Texaco. His personal fortune was estimated at just over $1 billion.

The crash made him Australia's first ex-billionaire. His holdings were recently estimated at just under $558 million.

#90246u0840 09/03/1990 ~United Press International

(SEPT. 3) UPI - Americans celebrated the nation's 100th Labor Day Monday with parades, picnics and fireworks while a major labor union used the occasion to proclaim its support for U.S. forces in the Middle East with advertisemnts in major newspapers across the country.

The Teamsters union placed full-page ads in such papers as The New York Times, the Los Angeles Times and the Washington Post with bold, black letters saying, ''It's no holiday for U.S. troops and hostages'' and pledging support to Americans on both sides of the crisis.

The union said its members from coast to coast were wearing ribbons - blue for the military and yellow for the hostages - as lapel pins and armbands.

In Chicago, the 1,500 participants in the Wellington-Oakdale Old Glory Marching Society used their annual Labor Day parade Monday to send messages of support to U.S. troops in the Persian Gulf.

Parade organizers sold small American flags to marchers and spectators before the event began. The flags were collected afterward and will be sent to the troops participating in Operation Desert Shield in the Persian Gulf.

''This event has always been a unique opportunity for people, especially children, to show their patriotism,'' said parade leader Tony Weisman. ''Today's parade is a unique opportunity for people to send their best wishes to the soldiers in the Middle East.''

It was a day of relief in Virginia Beach, Va., where a year ago masses of police and National Guardsmen were called out to quell a riot by about 100,000 students celebrating ''Greekfest,'' a final bash before classes resume.

Police reported no major problems this year as fewer than 30,000 students

showed up for the holiday, renamed ''Laborfest'' by the city.

Monday was the 100th nationwide honoring of the working man but New York declared it a state holiday in 1882.

Thousands of union members Monday walked up New York's Fifth Avenue in bright sunshine, led by Mayor David Dinkins and Gov. Mario Cuomo, who said union members were not staying ahead of inflation.

''Their wages have not grown. After inflation they are actually down,'' he said. ''The only reason they get ahead is that they have taken another job their spouses have gone to work or their offspring have left home.''

But he predicted the union movement ''will come roaring back.''

In Boston, state officials and labor leaders opened a new exhibit about Bay State workers and unions dating back to the 1912 Bread and Roses Strike in Lawrence, Mass.

'''Collective Voices' offers the first real look at the history of working people's contributions to our state,'' said Arthur Osborn, president of the Massachusetts AFL-CIO. ''It is a fitting tribute to open on Labor Day.''

In Los Angeles, descendants of the 11 families that first settled the city more than 200 years ago honored a Labor Day custom by making their annual 9-mile trek from a historic Spanish mission to the park marking the site of the original Mexican pueblo. The journey of the ''Pobladores'' symbolically re-enacts the founding of the nation's second-largest city.

U.S. Rep Dante Fascell's 40th annual Labor Day picnic proceeded on schedule in Miami but the Florida Democrat was not there. He was with many other members of Congress on a fact-finding tour of the Middle East, missing the bash for the first time in 40 years. Celebrants ran sack races scarfed down 3,000 boxed chicken dinners and signed letters of support for U.S. forces in the crisis area.

Toledo, Ohio, factory worker Pamela Richards, who gained national attention for refusing a $17,000 Honda as a prize offered by the Ohio Lottery Commission because it was built by non-union labor, was named grand marshal for the city's parade.

The American Enterprise magazine reported that an overwhelming majority of Americans - 86 percent - are satisfied with the work they do, a trend that has continued throughout most of the past decade.

But another report released for the Labor Day weekend found that the average American worker lost ground financially in the 1980s, forcing

people to work longer hours or send additional family members into the workforce. And single mothers ''saw their incomes collapse,'' the report said.

Spencer, N.C., is a small town in 1990 but at the turn of the century it was a hotbed of railroad unions and was home to Southern Railways' largest steam engine repair shop. About 7,000 visitors were expected at the Spencer Shops Transportation Museum to hear and see about the good old days.

''When they got the day off it was real holiday,'' said museum spokeswoman Kelly Wrinn. ''All the politicians came and everybody just celebrated.''

#90246u0901 09/03/1990 ~United Press International

(SEPT. 3) UPI - The search for a peaceful solution to the Persian Gulf crisis has taken Jordan's King Hussein to Bonn, West Germany. Hussein met today with West German Chancellor Helmut Kohl. It's believed the Middle Eastern monarch is trying to secure additional European emergency aid for his beleaguered kingdom. Kuwait has been strapped by the flow of refugees from Iraq and sanctions against the neighboring country.

A presidential source in Lebanon says President Elias Hrawi is preparing for a military push to drive out rebellious Christian General Michel Aoun. The source told U-P-I the chances are high that Hrawi will seek a military end to Aoun's economically ruinous nine-month-old mutiny. The source says Syrian troops have assured the Lebanese president they'll back a military assault.

The European Community's monetary committee will hold a crucial hearing tomorrow on Great Britain's alternative proposal to unifying European currency. Britain opposes plans to quickly develop a single E-C currency for all members. British officials instead want to forge a 13th currency backed by a new European Monetary Fund to compete with the 12 national currencies of the E-C members.

Barry Lee Fairchild is sitting on Death Row at Cummins prison in Pine Bluff, Arkansas, where he was transferred in preparation for his scheduled Wednesday execution. Fairchild is scheduled to die by lethal injection at 9 Wednesday night for the 1983 rape and murder of a nurse at Little Rock Air Force Base. He would be the third inmate executed this year in Arkansas.

A report published today in a Boston newspaper says a member of the singing group New Kids on the Block was involved in a fight on an airliner... the latest altercation involving one of the teen sensations. The report says New Kid Donnie Wahlberg allegedly bullied a fellow airline

passenger who refused to give up a seat on a flight from Salt Lake City to Atlanta. Wahlberg was said to have poked Benjamin Dattner in the eye during the argument.

Football

Atlanta - Traded nose tackle Shawn Lee to Miami for an undisclosed 1991 draft pick; signed center Guy Bingham and placed him on the exempt list; released wide receiver Stacey Bailey; nose tackle Tony Bowick; guards Stan Clayton and Ben Utt; quarterback Gilbert Renfroe; tight end Troy Sadowski; linebacker Donnie Salum; safety Elbert Shelley; and defensive end Ben Thomas.

Cleveland - Released offensive linemen Dave Smith and George Hawthorne; wide receiver Eugene Rowell; running backs Darryl Clack and Nuu Faaola; defensive lineman Darryl Sims; linebackers Clifford Charlton, Lawrence McGrew and Kerry Owens; safety Falanda Newton; quarterback Pat Ryan and kicker Matt Bahr; placed defensive lineman Andrew Stewart on injured reserve.

Dallas - Acquired fullback Alonzo Highsmith from Houston for two undisclosed draft picks; acquired offensive guard John Gesek from LA Raiders for undisclosed draft pick; placed kicker Ken Willis and running back Timmy Smith on procedural recall waivers.

Detroit - Released running backs Carl Painter, Eric Wilkerson and Greg Paterra; wide receivers Davis Smith and Mike Farr; defensive backs Bruce McNorton, John Miller and Herb Welch; offensive linemen Larry Jones, Eddie Grant and Mark Nua; kicker Wilson Hoyle; linebacker Keith Karpinski; and nose tackle Pat Marlatt.

Kansas City - Signed cornerback Kevin Ross and linebacker Louis Cooper to a series of one-year contracts; placed on procedural waivers wide receivers Willie Davis and J.J. Birden; defensive backs Sherrod Rainge and Peter Shorts; guard Gene Chilton; tackle Michael Harris; defensive tackle Peter Shorts; and linebacker Walker Lee Ashley.

LA Raiders - Signed quarterback Steve Beuerlein; placed defensive end Anthony Smith on injured reserve; released linebackers Ricky Hunley, Ron Burke and Darin Jordan; quarterbacks Vince Evans and Jeff Francis; cornerback Elvis Patterson; tackle Bruce Davis; wide receiver Stefon Adams; safety Derrick Crudup; tight end Trey Junkin and running back Kerry Porter.

LA Rams - Released quarterback Mark Herrmann; linebackers Mel Owens and Stephen Bates; wide receivers Tim Stallworth, Paco Craig and Monty Gilbreath; fullback Mel Farr; offensive linemen John Guerrero and Elbert Crawford; running back Fred Whittingham; safety Lupe Sanchez, and defensive tackles General Brown and Jerry Leggett.

Miami - Acquired nose tackle Shawn Lee from Atlanta for conditional late-round draft pick; released defensive end Jackie Cline; guards Stacy Searels and Tony Brown; tight end Greg Baty; defensive end Jeff Faulkner; cornerback African Grant; linebacker Chris Haering; fullback Garrett Limbrick; nose tackle Jeff Roth; and wide receiver Thomas Woods; placed cornerback Donnie Elder and tackle Dave Popp on injured reserve.

New England - Released tight end Lin Dawson; running backs Marvin Allen and Jamie Morris; linebackers Ed Williams, Tim Jordan and Ilia Jarostchuck; wide receiver Kitrick Taylor; center Bob White; guards David Douglas and Eric Still; defensive end Billy Keys; and safety Brian Hutson.

NY Giants - Released running back Joe Morris; quarterback Craig Kupp; tight end Thornton Chandler; tackle Ed Cunningham; wide receiver Troy Kyles; linebackers Mark Dennis and Randy Thornton; cornerback Sheldon White and Howard Feggins; defensive ends Greg Mark and Tim Downing; guard Roy Brown; placed safety Adrian White on injured reserve.

NY Jets - Traded fullback Roger Vick to Philadelphia for an undisclosed draft pick; released wide receiver Mike Martin; linebacker Basil Proctor; tackles Mike Withycombe and Curt Singer; and defensive tackle Tony Savage.

Philadelphia - Released wide receivers Cris Carter, Marvin Hargrove, Tyrone Watson; running backs James Gray, Adam Walker, Ervin Farris; offensive linemen Owen Hooven, Michael Husar; defensive linemen Carl Dawson, Horacio Moronta; linebacker Gary Kinne; tight end Maurice Johnson; quarterback Matt Cavanaugh.

San Diego - Released running back Tim Spencer, Thomas Sanders and Darrin Nelson; tight end Andy Parker; safeties Bruce Plummer and Michael Brooks; defensive ends Nate Hill and Gerald Robinson; offensive linemen Dennis McKnight, Larry Williams, Joe Staysniak and Jeff Novak, and wide receiver Terence Cleveland.

Tampa Bay - Released kicker Donald Igwebuike; running back Lars Tate and Derrick Douglas; wide receivers Chris Ford and Terry Anthony; punter Chris Mohr; defensive back Sean Lucas; defensive end Donnie Gardner; nose tackle Willie Wyatt and linebacker Maurice Oliver; placed center Dan Graham on injured reserve.

#90246u0916 09/03/1990 ~United Press International

JOHANNESBURG, South Africa (SEPT. 3) UPI - Black leader Nelson Mandela returned home unannounced from a week-long tour of African and other nations, including a stop in Libya, and renewed factional fighting erupted in townships outside the city.

A member of Mandela's household confirmed the ANC deputy president and de facto leader had arrived back Sunday at his Soweto home, but said he would not be issuing any immediate statement regarding his time abroad or local matters. ''Libya, the violence and everything else will be discussed at a press conference on Monday,'' he said.

An official of Mandela's African National Congress said the 72- year-old Mandela slipped back into the country to avoid crowds of journalists and go through customs without delay.

He arrived from Zambia with a message for President Frederik de Klerk from other African states to end all factional conflicts in South Africa.

Fighting had flared in townships around Johannesburg overnight, killing at least 17 people and shattering a tenuous peace enforced by the imposition in late August of emergency rule in the stricken areas.

Police Capt. Eugene Opperman said patrols found the bodies of many people shot or hacked to death in Thokoza and Tembisa after an unidentified group of men armed with rifles and sharpened weapons ''went on a rampage'' late Saturday.

The deaths come only hours after the signing of a regional peace accord Saturday between the ANC and arch rival Inkatha in the north of hard-hit Natal province, since 1987 the scene of the worst fighting between the groups.

In other developments, 15 African National Congress members convicted of high treason and terrorism were freed Monday - the first group of prisoners to be released under a groundbreaking agreement between the ANC and the government.

The releases came under an accord negotiated Aug. 6 under which the government agreed to a phased release of an estimated 1,500 political prisoners to further pave the way for power-sharing negotiations between black leaders and the government. The ANC's end of the bargain was agreement to suspend its 29-year guerrilla war.

Most of the prisoners freed Monday came from the offshore maximum-security facility at Robben Island and from jails in Transvaal province and had served at least two-thirds of their sentences.

The prisoner releases and return of exiles are expected to be completed by April 1991.

On his tour, Mandela visited Norway and Algeria, and in Libya apparently sought funds for the ANC from Libya's Col. Moammar Gadhafi, one of the movement's most stalwart foreign supporters.

Mandela has refused to condemn Libya's exporting of terrorism, cutting off questions and criticism on the issue. He said in an address last month, ''We don't all share the same enemies.''

In Lusaka, leaders of a coalition of seven southern African states working against apartheid and known as the ''Frontline States,'' ended a one-day summit Saturday with the appeal to de Klerk to end the black strife.

The meeting of Zambia, Angola, Botswana, Mozambique, Tanzania, Namibia and Zimbabwe sent with Mandela ''a message to Mr. de Klerk to stop the carnage '' group chairman and Zambian President Kenneth Kaunda said.

De Klerk imposed emergency rule on 27 townships straddling Johannesburg Aug. 24, giving police and the army sweeping powers to quell the violence between the multi-tribal supporters of Mandela's ANC and followers of the exclusively Zulu Inkatha movement that in two weeks last month killed more than 500 people.

Police said the latest deaths, in three townships east of Johannesburg, followed attacks Saturday by an unidentified group of men armed with rifles and sharp weapons and a separate attack by gunmen on an opposing group.

Mandela had condemned the imposition of the emergency rule as ''totally useless,'' noting the three-month renewable measures would not solve the problem of what the ANC calls Inkatha provocation.

Battles between the two sides in Natal have killed up to 4,000 people since 1987, and De Klerk reimposed a state of emergency there June 8 while lifting it after four years in the country's other three provinces in a move to placate anti-apartheid movements.

Despite denials from Inkatha leader Mangosuthu Buthelezi, the ANC has insisted he has fomented the violence to undercut Mandela's position as preeminent black leader ahead of full-blown power-sharing talks with the white minority government.

#90246u0970 09/03/1990 ~United Press International

(SEPT. 3) UPI - Jordanian King Hussein is in West Germany to talk about Mideast peace and more aid for his country. Bonn has already sent food, medical supplies and tents to help the thousands of refugees who fled to Jordan after Iraq invaded Kuwait. .

40 Americans may have made it out of Iraq, accompanied by civil rights figure Jesse Jackson, but hundreds more remain behind. Promises made one week ago to let women and children out of Iraq have been met by further delays.

A predawn launch Thursday is still the goal for the shuttle Columbia and its seven-member crew. The flight is already three months late because of a fuel leak. The countdown resumed this morning after engineers scurried to make repairs this weekend.

Labor Day traditionally marks the end of summer and the start of fall politics. And so it is in Florida and Nevada. Voters there head to the polls tomorrow to decide who will be running in November's gubernatorial races. Political veterans Senator Lawton Chiles and Representative Bill Nelson battle for the chance to UNseat Florida Governor Bob Martinez.

Diplomatic efforts to end a nine-month crisis in Lebanon may end with military action. Troops loyal to President Elias Hrawi are reported to be moving with promises of Syrian back-up toward positions held by rebel Christian General Michel Aoun.

A week-long series of events are planned in New Hampshire to mark today's 25th anniversary of the ''Incident at Exeter'' U-F-O sighting. But the person who reported the famed sighting that touched off a wave of sightings across the nation woN'T be there. Norman Muscarello is thought to have moved from New Hampshire.

(SEPT. 3) UPI - President Bush headed back to Washington today following his Maine vacation. And he'll spend part of this week packing his bags again. Bush heads to Finland next weekend for a meeting with Soviet leader Mikhail Gorbachev that's expected to touch on the Persian Gulf crisis and arms control.

Nelson Mandela says efforts to reach a settlement on apartheid should begin as soon as possible and he predicted today that formal power-sharing talks with the South African government will likely open before the end of the year. Mandela made his comments today at a news conference in Johannesburg's Soweto township.

Philippine President Aquino today ruled out declaring martial law in her government's battle with mutinous soldiers. Aquino also rejected a call by a Cabinet member for her resignation. A string of bombings in the Philippines continued today with a blast that injured four people inside a Manila shopping center.

Chilean officials will attend tomorrow's private funeral for the nation's late president Salvador Allende, killed in a military coup 17 years ago. Foreign officials are also expected to attend the service. Allende had been buried in an UNmarked grave in a seaside resort.

At least 10 people have died in new violence in India as Moslem rebels press their fight for independence from Indian rule. A suspected government informant was publicly executed today when rebels fired at bombs they had strapped to his body. The violence coincided with the beginning of a five-day strike by government workers.

(SEPT. 3) UPI - Few disruptions are reported in a 24-hour general strike called by ethnic Albanians living in Yugoslavia's Serbia Republic. Tens of thousands of Albanians took part in the demonstrations against alleged human rights violations by the communist government. Workers from other areas filled in for the strikers.

New York City police are questioning four suspects in the stabbing death of a 22-year-old tourist from Provo, Utah. And family members reportedly identified two of them in the death of Brian Watkins, killed last night on a mid-town Manhattan subway platform. Watkins was stabbed trying to protect his mother from muggers.

Teachers at the W-J Bryan Elementary School in Miami will let their fingers do the walking- and talking- when school opens tomorrow. A new computerized telephone system will let teachers inform parents when their child is disciplined, forgets a homework assignment or was given a note to bring home.

Atlanta - Traded nose tackle Shawn Lee to Miami for an undisclosed 1991 draft pick; signed center Guy Bingham and placed him on the exempt list; cut wide receiver Stacey Bailey, nose tackle Tony Bowick, guards Stan Clayton and Ben Utt, quarterback Gilbert Renfroe, tight end Troy Sadowski, linebacker Donnie Salum, safety Elbert Shelley, and defensive end Ben Thomas.

Chicago - Cut linebackers Troy Johnson and Glenell Sanders, defensive tackle Dick Chapura, fullbacks Scott Williams and Pat Chaffey, tackle Chris Dyko, wide receivers Tom Waddle and Quintin Smith, cornerback John Mangum, and defensive end Brent White; placed wide receiver Tony Moss on the waived-injured list.

Cleveland - Cut linemen Dave Smith and George Hawthorne, wide receiver Eugene Rowell, running backs Darryl Clack and Nuu Faaola, defensive lineman Darryl Sims, linebackers Clifford Charlton, Lawrence McGrew and Kerry Owens, safety Falanda Newton, quarterback Pat Ryan and kicker Matt Bahr; placed defensive lineman Andrew Stewart on injured reserve.

Dallas - Acquired fullback Alonzo Highsmith from Houston for two draft

picks; acquired offensive guard John Gesek from LA Raiders for draft pick; placed kicker Ken Willis and running back Timmy Smith on procedural recall waivers.

Denver - Placed defensive end Alphonso Carreker on injured reserve; cut running backs Jeff Alexander and Blake Ezor, offensive linemen Brad Leggett and Scott Beavers, quarterbacks Pat Hegarty and Scott Erney, wide receivers Jason Johnson and Vernon Turner, tight end Paul Green, and linebackers Rick Dennison, Ty Allert and Anthony Thompson.

Detroit - Cut running backs Carl Painter, Eric Wilkerson and Greg Paterra, wide receivers Davis Smith and Mike Farr, defensive backs Bruce McNorton, John Miller and Herb Welch, offensive linemen Larry Jones, Eddie Grant and Mark Nua, kicker Wilson Hoyle, linebacker Keith Karpinski and nose tackle Pat Marlatt.

Indianapolis - Cut quarterback Gene Bernhart, tackles Dean Brown and Tim Freeman, tight ends Bill Ames and Pat Davis, wide receivers Tim Finkelston and Darvell Huffman, running backs Marcus Wilson and Joe Henderson, defensive back Harvey Wilson, linebacker James Singletary and center Stan Eisenhooth; placed defensive end Carl Smith on injured reserve.

Kansas City - Signed cornerback Kevin Ross and linebacker Louis Cooper to a series of one-year contracts; placed wide receivers Willie Davis and J.J. Birden, defensive backs Sherrod Rainge and Peter Shorts, guard Gene Chilton, tackle Michael Harris, defensive tackle Peter Shorts and linebacker Walker Lee Ashley on procedural waivers.

LA Raiders - Signed quarterback Steve Beuerlein; placed defensive end Anthony Smith on injured reserve; cut linebackers Ricky Hunley, Ron Burke and Darin Jordan, quarterbacks Vince Evans and Jeff Francis, cornerback Elvis Patterson, tackle Bruce Davis, wide receiver Stefon Adams, safety Derrick Crudup, tight end Trey Junkin and running back Kerry Porter.

LA Rams - Cut quarterback Mark Herrmann, linebackers Mel Owens and Stephen Bates, wide receivers Tim Stallworth, Paco Craig and Monty Gilbreath, fullback Mel Farr, offensive linemen John Guerrero and Elbert Crawford, running back Fred Whittingham, safety Lupe Sanchez and defensive tackles General Brown and Jerry Leggett.

Miami - Acquired nose tackle Shawn Lee from Atlanta for draft pick; cut defensive end Jackie Cline, guards Stacy Searels and Tony Brown, tight end Greg Baty, defensive end Jeff Faulkner, cornerback African Grant, linebacker Chris Haering ans Stacy Harvey, fullback Garrett Limbrick, nose tackle Jeff Roth and wide receiver Thomas Woods; placed cornerback Donnie Elder, tackle Dave Popp and linebacker Barry Krauss on injured reserve.

New England - Signed linebacker Chris Singleton to four-year contract; cut

tight end Lin Dawson, running backs Marvin Allen and Jamie Morris, linebackers Ed Williams, Tim Jordan and Ilia Jarostchuck, wide receiver Kitrick Taylor, center Bob White, guards Shawn Bouwens, David Douglas and Eric Still, defensive end Billy Keys and safety Brian Hutson.

New Orleans - Cut running back Buford Jordan, linebacker Lonnie Brockman, tackle Chris Port, nose tackle Tony Woods and quarterback Jason Garrett; placed linebackers Alvin Toles and Tracy Simien and cornerback Calvin Nicholson on waived-injured list; placed center Todd Wheeler on injured reserve.

NY Giants - Released running back Joe Morris, quarterback Craig Kupp, tight end Thornton Chandler, tackle Ed Cunningham, wide receiver Troy Kyles, linebackers Mark Dennis and Randy Thornton, cornerback Sheldon White and Howard Feggins, defensive ends Greg Mark and Tim Downing and guard Roy Brown; placed safety Adrian White on injured reserve.

NY Jets - Traded fullback Roger Vick to Philadelphia for an undisclosed draft pick; cut wide receiver Mike Martin, linebacker Basil Proctor, tackles Mike Withycombe and Curt Singer, and defensive tackle Tony Savage.

Philadelphia - Released wide receivers Cris Carter, Marvin Hargrove, Tyrone Watson, running backs James Gray, Adam Walker, Ervin Farris, offensive linemen Owen Hooven, Michael Husar, defensive linemen Carl Dawson, Horacio Moronta, linebacker Gary Kinne, tight end Maurice Johnson and quarterback Matt Cavanaugh.

Phoenix - Released quarterback Gary Hogeboom, defensive tackles Travis Davis and Gary Hadd, defensive end Ralph Jarvis, cornerback Mickey Washington, wide receivers John Jackson, Amod Field and Norman Dempsey, linebackers Vernon Maxwell and Chris Chenault, tight end Dennis Smith and running back William Howard.

Pittsburgh - Cut wide receivers Rodney Carter, Weegie Thompson, Mark Stock and Lorenzo Davis, tight end Billy Griggs, running backs Tim Tyrell and Kimble Anders, safeties Darryl Holmes and Billy Owens, cornerback Richard Shelton, linebacker Eddie Miles and tackle John Buddenberg.

San Diego - Cut running back Tim Spencer, Thomas Sanders and Darrin Nelson tight end Andy Parker, safeties Bruce Plummer and Michael Brooks, defensive ends Nate Hill and Gerald Robinson, offensive linemen Dennis McKnight, Larry Williams, Joe Staysniak and Jeff Novak and wide receiver Terence Cleveland.

Seattle - Signed defensive lineman Cortez Kennedy.

Tampa Bay - Released kicker Donald Igwebuike, running back Lars Tate and Derrick Douglas, wide receivers Chris Ford and Terry Anthony, punter Chris

Mohr, defensive back Sean Lucas, defensive end Donnie Gardner, nose tackle Willie Wyatt and linebacker Maurice Oliver, placed center Dan Graham on injured reserve.

Washington - Cut defensive backs Wayne Davis, Rico Labbe, Alvoid Mays and Clarence Vaughn, wide receiver Stephen Hobbs, defensive linemen Milford Hodge, Alonzo Mitz and Pat Swoopes, linebacker Jon Levernz, and tight ends Terry Orr, Mike Tice and Ken Whisenhunt; placed quarterback Cary Conklin on injured reserve.

LOS ANGELES (SEPT. 4) UPI - The Jerry Lewis Muscular Dystrophy Telethon broke its fund-raising records Monday, receiving pledges of more than $44 million.

The 21 1/2-hour effort, in its 25th year, exceeded last year's total by about $2 million, receiving pledges amounting to $44,172,186.

Broadcast live from the Aquarius Theater in Hollywood, the telethon was carried by some 200 television stations nationwide.

''The warmth and generosity of the American people in supporting MDA's fight against nueromuscular disease was never more evident than during these last few days,'' Lewis said.

The telethon featured a host of entertainers, including Bill Cosby and Aretha Franklin.

Portions of the show were aired from New York and Las Vegas.

#90246u1380 09/03/1990 ~United Press International

CHICAGO (SEPT. 3) UPI - Minnie Minoso's bid to become the first person to play in six decades of major league baseball will depend on the Chicago White Sox's chances in the American League West.

Minoso, a career .298 hitter who broke into the majors in 1949 with Cleveland but spent the majority of his career in Chicago, will be activated this season, White Sox owner Jerry Reinsdorf said Monday.

This is the White Sox's last season at Comiskey Park, a stadium that is only a few years older than the 67-year-old Minoso. The Cuban's 1990 appearance would be set by now except the White Sox are still challenging Oakland in the AL West.

The White Sox probably won't use Minoso until the pennant race is decided, one way or the other.

'''When' I don't know - but I'll play,'' said Minoso after taking his turn in the batting cage Monday.

''Oakland gets Harold Baines and Willie McGee. We get Minnie Minoso and Jerry Hairston,'' said Ozzie Guillen, the White Sox's ebullient shortstop.

Minoso joined the White Sox in 1951-57, then again 1960-61, '64, '76 and '80. He led Chicago in extra base hits in 1966, and in runs and RBI in 1954, and had a 23-game hitting streak in '55. He compiled a .304 average for the White Sox, appearing in 1,379 games in a Chicago uniform, not counting the numerous Old Timers games when he dons No. 9. That's one of seven numbers retired by the White Sox.

''It looks pretty good, doesn't it?'' Minoso said, modeling his uniform, which has a slight bulge around the middle.

He ranks among the top 10 career White Sox players in games, runs (893), average (.304), hits (1,523), doubles (260), at-bats (5,011), triples (79) slugging percentage (.468), RBI (808), and extra base hits (474).

Minoso's name already has appeared on a Hall of Fame ballot, but his eligibilty would not be threatened. His longevity is legendary - he became a father at the age of 66.

''He (Minoso) looks pretty good,'' Reinsdorf said. ''Look, he hit a ball to the warning track.''

Hairston, who played for the White Sox from 1973-77 and 1981 until the present, also will be activated in his bid to total 10 major league seasons so he is eligible for the pension plan. He was Chicago's premier pinch hitter.

But can Minoso and Hairston help the White Sox in the stretch? When told of Guillen's comments, Chicago Manager Jeff Torborg laughed. Loud and long.

-30- 2617

#90246u1426 09/03/1990 ~United Press International

NEW YORK (SEPT. 3) UPI - Steffi Graf, her two biggest rivals already eliminated, personally removed the darling of the crowd from the U.S. Open Monday with a 6-1, 6-2 victory over Jennifer Capriati.

The much anticipated showdown between the world's best woman player and the 14-year-old prodigy was a runaway disaster as Graf, the two-time defending champion, sped to a 53-minute victory for a berth in the quarterfinals.

Boris Becker, the men's defending champion, endured a much more difficult struggle than did his West German compatriot before edging Australian Darren Cahill 2-6, 6-2, 6-3, 3-6, 6-4.

No. 4 seed Andre Agassi coasted into the quarterfinals, sweeping 11 games in a row in downing No. 13 Jay Berger, 7-5, 6-0, 6-2, in 1 hour, 50 minutes.

Perhaps too much was expected of Capriati, who begins ninth grade next week in Boca Raton, Fla., and the pressure was compounded by a sellout crowd of 20,000 at the National Tennis center solidly behind her.

From 1-1 in the opening set, Capriati managed merely 11 points in the next eight games, effectively ending her day.

''The press has made it seem like I'm so great and people expect it of me '' Capriati said. ''That puts more pressure on.

''To win the first set, all Steffi had to do was get the ball on the court. I didn't really feel solid out there. It was one of those days, I guess. I was pretty nervous. I didn't realize how nervous I was until I

got out there. In the beginning I couldn't hit a ball on the court.''

Capriati, who has a 35-9 record in her first season on the tour and climbed to No. 14 in the world rankings, said she absorbed a solid lesson from the champion.

''I wasn't doing anything out there,'' she said. ''I wasn't making the shots, I wasn't going to the net. Next time I can't let that ''wasn't

Graf's victory, her 18th in a row at the Open, fittingly comes on the day she broke the record for men and women of holding the No. 1 world ranking for 160 weeks.

''I expected a very tough match,'' said Graf, 21. ''I knew it wasn't going to be easy to play her because of expectations, but it turned out different. She deserves a lot of attention, being 14 and doing so well, but it's not making it easy for her.''

Capriati, who carried Graf to 6-4 in the third set before losing to her in the final of an exhibition last week, overcame double break point to hold serve in the second game. But she won only 13 more points in the first set which Graf polished off in 21 minutes.

Trailing 3-0 in the second set, Capriati started going to the net more and broke service, then held at love. She had two break points in the sixth game and one more in the eighth, courtesy of a Graf double fault, but was unable to convert.

''I'm mostly disappointed,'' Capriati said of her effort. ''I'll just think that this is not going to be the end of the world for me. I'll think about it and go on to the next tournament.''

Asked how her classmates would respond to her, Capriati responded: ''They'll treat me normal. I'm still normal.''

With the eliminations of Martina Navratilova and Monica Seles, the second and third seeds, Graf is in excellent position to annex her third consecutive U.S. Open crown and her first Grand Slam title since the Australian Open in January.

She next plays No. 12 Jana Novotna, a 6-4, 6-2 winner over No. 7 Katerina Maleeva.

No. 4 Zina Garrison also reached the quarterfinals with a 6-1, 7-5 victory over Nathalie Tauziat and could face Graf in the semifinals. They also met in the Wimbledon semis, with Garrison scoring a big upset.

Becker, the second seed, used a service break in the seventh game of the

deciding set to turn back Cahill, the same man who eliminated him in straight sets in the second round of the 1988 Open.

''It's nice to win 6-4 in the fifth, sometimes better than 2, 2 and 2,'' said Becker, winner of seven of his last nine five-set matches. ''It's tougher for your head, it's a real battle out there to try and fight to win.''

Cahill, ranked 48th in the world and like his opponent a strong serve-and-volleyer, took the first two points on his serve in the decisive seventh game, but Becker swept the next four. A backhand pass by Becker set up break point and Cahill then netted a forehand volley.

Becker served out the 3-hour, 14 minute match, yielding five points in five service games. In the sixth game, Becker held with a pair of aces, half the four he managed all day, followed by two service winners.

On match point, Cahill fell racing to his left and was in no position to contest a follow-up backhand volley from Becker to the other side of the court.

''I played a couple of loose volleys at the wrong time, and he served better in the fifth set,'' Cahill said. ''He cut out his loose errors on his service games in the fifth set.''

Becker will play ninth-seed Aaron Krickstein. The American defeated Amos Mansdorf of Israel, 6-3, 6-4, 6-4 in Monday's evening match.

After winning the second and third sets comfortably, Becker fell behind 3-0 in the fourth, including two service breaks. He got one of the breaks back at love in the fourth game, then held at love to narrow his deficit to 3-2.

Becker had several good chances to get back on serve, with a total of seven break points in the sixth and eighth games, but failed to capitalize. In the sixth game, when Becker had five break points, Cahill set up two of them with double faults.

Cahill ended the set with a break in the ninth game. On the final point, Becker thought a forehand from the Australian was going long and he watched it bounce past. The ball was called good.

''It was a very difficult one and I was lucky to get through it,'' Becker said. ''He played great tennis and I had to struggle to get back. I kept my cool.''

Agassi, the loser in the French Open final, believes he can ride to the title if he remains at the top of his game.

''When it comes down to it, I seem to be bearing down and that gives me a lot of confidence going into the rest of the tournament,'' he said.

From 5-5 in the opening set, Agassi captured the next 11 games, carrying him to 3-0 in the third set.

''I knew it was a question of being motivated, staying concentrated and making him pay the price if he was going to win,'' Agassi said of Berger.

In the quarterfinals Agassi faces unseeded Andrei Cherkasov, who advanced with a 6-4, 6-4, 7-5 victory over Christo van Rensburg.

Garrison also is feeling frisky and likes her chances for a first Grand Slam crown.

''The balls have been falling my way,'' she said after beating Tauziat. ''I'm hitting the ball better, and more than anything I'm fighting it out mentally and getting that extra inch when I need it.''

Garrison's next opponent will be sixth seed Arantxa Sanchez Vicario, who claimed her berth in the quarterfinals by beating No. 16 Barbara Paulus, 6-4, 6-3.

One day after her older sister, Manuela, reached the quarterfinals by upsetting Navratilova, Katerina Maleeva was bounced out. Novotna, reaching the quarterfinals of the Open for the first time in four attempts, raced to a 5-0 lead in the second set before Maleeva broke her service.

''I was a little nervous at the beginning, but after winning the first set I started playing better,'' said the 21-year-old Czechoslovakian. ''Until 5-0 in the second set I played an incredible match.''

Maleeva said she had difficulty adjusting to the wind on the Stadium Court adding, ''It was just a day when not everything worked for me.''

#90246u1475 09/03/1990 ~United Press International

(SEPT. 3) UPI - A Paris organization is calling for massive refugee aid on a scale NOT seen since World War Two ended. The group Doctors Without Borders says the international effort is needed to head off what it calls a ''catastrophe'' in the Mideast. The group reports that 20-thousand refugees are trapped in the desert between Jordan and Iraq, and another 90-thousand are in Iraq trying to get out.

The Persian Gulf crisis is expected to be a major topic of discussion when Israeli Foreign Minister David Levy arrives in Washington for the first

time since taking office in June. He is to meet with Secretary of State Baker on Wednesday. The two may also discuss the stalled peace process between Israel and its Arab neighbors.

Increased economic aid for the poorest nations is being discussed in Paris in a meeting of eight industralized countries. France has already proposed increasing its Third World aid to equal two-tenths of one percent of its yearly gross national product. Other countries attending the meeting include Canada, Italy, Norway, Sweden, Denmark, Finland and the Netherlands.

An urgent call for a market economy is being made by Russian leader Boris Yeltsin at the opening of the parliament governing the largest republic in the Soviet Union. Yelstin told delegates that a recently completed three-week tour convinced him that local enterprises must be free of central control.

Officials say the presence of chaplains and community leaders helped keep a gathering of college-age youths in Virginia Beach, Virginia, relatively quiet this holiday weekend. This year's calm is just the opposite of last year when some of the youths went on a rampage, leaving behind damage of one-point-four-Million dollars.

#90246u1591 09/03/1990 ~United Press International

(SEPT. 3) UPI - Tunisian state television says the head of the 21-nation Arab League has resigned. Arab diplomats report that Chadli Klibi stepped down from his post after Saudi and Egyptian delegates criticized him for his response to the Iraqi invasion of Kuwait. Diplomats say the resignation could worsen the division between league members who support Iraq and the slight majority that opposes Baghdad's aggression.

.

Jordanian King Hussein was in West Germany earlier today seeking support to end the Middle East stand-off without an eruption of violence. Hussein and West German Chancellor Kohl met for about an hour before Hussein's departure for Paris. The two men emphasized the need to end the crisis peacefully. Hussein also sought German financial assistance to soften his country's burden as refugees pour over the Iraqi border.

The newest member to the Soviet legislature is a former K-G-B general who was stripped of his rank and honors for criticizing the secret police agency. Soviet television reports Oleg Kalugin, a 32-year K-G-B veteran, won a majority of votes in a weekend runoff election for a seat in the Congress of People's Deputies.

-30- 1328
#90246u1760 09/03/1990 ~United Press International
(SEPT. 3) UPI - Iraq has shut off the flow of detained foreigners seeking to leave the country. The move comes as Baghdad demanded that it receive reciprocal landing rights from governments desiring to send planes to retrieve nationals from Iraq. Current U-N sanctions prohibit such a deal.

.

Tensions with the Arab League are said to be the reason the organization's chairman stepped down from his post today. Arab diplomats say Chadli Klibi resigned after facing stiff criticism for his handling of the conflict by Egyptian and Saudi delegates.

The spirit of reform appears to be healthy in the Soviet Union. Television reports say a weekend run-off election for the Soviet legislature went in favor of a former K-G-B official and military general. Oleg Kalugin was stripped of his rank in March after criticizing the secret service.

South African anti-apartheid leader Nelson Mandela said today that power-sharing negotiations with the white-minority government should get underway before year's end. Mandela says he sees NO reason NOT to expect the government to dismantle apartheid.

The nation's space agency encountered NO troubles following today's re-activization of countdown clocks for the shuttle Columbia. Columbia is slated to liftoff Thursday morning on a 10-day astronomy mission.

City officials say the gathering of black college students in Virginia Beach, Virginia, went smoothly. But the head of the state's N-Double-A-C-P says the safe atmosphere was gained through a suffocating police presence. Hundreds of police officers were on duty after riots scarred last year's gathering.

-30- 1791
#90246u1763 09/03/1990 ~United Press International
(SEPT. 3) UPI - Witnesses in India's embattled Kashmir province say Moslem rebels killed a suspected police informant today by detonating explosives rigged to his body with firearms. The violence came as government workers began a five-day strike.

Philippine officials today removed the country's military from a red alert status. The armed forces were placed on their highest level of readiness nearly three weeks ago after a number of anti-government bombings.

.

Despite continued right-wing violence, Philippine President Corazon Aquino refused to declare martial law today. Aquino instead asked Filipinos to unite to rid the country of insurgent forces.

New York police have four suspects in custody following last night's fatal stabbing of an out-of-towner who tried to protect his family from a band of subway muggers. A police spokesman says the family has positively identified two detained suspects as their attackers.

Cleveland authorities say two youngsters died in an early-morning blaze today. Fire officials are investigating the cause of the blaze, which occurred as the children's mother was giving birth to a boy at a nearby hospital.

Guatemalan officials today denied reports that Guatemalan troops crossed the Mexican border and threatened Guatemalan refugees. A group of refugees in Mexico last week said 20 armed Guatemalan troops entered Mexico in early August and searched one expatriate's house for weapons.

Aerospace giant Boeing says a Korean flier has placed an order that could total six BILLION dollars. Asiana Airlines has ordered 27 Boeing planes- worth about three BILLION dollars- and has an option on another two dozen- worth another three BILLION dollars.

#90246u1852 09/03/1990 ~United Press International

(SEPT. 3) UPI - Cause for optimism appears to have been short-lived regarding the fate of several thousand Westerners detained in Iraq. After a weekend in which nearly 500 detainees were allowed to leave Iraq, Baghdad has demanded that future departures be tied to Iraqi planes receiving landing clearance from foreign governments with citizens in Iraq. Such a move would go against U-N sanctions.

.

Venezuela has responded to the embargo of Iraqi and Kuwaiti oil by announcing it would lift its daily oil production level by 350-thousand barrels by the end of September. But today, the South American nation's energy minister said further boosts in production will likely rely on oil-consuming nations investing in the Venezuelan economy. Venezuela supplies about 18 percent of the U-S oil supply.

Russian leader Boris Yeltsin today re-asserted the importance of his proposal to implement a free-market economic model in the Russian republic in 500 days. Yeltsin's plan would free Russia's economy from central control and allow private ownership of property. He made his call today at

the opening session of the Russian parliament.

Peru's new government predicts that it will rein in the South American country's inflation rate this month. The optimistic prediction follows an inflation rate of 397 percent last month and an astronomical inflation rate of 12-thousandmonth period that ended last month. Peru's new president... political novice Alberto Fujimori... was elected to office in part because the public wanted fresh ideas to deal with the economy.

Pope John Paul spent the third day of his African trip calling on Christians and Moslems in southern Tanzania to seek mutual respect and understanding. The statement by the 70-year-old pontiff highlights the multi-racial, multi-religious nature of the east African nation he is visiting. Although this is John Paul's seventh trip to Africa, it is his first journey to Tanzania.

#90247b0006 09/04/1990 ~Business Wire

PORTLAND, ORE. (SEPT. 4) BUSINESS WIRE - Pinnacle West Capital Corp. (NYSE: PNW) and PacifiCorp (NYSE, LSE: PPW) announced Friday that they had reached agreement on several long-term transactions providing significant benefits to the electric utility customers and shareholders of the companies.

Richard Snell, chairman of Pinnacle West and Arizona Public Service Co., and Al Gleason, president and chief executive officer of PacifiCorp, jointly announced the agreements, which are subject to additional documentation, approval by the boards of directors and approvals of regulatory agencies.

Snell said that the near term effects of the agreements will assist Arizona Public Service Co. in its plan to reduce the proposed rate increase pending before the Arizona Corporation Commission.

Gleason said that the expected long-term benefits of these agreements will help PacifiCorp achieve its goal of maintaining price stability for its customers and earnings growth for its shareholders.

Included in those transactions are:

-- Purchase by PacifiCorp of interests in the Cholla power generation station and other facilities;

-- Exchange of transmission access to each other's systems;

-- Power sales and purchases to complement the needs of both systems, and

-- Resource sharing and seasonal exchanges made possible by the seasonal diversity of the two systems.

On closing of the transactions, PacifiCorp will pay Arizona Public Service Co. approximately $222 million.

In addition, the agreements provide for joint planning of future power supply facilities to insure Arizona's access to Northwest power supplies.

As a result of the agreement reached, PacifiCorp has agreed to terminate its attempt to purchase Arizona Public Service or to acquire control of Pinnacle West.

ALISO VIEJO, CALIF. (SEPT. 4) BUSINESS WIRE - Cymbolic Sciences International (CSI), with headquarters in Orange County, will acquire the Electro-Optical Products (EOP) division of MacDonald Dettwiler and Associates Ltd. (MDA), Richmond, B.C., Canada, under terms of an agreement

jointly announced Tuesday by the two companies.

Subject to approval by the Canadian Federal Government, Cymbolic Sciences will acquire MDA's line of digital film recorder products in addition to technology, personnel, the plant, equipment and other facilities for their manufacture, sales, distribution and service.

The combination of the two firms' resources in imaging technology is a milestone for the industry as well as the individual companies involved, according to Peter Lake, president of Cymbolic Sciences.

''MacDonald Dettwiler's achievements in developing precision image output devices are well-known and highly regarded in the U.S., as well as Canada and other parts of the world where its products are marketed. Our strengths lie in the acquisition and manipulation of images and together we have an incomparable team.''

Both firms have established market positions in the printed-circuit- board manufacturing industry, but the MDA division has further developed applications in graphic-arts and scientific sectors.

In the graphic-arts sector, for example, MDA/EOP provides original equipment to three of the largest suppliers of imaging systems in North America.

''We can see enormous opportunities for new products that support MDA's installed base, as well as other industries, such as automotive and medical, which neither firm could address alone. We are budgeting a substantial increase in R&D funds to take advantage of the combined engineering talents,'' Lake said.

The product development and marketing thrust of Cymbolic Sciences International since its foundation in 1986 has focused on the creation, acquisition, manipulation and deposition of images. The first implementation of the company's sophisticated imaging technologies has been in products that automate printed-circuit-board (PCB) manufacturing.

#90247b0022 09/04/1990 ~Business Wire

LOUISVILLE, CO (SEPT. 4) BUSINESS WIRE - Explosive Fabricators Inc. reported third quarter, ending July 31, 1990, revenues of $3,090,000, an

increase of $322,000, or approximately 12 percent, over the same period in 1989.

Net income of $70,000 for the third quarter, or 1 cent per share, fully diluted, was down from $242,000, or 2 cents per share, as reported for the comparable period a year ago.

Nine month revenue for 1990 was reported to be $9,785,000, with net income of $566,000, or 5 cents per share fully diluted. This compares to the nine month figures for 1989 of $7,764,000 in revenue, with $602,000 of net income, or 6 cents per share fully diluted.

The third quarter net income shortfall was attributed to several factors: increased expenses to advance manufacturing efficiencies and marketing activities; price competition for traditional products; and losses experienced from two developmental orders. Although these events adversely affected the company's third quarter earnings they are designed to result in future improvements in revenue and margin performance.

ALAMEDA, CA (SEPT. 4) BUSINESS WIRE - Glycomed Inc. announced Tuesday that Irving S. Johnson, Ph.D., former vice president of Lilly Research Laboratories, a division of Eli Lilly and Co., has been elected to Glycomed's board of directors.

''The election of Dr. Johnson to our board of directors adds significant expertise to Glycomed's research and management,'' said Alan R. Timms, Ph.D., Glycomed president and chief executive officer.

''His career with Lilly spanned 35 years and he is highly regarded for his personal research accomplishments in biotechnology and for the innovative drug development programs he established during his 15 years as head of pharmaceutical research.''

Johnson joined Eli Lilly and Co. in 1953 as a bacteriologist in a program designed to utilize tissue culture techniques in cancer research. During this time he contributed to solving problems associated with mass production and safety testing of the Salk polio vaccine.

During his career he was actively engaged in a number of research areas,

including cancer and viral chemotherapy, immunoregulatory studies and recombinant DNA research.

While vice president in charge of Lilly Research Laboratories, Johnson oversaw research in the areas of pharmacology, endocrinology, physiology, biochemistry, immunology, cell biology and drug metabolism. He also established and directed programs in recombinant DNA research, plant molecular biology and transgenic animals.

He was largely responsible for Lilly's thrust into applications of molecular biology to identify targets for pharmaceutical development in experimental biology and medicine. Johnson was also instrumental in technology acquisition and corporate investment.

Johnson received a B.S. in chemistry from Washburn Municipal University in 1948 and a Ph.D. in developmental biology from the University of Kansas in 1953.

Johnson was born on June 30, 1925, in Grand Junction, Colo., and lives in Stonington, Maine.

Glycomed is a privately held company that is developing complex carbohydrates for pharmaceutical applications. The company was formed in 1987 and is headquartered in Alameda.

#90247b0046 09/04/1990 ~Business Wire

SAN FRANCISCO (SEP[T. 3) BUSINESS WIRE - Bank of America State Bank and the state's Office of Small Business Tuesday announced they are working together to provide financing to small businesses in California that includes guaranteed revolving lines of credit, term loans, and micro loans as low as $5,000, according to Mike Mantle, president of the bank.

''We are pleased to be the only financial institution in California participating in this program statewide,'' Mantle said. The cooperative efforts between Bank of America State Bank and the Office of Small Business are designed to meet the financial needs of small businesses in California, especially for working capital and short-term credit, Mantle explained.

''I'm delighted that Bank of America State Bank is using its resources and

expertise to further the needs of small businesses in California through this regional guaranteed loan program,'' said Rich Nelson, executive director of the Office of Small Business for the California Department of Commerce.

''Small businesses are vitally important to California's economy because they create most of the new jobs and employment opportunities in the state. These loan products can help ensure that small businesses have access to capital, which is crucial to their economic stability and growth '' Mantle noted.

Bank of America State Bank was specifically created to develop and underwrite these types of loans, Mantle pointed out.

''Our decision to participate in the regional loan guarantee program was based upon careful analysis of the needs of small businesses in California. The analysis included extensive meetings and conversations with economic development practitioners in the public, private, and nonprofit sectors,'' Mantle said.

The small business loan products are being offered by Bank of America State Bank under agreements with the Office of Small Business and eight regional nonprofit small business development corporations. The bank's loans and lines of credit will be guaranteed by these regional nonprofit small business development corporations, which administer the state's $40 million guarantee and direct loan fund under contract with the California Department of Commerce, Office Of Small Business. The fund was established by the State of California to promote economic growth of small businesses.

Small businesses that are creditworthy can obtain one year lines of credit ranging from $50,000 to $400,000. Lines of credit can be used for the purchase of inventory, utilized as cash advances to implement the terms of a work order or a sales contract, or used for the financing of account receivables. Rates on the line of credit are adjustable, with the reference rate of Bank of America NT&SA serving as the index against which the adjustments are made.

Micro loans are available to creditworthy small businesses in amounts from $5,000 to a maximum loan size of $25,000, with terms ranging from one to five years. Term loans over $25,000 are available for up to seven years, with a maximum loan amount of $400,000. The loans can be used for a broad range of business purposes. Interest rates on both the micro loans and the term loans are adjustable, with the reference rate of Bank of America NT&SA serving as the index against which the adjustments are made.

Small businesses interested in obtaining more information on the Bank of America State Bank program should contact one of the regional nonprofit

development centers, or call one of the following Bank of America State Bank officers: in Los Angeles, telephone Susan Howard, 213/228-3081; in San Francisco, call Susan Nakata, 415/622-3942.

The regional small business development corporations are: California Capital Small Business Development Corporation, Sacramento; California Coastal Rural Development Corporation, Salinas; California Regional Urban Development Corporation, Oakland; California Southern Small Business Development Corporation, San Diego; Hancock Urban Development Corporation, Los Angeles; Pacific Coast Regional Urban Development Corporation, Los Angeles; SAFE-BIDCO, Santa Rosa; and Valley Small Business Development Corporation, Fresno.

The Bank of America State Bank is a state-chartered bank headquartered in Concord, Calif. It opened for business in April 1990. The bank focuses on specialized community development lending and investment activities that furthers neighborhood revitalization and production of housing for low- and moderate-income households. Bank of America State Bank is a subsidiary of BankAmerica Corporation.

IRVINE, CALIF. (SEPT. 4) BUSINESS WIRE - Helionetics Inc. (ASE:ZAP) Tuesday announced that its board of directors appointed E. Maxwell Malone as president and chief executive officer of the company.

Malone currently serves as a director of the company and is the chairman of the board and treasurer of TrueTech Inc., the wholly owned subsidiary of the company's Definicon International Inc. subsidiary.

Bernard B. Katz, chairman of Helionetics, said ''that new innovative products that should contribute materially to the growth of Helionetics from its TrueTech subsidiary make Mr. Malone the logical leader to spearhead Helionetics' future growth.''

Helionetics has been a leader for over 20 years in the design and manufacture of solid state and rotary power conditioning systems.

With the acquisition of Definicon International Inc. and TrueTech, Helionetics has further expanded its product lines to include products that are designed around state-of-the-art 32-bit microprocessors and include vector, scalar, parallel and graphic processors that find applications in computer-aided design (CAD), modeling, simulation and three-dimensional fluid dynamics.

SOLANA BEACH, CA. (AUG. 26) BUSINESS WIRE - Chart House Enterprises Inc. (NYSE:CHT) announced the opening of a new Paradise Bakery restaurant in West Covina, Calif., by its wholly owned subsidiary, Paradise Bakery Inc.

This is the third retail bakery opened by Paradise Bakery in Southern California during the third quarter. Paradise Bakery plans to open six additional retail bakeries by year end.

The company presently has a Chart House restaurant under construction in Scottsdale, Ariz., which is expected to open in October. This will bring the number of Chart House restaurant openings to seven for the year.

The company also announced the acquisition of a restaurant property in Warwick, R.I. The property will be remodeled and converted to a Chart House restaurant, which should open in early 1991.

Chart House Enterprises Inc. operates 84 restaurants, including 64 Chart Houses, one Peohe's, 16 Paradise Bakeries and three Cork 'N Cleavers. The company's restaurants are located in 20 states, Puerto Rico and the U.S. Virgin Islands. In addition, the company's franchisees operate 13 Paradise Bakeries in Northern California, Colorado, Arizona, Oklahoma and Oregon.

SANTA CLARA, CA (SEPT. 3) BUSINESS WIRE - Siliconix inc. (NASDAQ:SILIQ), which filed a voluntary petition for reorganization under Chapter 11 of the Bankruptcy Code in April 1990, announced Tuesday that on Aug. 31, it filed a plan of reorganization with the U.S. Bankruptcy Court.

Members of the Creditors' Committee who represent the company's institutional lenders, vendors, and other trade creditors have concurred with the plan, as has the Equity Committee. Negotiations are proceeding with holders of subordinated debentures.

Siliconix intends to seek confirmation by the court of this plan of reorganization by Oct. 31, 1990. Under the plan, AEG Capital, a subsidiary of AEG Aktiengesellschaft, will become an 80.1 percent shareholder in the company. AEG Aktiengesellschaft, an 80 percent subsidiary of Daimler-Benz AG, will guarantee the promissory notes to be issued to the general creditors.

Siliconix is a leading supplier of advanced semiconductor products for motor controls, power supplies, computer peripherals, telecommunications, instrumentation, and automotive systems. In business for 28 years, Siliconix is a publicly traded company on the NASDAQ board.

SAN JOSE, CA (SEPT. 4) BUISNESS WIRE - Valid (NASDAQ:VLID), a leading supplier of electronic design automation (EDA) systems and software, Tuesday announced that L. George Klaus has been named to the newly created position of president and chief operating officer, Klaus, who reports to Valid CEO and chairman W. Douglas Hajjar, will be responsible for day-to-day managment of the company's operating functions.

Klaus will also be a member of the company's board of directors.

''Valid's dramatic growth over the past few years has brought us to the size where we needed to expand our executive team,'' stated Hajjar.

''Running a $200 million company amid the rapidly evolving EDA market demands a balance between long range and day-to-day managment activities that is best achieved through the traditional CEO and COO structure common in other large electronics companies.

''George is a proven executive with a strong sales and marketing background. His experience in all facets of company operations will help us plan for and orchestrate our continued rapid growth.''

During the past 25 years,, Klaus has held many executive positions at Sytek, Amdahl, and Control Data Corp. After joining Sytek in 1983 as vice president of marketing and sales, his responsibilities expanded to include engineering in 1985.

In 1986 he was promoted to president and chief operating officer, and in 1988 also assumed the CEO responsibilites. After Sytek was acquried by Hughes Aircraft Co. last year, Klaus remained on board to assist in the merging of the management teams.

Prior to Sytek, Klaus worked three years as a vice president for Amdahl Corp. where he increased the company's federal and western regional revenues by over 50 percent. Klaus also spent 13 years at Control Data Corp. in a variety of sales, marketing and operations positions, including coprorate vice president for governemt systems marketing where he was responsible for annual revenues of over $300 million.

From his new post, Klaus sees tremendous opportunites for Valid. ''Valid is extremely well posiitoned,'' noted Klaus. ''We have no major integration issues facing us, our new products and framework technology are the best in the business, we have a strong customer base, solid financial backing and an exceptional group of employees.

''I'm looking forward to blending my experience with the team at Valid to help increase Valid's share of the EDA market.''

Klaus serves on the board of directors of the Corporation for Open Systems (COS) and is a member of the COS executive committee. He is a member of the American Electronics Association and the Association for Corporate Growth.

Valid is the world's second largest supplier of EDA systems, with 1989 revenues of $174 million. The company designs, manufactures, markets and supports a full line of EDA solutions based on industry standard hardware, operating systems and networks. Valid products are used to develop electronic systems, including integrated circuits (ICs), application-specific ICs (ASICs), and printed circuit boards (PCBs).

Valid has sales and support operations in more than 40 locations worldwide. Valid coprorate headaquarters is located at 2820 Orchard Parkway, San Jose, Calif, 95134. Telephone: 408/432-9400.

SAN FRANCISCO (SEPT. 4) BUSINESS WIRE - "The centerpiece of the '90s...began more than a decade ago. Some people think of it as the global village. I call it the global mind."

Speaking at the annual Labor Day conference of The National Association of State Telecommunications Directors, William T. Esrey, chairman and chief executive officer of United Telecommunications Inc., which owns U.S. Sprint, offered his vision of the near-term future of the telecommunications industry: a concept he calls "infonics," his name for the technological infrastructure he feels "will probably reshape the world."

Esrey may be best known as an architect. His own building blocks are fiber-optic cable and digital switches. His most acclaimed structure is arguably the most advanced long-distance network in the United States: the U.S. Sprint nationwide 100 percent fiber-optic, all-digital network.

He is now leading the company's strategic thrust into worldwide markets,

where he sees advancements in the telecommunications industry giving consumers unprecedented opportunities to demand new services from their long-distance carriers.

"If the main product of infonics is instant information, regardless of location, we can already see it busy today, shrinking time and space and rearranging the social structure supported by them," Esrey told the group.

"Look at what infonics is doing to the old notions of time and space as they relate to what we build. Infonics has made information a productive resource - like labor or land or materials or equipment."

According to Esrey, "In an advanced economy like ours, three out of four people work in the service sector overall - and more than half of those are connected in one way or another with the knowledge industry itself."

This situation, he noted, "has brought great pressures to bear on institutional frameworks - on regulatory and political bodies, and...monetary and trade policies." Esrey called on both telecommunications providers and their customers to join in a re-thinking of the traditional ways of using telecommunications.

He predicted that the global communications infrastructure, or "infonics," will demand entirely new approaches to the way people and organizations operate.

SAN FRANCISCO (SEPT. 4) BUSINESS WIRE - Home Federal Savings and Loan Association of San Francisco (NASDAQ:HFSF) Tuesday announced that the previously announced reorganization of Home Federal into the holding company form of ownership became effective on Aug. 31.

Under the reorganization, Home Federal has become the wholly owned subsidiary of Home Federal Financial Corp., San Francisco (''Home Financial'') and all issued and outstanding shares of Home Federal have been converted into shares of Home Federal Financial.

The NASDAQ trading symbol of Home Federal Financial's common stock will be ''HFSF,'' the same as it was for the stock of Home Federal.

Home Federal's President and Chief Executive Officer Stanley E. Bailey commented that ''many changes have occurred in the financial services

industry and the reorganization of Home Federal into the holding company form of ownership will provide greater flexibility than is currently enjoyed by Home Federal and its subsidiaries, including flexibility in management structure and diversification opportunities.''

Bailey further stated that ''although Home Federal Financial has no specific plans for diversification at this time, its strong capital position and high asset quality, combined with the Northern California economic base provides a secure foundation upon which to build our future.''

SANTA MONICA, CA. (SEPT. 4) BUSINESS WIRE - National Medical Enterprises Inc. (NYSE/PSE/LoSE:NME) Tuesday announced the promotion of Nita Puig-Heckendorn to executive vice president in charge of corporate strategic planning.

Heckendorn continues to oversee the company's overall strategic and financial planning.

Heckendorn, 47, joined NME in 1982 as director of corporate budget and performance review. In 1984, the company named her a corporate vice president, and in 1986 she became a senior vice president.

Prior to joining NME, she served as director of reimbursement and financial review for Beverly Enterprises and vice president of domestic and international development for American Medical International (AMI). In that position, she also served on the board of directors for AMI's Hospital Quiron in Barcelona, Spain.

She previously worked as director of operations of Shea Enterprises, a

privately held skilled nursing facilities and retirement centers company.

A native of Valencia, Spain, Heckendorn graduated in 1963 from the Universidad Central de Venezuela with a bachelor of science degree in business administration with an emphasis in finance. Her memberships include the Health Care Financial Management Association.

National Medical Enterprises, one of the nation's largest health care services companies owns, operates and manages acute, psychiatric and physical rehabilitation hospitals and substance abuse treatment centers throughout the United States and internationally. -0-

NOTE TO EDITORS: Heckendorn resides in San Marino, Calif. with her husband. They have three children.

NEWPORT BEACH, CALIF. (SEPT. 4) BUSINESS WIRE - American Express Travel Related Services Tuesday announced that the company will place Airline Computerized Ticketing's electronic ticketing machines in its prime corporate sites.

According to Joanne Stewart, chief executive officer of ACT, the move by AmEx/Eastern Region makes the company the first to install the Orange County-based firm's revolutionary airline self-ticketing machines.

''American Express has always been at the forefront in developing sophisticated technology to assist our clients,'' said James Yasinski, vice president of Business Travel Operations, Eastern Region. ''We have been testing this product since 1989 and we're delighted that the first installations on customer premises will take place within our Eastern Region,'' he said.

The ''ACT ETMs'' provide a computerized airline self-ticketing network that allows travellers to electronically receive airline tickets, boarding passes and itineraries in 25 seconds from anywhere in the country and to be able to make last-minute, trouble-free changes around the clock.

Commented Jim Thompson, vice president of Facilities and Automation, ''The ACT ETMs are a tool that move American Express into a whole new generation of customer-service technology.''

Stewart will discuss her self-ticketing network on Sept. 5 at 11:45 a.m.

at Travel Weekly's Focus on Automation show at the San Francisco Marriott.

SAN JOSE, CALIF. (SEPT. 4) BUSINESS WIRE - International Microelectronic Products Inc. (IMP) (NASDAQ:IMPX) announced Tuesday that it expects a significant loss in the second fiscal quarter ending Sept. 30, 1990.

The company reports that its anticipated loss will be due primarily to a softening of demand resulting from excess inventory among key customers and weakness in certain segments of the ROM market.

''IMP, along with the semiconductor industry in general, is experiencing the downturn market analysts predicted for the second half of 1990,'' said Barry Carrington, president and chief executive officer. ''Rigorous cost-control programs are in place and will remain in effect until market conditions improve.

''IMP's balance sheet is solid and we have a strong cash position,'' he said. ''We are encouraged by the high level of customer interest in our new filter product family and will continue to aggressively pursue the development of these and other new products.''

In an unrelated action, IMP announced that its interest in its European affiliate has been sold to a large West German industrial corporation.

IMP designs and manufactures application-specific integrated circuits (ASICs) and application-specific standard products (ASSPs). The company uses its proprietary cell-based design methods and CMOS process technologies to supply value-added mixed analog/digital and complex digital chips to customers, primarily in the computer peripheral and computer markets.

WASHINGTON (SEPT. 4) BUSINESS WIRE - The federal government Tuesday announced that an agreement in principle has been reached with AVX Corp. (AVX) of New York, N.Y., a major defendant in the New Bedford (Mass.) Harbor Superfund litigation.

The U.S. Department of Justice (DOJ) stated that, under the terms of the settlement, AVX will pay $66 million to the United States, on behalf of the U.S. Environmental Protection Agency (EPA) and the National Oceanic and Atmospheric Administration (NOAA), and to the commonwealth of

Massachusetts.

The money paid by AVX to the United States and the commonwealth of Massachusetts will be used toward: (1) funding cleanup of the widespread polychlorinated biphenyl (PSB) contamination of New Bedford Harbor, (2) restoring injured natural resources of the harbor area and (3) reimbursing funds that the respective governments have already spent in enforcement, remedial investigation, feasibility studies and natural resource damage assessment costs.

The amount to be paid by AVX could increase if the total cleanup cost at New Bedford Harbor exceeds $130.5 million, if new information emerges or if currently unknown conditions present new problems at the site.

The formal settlement papers, embodied in a consent decree, are to be negotiated by AVX with DOJ, EPA, NOAA and the commonwealth of Massachusetts within one month. The consent decree, once filed with the U.S. District Court in Boston, will be open to public comment and subject to approval by the court.

The $66 million payment will represent one of the largest settlements by a single defendant in the 10-year history of Superfund.

ROSEMONT, IL (SEPT. 4) BUSINESS WIRE - Covia Tuesday announced Premier Meetings, a new service enabling travel agencies to offer corporate customers a full range of meeting planning support and management expertise -- at no cost to the agency.

Covia, whose Apollo reservation system is the most advanced in the travel industry, is the first travel distribution company to enter the meeting planning business with a comprehensive product. The service is available today.

''Premier Meetings capitalizes on our knowledge of travel and our expertise in providing solutions to help agencies satisfy their customers '' said Paul Blackney, Covia president and chief executive officer.''

''It represents both a revenue-generating opportunity and a value-added service that any agency, large or small, can use to grow existing corporate business and attract new accounts.''

Agencies are not charged for using Premier Meetings, but benefit from

revenues created by meeting-related travel arrangements and ticketing. Premier Meetings does not issue airline tickets. It derives income from a management fee charged to clients.

''Premier Meetings gives smaller agencies a chance to expand the range of services they offer without hiring additional staff or investing in new resources,'' said Scott Raine, Covia general manager of Premier Meetings.

''Larger agencies that already have meeting or incentive divisions can draw on Premier Meetings' expertise for supplemental support. For example, they might only want help with on-site meeting management or installation of a bank of computers.''

Premier Meetings can handle all elements of the meeting planning process, from establishing the meeting objectives to selecting the meeting site, from audio-visual support to actual on-site management.

''We are essentially a 'one-stop shop' for anyone who needs help with meeting planning activities of any sort,'' Raine said. ''We have a dedicated staff of professionals ready to enter the planning process at an early stage, help draw up a project plan, then implement any or all phases of the plan until the meeting is completed successfully.''

Premier Meetings will be marketed primarily through travel agencies but is also offered directly to corporations and events planning firms.

Covia is owned by United Airlines, USAir, British Airways, KLM Royal Dutch Airlines, Swissair, Alitalia and Air Canada.

#90247b0224 09/04/1990 ~Business Wire

SANTA CLARA, Calif. (SEPT 4) BUSINESS WIRE - Applied Materials Inc. Tuesday announced the signing in early August of a new joint development program with South Korean electronics giant, Samsung Electronics Co., that will focus resources from both companies toward advanced plasma etch process development and production support using Applied Materials' Precision 5000 Etch system.

The agreement follows an earlier joint development program between the two companies, announced in May 1990, that involved chemical vapor deposition (CVD) process development with Samsung's Kiheung Research and Development Center.

The latest agreement is aimed at meeting Samsung's current and future

requirements in production fabs, and covers virtually all of Applied Materials' etch technologies, including single-crystal silicon, polysilicon, tungsten silicide and silicon oxide etching applications, particularly for 200mm wafers. ''Samsung is pleased to be joining its talents with those of Applied Materials in this extremely advanced, half-micron etch process development program,'' said Dr. J.S Lim, director of Kiheung Factory. ''Our earlier agreements have laid the groundwork for a very close cooperation with Applied Materials, which we believe will benefit both companies.''

''This agreement between the two companies represents a growing trend between the most advanced semiconductor manufacturers, such as Samsung, and suppliers of production equipment to bring together their talents to achieve hardware and process goals that will forge new directions into the future,'' said Dr. David N.K. Wang, vice president and general manager of Applied CVD and Etch Technologies (ACET) Division at Applied Materials. Wang and Lim will manage the program as ranking members of a committee composed of high-level Samsung and Applied Materials technical staff.

Under the agreement, Samsung will send process engineers to Applied Materials' Santa Clara facilities for advanced oxide and polysilicon process development and training on the Precision 5000 Etch system. Samsung engineers will also work with Applied Materials' personnel to evaluate and standardize ultra-clean hardware enhancements for Precision 5000 systems to be installed at Samsung in early 1991.

In addition to the Santa Clara facility, Applied Materials Japan (AMJ) will also be involved in development of hardware and software that will be provided to Samsung.

As part of the joint agreement, Applied Materials will develop new training programs for Samsung personnel, to include process and maintenance support of Applied Materials' advanced Etch and CVD equipment, thus achieving greater self-sufficiency and more economical maintenance procedures for Samsung.

Applied Materials Inc. is a global growth company based in Santa Clara, and is the leading independent supplier of wafer fabrication systems to the worldwide semiconductor industry. It is a market leader in chemical vapor deposition (CVD), dry plasma etching and silicon deposition.

The company is also a leading manufacturer of ion implantation systems and recently launched its entry into the physical vapor deposition (PVD) market.

#90247b0225 09/04/1990 ~Business Wire
STOCKTON, CA (SEPT. 4) BUSINESS WIRE - California Financial Holding Co. (NASDAQ:CFHC) completed a senior debt financing with the Chase Manhattan Bank (National Association) as the lender on Aug. 31.

The loan amount was $25 million, and the company has the option to borrow an addition $5 million from Chase at any time prior to Feb. 28, 1991.

The proceeds of the loan were concurrently advanced by the company to its wholly owned, second-tier subsidiary, Stockton Service Corp., in order to permit Stockton Service Corp. to repay borrowings from Stockton Savings Bank, FSB.

This refinancing enables Stockton Savings Bank to meet its regulatory capital requirements by reducing the amount of its investment in Stockton Service Corp. The company anticipates that, as a result of the refinancing and the Savings Bank's improved regulatory capital position, the Savings Bank will no longer be subject to regulatory restrictions relating to its capital position.

The proceeds of the loan will be used by Stockton Savings in its normal course of business.

The loan matures Oct. 31, 1993, subject to prepayment, in whole or in part at any time at the option of the company. The loan is secured by a pledge by the company to Chase of its interest in the common stock of the Savings Bank and Stockton Service Corp.'s note to the company representing the relending of the loan proceeds to Stockton Service Corp.

The Stockton Service Corp. note is secured by a deed of trust in favor of the company and has been assigned to Chase. The loan agreement imposes certain conditions and restrictions on the company and its subsidiaries.

Established in 1887, Stockton Savings Bank, FSB offers a full range of financial services at 23 branches located throughout the Central San Joaquin Valley and the Sierra Foothills.

SAN FRANCISCO (SEPT 4) BUSINESS WIRE - S. A. Megeath, III Tuesday announced his resignation from the board of directors of PLM International Inc. (ASE:PLM) of San Francisco, which he tendered to the company Monday, Sept. 3, 1990.

In his resignation letter, Megeath, 44, cited intense disagreement with the board of directors over the company's operations, policies and practices and his unwillingness to accept what he views as significant deviation from sound and responsible management and fiduciary standards.

Megeath said the board made it impossible for him to fulfill his responsibility to the shareholders by depriving him of information necessary to the fulfillment of his duties as a director. He cited the company's management directors and especially Robert Tidball, PLM International's president and chief executive officer, who has served in this capacity since March 9, 1989.

Megeath said this situation became critical during the past week when the board removed him from all of his positions in the company, except his directorship, including his positions as chairman of the board of directors, chairman of the executive committee of the board and a member of the audit committee.

Megeath served in those capacities from Oct. 14, 1988 until Aug. 29, 1990. Megeath became chairman of PLM International immediately after Mark C. Hungerford resigned under pressure brought by all of the then outside directors, for what PLM International described in an SEC filing, dated March 16, 1989 as a misappropriation of company property by him and Transcisco Industries, Inc.

Hungerford is the chief executive and controlling stockholder of Transcisco. Transcisco owns 36 percent of the common stock of PLM International.

Megeath is and has since 1985 been the managing general partner of LEF&C Partners of Carson City, Nev., which is engaged in corporate strategic and advisory services, risk capital and investments.

From 1979 through 1985, he was chief executive officer of LEF&C Corp. of San Francisco, a diversified company with investments in rail transportation, including ownership of the Lake Erie, Franklin and Clarion Railroad railroad equipment leasing, natural resources, real estate and securities.

IRVINE, Calif. (SEPT 4) BUSINESS WIRE - Advanced Logic Research Inc. (ALR) (NASDAQ:AALR) announced a price reduction on its award-winning PowerFlex 286-based PC made effective Tuesday.

The PowerFlex base Model 1 starts at $995. The PowerFlex Model 40 now lists for $1,295, a 14 percent price reduction.

In conjunction with Tuesday's announcement, ALR has announced the SX PowerFlex 16-MHz 386SX-based PCs starting at $1,195.

The SX PowerFlex Model 40 includes 1MB of RAM expandable to 5MB on the system board, and is expandable to 16MB RAM with expansion
28 ms) hard disk drive, 1:1 IDE controller, 1.44MB 3.5-inch floppy disk drive, one serial port, one parallel port, 101-key enhanced keyboard, and retails for $1,495.

All PowerFlex models meet FCC class B certification and are tested for UL and CSA. The SX PowerFlex can be easily upgraded to 20MHz SX and 25MHz i486 with the standard PowerFlex upgrade modules.

Dave Kirkey, vice president of worldwide marketing at ALR, states, ''The PowerFlex products have been well accepted worldwide for their competitive price and with our increased production volumes, lower cost of materials and increased manufacturing capabilities, we are able to bring these savings to the customer.''

Kirkey goes on to say, ''Although the PowerFlex is competitively priced, our customers have quickly picked up on ALR's affordable upgrade designs and claim this as a key reason for choosing the PowerFlex system.''

Phil Ellet, executive vice president, Gates/FA comments, ''The PowerFlex has been a best seller here at Gates/FA and this price reduction will maintain the ALR competitive edge.''

Chip Lacy, chairman and chief executive officer at Ingram Micro D adds, ''ALR's PowerFlex machines have sold well in the small-business, home-office and educational markets. These significant price reductions offer our resellers a tremendous opportunity to increase sales to those arenas.''

The PowerFlex upgrade path is the most affordable and sensible design for the user to increase the performance of a microcomputer. The PowerFlex levels of upgrade include ALR's 386SX module with a retail proce of $395. ALR's 386SX-20 Module with 32KB cache retails for $595 and ALR's i486/25 Module retails for only $1,995.

ALR currently is offering customers an incentive of almost 50 percent off the suggested list price of the PowerFlex 386SX Module, bringing the cost to upgrade to only $199. Full details are available from ALR.

The PowerFlex and SX PowerFlex are currently available nationwide from Ingram Micro D, Merisel, Gates/FA and authorized ALR resellers.

Advanced Logic Research is a leader in high-performance CPU technology. The company carries the most comprehensive line of ISA-, Micro Channel- and EISA-based PCs and upgradeable PCs ranging from entry-level 12.5-MHz 286 computers to 33-MHz 386, 25-MHz and 33-MHz i486-based high-performance systems and multiprocessor systems based on UNIX and Novell.

ALR products can be purchased through value-added resellers, value-added dealers, major chains and retail locations throughout the United States, Canada, Europe, Mexico, Latin America and Asia.

#90247b0613 09/04/1990 ~Business Wire

SANTA MONICA, CA (SEPT. 4) BUSINESS WIRE - MERET Optical Communications Inc., an Amoco Co., specializing in the design and manufacture of fiber optic communication systems, introduces a new, low-cost fiber optic product line intended for use in commercial and industrial Closed Circuit Television (CCTV) and Access Control, under the name ''SecureLink.''

The SecureLink product line features a wide variety of solutions for such applications as surveillance and security; process control and monitoring, teleconferencing, and radar remoting: transmission of high-quality video for multi-camera installations; data links for pan; tilt and zoom control; and audio transmission for intercom communications -- at distances to 20 kilometers and beyond.

Packaging options range from transmitters mounted in the camera housing itself, and stand-alone units, to complete rack-mountable, multichannel chassis.

Several SecureLink models feature the multiplexing of video, audio, and data signals using Field Division Multiplexing (FDM), Time Division Multiplexing (TDM) or Wavelength Division Multiplexing (WDM) techniques over a single fiber. Loss budgets up to -40 dB provides for long-distance runs, multiple drops and splits.

MERET has been designing and manufacturing fiber optic links for CCTV and Access Control systems since 1972 and has extensive experience in both the commercial and military security systems markets.

The technical expertise gained by adhering to strict military standards of quality and performance has brought about SecureLink products' reliability in critical applications, application diversity and moderate pricing.

Established in 1971, MERET designs, manufactures and distributes fiber optic video and data communications systems for high-resolution computer graphics, medical imaging, HDTV, teleconferencing, flight simulation, industrial automation and control, military communications, C3I and CCTV.

MERET specializes in wideband analog fiber-optic systems and has developed a sophisticated variety of modulation schemes, components and custom-designed hybrid electronics to satisfy almost any system requirement.

WALLINGFORD, CONN. (SEPT. 4) BUSINESS WIRE - NOVAMETRIX MEDICAL SYSTEMS INC. (NASDAQ/NMS Symbol: NMTXE) Tuesday announced that it has received a purchase order for the company's pulse oximeters from a leading teaching hospital at a major east coast university.

The purchase order is valued in excess of $200,000 and is the company's single largest purchase order for oximetry products.

The company stated that revenues from the order will be recognized in the second quarter of the current fiscal year ending April 28, 1991.

Commenting on the announcement, William J. LaCourciere, president and chief operating officer of NOVAMETRIX MEDICAL SYSTEMS INC., stated, ''We are extremely pleased to announce this purchase order. Our Model 515A pulse oximeter was selected due to the product's superior performance over several competing monitors. In addition, the ''Y-sensor'', our proprietary reusable sensor, will provide the hospital with estimated savings of $100,000 per year.''

NOVAMETRIX MEDICAL SYSTEMS INC. is a leading designer, developer, manufacturer and marketer of medical electronic instruments which non-invasively and continuously assess a critically ill patient's oxygen and carbon dioxide status. The company's products are primarily used in operating rooms, intensive care units and respiratory therapy departments.

BREA, CA (SEPT. 4) BUSINESS WIRE - The First American Financial Corp. announced Tuesday it had purchased the realty tax services division of Metropolitan Realty Services Group, a New York-based company, according to Executive Vice President Parker S. Kennedy.

The acquisition, for cash and assumption of debt, was made through First American Real Estate Tax Service Inc.

Present Metropolitan staff, including President John W. Long, will be retained and Long will serve as First American Real Estate Tax Service's eastern regional vice president and director of marketing. Other terms of the agreement were not disclosed.

The acquisition will increase First American's level of service in the

Northeast. Metropolitan's computer system was developed specifically to handle the complexity of tax service in the Northeast and will be integrated with First American's extensive mainframe capabilities.

The company is now nationwide, providing lending institutions with information regarding property-tax payments on mortgage properties in all 50 states and Washington D.C. If property taxes are delinquent, mortgage investments can be lost through forced sale of the properties.

''The acquisition will give First American additional customer support in the East, while backing it with the capital resources, increased technology and computer systems capacity to assure the highest level of tax service,'' said Wayne M. Booth, president of First American Real Estate Tax Service.

''For customers in that area, this means a full range of tax reporting, payment and on-line services area available, as well as all the significant benefits of our customer-support program.''

First American Real Estate Tax Service is based in Brea with branch offices in key locations nationwide. The company is a wholly owned subsidiary of First American Title Insurance Co., one of the oldest and largest title insurers in the nation. First American Financial is the parent company of both.

SANTA ANA, CALIF. (SEPT. 4) BUSINESS WIRE - Tokos Medical Corp. (Delaware) (NASDAQ:TKOS) announced Tuesday that it has acquired Physiologic Diagnostic Service Inc. (''PDS'') of Atlanta.

The transaction was consummated after the Federal Trade Commission closed its investigation into the transaction late in the afternoon on Friday, Aug. 31.

Tokos acquired all of the outstanding shares of PDS in exchange for approximately 2.7 million shares of Tokos common stock. The acquisition will be accounted for as a pooling of interests.

PDS, which is now a wholly-owned subsidiary of Tokos, provides home uterine activity monitoring and perinatal nursing services for pregnant women at high risk of preterm labor along with other specialized services for pediatrics.

Tokos is the leading provider of specialized home health care services to the obstetric and gynecologic market. Tokos pioneered the development and commercialization of home uterine activity monitoring, perinatal nursing and other specialized home care services for women.

Robert F. Byrnes, Tokos' chairman and chief executive officer, stated ''This transaction is very meaningful to Tokos and its shareholders. It will give us impetus for future growth, enable us to expand the approved FDA indications for our home uterine activity monitors and enhance our ability to obtain broader reimbursement coverage of our preterm labor management services.''

Jeffrey D. Koepsell, president of PDS, concurs ''This merger will strengthen Tokos' clear leadership position through integrating our sales, marketing, research and regulatory functions.

''Just as importantly, through this combination an even stronger company will emerge that will accelerate our role in reducing the tremendous human and financial costs associated with preterm births -- a goal both of our companies have shared since their inception.''

#90247b0618 09/04/1990 ~Business Wire

BELLEVUE, WASH. (SEPT. 4) BUSINESS WIRE - Esterline Corporation (NYSE) today reported net earnings of $5.5 million, or $.83 per share, on sales of $294.7 million for the first nine months (ended July 31) of the company's current fiscal year.

Comparable earnings in the same period last year were $6.3 million, or $.74 per share based on the 8.5 million shares then outstanding, (now 6.6 million shares as a result of the repurchase of shares from a former major shareholder in September 1989). Net earnings for the first nine months of fiscal 1989 were $6.7 million, or $.78 per share, including an extraordinary item of $376,000, or $.04 per share, from an operating loss carryforward tax benefit. Sales were $209.6 million.

Fiscal 1990 sales and net earnings include the effects of six former Criton Technologies' companies acquired in September 1989. Earnings also reflect $13.4 million in year-to-date interest expense, primarily on financing for the acquisition and shares repurchase. Interest expense was $1.5 million in the same period last year.

Fiscal 1990 third quarter net earnings were $1.7 million, or $.25 per share, compared with the year-ago quarter's $2.5 million, or $.29 per

share on the shares then outstanding. The $1.7 million compares with $2 million net earnings in the immediately preceding quarter -- a period that also includes results of the former Criton companies.

Sales for the third quarter were $92 million compared to the pre-acquisition $67.4 million reported in the same quarter last year. Backlog at the end of the third quarter remained stable with the immediately preceding quarter at $116 million. The pre-aquisition backlog at the end of last year's third quarter was $69 million.

Wendell P. Hurlbut, Esterline's president and chief executive officer, said ''... the company's third quarter sales level reflects the prevailing softness in the company's traditional markets. The resulting lower earnings from our operations serving these markets are in contrast to the continuing strong performance from the acquired former Criton companies.''

Esterline is a leading manufacturer of automation equipment for the production of printed circuit boards and metal fabrication, instrumentation for quality control, power measurement and process control and engineered products for the commercial aircraft, aerospace and defense industries.

BOULDER, CO (SEPT. 4) BUSINESS WIRE - Netwise Inc. Monday announced a broadening of its product offerings by adding remote procedure call (RPC) support for IBM mainframes and Macintoshes, as well as an analysis and debugging tool for developing RPC-based applications.

The Netwise Mainframe RPC package integrates IBM mainframes with workstations and minicomputers. Mainframe RPC builds a cultural compatibility between COBOL programmers on mainframes and C programmers on PCs, minicomputers and workstations, by allowing both groups of programmers to continue working in their native programming environments while developing client/server applications.

Mainframe RPC is available for IBM or compatible mainframes with MVS architecture, CICS and VTAM. It can be used with the following other platforms: PCs running the DCA/Microsoft Select Communications Server or Workstation, PCs running IBM OS/2 Extended Edition (both of which include APPC/LU6.2 network software); Sun3/Sun4 architecture running SunOS with SunLink SNA Peer-to-Peer; and DEC VAX architecture running VMS and DECnet/SNA VMS APPC/LU6.2.

The debut of the Netwise RPC TOOL for the Macintosh on TCP/IP networks marks the first time remote procedure call technology has been available for Apple platforms. RPC TOOL for Macintosh supports Macintosh System 6.0 system software or higher, and Symantec Corp.'s C development environment, THINK C, version 4.0.

The Macintosh RPC TOOL allows Mac applications to interoperate transparently across a TCP/IP network with applications running on diverse systems, including DEC VAX machines running VMS and Ultrix, PCs running DOS and OS/2, Sun workstations, Unisys, Hewlett-Packard, and Data General hardware, and many other systems running UNIX variations.

The RPC Monitor is a graphical analysis tool that complements the RPC TOOL product line by allowing developers to manage and debug RPC-based applications. The new product facilitates programming, debugging and maintenance of client/server applications on multi-vendor networks.

The RPC Monitor consists of a user-driven graphical display of client and server interaction. Running in the Microsoft Windows 3.0 environment, the Monitor displays icons representing clients and servers -- components that make up a distributed application -- and shows the creation and cancellation of connections between them.

Based in Boulder, Netwise is the leading independent software company producing advanced products that simplify development of integrated processing solutions. The company provides the widest availabiltiy of RPC-based products for most popular hardware, operating system and networking platforms.

#90247b0630 09/04/1990 ~Business Wire

MELBOURNE, AUSTRALIA (SEPT. 4) BUSINESS WIRE - Sept. 3, 1990, The board of Amcor Limited, Australia's leading paper and packaging group, announced today that audited net operating profit of Amcor, on an equity accounted basis, was A$181 million for the year ended June 30, 1990, compared with A$151 million for 1988-89, and increase of 20 percent.

Equity profit before interest and tax rose from A$348 million last year to A$442 million in 1989-90, an increase of 27 percent, while profit before tax was A$268 million compared with A$239 million in 1988-89, a rise of 12 percent.

Equity earnings per share were 41.5 cents, compared with 40 cents last year.

Sales value for the Amcor Group, including an appropriate share of the sales of associated companies, was 25 percent higher at A$4,373 million (A$3,499 million).

A notable development in 1989-90 was that 29 percent of Amcor's sales and 17 percent of profit before interest and tax were generated outside Australia. A schedule showing segmental results is attached. Detailed comments on the year's results are included later in this statement.

Directors have declared an unchanged final dividend of 14 Australian cents per share, totaling 27 cents for the year, versus 26.5 cents last year (65 percent franked, versus 90 percent last year). The lower franking percentage this year reflects the reduction in tax paid (and hence the ability to frank dividends) resulting primarily from the tax depreciation claimable on our major investment program of the past few years.

The company will mail the final dividend on Oct. 17, 1990, to shareholders of record at the close of business on Sept. 25, 1990.

Trading conditions in 1989-90 were the most difficult for many years, particularly in Australia where there was a progressive slow-down in economic activity during the year.

In Australia, the difficulties for manufacturing companies like Amcor were compounded by the Federal Government's excessive reliance on monetary policy to control the economy.

The recent renewed rise in the value of the Australian dollar to unrealistically high levels penalises exporters while encouraging import competition. Simultaneously high interest rates inhibit growth in the domestic market.

BEVERLY HILLS, CALIF. (SEPT. 4) BUSINESS WIRE - International Lease Finance Corp. (ILFC) and Aeronautical Support Inc. (ASI), based in Deerfield Beach, Fla., jointly announced Tuesday that ILFC has agreed to purchase a 19.5 percent shareholding in ASI.

ILFC, a major owner/lessor of commercial jet aircraft with assets of nearly $4 billion, is a wholly owned subsidiary of American International Group (NYSE:AIG).

Aeronautical Support is a supplier and lessor of commercial aircraft spare parts, equipment and aircraft engines and is a privately owned Florida corporation with annual sales of $9 million.

Louis L. Gonda, executive vice president of ILFC said, ''Demand for the leasing and sale of spares to our growing worldwide airline customers is becoming increasingly important and profitable and complements ILFC's leasing activities of new technology aircraft to airlines on all continents.''

Bruce Agardy, president of ASI, emphasized, ''The association with ILFC, one of the world's great owners/lessors of jets, significantly broadens our potential airline customer base for supply and leasing of commercial aircraft parts.''

Agardy added, ''Through ILFC's resources ASI can obtain valuable and high demand aircraft parts inventories, such as ILFC's recent agreement to sell ASI more than $10 million of former Singapore Airlines Boeing 757-200 spare parts.''

Gonda pointed out, ''Through the investment in ASI, ILFC need not set up its own labor and logistics intensive spare parts leasing organization, but can channel that business profitably to ASI, which has full capabilities in house to service global airline spare parts requirements.''

The transaction is expected to be consummated during September, both companies said.

DALLAS (SEPT. 4) BUSINESS WIRE - Zfax Image Corp. (NASDAQ:ZFAXF) Tuesday announced that it has opened a second retail store dedicated to the sale of facsimile machines and complementary products.

Named ZFAX, the store is located at 131-106th N.E. in Bellevue, Washington. The company also operates a retail facsimile operation in Dallas.

ZFAX is currently completing development of a portable, lightweight, 9600

baud facsimile machine, the PF4003, which will be marketed at its two retail locations this fall and through national distribution.

According to Harmon Hardy, chief executive officer of ZFAX, ''We look forward to becoming the source in the Seattle area for the facsimile needs of local businesses and individuals. Plans are in process for the opening of additional ZFAX stores in the near future.''

MOUNTAIN VIEW, CALIF. (SEPT. 4) BUSINESS WIRE - Adobe Systems (NASDAQ:ADBE) Tuesday announced the signing of a letter of intent with Apple Computer Inc. to reach a new and expanded technology licensing agreement.

Under the terms of the agreement, the two companies plan to continue to work together to provide new products based on Adobe's PostScript software and printer technology developed by Apple Computer.

''Adobe and Apple have together achieved success in providing users with innovative PostScript software products; printers, such as the Apple LaserWriters, and PostScript language applications such as Adobe Illustrator and Adobe Photoshop.

''We are confident that the strengthening of the relationship between Adobe and Apple will lead to additional innovative products in the future '' said John Warnock, chairman and chief executive officer, Adobe Systems Inc.

''Continuing to work closely with excellent third-party vendors such as Adobe has many benefits for Macintosh customers,'' said Randy Battat, vice president of product marketing, Apple Computer Inc.

''Together we can offer customers the proven benefits of Adobe's PostScript software, and Apple can add value through new technologies such as TrueType font format. Apple remains committed to TrueType and will work closely with Adobe to guarantee that all of our common customers' current investments in hardware and software will be protected and

enhanced in the future.''

Adobe Systems Inc., founded in 1982, is headquartered in Mountain View, Calif.

Adobe is the developer of PostScript, the industry-standard page description language for electronic printing and publishing and Display PostScript, a device-independent graphics software component for computer displays. In addition, the company develops and markets a line of application software products. Revenues for 1989 were more than $120 million.

#90247b0642 09/04/1990 ~Business Wire

SANTA CLARA, CALIF. (SEPT. 4) BUSINESS WIRE - Valisys Corp. Tuesday announced support for the Dimensional Measuring Interface Specification (DMIS).

Valisys will support both an interactive and batch version of DMIS.

DMIS is a specification for a standard interface through which CAD systems and dimensional measuring equipment, such as coordinate measuring machines (CMMs), can communicate. The Valisys support for DMIS will allow DMIS users to take advantage of the full set of Valisys capabilities, including design verification and inspection programming, while maintaining continued use of DMIS functionality.

''DMIS support provides advantages to both CMM vendors and Valisys end users,'' said John J. Clancy, president of Valisys. ''CMM vendors can now provide Valisys compatibility more easily than ever before. Valisys end users, with DMIS already implemented, can maintain continued use of DMIS functionality independent of Valisys. The result will be more efficient use of current investments.''

For interactive DMIS support, Valisys has authored and released a ''simplified'' interactive DMIS specification. This specification defines the communications protocol and error processing needed to run CMMs in a real-time, interactive mode.

For batch DMIS support, Valisys has defined and implemented a subset of the BATCH DMIS 2.1 specification, which defines the commands that drive the CMM to move and measure, report measured data, define part geometry, rotate tables, and execute tool change. Support of these commands by any CMM manufacturer will provide complete compatibility with Valisys

technology.

For full-function DMIS support, Valisys has contracted with TechTran Inc. (Port Richey, Fla.) to develop the functional specifications for translating the entire Valisys database into its equivalent DMIS 2.1 commands.

Valisys Corp. develops Valisys software, and provides customer support and consulting services. Valisys is a set of interconnectable software modules spanning design engineering, manufacturing engineering, quality assurance, production and inspection.

CINCINNATI (SEPT. 4) BUSINESS WIRE - Cincinnati Bell Inc. (NYSE:CSN) announced Tuesday it has acquired Ameritel Corp., a business-to-business telemarketing firm.

Ameritel is a privately held corporation based in Neenah, Wis. It will operate as part of the Business Division of MATRIXX Marketing Inc., Cincinnati Bell Inc.'s telemarketing and marketing related services subsidiary.

Ameritel specializes in providing full account management services and business-to-business telemarketing primarily for consumer product firms. The present management of Ameritel will remain with the firm. The terms of the agreement were not disclosed and the transaction will not have a material effect on Cincinnati Bell Inc.

MATRIXX is a wholly owned subsidiary of Cincinnati Bell Inc. operating in the U.S. and Europe. In addition to the Business Division, MATRIXX Marketing operates three other divisions -- the Consumer and Research Divisions and MATRIXX Marketing Europe.

MATRIXX services include business-to-consumer and business-to-business telemarketing, consulting, direct mail, fulfillment, database management, and marketing research.

Cincinnati Bell Inc. supplies telecommunications, information management, telemarketing and related marketing services. Product lines include information systems development, data processing and systems consulting, software development, discount long distance telecommunications, market research, electronic database services, telecommunications equipment supply and repair.

#90247b0649 09/04/1990 ~Business Wire

LOUISVILLE, KY. (SEPT. 4) BUSINESS WIRE - Amid growing national energy and environmental concerns, a national pioneer in energy efficient lighting announced Tuesday that it is accelerating development of third generation electronic fluorescent ballast technology from research to production status.

Thomas R. Fuller, president and chief executive officer of Thomas Industries Inc. (NYSE:TII), said energy-driven factors prompted this accelerated emphasis. Among them are the expanded energy focus resulting from the Iraq-Kuwait situation, acid rain legislation and utility incentives for energy efficient lighting.

Fluorescent lighting fixtures regulated by Thomas All-Electronic Ballasts cut energy consumption as much as 20 to 40 percent. Some applications of Thomas third generation technology being introduced in early 1991 offer 60 percent savings.

Federal reports attribute to lighting (a) 20 to 25 percent of all national electrical consumption and (b) two-fifths of commercial buildings' electrical use.

''America has the technology to avoid becoming an energy hostage,'' Fuller said. ''We've expanded our research and engineering teams. Effective immediately, we're assigning top priority to bringing third generation microchip technology out of the laboratory and into the marketplace in our lighting equipment.''

Thomas said it expects to introduce some third generation ballasts within 120 days. The ballasts are part of a new line of energy saving lighting fixtures, ballasts, dimming devices and other items to be introduced over the next 22 months.

Fuller said a $93 million acquisition in 1989 dramatically enhanced the ability to produce energy efficient lighting products that were under development for several years.

''Upon acquiring Day-Brite Lighting in May 1989, we began planning the production and marketing of expanded lines of energy efficient lighting products under the Day-Brite label as well as our long-standing Benjamin line,'' he said. ''We've accelerated production schedules at both the

Day-Brite plant in Tupelo, Miss., and our Benjamin facility in Sparta, Tenn.''

Energy efficient products account for a portion of Thomas Industries revenues that will approach $500 million in 1990. Thomas Industries designs and manufactures a broad array of commercial, industrial and residential lighting products, fractional horsepower compressors and vacuum pumps, as well as specialty products for commercial, industrial and consumer markets. The company has operations in the U.S., Canada, Europe and Asia.

HOUSTON (SEPT. 4) BUSINESS WIRE - Sanifill Inc. has completed five acquisitions, four which were previously announced in July and August as letters of intent.

One is a special waste site which receives nonhazardous industrial waste and is located in California. One is a special waste site which receives nonhazardous oilfield waste and is located in Louisiana. Three are nonhazardous construction/demolition landfills and are located in Arizona, Georgia and Virginia.

Four of the transactions will be accounted for as poolings-of-interest and the other is a purchase of net assets. The unaudited combined revenues of the four poolings of interest acquisitions were approximately $10 million for their most recent fiscal years-end and revenues for the purchase transaction were approximately $3 million.

Consideration in these transactions consisted of approximately 1,785,000 shares of Sanifill common stock and approximately $1 million in cash.

In addition, Sanifill has entered into an agreement to operate the asbestos monofill closed into excrow in July 1990 pending resolution of the condition precedent to final closing. Further, Sanifill has entered into a joint venture to operate a newly permitted construction/demolition landfill in its Southeast Region.

Sanifill Inc., headquartered in Houston, is an environmental services company specializing in nonhazardous waste disposal.

NEW YORK (SEPT. 4) BUSINESS WIRE - National Patent Development Corp. (AMEX/PSE:NPD) announced Tuesday that its 63% owned subsidiary, Duratek Corp. (NASDAQ/NMS:DRTK) entered into a letter of intent to acquire General Technical Services Inc. (GTS), a subsidiary of General Physics Corp., a 92% owned subsidiary of National Patent, for a purchase price of $7.5

million in cash and approximately 3 million shares of Duratek common stock.

GTS is a supplier of high-tech temporary personnel to utilities, government agencies and commercial businesses. For the year ended Dec. 31, 1989 and the six months ended June 30, 1990 GTS had revenues of $34,576,000 and $15,406,000.

When the transaction is completed, General Physics would own approximately 44% of the outstanding common stock of Duratek and National Patent would own approximately 36% of the outstanding common stock of Duratek.

The acquisition is subject to execution of a definitive agreement and approval of the board of directors of Duratek and General Physics.

On Aug. 20, 1990, Duratek completed the sale to Chem-Nuclear Systems Inc., a subsidiary of Chemical Waste Management Inc. (NYSE:CHW), of substantially all of the assets used in Duratek's domestic commercial low-level radioactive waste processing business at nuclear power plants, for a purchase price of $3,930,000 in cash and an additional $1 million in deferred payments over a five-year period. Duratek is using the proceeds of the sale to enter this growing field of providing high-tech temporary personnel to utilities, government agencies and commercial businesses.

WILMINGTON, N.C. (SEPT. 4) BUSINESS WIRE - The City of Wilmington, N.C. Board of Adjustments denied CG&T's continued use of its fractionating tower at the company's terminal and blending facility in Wilmington.

The company is authorized by the North Carolina Code to immediately apply to the City Council for a Special Use Permit seeking approval to expand the terminal and blending facility to include the use of the refinery fractionating tower.

Alternatively, the company may, and plans to appeal the decision of the Board of Adjustment. Management is confident of eventually acquiring this permit. Although CG&T cannot utilize this tower until the permit is issued, Management plans to aggressively make use of all other facilities at the site.

The company plans to reopen its terminal and blending facility at the Wilmington site before Oct. 1, 1990. This reopening of terminal and blending services is expected to provide the company with a steady and

substantial cash flow during the fractionating tower permitting process.

Moreover, anticipated proceeds from the terminal and blending operations are expected to finance the company's Haben tool manufacturing and sales division. Bids are currently being reviewed from various tool manufacturing companies, with tool production projected to begin within 90 days after a final bid has been accepted.

Haben Industries (NASDAQ:HABN) has recently purchased a 60 percent controlling interest in CG&T. CG&T is a OTC publicly traded company that is engaged in the marketing storage and blending of Petroleum products. The company's terminal and blending facility in Wilmington, has the capacity to accommodate 600,000 barrels of Petroleum products and to blend 20,000 barrels of Petroleum products per day.

#90247b0671 09/04/1990 ~Business Wire

BREINIGSVILLE, PA. (SEPT. 4) Business Wire - AT&T announces the availability of two new data transceivers that comply with the Fiber-Distributed Data Interface standard.

They complete a set of AT&T components that encompass the full range of physical connections that have evolved for FDDI transmitters and receivers.

FDDI is an industry standard for high-capacity (100 megabits-per-second) data transfer through lightwave systems. FDDI is expected to speed the adoption of fiber-optic local area networks (LANs) by bringing speed, capacity and cost advantages over today's copper-based systems.

''We think that AT&T's heritage of lightwave reliability gained during twenty years in the business, coupled with our commitment to low-cost products, will help persuade LAN system customers to choose fiber over copper,'' says Greg Dougherty, manager, product marketing in AT&T Microelectronics lightwave group.

''In addition, AT&T's range of FDDI components eases challenges to the system designer: We address both the compliant and compatible markets.''

The two new AT&T transceivers, the AT&T 1402A and 1403A ODL (R) FDDI Transceivers, are single components that both transmit and receive, reducing the system space required for separate components doing those

functions.

The FDDI standard defines electrical characteristics of fiber optic LANs but not the physical connections or pins by which components are mounted in systems and linked to the information-processing components of an FDDI system. Designers can now get from AT&T the full range of pin arrays currently in use in FDDI components.

Use of the 1402A ODL FDDI Transceiver helps assure the system designer of long-term multiple supply sources for an emerging industry-standarad pin array for FDDI transceivers, adopted by AT&T Siemens, and Hewlett-Packard.

AT&T Microelectronics offers a full line of high-performance components and electronic systems to original equipment manufacturers.

ATLANTA (SEPT. 4) BUSINESS WIRE - Cascade Recreational Systems, a Georgia corporation which designs, manufactures and constructs waterpark amusement rides, has become a victim of the Iraqi occupation of Kuwait.

In January 1990, Cascade received an inquiry from a Fairfax, Va., import-export company on behalf of Colonel Mohammed Abdel Karim, commander of the Kuwait National Guard; the Kuwaiti Army.

''The colonel had recently visited Wet and Wild, a waterpark in Orlando, Fla., and thought that a couple of waterslides would be good entertainment for his troops' new Officers' Club on the shore of the Persian Gulf,'' said Bradley C. Race, president of Cascade Recreational Systems.

Cascade bid against Canadian and Italian firms and was awarded the contract. In early February, Race traveled to Kuwait to visit the construction site, execute the contract and consult with the architect, a Kuwaiti national with a degree from the University of Oklahoma.

Cascade completed its engineering work and shipped all of the specified equipment for the project to Kuwait on July 1, for a scheduled Sept. 15 completion date.

''We shipped them five ocean freight containers, which were scheduled to arrive in Kuwait Aug. 1, at which time I was supposed to go over with a construction supervisor and complete the project,'' said Race.

''But on the night of Aug. 1, the Iraqi army invaded Kuwait,'' said Robert A. Strall, Cascade vice president. ''The balance of our contract payment over $50,000, was to be made upon completion of the project. Right now, our equipment is probably sitting on an abandoned dock somewhere in Kuwait '' said Strall.

''In the meantime, we're wondering when and now even if we'll ever get our money,'' said Race.

NATICK, MASS. (SEPT. 4) BUSINESS WIRE - Prime Computer Inc. Tuesday announced the addition of the 5000 Series systems -- the first two members of the firm's next generation of proprietary 50 Series minicomputer systems.

The announcement is a continuation of the firm's ''dual rail'' strategy to provide customers with a range of proprietary and open systems offerings.

The 5320 system and the 5340 system are based on start-of-the-art complementary metal oxide semiconductor (CMOS) technology which provides up to 65 percent performance improvement over the firm's earlier mid-range systems and requires less power, cooling and space.

In addition, the systems are the first of a new line of computers delivered in new modular packaging which permits more flexibility in system configurations and allows users to upgrade their systems without trading in components.

The company also noted that the 5320 system and the 5340 system offer substantially lower monthly maintenance fees of up to 49 percent compared to the mid-range systems they replace -- the 4050 system and the 4150 system.

The 5320 system and the 5340 system use the same PRIMOS interactive operating system as other members of the 50 Series ensuring software compatibility from one system to another. Applications created on one system are portable and will run on any 50 Series systems -- usually with no need to recompile.

The 5320 system and the 5340 system are available for immediate shipment.

''Users want choices and they want freedom,'' said Richard B. Snyder, president and general manager of Prime's Computer Systems Business Unit.

''This new generation of 50 Series minicomputers, along with the range of new systems based on the UNIX operating system announced two weeks ago, gives customers that choice and freedom.

Prime Computer Inc. with headquarters in Natick, Mass., is a worldwide supplier of integrated system solutions for proprietary based and open systems applications to selected end-user markets. The company's Computer Systems Business Unit is the leading worldwide supplier in the PICK data management marketplace, and a major supplier of commercial servers, networks and minicomputers. Prime has a major international sales presence and a global field service maintenance organization for its customer base.

HOUSTON (SEPT. 4) BUSINESS WIRE - Proler International Corp. (NYSE:PS) Tuesday announced expiration of the letter of intent it signed to purchase from USX a substantial portion of land and the melt shop facilities at Baytown, Texas, for the Buffalo Steel project.

Buffalo Steel was originally formed as a partnership of Birmingham Steel Corp., Proler International Corp. and Danieli & C. Officine Meccaniche to develop a mini-mill facility for the production of flat rolled steel. In March 1990, Birmingham Steel withdrew from participation in the proposed project. As a result, Proler International has been seeking alternatives for pursuing the project with other parties.

Commenting on the announcement Robert L. Mueller, President of Proler said ''Proler reaffirms its interest in the Buffalo Steel project and will continue to seek an operating partner in the project. We believe the Baytown facility is ideally suited to serve the flat rolled market in the Southwest.''

Proler International Corp. is an environmental company primarily involved with recovering, recycling and processing ferrous and non-ferrous metals for shipment to domestic and foreign users. Through 22 processing plants operated either directly or through joint ventures, Proler is a leading provider of high quality raw materials to industrial users.

The company's non-ferrous operations produce reusable premium quality non-ferrous scrap, including copper, brass, aluminum, stainless steel and nickel alloy. Premium grade steel scrap from its state of the art detinning operations is sold to the steel and foundry industries and tin is sold for use in many different industrial applications.

Proler also distributes new prime and used line pipe and off-spec pipe for a wide range of industrial and commercial uses.

CAMBRIDGE, MASS. (SEPT. 4) BUSINESS WIRE - Shiva Corp., a Massachusetts developer of network communications products, has moved to new offices.

Shiva's new address is:

Shiva Corp.
1 Cambridge Center
Cambridge, MA 02142

The phone number has changed to 617/252-6300.
The FAX number has changed to 617/252-6852.
The toll free number remains 800/458-3550.
Technical Support's new number is: 617/252-6400.

Technical Support can still be reached via AppleLink address: SHIVA.TECH.

CompuServe address: 70511,444 and Internet address: Tech at SHIVA.COM.
Shiva has experienced rapid growth in the past year due to the expansion of the networking market, a larger product line and the acquisition of the Novell FastPath. Revenues have quadrupled and staff has tripled, leading Shiva to move its headquarters to a 20,000 square foot space in Cambridge.

''We've increased our executive, managerial and technial staffs to direct and support the growth of the company,'' said Shiva President Dan Schwinn. ''Moving to a space that's two and a half times the size of our current offices will enable us to better serve and support our customers.''

Shiva's new offices are located in Kendall Square, an area popular with Boston high-tech companies because of its proximity to the Massachusetts Institute of Technoloy. The space in the Cambridge Center office building will include a product demonstration and training center, and enhanced development and testing facilities.

Shiva Corp. manufactures network communications products which provide links beyond the local area network. Users of Shiva products can share serial devices over LocalTalk and Ethernet, dial-in to the network from a remote computer and link remote networks together over phone lines.

WILLOUGHBY, OH (SEPT. 4) BUSINESS WIRE - Figgie International Inc. has announced the acquisition of the assets of Southwest Safety & Supply Co. Inc., San Diego, California. Terms of the acquisition were not disclosed.

Southwest Safety will become part of Figgie International's Safety Supply America division headquartered in Carson, California. Safety Supply America is the world's largest independent distributor of health and safety products, including respiratory protection systems, hazardous material handling equipment, firefighting equipment, eye and face protection, protective clothing, safety shoes and gloves.

Allan H. Bennett, president of Safety Supply America, said, ''This acquisition rounds out our distribution network in the important Southern California market as we continue to build our nationwide safety supply distribution system.''

Figgie International's safety products distribution business was begun in 1987. Nine safety products companies were acquired to form a nationwide network of distributors. Safety Supply America is committed to the safety and protection of workers and maintaining the quality of life in the work environment.

Figgie International Inc. is a major diversified Fortune 500 company serving consumer, industrial, technical and service markets worldwide. Sales in 1989 were $1.3 billion.

TOLEDO, OHIO (SEPT. 4) BUSINESS WIRE - Dana Corp. of Toledo, has acquired the machining and assembly assets of The Columbus Auto Parts Company Inc. located in Rives Junction, Mich., and Ann Arbor, Mich.

The agreement, effective Sept. 1, was announced by William Carroll, vice president and general manager of Dana's Aftermarket Production Division, and Kenneth D. Smith, president and chief executive officer of The

Columbus Auto Parts Company, Inc.

The purchase price was not disclosed. The agreement has been approved by Dana's board of directors, by the principals of Columbus Auto Parts and by all required government regulatory agencies.

Columbus Auto Parts manufactures steering linkage assemblies and components for the original equipment and aftermarket segments of the automotive and truck markets.

Sales of Columbus Auto Parts have approximated $50 million a year. Dana Corp. is a global manufacturer of drivetrain, chassis and engine components with 1989 sales of $4.9 billion.

''Chassis products are a very important part of our business,'' said Carroll. ''With the addition of this business from Columbus Auto Parts, we can offer our customers a broader base of aftermarket components and complete systems. Dana is committed to increasing its share of the chassis components business as well as supporting the aftermarket, which is our fastest growing market segment. This acquisition is a solid step in that direction.''

Smith stated, ''In an effort to become more cost effective, Columbus Auto Parts undertook major reorganizational changes and plant consolidations in 1988 and 1989. This sale to Dana and the long-term supply agreement we have entered into with them dramatically reduces our debt load and strongly positions us for the future.''

Under terms of the agreement, Dana will acquire the machining and assembly equipment currently located at the Rives Junction plant and most will be moved to Dana's Oklahoma City chassis products plant, with the remaining going to its Barmatic facility in Oakwood Village, Ohio. Dana also will acquire the technology and equipment of the technical center in Ann Arbor, which will continue to offer services to Dana. Columbus Auto Parts will retain all real estate interests and an undisclosed amount of machining assets, and will continue its forging operations. In addition, the two parties have agreed to a long-term supply agreement for forgings.

ZAANDAM, THE NETHERLANDS (SEPT. 4) BUSINESS WIRE - Koninklijke Ahold nv, one of Europe's largest food retailers and one of the top 10 supermarket operators in the United States, Tuesday announced that net earnings for the 12-week period ended July 15, amounted to Dfl 58.5 million, as

compared to Dfl 42.1 million in 1989, a 39.1 percent rise.

This significant rise in net earnings is attributable to continued growth in operating results, higher income from unconsolidated subsidiaries and affiliates, and lower net interest expense. The lower exchange rate of the dollar (on average Dfl 1.89, compared to Dfl 2.18 in the corresponding period of 1989) reduced reported net earnings by more than Dfl 4 million.

Sales to third parties in The Netherlands in the second quarter of 1990 amounted to Dfl 2,194.7, or a 4.2 percent rise. On a comparable basis, taking into account the sale of the AC Restaurants, sales growth in The Netherlands amounted to 5.6 percent. Sales in the United States totaled $1,030.2 million, representing a 9.1 percent rise.

Consolidated sales in guilders amounted to Dfl 4,144.7 million, only slightly lower than in the corresponding period of 1989 despite the lower exchange rate of the dollar, which reduced reported sales by about 6.6 percent.

Sales growth in The Netherlands largely reflects the Albert Heijn chain's increasingly strong market position. In the United States Ahold's BI-LO, FNS and GFS supermarket chains all achieved considerably higher sales.

Operating results for the second quarter of 1990 amounted to Dfl 86.2 million (1989: Dfl 68.7 million), a rise of 25.5 percent.

As in the first quarter, this rise largely reflects strongly improved operating results in the United States.

Operating results in The Netherlands continued to rise as well, especially at the Albert Heijn chain.

The company's balance sheet ratios continued to improve as compared to 1989 year end.

Net earnings for the period ended July 15, 1990 (28 weeks), amounted to Dfl 126.3 million (1989: Dfl 89.4 million), a 41.3 percent rise.

Consolidated sales in guilders during the same period totaled Dfl 9,467.0 million (1989: Dfl 9,362.8 million), representing a 1.1 percent growth. The lower exchange rate of the dollar reduced reported sales growth by 5.9 percent.

#90247b0688 09/04/1990 ~Business Wire

NEW YORK (SEPT. 4) BUSINESS WIRE - J.P. Morgan & Co. Inc. announced that it has arranged financing for Morgan Place, the office complex it is building at 60 Victoria Embankment in London.

Upon completion next year, it will become the London headquarters for the international banking and securities firm.

J.P. Morgan has entered into an agreement to convey a 52.5 percent interest on a structured basis in Morgan Place to Sumitomo Life Insurance Co. of Japan for 220 million pounds (U.S. $416 million at current exchange rates).

The transaction will be reflected by J.P. Morgan in its financial statements as a financing amortized over its 25-year lease term for Morgan Place.

No immediate gain will be recorded as a result of the transaction, the benefits of which will be realized in the financing cost over time.

The interest cost, for accounting purposes, will be calculated annually on the basis of London rental rates.

J.P. Morgan's 25-year lease contains renewal options for an additional 50 years and standard clauses under which rental payments will be redetermined every five years.

The freehold site, which was formerly occupied by the City of London Schools and is near Blackfriars Bridge, was acquired by J.P. Morgan in 1987.

#90247b0692 09/04/1990 ~Business Wire

NEW YORK (SEPT. 4) BUSINESS WIRE - NBC has entered into an exclusive agreement with Leisure Concepts Inc. (NASDAQ/NMS:LCIC) appointing the New York and Los Angeles firm as the worldwide licensing and merchandising agent for the network's upcoming Saturday morning music and comedy series ''Guys Next Door.''

Announcement of the agreement was made last week by Albert Spevak, vice president, Marketing & Production Business Affairs, NBC Productions, and Stanley A. Weston, chairman of the board, Leisure Concepts Inc. (''LCI'').

''Guys Next Door'' was launched last week (Monday, Aug. 27) with a special prime time preview (8:30 - 9 p.m. NYT, to be repeated Saturday, Sept. 1 at 11:30 a.m. NYT), and will premiere in its regular Saturday morning time period Sept. 8 (11:30 - noon NYT).

Under the agreement, LCI will be responsible for the licensing of manufacturers for a wide range of ''Guys Next Door'' merchandise. License agreements have already been completed for numerous product categories including posters, t-shirts, sweatshirts, coordinated clothing sets, sleepwear, towels, watches, jewelry, backpacks, banners and various novelty items.

The merchandise will be available through mass market, record, gift and department stores. Additionally, special marketing programs will be conducted with retailers, licensees and SBK Records, which has already released the ''Guys Next Door'' single, ''I Was Made for You,'' and is releasing the album ''Guys Next Door'' today.

''Guys Next Door'' is a high-energy half-hour of comedy and music performed by five exciting teen stars: Eddie Garcia, Bobby Leslie, Patrick J. Dancy, Damon Sharpe and Chris Wolf. The program represents an innovative leap into the future of broadcast and music with its fresh mix of youth-directed comedy, contemporary sounds and original music videos.

''Guys Next Door'' is produced by NBC Productions. Vince Manze is executive producer. Deborah Liebling is co-executive producer.

#90247b0695 09/04/1990 ~Business Wire

RESEARCH TRIANGLE PARK, NC (SEPT. 4) BUSINESS WIRE - BroadBand Technologies Inc. (BBT) Tuesday announced the Fiber Loop Access (FLX) System, the first fiber optic transport system that allows telephone companies to deliver cost-effective voice services today, and through a seamless upgrade, enhanced digital services tomorrow.

The FLX System delivers the benefits of fiber optics, including access to advanced video and data services, from the central office to the subscriber. The system, which is currently being tested by three of the seven Regional Bell Operating Companies (RBOCs) -- Bell Atlantic, NYNEX and Ameritech -- complies with fiber-in-the-loop architecture

recommendations recently released by Bell Communications Research (BellCore).

The FLX System enables telephone companies to deliver voice communications at a cost competitive with today's copper-based service -- a requirement of regulators. At the same time, it provides the telephone companies with the platform from which they can offer advanced narrowband services, such as ISDN, and broadband services such as video. All this is available in a system that is compatible with today's telephone network topology.

The FLX Systems, through an intelligent, software-defined selection capability, will allow service providers (CATV companies, broadcasters) to offer consumers a broad range of video channels or data services from which to choose. This selection capability reduces the bandwidth required for video transport to individual subscribers, reducing the cost.

Upgrading the FLX System to video capability is easy for the telephone companies. It requires only changing optoelectronic line cards at the telephone company's remote terminal and at the subscriber's home or curbside pedestal, without affecting other homes on the system.

The FLX System matches the switched star topology of today's telephone network, and is designed to be compatible with current and emerging public network standards. It also incorporates the telephone network's next generation Operation, Administration and Maintenance techniques by conforming to forward looking standards such as TR303. This will simplify the telephone companies' efforts to integrate the FLX System into the network.

The FLX System employs Passive Optical Networking technology which splits a single lightwave signal containing multiple channels into multiple lightwaves which can be allocated as needed among subscribers. The system shares the distribution fiber and transmission electronics over a number of subscribers, which results in costs that in some cases are lower than those for the installation of copper systems, which today averages around $1,100.

The FLX System's standard telephone service capability will be commercially available in the first quarter of 1991. The switched digital video capability will be commercially available in the fourth quarter of 1991.

The FLX System is well-positioned in a market that is expected to soar. A recent industry study, conducted by Goldman, Sachs & Co., estimates that the annual fiber-to-the-home market will grow to $4-$5 billion in the next few years. That study also indicates that deployment by the RBOCs will begin in 1991.

BroadBand Technologies Inc., based in Research Triangle Park, N.C., is the developer of fiber-to-the-home transport and has received more than $18 million in financial backing from corporate and private sources.

NEWBURY PARK, CALIF. (SEPT. 4) BUSINESS WIRE - This month, Computer Peripherals Inc (CPI will ship its latest lineup of ViVa 2400 baud internal modems for IBM personal computers.

The Hayes compatible ViVa 24i, 24i/fx and 24im modems come with manuals, Quick Link II or ProComm communications software and introductory CompuServe offer. The ViVa24i is a standard 2400 baud modem with non-volatile memory for storing two modem setup configurations and four phone numbers. The 24i supports custom interrupt settings and COM ports 1,2,3, and 4. Currently it is one of CPIUs biggest sellers at a retail price of $179.

The ViVa 24i/fx is a 2400 baud modem with send only FAX capability. Its sports the same standard features found in the ViVa 24i, but allows the user to FAX a document created from any application. Its unique FAX utility captures the screen image and converts the document to a FAX file at the time of transmission. This new software enhancement permits FAX conversion of files created from PageMaker, Windows, WordPerfect and other popular graphics programs.

The ViVa 24i/fx retails for $199.

Sophisticated userUs will appreciate the ViVa 24im with MNP5 data compression and MNP 1-4 error correction. It increases data transmission by 100% when connected to another MNP modem. For added convenience this modem includes a bracket-mounted

COM port selection switch accessible from the back of the computer. The COM switch makes system configuration easy if a mouse or other peripheral device is added to the computer. The ViVa 24im retails for $299.

''We hope to make communications easier and more economical for the masses '' said Darius Antia, Marketing/Sales Director for CPI, ''With our latest additions to the ViVa line, we have a modem for the seasoned professional or the budget conscience consumer.''

The ViVa internal modems support CCITT V.22, V.22bis, V.21, Bell 103 and 212A communication standards for operation at 2400, 1200, and 300 baud.

The new ViVa internal modems are available through CPI's nationwide network of computer retailers and distributors. CPI is located at 667 Rancho Conejo Blvd., Newbury Park, CA 91320. Phone (800) 854-7600.

ATLANTA (SEPT. 4) BUSINESS WIRE - AT&T (NYSE:T) Tuesday announced a grant of $184,000 to the Atlanta School System to support its Efficacy Seminars for Educators program.

The program's goal is to provide educators with insights and techniques to improve student academic performance.

''AT&T is proud to be associated with this critical project,'' said Esther Silver-Parker, public relations district manager for AT&T. ''We are partnering with the Atlanta School System to bring to our community the sense of urgency and ownership we all must share if we are to develop our young people to become the future leaders of Atlanta and this country.''

The Efficacy Seminar for Educators is a five-day training session in which participants explore the nature of the development process, effective responses to obstacles which impede students' development, and techniques to motivate students to achieve at their highest potential.

Dr. Lester W. Butts, superintendent of Atlanta Public Schools, said, ''We are very pleased to have AT&T as a partner with us in our efforts to be responsive to the needs of our students. The company's generous grant to

our school system is indicative of the type of commitment that the business community in Atlanta is extending to the Atlanta Public Schools.''

In recognition of the current needs in public education, AT&T will also be a major sponsor of the CBS News presentation, America's Toughest Assignment: Solving the Education Crisis. The two-hour special, hosted by Charles Kuralt, will be broadcast Thursday, Sept. 6, (9 p.m. EST) on the CBS television network.

NEW YORK (SEPT. 4) BUSINESS WIRE - Polly Peck International plc Tuesday reported financial results:

- Sales up 72 percent to 881 million pounds
- Operating profits up 116 percent to 129 million pounds
- Pre-tax profits up 72 percent to 110 million pounds
- Earnings per share (fully diluted) up 29 percent to 21.5 pence
- Interim dividend up 21 percent to 5.5 pence

Commenting on these results, Asil Nadir, chairman & chief executive of PPI said, ''We have once again achieved record results in terms of sales, profits, earnings per share and dividends. This is due to outstanding performances from our existing businesses, as well as to first-time contributions from acquisitions.

''The results are a comprehensive endorsement of the group's strategy and a tribute to the skills and efforts of its management and staff in implementing that strategy.

''All divisions have performed excellently as a result of strong demand, improved productivity and the introduction of new products.

''In particular, the results are clear evidence of the board's commitment to increasing the rate of growth in earnings per share.

''Based on current trading, the board expects that the remainder of the current financial year will be highly successful. The company is well-placed for the 1990s.''

ATLANTA (SEPT. 4) BUSINESS WIRE - AT&T (NYSE: T) will be the major sponsor of the CBS News presentation, America's Toughest Assignment: Solving the Education Crisis, to be broadcast Thursday, Sept. 6 (9 p.m. EST), on the CBS television network.

The two-hour special, hosted by Charles Kuralt, will examine one of the most critical issues facing America today: the performance of our nation's schools. The program is one element in a weeklong CBS campaign titled "Project Education," which will run Sept. 2-7.

Other "Project Education" elements include a national education conference in Washington on Sept. 5. AT&T Chairman Robert E. Allen will deliver the keynote address at that conference. In addition, education reports on CBS News broadcasts and a nationwide open forum, to be broadcast following America's Toughest Assignment, will round out "Project Education."

America's Toughest Assignment offers a composite look at the problems with American education. But of even greater importance, it highlights solutions that are already at work around the country. Segments of the program were filmed in Columbus, Ga.

In Atlanta, AT&T has been active with school leaders, teachers and students in a number of initiatives aimed at improving public school programs. The company's efforts have included adoption of several local

schools, and grants totaling over $680,000 to benefit Atlanta students through AT&T's Carver Community Family Initiative and Atlanta Public Schools' Efficacy Seminars for Educators programs.

HOUSTON (SEPT. 4) BUSINESS WIRE - Exxon announced Tuesday award of more than $560,000 in special unrestricted grants to departments of 18 universities in the Southwestern United States. The grants are part of a

nationwide program providing $1.8 million in such grants this year at more than 100 schools where Exxon recruits employees.

Exxon College Relations Coordinator Truman T. Bell said support of education has traditionally been a top priority for his organization. He said Exxon, its affiliate companies and the Exxon Education Foundation made educational grants totaling more than $20 million last year "to universities, other nonprofit institutions, and activities that can help make a meaningful difference in the quality of American education.

"The grants announced today are but one part of that total," he said, "but we believe they are especially significant. They reflect Exxon's desire to give something back specifically to the university departments producing graduates with the qualities Exxon and its affiliates need."

Exxon's departmental grants program officer, Terry L. Walker, said grants going to individual departments "are related to Exxon's past and anticipated future hiring of their graduates, with special emphasis on diciplines critical to our business.

"The universities receiving grants under this program are a diverse group. Some are among the country's largest schools; others are relatively small. They are located in many different parts of the country. All have one thing in common: they provide the people to fill highly demanding roles in America's energy industry."

Presentation of the awards began Tuesday at Texas A&M University, with similar announcements scheduled over the next three months at other campuses.

Other Southwestern universities at which departments will receive grants include Arizona, Baylor, Houston, Kansas, Kansas State, New Mexico State, Oklahoma, Oklahoma State, Prairie View A&M, Rice, Southern Methodist, Texas-Austin, Texas-El Paso, Texas A&I, Texas Southern, Texas Tech, and Tulsa.

#90247b0736 09/04/1990 ~Business Wire

CAMBRIDGE, MA (SEPT. 4) BUSINESS WIRE - More than 35,000 attendees and exhibitors expected at next month's Networld '90 Dallas will gain first-hand experience with the largest groupware application ever built.

Lotus Notes, Lotus Development Corp.'s group communications software product, will run on more than 100 Shownet kiosks, using a real-time network designed by Lante Corp. to offer key information and services to

attendees and exhibitors. The Lotus Notes 1.1 application, which is compatible with Windows 3.0, will also be shown in the IBM, Compaq, Lotus, Microsoft, 3Com and Tricord booths.

The Lotus Notes Networld application will include six databases allowing show attendees and exhibitors to share opinions on controversial industry issues, find out about the products and some vendors represented at the show, get information on events and nightlife at the show, tap into a Reuters news feed for the latest worldwide developments, review and enter job offerings, and receive help on any of the Lotus Notes applications.

''This Lotus Notes application is a perfect example of the power group communications software gives people today,'' said Mark Tebbe, president of Lante Corp. ''It provides a common and easily accessible method for providing important and encouraging discussion among several groups of people -- in this case, attendees, exhibitors and press at a major networking trade show.''

Networld attendees will be able to use their show badges to access the following Lotus Notes databases:

Discussion: To encourage discussion among Networld attendees about controversial technical and industry issues, members of the press will submit topics before and during the show. Users will be able to search key words for discussions on various topics such as operating systems, network operating systems or LAN topologies, and read the comments of other attendees, or enter their own opinions.

Reuters: Users will be able to access the latest news, organized by categories similar to a newspaper such as country, sports, money market and commodities, through the Lotus Notes Reuters interface. Through this live news feed, stories running Reuters' news wire are automatically searched by key words and placed in an appropriate folder. Users will be able to quickly scan the database for the topic they want to explore.

Product: Users will have immediate access to information about the products exhibited by IBM, Compaq, Lotus, Microsoft, 3Com, and Tricord. Users will be able to enter questions about products and receive answers from company representatives, who will be connected from their exhibit booth to the Notes application.

Jobs: Attendees looking for employment opportunities can search this database by keying on company name, regional location or business description. Attendees can also enter information about job openings at their companies.

Entertainment: To provide attendees with the latest status on leisure activities at Networld and around Dallas, Lotus Notes will provide

reference information on restaurants, sightseeing and Networld receptions.

Lotus Notes executives, including Larry Moore, vice president, and Bromnell Chalstrom, director of marketing, will participate in panels on groupware and wide area networks. In addition, Lotus will host a reception to introduce its new Alliance Partners, a group of systems integrators and product developers that will provide service and support to Lotus Notes customers.

Voted this year's ''Best New Business Software Product'' by the Software Publisher's Association, Lotus Notes is a group communications software product that allows people to create and access shared information using personal computers and local- and wide-area networks. Some of the most popular types of Notes applications fall into these categories: electronic mail, information distribution, sales management, customer service and product development. Currently being sold via a direct sales force throughout North America, Notes is available at a minimum of 200 licenses for $62,500, including five days of support services.

Lotus Development Corp. is the leading provider of applications software for personal computers and information services delivered on CD-ROM, and is a worldwide supplier of applications software for workstations, minicomputers and mainframes.

NOTE: All prices and terms are for the U.S.A. only.

#90247b0742 09/04/1990 ~Business Wire

HUNTSVILLE, AL (SEPT. 4) BUSINESS WIRE - The Nirvana Project has led to a multi-year, multi-million dollar agreement for Intergraph Corp.

(NASDAQ:INGR) of Huntsville.

Nirvana is the code name for the Sandia National Laboratories/Department of Energy prime contractors' program to implement an Electronic Design Automation (EDA) system with true concurrent-engineering capabilities.

In the first year of the agreement, Intergraph will ship EDA software tools and approximately 140 RISC-based Unix workstations. First-year value of the award is expected to be $8 million; over the lifetime of the agreement, Intergraph is expected to provide approximately 500 seats.

Intergraph's hardware and software products will be used to integrate and improve the design, manufacture, and assembly of complex printed circuit boards, bybrid microcircuits, and integrated circuits.

The Nirvana Project is a program to help Sandia and other Department of Energy (DOE) contractors migrate away from isolated multi-vendor EDA ''point solutions'' and move to an integrated and more efficient environment.

The two principle goals of the Nirvana Project were: 1) to increase the productivity of each design and manufacturing group member by providing individual users with newer and better automation tools; 2) to increase the productivity of the entire organization -- by making it easy for each separate group to exchange and share data with other groups and departments.

The Nirvana team used Intergraph's integrated tool sets (electronics, database, mechanical, document management, and manufacturing) to help meet the Nirvana Project goals.

DOE contractors will use Intergraph hardware and software tools for tasks such as: hierarchial design capture (schematic capture); digital simulation and analysis; analog simulation and analysis; physical layout and design; packaging design; manufacturing design; thermal analysis; three-dimensional interference fit; and documentation and design management.

To maximize system capabilities, third-party design tools were integrated into the Intergraph design framework. For example, tools from Cadence, CLSI, GenRad, Layout Concepts, MINC, and Pacific Numerix were all integrated tightly together in an Intergraph framework to form a single EDA system.

The new EDA system will improve the design and manufacturing processes for technologies such as: printed wiring boards and flex circuits; hybrid microcircuits -- including thick film, thin film, co-fired ceramic, chip and wire; radio frequency and microwave circuits; and ASICs.

Prior to the Nirvana Project, the participating DOE contractors maintained their own separate and different design and component databases. For that reason, as a design progressed from one group to the next, it was necesary for each group to translate or re-enter all data. That process not only increased design time, it also often created data transfer/entry errors.

With the implemantation of the Nirvana Project, the involved contractors will begin replacing their existing EDA systems with tool sets from Intergraph. The implementation will occur in a phased manner as the older systems are scheduled for upgrade or replacement.

All groups participating in Nirvana will use Intergraph hardware and software solutions. These solutions will be integrated with existing networking and plotting resources as well as with the PCs being used in engineering departments. The hardware and software tools will operate under a common user framework.

Product design information will flow from initial system design, through sub-system design, PCB or Hybrid design, through physical IC, and on to manufacturing. Additional data will be added to the design definition at each step -- and there will be no need to re-enter the design data from preceding steps. The result will be higher quality products -- designed and manufactured in a shorter period of time. Integraph Background Information:

Intergraph Corp.'s products include a broad range of complementary workstations and network servers, as well as complete application-specific systems for computer-aided engineering, design, manufacturing, and publishing, plus numerous earth science applications.

A ''Fortune 500'' company, Intergraph is the world's largest company dedicated to developing and manufacturing interactive computer graphics systems.

Intergraph's Electronics Division has a broad suite of electronic design automation (EDA) software which complements the product design process, providing solutions from conception through manufacture, and is integrated within a common framework.

Intergraph is a registered trademark of Intergraph Corp. Other brands and product names are trademarks of their respective owners.

MADISON, NJ (SEPT. 4) BUSINESS WIRE - Schering-Plough Corporation Tuesday announced the appointment of Rodolfo C. Bryce as president of Schering Laboratories, the company's U.S. prescription products arm.

In his new position, he is reporting to Donald R. Conklin, president - Schering-Plough Pharmaceuticals.

Bryce most recently was senior vice president - Rx marketing and sales, Schering Laboratories. He replaces Jean-Pierre Garnier, who announced his resignation today to take an executive position with SmithKline Beecham.

Bryce joined Schering-Plough in 1980 as finance director (Latin America) for Schering-Plough International. In 1983, he became general manager of Essex Farmaceutica Portuguesa Limitada, the company's subsidiary in Portugal. A year later, he was appointed a vice president and regional director in Schering-Plough's Latin American operations, headquartered in Miami, Fla. He became president of Schering-Plough Animal Health in 1988, and was named to his most recent position in January 1990.

Before joining Schering-Plough, he held various executive positions in finance and operations with ITT Corporation in Peru, Belgium and the United States.

In his new position, Bryce will be responsible for Schering Laboratories' prescription products business, which includes allergy and asthma medications, dermatologicals and anti-infectives, as well as anticancer and antiviral therapies. His responsibilities will encompass marketing and sales, technical operations, planning and administration, and human resources.

Continuing to report to Bryce will be David M. Stout, who has been promoted to vice president - Rx marketing from his previous position as senior director - marketing, respiratory products. Stout will assume the marketing responsibilities of Bryce's previous position. Also reporting to Bryce are Robert E. Baldini, senior vice president - Key marketing and sales; Eugene P. Desimone, senior vice president - planning and administration; Richard Happel, vice president - human resources; John Nine, president - Schering technical operations; Izabela J. Roman, M.D., Ph.D., vice president - medical marketing; and Harvey J. Weintraub, vice president - Rx sales.

Bryce holds a B.B.A. degree in financial management from Saint Mary's University in San Antonio, Texas.

Schering-Plough is a research-based company engaged primarily in the discovery, development, manufacture and marketing of pharmaceutical and health care products worldwide.

CLEVELAND (SEPT. 4) BUSINESS WIRE - Eaton Corp.'s Board of Directors has elected Stanley V. Jaskolski Vice President Technical Management, to succeed Warren B. Offutt, who has chosen to retire effective October 1, 1990.

Jaskolski will report to Eaton President and Chief Operating Officer William E. Butler.

Jaskolski, 51, joined Eaton in 1982 as Executive ManagerTechnology Development for Eaton's Corporate Research and Development Center in Milwaukee. Prior to that, he was chairman of the Department of Electrical Engineering and Computer Science at Marquette University in Milwaukee.

As Eaton's chief technical officer, Jaskolski will be responsible for directing corporate research and development activities, as well as its quality and engineering development functions at the company's facilities in Southfield, Michigan, and Milwaukee.

The Southfield center, which employs 250 people, is primarily responsible for vehicle-oriented product research and development. The Milwaukee Center, which employs 160, is primarily responsible for research and development of electrical and electronic controls products. Jaskolski and his family will relocate to Cleveland, Eaton's corporate headquarters.

Jaskolski received his Doctorate degree in Electrical Engineering from Marquette University in 1967. He subsequently became a faculty member in the College of Engineering at Marquette, where he conducted research and taught courses in solid-state electronics. In 1976 he was named chairman of the Department of Electrical Engineering and Computer Science, the position he held prior to joining Eaton.

The Milwaukee native had served as a consultant to Eaton while at Marquette, and is the co-holder of 27 patents and the author of more than 30 technical articles. He is a member of several professional organizations and is Eaton's representative to the Industrial Research Institute and the Industrial Automation Advisory Board of the National Electrical Manufacturers Association.

He serves as a Director of the board for the Semiconductor Research Corp. and the Wisconsin Foundation of Independent Colleges. Offutt, 62, became Eaton's Vice President Technical Management in 1979, after serving

Cutler-Hammer, Inc. for more than 23 years in a variety of engineering and management posts. Eaton acquired Cutler-Hammer in 1979. He had also been general manager of DuKane Corp.'s Communications Systems Division and board chairman of a subsidiary company, Northern Communications Inc., and vice president and general manager of the Electronics Systems Division at the Adams-Russell Co.

Offutt is actively involved in a number of civic organizations in Milwaukee and Cleveland. Additionally, he holds memberships in several professional groups and societies, and serves on committees at seven academic institutions in Wisconsin and Ohio. He has authored technical papers on a variety of electronics topics, and is a contributing author to ''Antenna Engineering Handbook'', first published in 1964 and revised in 1984. He holds patents in the fields of electro-optics, geometric-optics, and high-speed electrical controls mechanisms, and has consulted in the field of high-frequency direction finding technology.

With 42,000 employees in 20 countries, Eaton Corp. is a manufacturer of highly engineered products serving automotive, industrial, commercial and defense markets. Principal products include truck transmissions and axles engine components, electrical equipment, and controls.

The company's sales in 1989 were $3.7 billion, with net income of $225 million, or $6.00 per share of common stock. For the six months ending June 30, 1990, Eaton's net income was $107.3 million, or $2.97 per share, on sales of $1.9 billion.

BOSTON (SEPT. 4) BUSINESS WIRE - PC Week, the national newspaper of corporate computing, Tuesday announced a Virtual Lab partnership with Fox Valley Technical College in Appleton, Wis.

The partnership is a unique blending of large-scale, multi-platform computing resources focused solely on the real-world interests of corporate computing.

FVTC's relationship with local business and industry as computing consultant, trainer and product-evaluator, and as one of IBM's CIM (Computer Integrated Manufacturing) training sites, has resulted in a diverse facility that offers corporate computer buyers testing conditions close to their own business environments.

PC Week will participate in this business and industry partnership by

providing FVTC with access to cutting-edge product information and technology to ensure testing is always geared toward the latest industry has to offer. In addition, PC Week technical analysts will oversee all testing and the results will be published in the newspaper.

The unique partnership between PC Week and FVTC benefits many facets of the industry. By virtue of its involvement with PC Week, FVTC will enjoy easy access to products and vendor information that will benefit not only their educational training efforts, but also help meet local corporate partners' needs in an extremely timely manner. Some of the college's current corporate partners include Appleton Papers Inc., James River Corp. Menasha Corp., Miller Electric Manufacturing, Pierce Manufacturing Inc. and Valmet-Appleton Inc.

FVTC's first product evaluation will involve hosting a PC Week Labs Shoot-Out: 3270 Emulation Under Windows 3.0 to be held on September 17th. The PC Week Labs Shoot-Out is a new genre of comparative product review where vendors of similar products are invited to meet a specific challenge of organizational computing. Competing vendors' development teams are challenged to create a solution to a typical business computing task under real-world conditions.

Representatives of Appleton-area companies will judge the Shoot-Out competition and will witness the results first-hand as they decide which product best serves the Shoot-Out's stringent requirements.

PC Week is a weekly newspaper serving the needs of more than 195,000 volume computer buyers. PC Week is published by Ziff-Davis Publishing, a division of Ziff Communications Co.

WASHINGTON (SEPT. 4) BUSINESS WIRE - COMSAT Systems Division has been selected a consortium partner to provide the ground segment for the new Locstar European Radio Determination Satellite Service (RDSS), Locstar officials announced in Evry, France.

Locstar is the first Radio Determination Satellite Service scheduled to be deployed in Europe.

Under terms of a $12 million contract announced Tuesday, COMSAT will provide mission baseband satellite equipment and the Locstar Processing Center to be located at the Chateau-Gombert Technology Center at Marseille France.

The consortium also includes THOMSON-CSF DAS, responsible for the Telemetry, Tracking and Command chain and overall ground segment project management, and SYSECA, which will provide the satellite control center and support software. THOMSON-CSF is located in Le Plessis-Robinson and SYSECA in Saint Cloud, both in France.

The Locstar system provides positioning and messaging information and consists of dedicated space, ground and user segments. Users can ''stay in touch'' with any mobile assets by sending and receiving messages on land, in the air, and at sea, in real time, 24 hours a day.

''Locstar is patterned after Geostar, the world's first radio determination satellite service now operational in the United States,'' Joel R. Alper, CSD president said. ''COMSAT provided engineering support to that effort and helped forge a part for land-mobile satellite communications. We are a natural for Locstar.''

The Locstar ground segment includes the Locstar earth station, processing center, satellite control center and a network of terminals.

COMSAT will provide and install computer processing equipment and develop the software required to locate the mobile users and transfer messages between the mobile tranceivers and the subscribers' home bases.

COMSAT Systems Division, a part of the COMSAT Corp., is a systems integrator assisting government, international and commercial customers in the design, implementation and operation of information and telecommunications systems and networks worldwide.

CINCINNATI (SEPT. 4) BUSINESS WIRE - McCaw Cellular Communications Inc., has signed a two-and-one-half year renewal contract with CBIS, Cincinnati Bell Information Systems Inc., for the use of CBIS's Macro/Cell cellular information management system and other products that CBIS may have available.

McCaw is the leading cellular service provider in the United States. CBIS is the largest information management software provider to the mobile communications industry in North America, providing the software which produces 2.5 million mobile subscriber bills every month. McCaw will use Macro/Cell for many of its Cellular One operations across the U.S.

Macro/Cell is a comprehensive on-line cellular usage and accounts processing system that provides message processing, subscriber billing, customer service and marketing functions.

In March 1990, CBIS announced that American Cellular Communications Inc./LIN Broadcasting Inc. had signed a four-year agreement worth up to $40 million for the use of Macro/Cell. McCaw has recently completed its acquisition of approximately 52 percent of LIN Broadcasting. With the two separate contracts, CBIS's Macro/Cell system will perform information management for most of the markets served by McCaw and LIN. Those markets account for 47 percent of the non-wireline industry in the United States.

Ingvar Petursson, vice president and chief information officer for McCaw, said, ''CBIS's size and experience in mobile communications are important to McCaw. CBIS's systems offer us the information management and marketing functions we need to continue our growth.''

Miles Huskey, vice president of the Macro/Cell group for CBIS Mobile Communications, said, ''This contract with McCaw, the leading cellular service provider in North America, reinforces CBIS's position as the supplier of choice for companies that are serious about growth in the mobile marketplace. McCaw's continuing confidence in CBIS is gratifying, and also signals that we must continue our efforts to provide superior products and services to the entire industry.''

CBIS, a subsidiary of Cincinnati Bell Inc., provides information management solutions to telecommunications, financial and government entities.

PISCATAWAY, N.J. (SEPT. 4) BUSINESS WIRE - Unitronix Corp. (NASDAQ:UTRX) and Avnet Computer, Culver City, Calif., a major marketer of computer hardware, operating systems and automation to the manufacturing community, have entered into a non-exclusive cooperative marketing agreement.

Under the terms of the agreement Unitronix will sell PRAXA, its proprietary manufacturing and distribution software, in conjunction with Avnet Computer's sales and leasing activities in a number of western states.

In a second development, Unitronix said that it has received a letter of intent from Carlisle Systems Group Inc. to purchase its NCR inventory at a slight discount to book value, and subsequently, assume the distribution

activities relating to Unitronix' distribution agreement with NCR Corp.

Zimmer, president and chairman, said, ''Present negotiations are progressing and we hope to have a final purchase agreement before the end of this month. We are quite encouraged by the two positive developments following our announcement in August regarding the divestiture of the computer distribution and service business.''

''The planned exit from this business,'' continued Zimmer, ''will greatly strengthen the company by sharply reducing overhead and by positioning PRAXA as our exclusive growth product.''

Zimmer noted, ''Our stock price has decreased over the past few weeks, dropping by approximately 50 percent of its June levels. The company is not aware of any reason to account for the sudden decrease in value.''

Unitronix markets PRAXA throughout the United States from its New Jersey headquarters and from seven regional offices in major metropolitan areas.

NEW YORK (SEPT. 4) BUSINESS WIRE - Millicom Inc. (NASDAQ:MILL) announced Tuesday that its subsidiary, Millicom Technologies Corp., and SCS Mobilecom Inc. have formed a joint venture to develop and hold intellectual property rights for Personal Communications Networks (PCNs) specifically in the area of spread spectrum technology.

Millicom's and SCS' objective is to establish the intellectual base for a commercially viable, competitive radio based communication system and to make the technology available to American industry.

Dr. Donald Schilling, president of SCS Mobilcom, has worked with spread spectrum in military and space applications since the 1950's and is recognized as one of the leading experts in the field. The Millicom and SCS joint venture will take advantage of his knowledge and years of research and development of spread spectrum systems for PCN and cellular applications.

Shelby Bryan, Millicom's chairman and chief executive officer comments: ''PCN will be shown to be a dynamic addition to the mix of telephone services available to consumers, and existing microwave licensees will be able to continue operations without fear of being displaced to make way for a new technology.

''Millicom and SCS' development of this sophisticated technology should enable the American telecommunications industry to position itself as the world leader and trendsetter in the next generation of wireless telephony.''

The Millicom-SCS joint venture will utilize a combination of state-of-the-art technologies including broad band, Direct Sequence Spread Spectrum (DSSS); Code Division Multiple Access (CDMA); Adaptive Power Control (APC); and low-power handsets to create what the joint venture believes to be the perfect radio based communications system for the United States.

An innovative approach to the introduction of new radio based communications services is necessary in the U.S. because radio frequencies are not generally available for new services. This unique combination of advanced technologies is designed to ''overlay'' or share radio spectrum with existing commercial users.

Millicom Inc. is a diversified international telecommunications company with primary interests in cellular telephones, alphanumeric paging systems and satellite television.

WOOSTER, OHIO (SEPT. 4) BUSINESS WIRE - FirstFederal Financial Services Corp. (NASDAQ:FFSW), the holding company of First Federal Savings and Loan Association of Wooster, today announced the termination by it of the definitive agreement to acquire First Federal Savings and Loan Association of Mount Vernon, Ohio.

The signing of the definitive agreement had been previously announced and was subject to various contingencies. In announcing the termination of the agreement to acquire First Federal via a voluntary supervisory merger, Richard E. Herald, chairman and chief executive officer, stated, ''We regret that at this time it is not feasible for this transaction to occur. However, we continue to believe that First Federal is an attractive franchise with a strong core deposit base.''

FirstFederal Financial Services Corp.'s assets totaled $321 million at June 30, 1990. The company's only subsidiary, First Federal Savings and Loan Association of Wooster, operates eight offices in the north central Ohio counties of Wayne, Ashland, Medina and Richland.

(SEPT. 4) BUSINESS WIRE - Two of the world's leading telecommunications systems manufacturers are working together to ensure availability of Integrated Services Digital Network (ISDN) business applications to customers whose networks include equipment and services from both companies.

AT&T and Northern Telecom Tuesday announced the completion of the first phase of ISDN Primary Rate Interface (PRI) compatibility testing between Northern Telecom's public network switching systems and AT&T's private branch exchange (PBX) systems.

Testing involved Northern Telecom's DMS-100 central office and DMS-250 interexchange carrier switching systems, and AT&T's DEFINITY Communications System and System 85.

''This is a major step forward in ensuring that our customers derive maximum benefits from their investment in our ISDN-capable communications systems,'' said Ernie DeNigris, product management vice president - Communications Systems, for AT&T's Business Communications Systems group.

''Switching system compatibility is the first requirement for extending the benefits of ISDN to our customers,'' said Ken Heffner, director, product management, Networks, for Northern Telecom Inc.

''Successful phase one testing with AT&T is a significant milestone in our plan to interwork with all major switching system vendors.''

ISDN PRI compatibility will extend the benefits of ISDN to AT&T PBX customers who are served by Northern Telecom's central office and long distance switching systems.

First phase testing covered basic call services, including voice traffic and circuit switched data, calling line identification, and call-by-call service selection.

Call-by-call service selection offers customers more efficient use of their trunking facilities. Rather than designate a specific trunk to route outgoing calls -- over a private line, WATS, or over the public switched network -- this features attaches routing information to the call.

WHITE PLAINS, N.Y. (SEPT. 4) BUSINESS WIRE - Entrepreneurs, small businesses or anyone in the market for a personal computer can now take advantage of a ''Grand Scale Sale,'' a special promotion from IBM.

Through January 15, 1991, IBM will offer six software programs at no charge and rebates to those customers buying selected IBM Personal System/2(a) models. In addition, purchasers of qualified PS/2(a) systems can receive rebates on selected IBM desktop printers. Quick credit and deferred payments also are available to qualifying customers.

''Finding the right solution for home and business users is what IBM and our business partners do best,'' said Winnie Briney, director of personal systems for IBM's US Marketing & Services. ''With this special offer of rebates and easy financing, as well as software at no additional charge, customers can take advantage of a great deal and reach new levels of productivity and efficiency.''

When purchasing IBM's Personal System/2 Models 25 through 65 and an IBM operating system, customers will receive six selected software packages at no charge with a total suggested retail value of more than $600.

Grand Scale Sale customers also receive a customised Magellan installation program to easily install all six promotional software products.

NASHVILLE, TENN. (SEPT. 4) BUSINESS WIRE - Northern Telecom (NYSE:NT), Digital Equipment Corp. (NYSE:DEC), StrataCom and cisco Systems, four key players in the new frame relay data networking technology, are taking the lead in ensuring compatibility among public and private networks.

The four companies Tuesday announced agreement on a common specification for frame relay connections to link customer premise equipment such as bridges and routers to networking equipment such as central office switches, fast packet networking systems, and packet switches.

This represents the first agreement between private and public network suppliers on a common implementation of the frame relay interface standard. The participating companies see this as a significant step toward meeting the needs of corporate network managers for flexibility in building voice and data networks.

StrataCom Inc. is the leading fast packet and frame relay supplier. The company manufactures, markets and services the IPX fast packet networking system and has already announced frame relay agreements with Digital Equipment Corp., US Sprint, cisco Systems, Vitalink Communications Corp. and Cross Comm Corp. StrataCom is based in Campbell, Calif.

Digital Equipment Corp., headquartered in Maynard, Mass., is the leading worldwide supplier of networked computer systems and services. Digital offers a full range of computing solutions and systems integration for the entire enterprise -- from the desktop to the data center.

Cisco Systems Inc., is the leading supplier of high-performance, multimedia, and multiprotocol internetworking products, including routers, bridges, and terminal servers. Cisco technology can be used to build wide-area networks linking an unlimited number of geographically dispersed LANs.

Northern Telecom is the leading global supplier of fully digital telecommunications switching systems, providing products and services to telephone operating companies, corporations, governments, universities and other institutions worldwide. Northern Telecom, with 1989 revenues of $6.1 billion, employs more than 49,000 people around the world.

DAYTON, OHIO (SEPT. 4) BUSINESS WIRE - Audio/Video Affiliates Inc. (NYSE:AVA) today reported revenues and net income for the second quarter and six months ended July 31, 1990.

For the second quarter the company reported net income of $247,000 or 4 cents per share, compared with a loss of $1,198,000, or 19 cents per share for the quarter ended July 31, 1989. Revenues for the quarter totaled $35.4 million, compared with $34 million in 1989. The average number of shares outstanding during the second quarter was 6,671,251, compared to 6,231,000 for the same period in the prior year.

For the six months ended July 31, 1990, the company reported net income of $369,000, or 6 cents per share, compared with a loss of $1,627,000, or 20 cents per share for the prior year's first six months. The average number of shares outstanding during the first six months of fiscal 1991 was 6,671,256, compared to 8,056,000 shares for the first six months of the prior year. Revenues for the first half of fiscal 1991 were $63.7 million compared to $65.7 million for the prior year.

Same store sales for the second quarter increased 37.2 percent, as compared to the same period in the prior year, and for August, 1990, same store sales increased 34.8 percent, as compared to August, 1989. As of the end of the second quarter of fiscal 1991 the company had 78 stores, compared to 112 stores in the prior year.

Commenting on the results, Stuart A. Rose, chairman and CEO of Audio/Video Affiliates Inc., said, ''The transition experienced during Fiscal 1990 is favorably continuing into Fiscal 1991.'' Rose attributed the company's performance in the second quarter to the store closings in fiscal 1990, the continued strong controls and monitoring of overhead-related costs and the increase in same store sales experienced during the quarter.

Audio/Video Affiliates Inc., is a leading specialty retailer of consumer electronic products and appliances. The company, headquartered in Dayton operates stores in 17 midwestern and sunbelt states under the trade names

''Rex'' and ''TV and Stereo Town.''

KENNEDY SPACE CENTER, FLA. (SEPT. 4) BUSINESS WIRE - McDonnell Douglas Space Systems Co. has selected The Network Connection to supply advanced file servers and workstations for a large network that will support NASA's Freedom Space Station project.

The network will handle all data processing required for management, administration and engineering of the project. Atlanta Technologies Inc. was awarded a contract for design and implementation of the network, including end user applications support. The dollar value of the contracts was not disclosed.

Baseband Ethernet Local Area Networks (LANs) in seven buildings at the Kennedy Space Center will be linked together on a broadband backbone. The applications that will run on The Network Connection hardware include spreadsheet, database, word processing, desktop publishing, project management, presentation graphics and engineering graphics.

The initial release of the contract calls for 22 Triumph network file servers and more than 200 Triumph workstations. Each of the 20 megahertz 80386-based Triumph file servers, will be equipped with a proprietary disk controller, and configured with 330 megabyte disk drives.

The 386/20 Triumph workstations will be shipped in four different configurations depending upon the application to be supported.

McDonnell Douglas late last year sent Requests For Proposals to approximately 200 firms in the communications networking industry. The Network Connection and Atlanta Technologies were selected from a field of 10 finalists.

Harold P. Gray, president of Atlanta Technologies, said McDonnell Douglas visited each finalist to evaluate the firms' competence, review hardware and software, and conduct on-site benchmark performance tests. The primary selection criteria were: demonstrated technical ability, hardware performance and competitive price.

Founded in 1986, The Network Connection is a fast-growing supplier of networking equipment, systems and services including the Triumph family of network file servers and workstations. The Network Connection is headquartered at 1324 Union Hill Rd., Alpharetta, GA 30201. Telephone:

404/751-0889; Fax: 404/751-1884.

NEW YORK (SEPT. 4) BUSINESS WIRE - American Express Company Tuesday announced that Harvey Golub has been elected Vice Chairman of the Company and that Michael P. Monaco has been elected Executive Vice President and Chief Financial Officer.

In addition, Mr. Golub will be nominated as a Director of the Company and a member of the Board's Finance Committee at the Board meeting on September 24, 1990.

Golub will also become Chairman of IDS Financial Services, a title that has been vacant, and continue as its Chief Executive Officer. He has been President and Chief Executive Officer of IDS since 1984. Jeffrey E. Stiefler, currently IDS Executive Vice President for Sales and Marketing, will be elected President of IDS, with enlarged responsibilities.

James D. Robinson III, Chairman and Chief Executive Officer of American Express, said, ''The appointments of Harvey and Mike at American Express and of Jeff at IDS continue our program to broaden and develop senior management. American Express has great depth of talent and an increasing

number of seasoned executives who are playing important leadership roles.''

Robinson said that the Chief Executive Officers of American Express Travel Related Services Company, IDS Financial Services, Shearson Lehman Brothers and American Express Information Services Corporation will continue to report to him as Chairman and Chief Executive Officer of American Express.

The Executive Vice Presidents for Corporate Legal and Administration and for Corporate Affairs and Communications will also continue to report directly to him.

Golub as Vice Chairman will supervise the Offices of Corporate Finance and of Strategic Planning. His responsibilities will include coordinating and directing the strategic planning and operating planning and review processes, and supporting close coordination among the American Express business units.

He will also coordinate American Express's senior management Planning and Policy Committee, which works with the Chairman on a broad range of issues. Mr. Golub will divide his time between IDS and his new responsibilities as Vice Chairman of American Express.

Monaco as EVP and Chief Financial Officer will be responsible for the Office of Corporate Finance, which includes the Comptroller's Office, Treasurer's Office, Investment Division, Tax Department and Audit Department, and for Investor Relations.

As a member of American Express senior management, Mr. Monaco is also a member of the Planning and Policy Committee. He assumed the position of Acting Chief Financial Officer early this year after former Chief Financial Officer Howard L. Clark, Jr., became Chairman and Chief Executive Officer of Shearson Lehman Brothers. Mr. Monaco has served as Senior Vice President and Corporate Comptroller since 1985.

American Express Company, a diversified travel, financial and information services company founded in 1850, is a world leader in charge cards, Travellers Cheques and travel related services.

#90247b0816 09/04/1990 ~Business Wire

STAMFORD, CT (SEPT. 4) BUSINESS WIRE - Frank J. Kugler Jr., chairman of

the board and chief executive officer of Northeast Bancorp Inc. and Union Trust Company, announced Tuesday that Northeast Bancorp has filed a motion for permission to amend and supplement its complaint against The Bank of New York Company Inc. for breach of contract arising out of Bank of New York's failure to maintain an adequate capital position to support approval by the Federal Reserve Board of Bank of New York's application to acquire Northeast.

The motion was filed in Connecticut District Court in New Haven.

On August 15, 1990, the Federal Reserve denied Bank of New York's application to acquire Northeast concluding that Bank of New York's proposal was inconsistent with the Federal Reserve's policy concerning an applicant's maintenance of a strong capital position. The Federal Reserve specifically pointed out that after the proposed acquisition, the combined organization's tangible capital ratio would not be substantially above the Federal Reserve's minimum capital levels and would be less than the current average levels of Bank of New York's peer group of the nation's largest regional banking organizations. In addition, the Federal Reserve found that Bank of New York's application was deficient because it failed to present any proposals to strengthen the combined organization's capital levels shortly after the consummation of a proposed acquisition.

The proposed amended complaint alleges that Bank of New York's acquisition of Irving Bank Corp. in 1988 reduced Bank of New York's capital levels below the requirements of the Federal Reserve Board. It also points out that in approving the acquisition of Irving Bank Corp. by Bank of New York the Federal Reserve made the approval subject to the fulfillment of certain commitments made by Bank of New York and the satisfaction of specific conditions established by the Federal Reserve and that such commitments and requirements were not fulfilled by Bank of New York. The complaint contends that Bank of New York knew or should have known that its acquisition of Irving Bank Corp. would severely impair its capital levels so that Bank of New York could not perform its obligations under the agreement it had entered into with Northeast Bancorp in 1983.

Northeast Chairman Kugler has written to J. Carter Bacot, the chairman of the board of The Bank of New York, and has demanded that Bank of New York immediately request reconsideration of the order of the Federal Reserve Board and present proposals to the Federal Reserve Board to strengthen the capital levels of the combined organization to achieve a tangible common equity to assets ratio of 4.1 percent as required by its earlier agreement with the Federal Reserve Board.

FORT MITCHELL, KY (SEPT. 4) BUSINESS WIRE - Sunrise Bancorp Inc. (NASDAQ: SRSL) announced Tuesday that its board of directors has declared a cash dividend of $.125 per share payable to stockholders of record as of Oct. 3 1990. The cash dividend, which is the first paid by the company, will be paid on Oct. 17, 1990.

James C. Davis, president of the company, noted that the board of directors has determined that it is in the best interest of the company to establish a policy of paying quarterly cash dividends subject to favorable operating results, tax considerations and other factors.

The board of directors of Sunrise Bancorp Inc. have also declared a 1-for-20 stock split in the form of a five percent stock dividend. The stock dividend will be payable to stockholders of record on Oct. 3, 1990, and will be paid to such stockholders on Oct. 17, 1990. Cash will be paid in lieu of any fractional shares.

Sunrise Bancorp Inc. is the holding company of Sunrise Bank for Savings, F.S.B., which conducts business through seven offices in Kenton, Campbell and Boone counties. As of June 30, 1990, Sunrise Bancorp Inc. had total assets of approximately $272 million. Total savings were approximately $240 million.

CAMBRIDGE, MA (SEPT. 4) BUSINESS WIRE - Lotus Development Corp. Tuesday announced that its LotusWorks and Magellan(r) products have been selected as the leading software solutions for IBM's PS/2(r) personal computer users.

From Sept. 4 through Jan. 15, 1991, these Lotus(r) products will be bundled with selected PS/2s (Models 25 through 65) purchased through IBM's authorized dealer network as part of IBM's ''Grand Scale Sale'' promotion announced today.

''LotusWorks and Magellan are ideal software packages for meeting the PS/2 user's business challenges,'' said Woody Bensen, director of OEM sales and marketing at Lotus. ''With the leadership and quality that stands behind the names Lotus and IBM, PS/2 purchasers can feel confident they're getting a superior small business hardware and software solution.''

''IBM's ''Grand Scale Sale'' includes some of the finest software

available for the Personal System/2 to help home and business professionals manage their businesses,'' said Winnie Brine, director of Personal Systems for IBM's US Marketing & Services. ''With this special offer of free software and easy financing, customers can take advantage of a great deal and reach new levels of productivity and efficiency.''

Lotus has also developed an exclusive installation program for the PS/2 promotion. LotusInstall guides users through the installation of all six software products included in the package: Magellan and LotusWorks; Quicken(r) by Intuit; PFS:(r) First Publisher by Software Publishing; Calendar Creator Plus by Power Up! Software Corp; and PGA TOUR Golf(r) by PGA Tour, Inc. LotusInstall also includes a menu program that lists all six bundled software programs on the PS/2 user's screen for easy selection.

LotusWorks offers small and home businesses an all-in-one program that includes a word processor with spell checker and thesaurus, database manager, spreadsheet, graphics, and communication capabilities. The package is easy enough for first-time computer users to learn and use, and offers full-featured help and starter applications. LotusWorks is the only entry-level integrated software package that offers full compatibility with Lotus 1-2-3(r) and Ashton-Tate's dBase(r).

Lotus Magellan 2.0 is an award-winning utility program that lets users find, view and use information on the hard disk of their computers. Magellan lets users search for files containing specific words or phrases and launch directly into an application with a single keystroke. It also contains a full set of DOS utilities for easy file maintenance.

Purchasers of the PS/2-Lotus bundle will receive 30 days of toll-free telephone support from Lotus. After that, users can purchase Lotus PROMPT support service for a special $49 price. PS/2 customers will also receive a free, six-month subscription to LOTUS Magazine.

Lotus Development Corp. is the leading provider of applications software for personal computers and information services delivered on CD-ROM, and is a worldwide supplier of applications software for workstations, minicomputers and mainframes.

Lotus, Magellan, 1-2-3 and Lotus PROMPT are registered trademarks of Lotus Development Corporation. PS/2 is a registered trademark of International Business Machines Corporation. Quicken is a registered trademark of Intuit. PFS: is a registered trademark of Software Publishing Corporation. PGA TOUR Golf is a registered trademark of PGA Tour, Inc. dBase is a registered trademark of Ashton-Tate Corporation.

#90247c0029 09/04/1990 ~Comtex
STAMFORD, CT (SEPT. 4) COMTEX - Sutton Holding Corp., a New York investment company that fought for more than eight months to acquire Desoto Inc.(TICKER: DSO), said certain Sutton shareholders are interested in buying Desoto's detergent business and any other assets that remain after its recent liquidation sale.

Sutton had offered $50 a share to buy Des Plaines, Ill.-based Desoto, which had been a paint manufacturer.

In fending off Sutton's overtures, Desoto sold off most of its assets, leaving only the detergent business and certain marketable securities.

Sutton was formed by William Spier and Michael Zurawin, former investment bankers with Goldman, Sachs & Co.

This 8-k Filing was submitted to the Securities and Exchange Commission on AUG. 30, 1990.

GROUP LED BY L. CHAVIN OWNS 150,000 SHARES (9.40%) OF GENERAL EMPLOYMENT ENTERPRISES INC (TICKER: JOB) OF OAKBROOK TERRACE, IL.

ANNOUNCEMENT:

On June 15, 1990, L. Chavin entered a complaint for declaratory judgement and injunctive relief against General Employment Enterprises Inc. and each of the board members stating that the poison pill rights plan is ultra vires and invalid because it violates continuing constitutional guarantees of cumulative voting secured by the Illinois constitution, and that the adoption and implementation of the plan constitutes a breach of fiduciary duties. On Aug. 27, 1990, the court ruled that the claims should be brought in a derivative suit and granted Chavin leave to amend his complaint to include such derivative allegations, which he filed on Aug. 29, 1990. Chavin presently intends to seek representation on General Employment Enterprises Inc.'s board of directors and is considering whether to solicit proxies for such purpose at the next annual meeting.

R.W. ERIKSON OWNS 131,750 SHARES (41.84%) OF CERBCO (TICKER: CERB) OF BAILEYS CROSSROADS, VA.

ANNOUNCEMENT:

On Mar. 12, 1990, R.W. Erikson and his brother, George Erikson (the "sellers") entered into a letter of intent with Insituform of North

America Inc., pursuant to which the sellers and INA expressed their mutual intention to effect a private sale of the 247,564 class B shares held by them to INA for $6 million in cash. The letter of intent, as amended by amendment four dated Aug. 24, 1990, would make INA a parent corporation of Cerbco Inc, with the sellers retaining 111,002 shares, representing 10 percent of the outstanding common shares. On Aug. 24, 1990, a complaint was filed alleging that the sellers have breached their fiduciary duties as directors and executives of Cerbco Inc. by allowing INA to obtain control of Cerbco Inc. without benefiting other shareholders. The plaintiffs also filed a motion for leave to conduct expedited discovery on Aug. 27, 1990, which was denied on Aug. 30, 1990.

#90247c0212 09/04/1990 ~Comtex
WASHINGTON (SEPT. 4) COMTEX - The 10-Q report filed at the NASD shows The Aril Group Inc.(TICKER: ARIL) lost $179,636, or $0.02 per share, on no revenues for the quarter ended May 31, 1990.

This compares with earnings of $241,458 ($241,458 gain from discontinued operations), or $0.03 per share, on no revenues for the same period in 1989.

During the fiscal year ended Feb. 28, 1990, Aril Group underwent a transition from a company which designed, sold and installed private telecommunications systems and equipment to commercial clients in Florida to an industrial holding company which intends to diversify its operations into other areas other than telecommunications, through the acquisition of other companies.

In connection with this newly adopted business plan, Aril Group acquired Medallian Kitchens Inc., a manufacturer of kitchen and bathroom cabinets, on Aug. 30, 1990.
